BROADCASTER BRIEFS

(Continued from page 2)

at WOR, Newark. History of the drama, talks on scene designing, lighting and costumes, and stage makeup will make these afternoons valuable to directors of little theater groups.

* *

The new Alemite orchestra, directed by Jack Crawford, will appear shortly at WBBM, Chicago. This famous orchestra has been appearing in the East.

* *

"Sam 'n' Henry," laughable characters in WGN's Radio "comic strip," who are heard each evening at 10 o'clock Central time, have been the recipients of many gifts since they started their hilarious series of adventures, but none more appropriate than one which reached them recently. At the conclusion of one of their episodes, Sam announced to Henry that he was hungry, and the next day a fine packet of ham sandwiches reached him, the gift of some unknown listener.

* *

The famous "Sir Hobgoblin" stories for children are being brought from WEAF, New York city, to WOC, Davenport, by long distance telephone lines every Friday evening. The regular WOC Sandman story teller, L. Emery Wass, will continue with his children's stories on other evenings during the week.

* *

The demand for the Crosley Burnt Corkers has been so great that it has been decided to make this unique minstrel act a regular feature of the Tuesday evening programs. These minstrels will be held for half-an-hour beginning at 8 p. m. central time.

* *

The talks entitled "Current Topics," given from WOR Monday evenings, are broadcast by a man well qualified to condense the world's news, H. V. Kaltenborn, associate editor of the Brooklyn Daily Eagle. Mr. Kaltenborn is a linguist of unusual skill and is equally at home speaking French, German or Spanish. When he served his paper as special observer in Europe before and after the

* *

The Coal Miners trio, recently added as a feature of the Monday evening programs of WEAF, will be heard again in a typical program of diversity and novelty emphasizing the vocalization of popular songs. Two of the members of this trio, Frank Bessenger and Frank Wright, are popularly known as "The Radio Franks" and have been heard often at WEAF

A "Step" On the Air

THE PRESENTATION of the especially written story, "A Step On the Stairs," as a weekly serial Radio play, concurrent with its appearance as a serial mystery story exclusively in Radio Digest, marks a new step in the development of broadcast entertainment. Fifteen of the country's leading broadcasting stations from coast to coast are giving their listeners the broadcast dramatization.

This project enables Radio receiver owners not only to listen to a play prepared by a recognized Radio playwright from a story written especially for Radio dramatization by a famous author who understands the problems of the broadcast play, but to read that author's story simultaneous with or just previous to its performance over the air.

By this ingenious device listeners are able to visualize to perfection the action taking place in the various episodes of the serial Radio play. And, unlike many motion picture scenarios, written from magazine stories or novels, which are often difficult for the motion picture audience to even remotely associate with the original stories or novels, the Radario of "A step On the Stairs" will follow very closely the installments as they appear in Radio Digest.

We are quite sure our readers will appreciate this excellent effort of Robert J. Casey, the author, and will also thank Fred Smith, in whose hands the Radio dramatization is placed, for his good work. Radio Digest hopes, by this initial project, to make popular a new form of broadcast entertainment, and begs that this publication receive comments from listeners and readers who read and tune in "A Step On the Stairs."

Better DX Is Assured

DURING the last part of January and the first few weeks of February, Radio reception has suffered from a "magnetic blanket," as it has been termed by the bureau of standards. We all know that distance, or DX, reception has been very poor for about a month. We are glad to know, however, that the "blanket" has lifted.

As mysteriously as when the "blanket" first made its appearance, nature has removed this atmospheric phenomenon. No one knows whence it came. No one knows whither it has gone.

The bureau of standards' experts report that similar magnetic blankets have occurred before. The government scientists are attempting to learn exactly of what the phenomenon consists, and to prescribe a remedy if such is possible. Little progress was made during the last occasion, but it is hoped that before another "blanket" makes itself felt, more will be known about the cause.

With the cause of such extraordinarily poor reception removed, listeners may count on excellent Radio weather during March and April.

Telephone Is Fifty Years Old

JUST fifty years ago, on March 10, 1876, Alexander Graham Bell had his first successful telephone conversation. He was speaking to his laboratory assistant. The technical aide reported that he understood perfectly what had been said.

Just fifty years ago!

In that brief span of years the telephone has become an essential part of modern business and society. Imagine doing without it.

Remember—this remarkable fifty-year transition has turned a slow-moving, letter-writing, message-sending world, into one in which snap judgments, instant cross-continent conversations and hurry are the order of the day.

What is more wonderful, the Radio telephone has been perfected to its present state in practically the last eleven years. With Radio telegraphy and the wire telephone invented and developed almost together, it was the work of Lee De Forest which made possible the combination of the two—and gave Radio telephony.

Let all loyal Radio listeners pause for a moment on March 10 in honor of the invention of Alexander Graham Bell.

RADIO INDI-GEST

The Spirit of the Radio

Four walls encompass me about
My door is locked within;
I vainly try to shut without
The world's dischordant din.

But silence presses.
One can't long endure
The murmur of insistent longings
That surge within, thronging
With human stresses.

The dial—Eagerly I reach it;
Turn it. A lilting song
Comes to my ears. A bird-like flute.
Gone are my fears of that silence
That has made men mad.

Music fills my room making it an enchanted place
Of Sun-lit gardens, fragrant with June roses
And vibrant with the soft murmur of the honey-bee
As it flits busily through sweet-scented space.

Again, a haunting melody fashions anew
My vagrant fancy and I wander 'neath dripping trees,
While rain-washed fronds of tender ferns
Make lush my heart with ecstasies.

Walls may encompass me about,
And one may lock one's soul;
But walls, nor locks, can't keep without
The Spirit of the Radio.

Speak Up, Chile

I'se got a kick a-comin, udders say I'se right;
I gits so awful mad, I jus a-wants to fight.
I tunes in a stashun, I hears a good ol' song;
De name uv de stashun, I hopes to hear fo' long.
De song am dun over, de banjo, it now play;
De name of de stashun I ain't a-heard him say.
But gee, dey starts a-playin annuder tune I hear
De man wot call de stashun dun a-sleep in his chair.
Guess he think it funny ter hold us in suspense,
Or maybe he is thinkin his voice will give offense.
I hopes de guy will listen to dis plea from all,
An when the musick stops, give us de stashun call.

ZED

Without a Leak

THIS WEEK'S NOMINATION FOR MEMBERSHIP IN THE "FAMOUS FANS" CLUB IS NOAH, BECAUSE HIS "ARK" COULD HANDLE ANY WAVE LENGTH.

Hurrah! Hurrah! Gonna Have a Band

Fairice, Alaska.

Editor Indi-Gest: I would have written this letter with a fountain pen but as the ink is froze I will half to use a pencil. I want to let you know that the Third Trombone Plair has not got a thing on me when it comes to using a musikal instrewment. I sling a wicked Kittle Drum myself. The last time I played was before the king of Siam and he said that he never wanted to here any other Kittle Drum as long as he lived. Last night while nine Eskimos were listening to WJAX the annownser got so het up telling abowt the wether down there that the Eskimos got all up a swet and took cold with newmonya. Always as ever,

KITTLE DRUMMER

Some Say He Is Ambitious

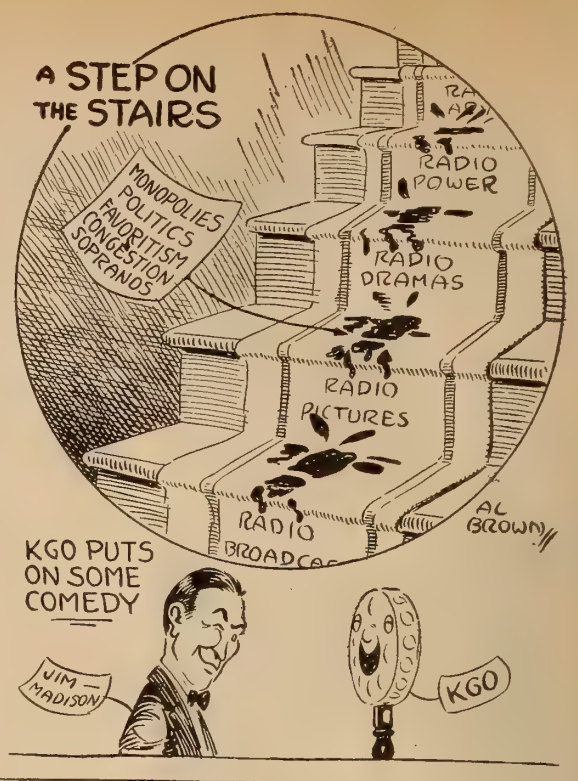
Dear Indi: Fame will come to the great. I just couldn't help it. Now I can no longer be a quiet, unobtrusive soul; nor can the things that please the common people be publicly accepted as entertaining to me. Did you see where the winner of the prize Radio drama contest sponsored by WLS called his play. "The Night Herd?" It isn't about me, but a lot of my ardent admirers will go on thinking it is just the same.

THE NIGHT HERD

Looking Ahead

In a Near Issue We Will Explain Our Call Router. A microphone placed in the Union depot picks up the spiel of the train caller and the Call Router broadcasts it so that the names of the different cities will go out and tag on the end of programs from those cities. In this way it will be impossible for announcers to keep their identity a secret.

The Mystery Is Solved



Condensed

BY DIELECTRIC

Sopranos are redeemed for Radio—at least if they can charm as did Miss Marion Talley, whose debut as a 19-year-old grand opera star at the Metropolitan, New York, was followed two days later by a Radio debut on the Victor hour of music over WJZ. Miss Talley is an American product and the proud daughter of Kansas City. Her success on the air was even more marvelous than her success before the critical Knickerbocker audience. She sang first "Caro Nome" from "Rigoletto," the aria which brought her twenty curtain calls in the old Metropolitan. There were three other numbers. Her whole range of tone to the highest trills was pure, sweet and practically faultless. Radio fans on all sides have concurred with the critics in praising the achievement of this slip of a girl. Much credit, however, is due to the engineers at WJZ for the excellent control and modulation. It may be the operators, after all, will find the real ultimate redemption of the sopranos for Radio.

One attribute every musical entertainer should develop is variation. Variation in phrasing, tempo (tempo rubato), tone coloring and character of song, each of these is essential to maintaining interest. While listening to a male quartet singing before the mike in the studio of WWJ, Detroit, one or more of these "essentials" were absent. The voices were good individually and the quartet harmonized, yet they became rather tiresome for the sole reason that this variation was not in evidence.

To us provincials who have never been outside our native hamlet, a travelogue bears much of interest. It helps us to know what folks do and what their buildings and streets look like without spending cold cash to see first hand these distant lands. I'm all in favor of the travel talks as given from a number of our broadcasters, though some tour leaders are more entertaining and informing than others—naturally. Where the music accompanying these travelogues is taken from native compositions, it no doubt creates something of an atmosphere. WOC, Davenport, presented a very interesting travelogue a short time ago.

If you suffer an overdose of heavy features from any of the broadcasters just turn to WSBC, the World Battery station, Chicago, and let them give you an evening of lively fun. Andy sang the other night. I don't know the gentleman's last name, unless its Caruso. He had a wonderful time of it, so much so that it became infectious among his auditors.

Did you ever notice how the balmy air of southern climes tends to incite to slow, dreamy dance melodies? The other night I moved about from station to station while dance music was flourishing to see how they differed, if at all. While remaining among the northern stations most of the numbers were moving along at a fair rate of speed, but as the southern stations came in, particularly WMBF, Miami Beach, the effect noted above was apparent.

Probably the only way in which we Americans can listen to the broadcasting of foreign stations, at least for some time to come, is by the aid of our own powerful broadcasting stations picking up the signals and rebroadcasting them. The main drawback to those attempts made in the past has been lack of advance notice. We never knew when to expect such a feature. The other night, while tuned to Station WJZ, New York, the announcement suddenly came through the air that we would be permitted to listen to a rebroadcast from England.

ABC Radio Fundamentals for Everybody

Chapter IX—Radio Receiving Circuits

By Milo Gurney

RADIO receivers, if one is to believe the tons of type describing them, consist of some hundreds of circuits—yet, if you prefer to believe me, I can assure you that the entire number which I have seen described, are possible of duplication through using the fundamentals of some six circuits.

Putting a wire here which was there, does not constitute a new circuit nor does it employ a new principle. I only desire to caution the purchaser of a Radio receiver to lend an attentive ear to him who

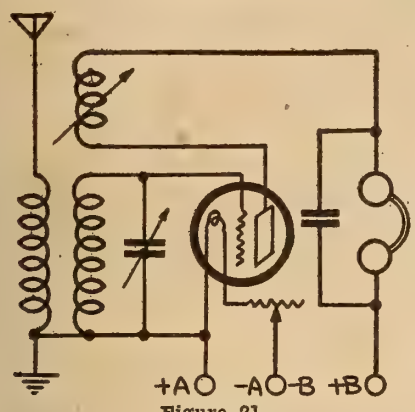


Figure 21

points out new refinements, rather than to him who insists that the receiver employs a new circuit.

Possibly the most efficient Radio circuit, tube for tube, is that known as the regenerative. It also easily steps into first place as the most persistent squealing offender, to make the night air homelike for the screech owl. In fairness, it should be stated that, when handled or tuned by one who understands its viciousness, it will not bother anyone. The great fault lies in the public's determination not to be taught how to tune and lack of consideration for neighbors. One perfectly good oscillating regenerative receiver can

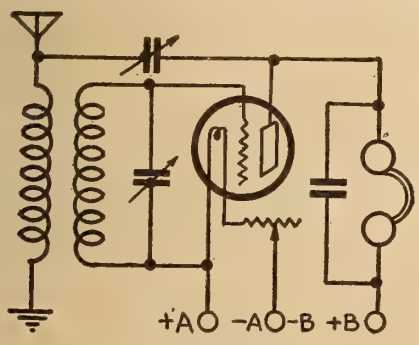

Figure 22

spoil reception for more neighbors per square mile, when improperly handled, than a flock of others which I might mention, yet to omit the description of one or two types of powerful distance getting regenerative receivers from this series would be unfair to its completeness.

Value Not Increased

In order to better understand what is meant by regeneration, as intentionally applied to a receiving circuit, please recall, if you will, my earlier explanation

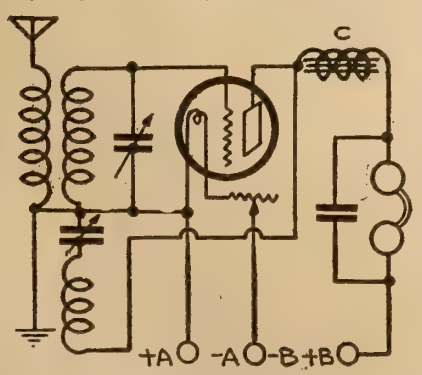

Figure 23

as to how a vacuum tube functioned. In a simple vacuum tube detector circuit, only the audio frequency pulsations of the space charge were made to actuate the head telephones or loud speaker, entirely eliminating the use of the radio frequency pulsations. In a regenerative receiver, advantage is taken of the radio frequency current, through feeding it back from the plate circuit onto the grid or input circuit. This, in effect, reinforces or strengthens the incoming signal which is applied upon the grid, and in a most practical though perhaps little understood manner. In reality, it cannot increase the received signal which reaches the tube, as such signal is of a definite value and unchangeable after reaching the detector. You who are of Radio experience read very carefully from here on. Whatever the original value of the signal impressed upon the secondary of the detector, it cannot be increased except in one manner or method, and that is through lowering the resistance of such secondary. Ohms law steps in and says "No," and the Noes have it. Therefore, the effect of regeneration does not in any manner increase the value placed upon the secondary, as many writers have contended, but does tend to lower the resistance of the secondary in order that the full value of the impressed voltage may reach the grid.

This point is well worth remembering, because it is maddening to hear and read so often that regeneration is but additive; and the answer is, or rather the question is, "additive to what?"

Three Ways of Feeding Back

This feeding back may be accomplished in several ways, all using but two principles, which are capacitive or inductive feed back, or their combination.

Figure 21 indicates a standard regenerative receiving circuit using the tickler or inductive method of regeneration. Figure 22 shows a like circuit using capacitive feed back, while figure 23 pictures a combination of the two. Of the three methods shown, the writer is of the opinion that figure 23 represents not only the most efficient method to employ, but also the one which permits of the greatest flexibility and fineness of control.

To those of you who have built either the tickler feed back circuit, or the combination capacity and tickler circuit, a word of advice may be of material help. This covers the construction of the tickler coil, which in no case should exceed one-half the diameter of the secondary. By this I mean that if your secondary is wound upon a three-inch form, then the tickler should be wound upon a one and one-half inch form. Put this hunch in your mental note book. It's well worth remembering.

The circuit shown in figure 23 and which I favor above all is the result of the work of one of Radio's most prolific inventors, Mr. Roy Weagant, and was introduced some years ago under the name of the Weagant X circuit. Properly constructed, it has the advantage of not changing the tuning of the secondary as the tickler is rotated, while the variation of its capacity element offers absolute control of regeneration over the total wave length range. The coil shown at "C" in the drawing, in no way affects the operation of the circuit but is a most desirable method to employ for the keeping out of the radio frequency currents from the telephone circuit.

It is of unusual interest to those who are becoming enthusiastic over the possibilities of reception at extremely short waves, of the order from 40 to 130 meters, that the Weagant circuit is favored by most constructors in this field. In fact, Radio Digest in its present series of "How to build" articles, covering short

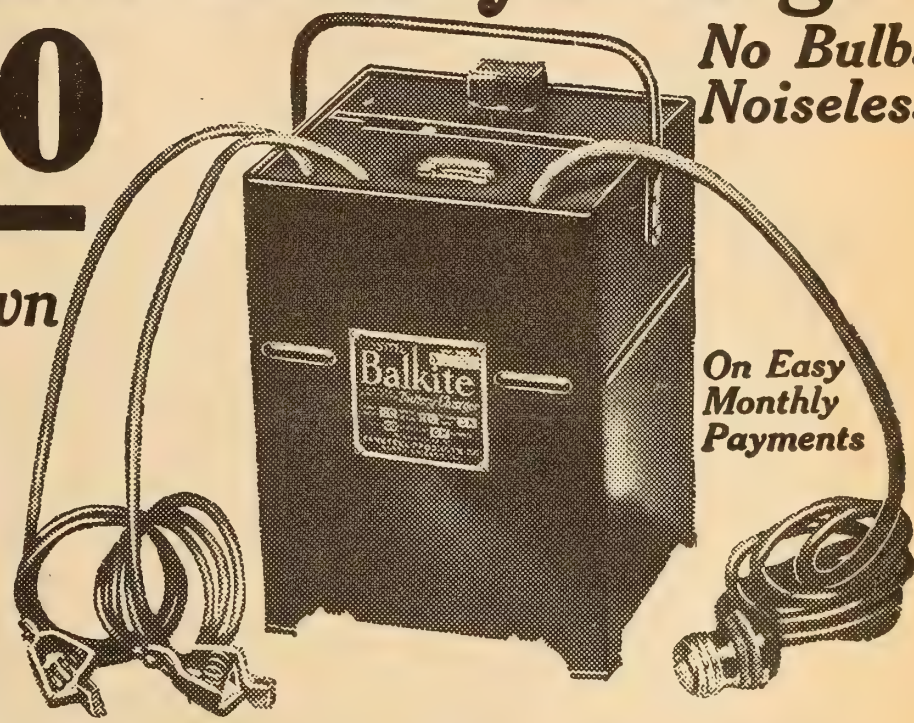
Genuine Fansteel Balkite Battery Charger

Only $1.00 Down

No Bulbs Noiseless



On Easy Monthly Payments

Radio Fans! Auto Owners, too! You may now own a Genuine Fansteel Balkite Battery Charger on a most amazing, easy payment offer. The famous Balkite is acknowledged the most efficient, the most fool-proof and trouble proof storage battery charger on the market. No tubes, no bulbs and no noise. Will charge your battery while using your radio. To get the most efficiency and greatest enjoyment out of your radio, you need the Balkite Battery Charger in your home. And, on this offer, we'll send it to you for only $1.00 with the coupon on

30 Days Trial

The Balkite comes to you completely wired, ready to attach to your light socket and battery. No extras to buy. Use it whenever necessary for 30 days. See how much it adds to the convenience and enjoyment of your radio. See how much it *saves* in battery charging cost. See how simple and easy to use. After 30 days trial, if you're not convinced that you *need* the Balkite Battery Charger, send it back at our expense and we'll refund your $1 plus transportation charges.

$2.50 a Month

If you decide to keep the charger, start making the small payments of only $2.50 a month until you've paid the total price of only $19.50. That's the price others ask for spot cash. We give you the lowest cash price on easy monthly payments you'll never feel. The money you save in charging your battery at home will almost take care of the payments on this offer.

For Radio and Automobile Batteries

The Balkite Battery Charger is based on a new principle, the use of "Balkite" a rare metal developed for this purpose. It will charge the ordinary 6 volt radio "A" battery or automobile battery from 110-120 AC, 60-cycle current. It will also charge radio "B" batteries of the lead type without added attachments in multiples of 6 cells.

No Bulbs—Noiseless The "Balkite" metal changes the AC current, commonly used for lighting, to the DC current necessary for charging batteries, without the use of fragile bulbs or vibrators. This makes operation practically devoid of any disturbing hum or noise of any sort.

Easy to Operate The Balkite delivers a taper charge and cannot damage the battery by overcharging. Cannot discharge or short circuit the battery. It will charge even a completely discharged battery. It cannot fail to operate when properly connected to the battery and line current. Is unaffected by temperature or fluctuations in the line current. It is simple, efficient and indestructible. Has no contact points, bulbs, vibrators or moving parts. Cannot deteriorate through use or disuse. Requires no attention other than filling with distilled water. Has nothing to adjust, break or get out of order.

Operates While Using Radio The Balkite can be used while the radio set is in use without affecting the set or its operation and without disturbing noises. Its operation does not create disturbances either in your set or your neighbor's.

Charger comes completely wired, ready to attach to your electric light socket and battery. No extras to buy—no fuss, no delay. Measures 8 inches high, 6 inches wide, 6½ inches deep. Shipping weight about 22 lbs.

Order by No. Y8306NA, $1.00 with coupon; $2.50 a month; total price, $19.50

Send Coupon NOW

Don't miss this opportunity to get the famous Balkite Battery Charger at the rock bottom cash price on small monthly payments. Send only $1.00 with the coupon now, while this offer lasts. No risk. No obligation; 30 days' trial, then decide. And you are always protected with Straus and Schram's money-back guarantee of satisfaction. Send now.

Straus & Schram, Dept. R4413 Chicago

ABC'S OF RADIO SETS

(Continued from page 23)

wave receivers, uses this circuit, modified only in the value of the inductances and capacities used.

In succeeding articles, each type of receiving circuit, not excepting the super-heterodyne, will be discussed and explained. However, in concluding this article, it seems essential that I again repeat my oft-written statement that, "Regeneration cannot precede, but must always follow amplification."

All Sets Regenerate

It must follow this formula and no other. If you accept this contention, which can be supported by positive proof, it is then but obvious that all Radio receivers, irrespective of type, style, name, make or kind which use vacuum tubes capable of oscillating are regenerative. They of necessity must be, and it is absolutely impossible to construct a Radio receiver which does not, or is not capable of regenerating, so long as the tube can oscillate.

This statement is made with force, because many believe that their particular receiver does not regenerate. But, in truth, those which do not—just hain't made. Devices are available and receivers are constructed which reduce such interference to a point where, with careful tuning, little disturbance is caused. Again, the market is now offering receivers which practically block such oscillations from reaching the antenna, but they are few and far between, as is evidenced by those who listened for Europe recently.

Each of you should learn how to tune properly, so that your receivers will not break into oscillation. I made a careful count of squealers during the recent transatlantic tests—or whistle competition, but gave up in disgust after counting to a million.

Verily, verily, I say unto you, "Please learn 'How to Tune.'"

(In the next issue Milo Gurney takes the reader into a discussion of radio frequency amplification, both tuned and untuned. The untuned variety came first, was displaced by tuned radio frequency and now we have them separately and in combination.—Editor's Note.)

HILL BILLIES AT WRC

(Continued from page 5)

Last summer the gang picked up another Hill Billy who has greatly increased the prestige and power of this combination orchestra-choral society. Charles Bowman, known all over the South as "Fox-Hunt Charlie," happened to hit Mountain City, Tenn., for a fiddlin' contest, at the same time the Hill Billy bunch struck town. Charlie lives in a log cabin back in the hills, ten miles from Mountain City, and he just came down to town for the purpose of snatching a few loose prizes in the exhibitions of old-time fiddlers. The Hill Billies grabbed him at the first showing, and he grabbed the Hill Billies. They all talked the same language, played the same tunes, and no rehearsals were needed to break in the new trouper. Charlie plays any ding-busted stringed instrument that is or can be, with the possible exception of an Irish harp, which hasn't sufficient volume to interest him. He does mean things with a banjo; a guitar is more easy meal to his grist, while the fiddle—he actually makes a fiddle sit up and bark. His piece de resistance, from which his nick-name is derived, consists in imitation of two houn' dogs chasing a red fox through the Tennessee hills. Charlie also fiddles his way through a barnyard selection, introducing the cacklings of the fowl, from turkey gobbler to bantam hen.

When they aren't on the road, the Hill Billies melt into the ordinary industrial lives of their communities like the snows in spring. Albert and Joe Hopkins are salesmen; John and Elmer are first-class mechanics. Alderman is a motion picture camera man. Bowman paints barns and houses or what-have-you. All of them are highly intelligent, excellent appearing young men.

They can pull the innards from an automobile, build a Radio set, or grace a drawing room. They can sing a negro spiritual to suit the longest-faced deacon, or they can turn it into a "can't-keep-still-your-foot" country dance. They can wield a double-bit ax or pick a pianissimo. Al rumbles a deep bass lead in "Get Away, Jordan," and jumps to a Tyrolean yodel in "Sleep, Baby, Sleep." If John gets tired of singing baritone in the quartet he just grabs Elmer's second tenor part, and Elmer can shift to baritone or get out of the race. Bowman and Alexander present a stunt in which each bows the other's fiddle and fingers his own.

Some evil day one of the boys is going to pick up a loose saxophone, take ten or fifteen minutes to learn to play it, and the party will be ruined. Heaven postpone that day, for when the sax supplants the mouth harp and the trap drummer drowns the banjo (one string at a time, if you please) America will lose an organization that represents all that is best in the music of its hills—the real simon-pure "leider" of our country.

EXOTIC CHARM OF PWX

(Continued from page 4)

development of Cuba, by arousing greater interest in the island abroad, and by educating other parts of the world in the cultural and economic progress of that corner of Spanish-America. A telephone company represents national progress, and should contribute whatever it can toward that end. The commercial welfare of any community is important to the telephone system serving it.

Another result of the broadcasting of PWX is to familiarize the audiences with personal communication over long distances even into foreign lands. It stimulates the imagination of the public to contemplate the many possibilities that lie in the science of projecting the human voice through vast space and over long stretches of wire. Thousands of miles mean little today in the art of conversing between persons. It helps to drive home the fact that the telephone, in its present state of development, is capable of reproducing the most delicate tones and inflections of the voice, be it a wired or wireless telephone, and that it can serve as the Magic Carpet in bringing a person across seas and continents to the side of those who would talk with him.

But, primarily, PWX was established because of the desire to investigate and study this new means of voice transmission without the aid of wires, and to learn what its usefulness might be in the art of telephonic communication. It has possibilities for usefulness where it is not economical or practical to string wires or submarine cables, and for maintaining communication between moving stations. In the study of this problem, PWX has been useful not only to the company owning it, but to the science as a whole.

PWX has played a part in several notable feats of Radio and telephony. At one end of a telephone circuit more than 5,000 miles long, the station participated in the world's first demonstration of a transcontinental conversation being broadcast by Radio so that persons all over North America might hear the words passing over the copper wires that stretch from Havana, below the tips of Florida to San Francisco, California. General J. J. Carty, vice-president of the American Telephone and Telegraph company, from the banquet hall of a Chicago hotel on February 8, 1924, called the roll of twenty cities along the circuit from Havana to the Pacific coast, and as each city answered on the telephone circuit, the response was heard not only by the banqueters but also by the millions who were tuned in to any one of seven Radio stations, along the route, connected with the telephone line. F. T. Caldwell, chief engineer of the Cuban Telephone company and Henry G. Bates, general commercial manager of the Pacific Telephone and Telegraph company, held a conversation from Havana to San Francisco, and musical selections were exchanged between the two cities separated by the United States while PWX and the other Radio stations let Cuba and America listen in.

When President Machado of Cuba visited New York in April, 1925, at the time he was president-elect, he was banqueted at the Hotel Astor by American business men. In order that his countrymen might hear his speech and the reception accorded him in America, a telephone circuit linked the banquet hall with PWX at Havana. Every word of the president-elect's speech and the thunderous applause accorded it could be heard by the Radio audience in Cuba. Station WOR of Newark also sent the president's remarks out on the air for Americans. Many letters of appreciation and thanks were written by Cubans to PWX for that evening's broadcasting of a New York banquet address.

Spaniards everywhere celebrate the birthday of His Majesty King Alfonso of Spain. Each year the Spanish Casino in Havana is the scene of such a jubilee. The Radio fans of Cuba and North, Central and South America are able to share in the birthday party through PWX, connected with the Casino by underground cables. The homes of Spaniards in a dozen nations have been added to the Casino party this way, so that they joined the audience hearing the music and speeches of the Spanish colony in the Cuban capital.

That the broadcasting and cooperation of PWX is appreciated by the Cuban government has been shown many times by official correspondence between the presidential palace and the Cuban Telephone company. One instance occurred sometime ago when a general strike tied up business in Havana. The president of the Republic issued a manifesto on the subject to the people of the nation. In order to give it quick and wide circulation, the Cuban Telephone company broadcast the proclamation from PWX.

The full amplifying efficiency of the tubes is never realized in a reflex circuit.

How to Stop Blooping and Man-Made Static

Part IV—Construction of the Penetrola

By the Technical Staff

IT WAS promised in earlier chapters of this series that the construction of a unit to be placed between the antenna and the set for the prevention of blooping would be given. Now this unit is unusual in that, in addition to preventing your radiation, it will reward you for its installation with increased selectivity, range and volume. There has long been a demand for such a unit and many have appeared on the market from time to time but none of them completely and satisfactorily solved the problem. In many cases, the use of such devices necessitated changes in the original receiver; in others, they merely added to the present difficulties in operating the receiver because they made it unstable.

Can Be Used on Any Set

Penetrola is built around the Isofarad circuit which is one of the balanced bridge arrangements shown last summer by Milo Gurney in his series on radio frequency improvements. It is made in such a way that is can be used with any receiver; non-regenerative, regenerative, tuned radio frequency, neutrodyne or super-heterodyne. It will increase the selectivity of any receiver and make it possible to tune in distant stations loudly and clearly in spite of local interference. It will stabilize a set and make a ticklish one easier to handle. It is presented in this series, however, because it acts as a uni-directional or one-way repeater, allowing energy from the antenna circuit to be applied to the set proper, but not permitting energy from the circuit to be radiated in the form of squeals over a wide area.

The front view is shown here as figure 6 and the front panel measures 7 inches by 10 inches. It is the same height as your receiver panel and adds to, rather than detracts from, the set's appearance. The circuit is shown in figure 7. The input coupler consists of two special coils wound on insulating tubing with proper regard for spacing of turns and separation of primary and secondary. When a long aerial is used, it is to be connected to the tap on the primary, while, if a short antenna has been erected it goes to the end terminal of the coil. The two coils are contained in a copper can with the result that they have all the power of solenoid type coils and the non-spraying qualities of the toroid type coils.

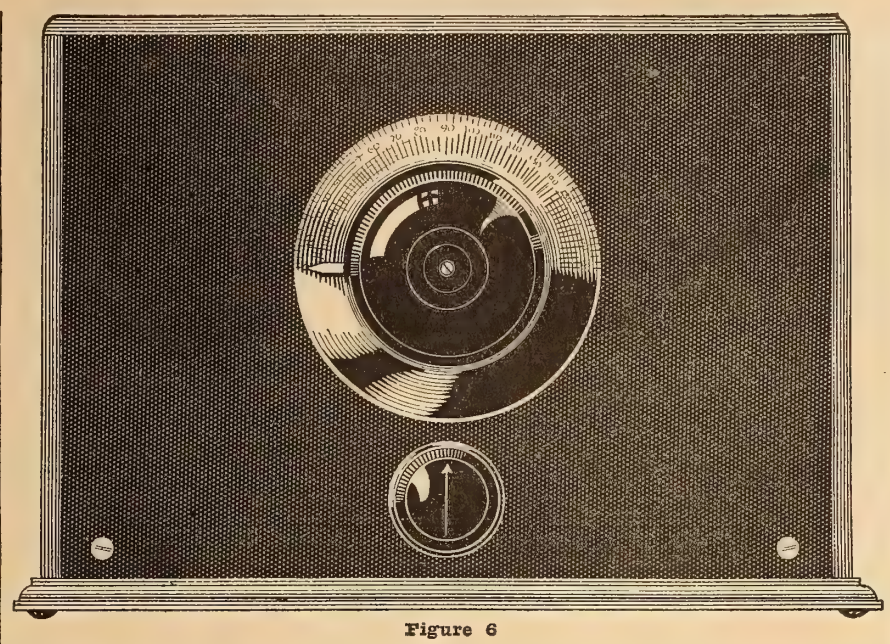

Figure 6

Gives Equal Amplification

It will be noticed that a special type of tandem condenser is used across the secondary of this input transformer. The two rotors and stators are not identical in size. One has more plates than the other. This feature gives the entire unit equal amplification over the wave length range, rather than a falling off on the upper end of the scale, as is usually the case in a stage of tuned radio frequency. Unbalancing of the circuit, once the small balancing condenser has been set on some wave length, is also prevented. The output circuit contains a tuned radio frequency choke which diverts the radio frequency energy through the condenser and to the upper output terminal rather than permit its flow through the B battery to get back to filament. That condenser at the upper output post is to keep the voltage of the B battery off the grid of the succeeding tube. Negative B connection is made automatically through the A and B battery connections to the set.

The essential parts for this unit are sold as a kit which contains the twin condenser, the canned coil, the output choke, the balancing condenser, the socket, brackets and a vernier dial. Full size drilling templates accompany this kit and it is only necessary to place the templates on the panel and sub panel, center punch with punch and hammer, and drill. You will need a ½-inch, ⅜-inch and number 18 drill; also a countersink. It is important that parts be mounted in the proper order as otherwise some parts will cover up the mounting holes for other parts. The brackets are first attached to the sub panel.

Installation of Unit

The supporting screw at rear edge is put on next, so that the underside of the sub panel is ¾-inch from lower end of screw. The socket follows, care being taken to get the terminals placed as shown. The output choke and the output blocking condenser follow. The order of assembly for the rest of the parts does not matter.

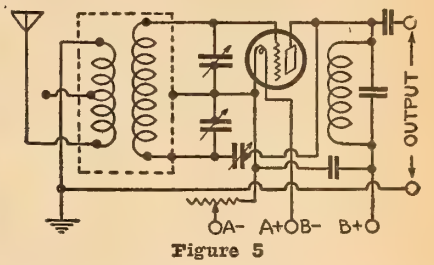

Figure 5

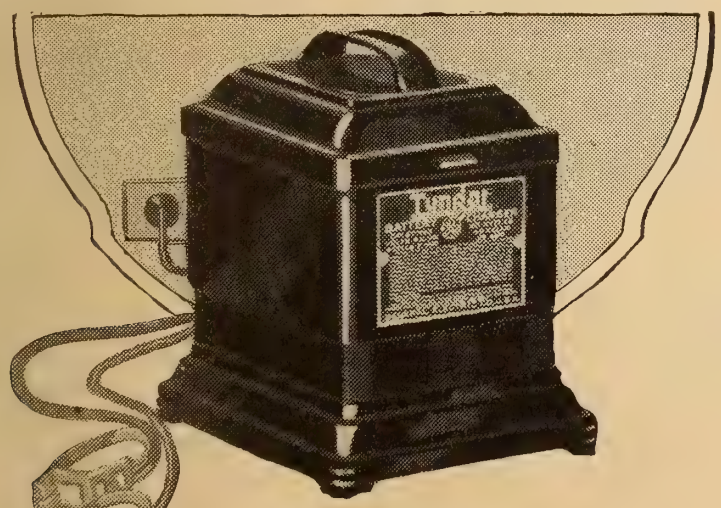
The wiring in picture form is shown in figure 8, which comprises a top and bottom view with wiring in place. Holes in the sub panel through which wires are run to connect terminals above the sub panel with those below have been lettered and it is easy to find the wire on either the upper or lower side.

(Continued on page 26)



With Tungar— an overnight charge for a dime!

It can't blow out Radiotrons if left hooked to set while charging.

Does not disturb radio reception in neighborhood.

It is complete—charges 2-4-6 volt "A" or 6-12 volt auto batteries, or 24-96 volt "B" batteries in series.

Especially adaptable to permanent instal'ation in cabinet with switch control.

East of Rockies)
Five ampere size $28.00
Two ampere size $18.00
60 cycles - 110 volts

Merchandise Department
General Electric Company
Bridgeport, Connecticut

Two clips for your battery and a plug for your house current—that's all. And the steady, quiet Tungar charges your batteries overnight.

Just about a dime's worth of current and two minutes of work. So simple!

It's the no-fuss, easy-to-use charger—for all batteries.

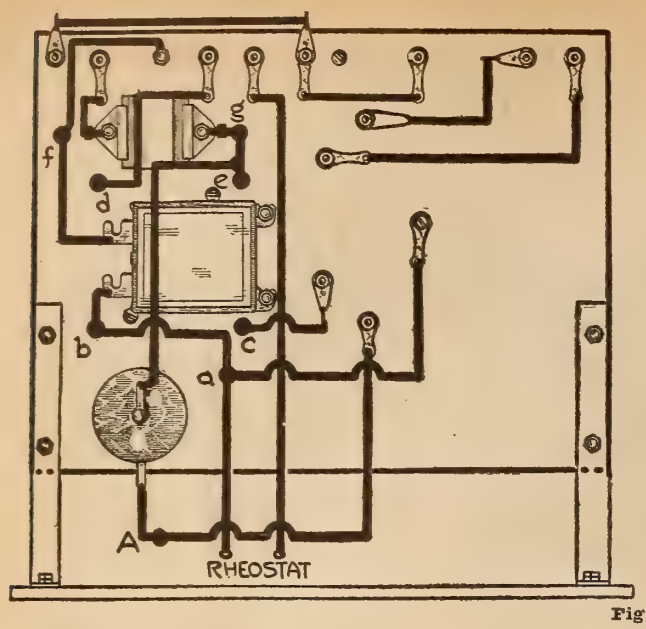

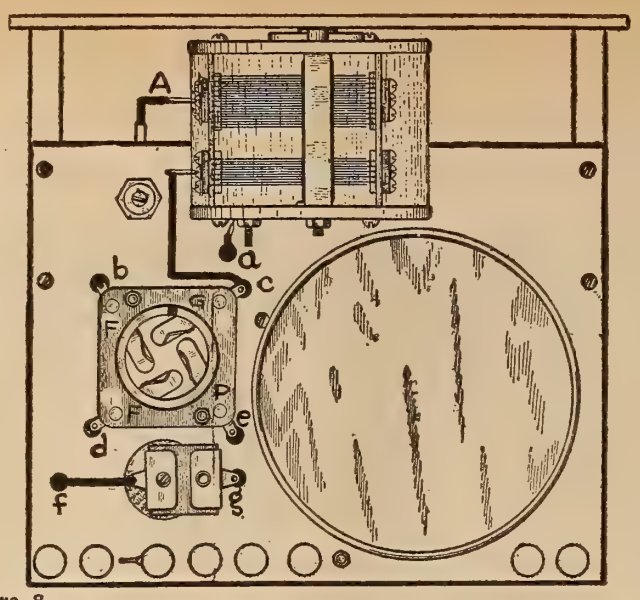

Figure 8

HELP STOP BLOOPING

(Continued from page 25)

Although no connection has been shown in figure 8, between the metal shield around the input coil and the ground, it is important that the shield and one of the A battery leads be grounded. The reason that no connection has been shown is due to the fact that in most receivers one of the A battery leads is already grounded and the shield would automatically be grounded through its connection with the negative filament lead as shown. In some receivers the negative lead is grounded while in others the positive lead is the one that is grounded, so that grounding the shield directly, in this unit, might short circuit the A battery.

Grounding Penetrola

If your set is of the type in which the A battery is already connected with the ground post in your set, the grounding of the Penetrola A battery leads will take care of itself. If, however, your circuit is of the type in which neither A battery lead is grounded to the ground post, you will have to take care of this as follows. Turn on your set so that all the tubes light up; take all the tubes out of your receiver. Attach one terminal of a voltmeter (do not use phones) to the ground terminal of the set and touch the other terminal first to the positive A battery binding post of the set and then to the negative A battery post. If there is no deflection of the needle in either direction when either of the A battery terminals are touched, then you know that neither A battery circuit is grounded. In that case, the two binding posts just to the right of the supporting screw at rear edge of sub panel are to be connected together.

If you do get a deflection in either direction, when one or the other of the A battery terminals is touched, then use the Penetrola wired as shown in figure 8, without connecting the posts mentioned.

It is a very simple matter to connect the unit with any receiver and operate the whole arrangement. The right end binding post connects to the ground binding post of your set. The next to it connects to the antenna post of set. The third post from right goes to plus 67½ or plus 90 of the B battery. The next post goes to plus A and the fifth to minus A, of your filament battery. Connect your ground to the sixth post from right and the antenna to either binding post in rear left corner. Balancing of the small condenser is carefully explained in the directions which accompany it and one cannot go wrong.

Will Prevent Blooping

There are probably many of our readers who are not inclined to the construction of apparatus and we are glad to be able to advise that the Penetrola can be purchased completely assembled and wired, ready to use, from the makers of the kit, who are located at 937 Wrightwood avenue, Chicago. **The price is $35.00 and it** can be had in either black crystalline or wood finish. Penetrola, whether home-assembled or purchased complete, is positive insurance against blooping. In closing this chapter we must advise that the Penetrola, as described here is primarily for use on those receivers designed to operate from outside aerials. If your receiver is of the loop type, this device may be adapted to use with it through the use of an antenna coupler, the primary of which will contain 6 to 10 turns and the secondary 40 to 60 turns with the correct inductance value to work with the variable condenser intended to tune the loop. As a rule this condenser is of .0005 mfd. capacity and an Uncle Sam or Ambassador tuner is suitable.

Connect the output of Penetrola to the primary and use the secondary in place of the loop. Where three terminals are provided for a tapped loop, tap at the middle of the secondary of this coupler.

(Penetrola is about the only well-known commercial device to stop blooping. Next week this series will be continued with further devices for this purpose.—Editor's Note).

LIST OF PARTS

1 Penetrola Kit of Essential Parts Walbert Mfg. Co., Chicago, Ill.	$15.00
1 Formica Panel, 7"x10"x3/16" Formica Insulation Co., Cincinnati	2.40
1 Formica Panel, 7"x9¾"x3/16" Formica Insulation Co., Cincinnati	2.00
1 Carter Imp Rheostat, 25-ohm Carter Radio Co., Chicago	1.00
8 Eby Ensign Binding Posts H. H. Eby Mfg. Co., Philadelphia	1.20
1 Cabinet, 7"x10"x9" Walbert Mfg. Co., Chicago, Ill.	4.00
1 Dubilier, type 640, .01 mfd. Cond. Dubilier Radio & Cond. Co., New York	1.00
1 Dubilier, type 656, 0.5 mfd. Cond. Dubilier Radio & Cond. Co., New York	.90

Note: Panel and sub panel may be purchased drilled from Walbert Mfg. Co., at price shown. Of the B binding posts, 2 are "Gnd," 3 are "Ant," and 1 each of "B Amp+," "A Bat+" and "A Bat—."

Enough electricity to illuminate ten 5-room homes is required, it is said, in operating a forty-foot electric sign at KOA, Denver, which represents the station's call letters. The sign itself is mounted on one of the two towers and is more than 100 feet above the ground. The letters are nearly ten feet high.

If your favorites are not in this list, send in a request to have them included in the Gallery of Radio Stars.

Photogravures of Your Favorite Artists

GALLERY OF RADIO STARS

Suitable for Framing or Placing in Your Album

By special arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany each coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

WITH COUPONS Only 10c Each—3 for 25c For cost of mailing and postage

COUPON NO. 11

This coupon entitles the holder to one photogravure selected from the Radio Digest Gallery of Radio Stars when accompanied by ten cents to pay the cost of mailing and postage.

Three consecutively numbered coupons entitle the holder to three photogravures when accompanied by 25 cents. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

Two-Tube Short Wave 15-130 Meter Receiver

Part IV—Adjusting and Operating

By John G. Ryan

IN ALL probability the experienced set builders following this series of articles now have this receiver all hooked up and working more or less efficiently, but since many will also tackle it who are not so advanced, the connections will be gone over quickly and the adjustment will then be taken up.

First of all, you have probably noticed that no antenna and ground posts were provided on the sub base. These were deemed unnecessary as they are provided on the coil mounting at the right end, and the lead-in and ground can be brought in directly, through holes at the rear of the cabinet, to these posts. As to the batteries, those for lighting the filaments will depend upon the tubes used. If 201-A type tubes with either UV or UX bases are your choice, a six volt storage battery serves, while, if UX-199 type tubes are used, three dry cells or a Philco four volt storage battery will do. In either case, connect the negative terminal to the binding post at the left end and the plus terminal to the second post from the left.

Two B batteries of 45 volts each are needed and these may be either medium or large in size since only two tubes are drawing current. The negative of one is connected to the second post from the left, or the plus post on the filament battery, and the plus of that same B unit is connected to the negative of the other and also to the third binding post on the set. This leaves the plus of the second B unit which is to be connected to the fourth binding post.

Can Use Switching Arrangement

If it is desired to operate this set from the same batteries used for your broadcast range receiver, some sort of six pole double throw switching arrangement must be used to throw the four battery leads and the antenna and ground to one set or the other. This can be either one switch, two triple pole D. T. switches or three double pole D. T. switches such as Carter or Yaxley jack switches. It is not a good plan to leave these wires connected to both sets and merely turn on the filament switch of one or the other. The six wires mentioned above would go to center lugs while there would be six short leads going to right to the broadcast set, with six other short leads going to the left to the short wave set.

In the original list of parts included with Part I, an Amperite 1-A was listed, on the presumption that 201-A tubes would be used. If the UX-199 tubes are to be operated this Amperite should be 4V-199. The Bradleystat is universal in its uses and is suitable for any tubes. For those to whom the insertion of the C battery, as described last week, may not have been clear, figure 9 is presented with this chapter with the exact placing of this battery and the flexible wires leading to it, clearly shown. No directions on the insertion of the radio frequency choke were given. This coil is both light and small and we found it could quite readily be supported on the bus bar wiring, one end being attached to the wire from the P terminal on the Karas transformer and the other to the wire which comes up from condenser-coil connector.

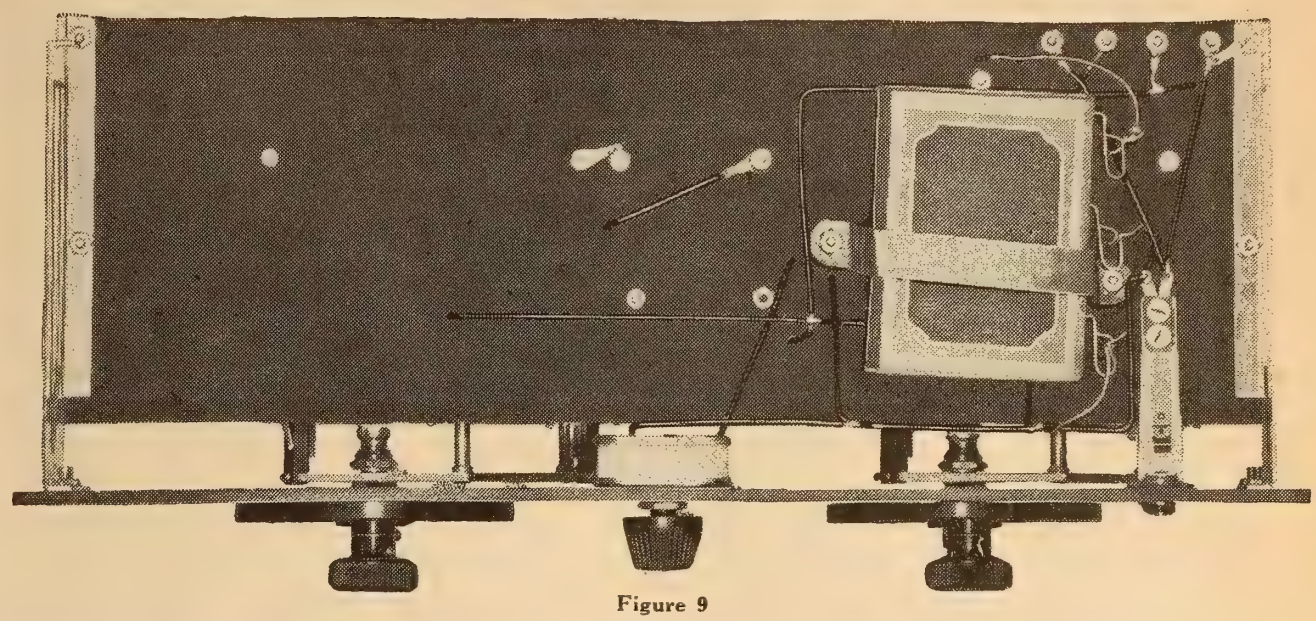

Figure 9

Experimentation Needed

The ticklish part of this whole outfit is the matter of grid bias of the detector tube. The set will work, to some extent, without a great deal of care in the matter of adjustment, but that gradual approach to oscillation that is the secret of range, will be obtained only if some experimenting with the grid leak, grid condenser and grid return is done. You probably noticed in the schematic diagram shown with Part I that the grid return was shown dotted to both the plus and minus filament leads. This can go to either the plus, the negative between rheostat and filament or the negative below rheostat. You will most likely find plus filament the best spot for this but try them all. If you have an assortment of grid leak cartridges and small fixed condensers around from previous work (and every true experimenter has), take out the Leakandenser cartridge and connect a .0001 mfd. or .00015 mfd. fixed condenser across the mounting screws for the clips on the under side.

Various resistance cartridges should then be tried, with the different grid return connections mentioned until a slow approach to oscillation, through regeneration, is possible. If no combination gives you this, the radio frequency choke is essential and its use will force all of the radio frequency component in the detector plate circuit, through the feedback coil and condenser and keep this component out of the audio frequency part of the set.

In the schematic diagram of figure 2, a possible connection between the filament circuit and the ground binding post is shown. It is usually preferable to omit this connection since it is likely to bring in a lot of undesirable noises and will not help the selectivity a bit. Put it in only if for some reason you are bothered with hand capacity.

While making any of the adjustments outlined, the three coils should be inserted one after another to be sure that, with any combination, it is possible to secure oscillation over the whole wave length range. These tests should be made with the antenna and ground disconnected and the antenna coil swung back away from the secondary coil. Thus you can be sure there are no "dead spots" created within the set itself. With a satisfactory arrangement in the matter of grid bias, the antenna and ground connections can be put back on and the tuning tried over the whole scale.

Now, due to characteristics of your individual antenna installation, it is highly probable that a dead spot or two will be found due to harmonics of the antenna circuit itself. At these harmonics it will absorb energy from the grid circuit surprisingly fast. Most of these spots can be eliminated by loosening the coupling of the primary to the secondary but it may prove necessary to shift the natural period of the antenna circuit by inserting either a loading coil to raise it or a series condenser to lower it. Although we did not find dead spots due to harmonics of the radio frequency choke, we understand

(Continued on page 28)

Steinite Low Loss Interference Eliminator

No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.
OVER 300,000 SOLD

PATENT PENDING.

Improved Results With Tube or Crystal Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. ***MONEY-BACK GUARANTEE.***

Mfrs. Famous 1,500 Mi. Steinite 1-Tube Set, $6; Long Distance Crystal Set, $6; Steinite Crystal 50¢—3 for $1
STEINITE 5-Tube Set—$29.75
FREE Descriptive Literature on request.

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

$1 Postpaid If you are not delighted with results you get your dollar back

Veri Chrome and Formica Provide the Finest Radio Panel

THE great variety and beauty of the decorations for radio panels that are possible with Veri Chrome, and the remarkable permanence of a Formica panel so decorated have made sets with Veri Chromed panels very popular.

To give kit buyers who assemble their own sets a chance to purchase Veri Chrome decorated panels we have prepared panels for some of the better known kits.

Bremer-Tully No. 1; Bremer-Tully Counterphase; Bremer-Tully Nameless; two sizes of Best's Superheterodyne put out by Remler; and the Browning-Drake receiver offered by the National company, the four tube Marco Browning-Drake and the General Radio Universal Receiver, are kits for which Veri Chromed panels are now available—see your dealer or jobber or write us direct.

Panels of all standard sizes are packed in neat individual envelopes and sold by dealers to home set builders.

from Marco that these are also a possible source of such areas. Alteration of this choke either by adding turns, cutting them down, using a smaller core or a slightly larger one will shift these harmonics out of range.

It may seem to builders of this outfit that there are a great many "ifs," "ands" and "buts" to this outfit but it must be understood that factors which are not important in the broadcast range of wave lengths, are magnified tremendously in importance when one is working between 15 and 130 meters. In the first case, the frequencies are 500,000 to 1,500,000 per second, while, in this latter work, the frequencies involved are from 2,300,000 to 20,000,000 per second. Patience and willingness to experiment, however, will give the builder satisfaction well worth the effort and a valuable education in Radio.

A STEP ON THE STAIRS

(Continued from page 7)

scraped and flamed almost instantly in the hallway.

"The candle is there under the table near the Sahib's foot," the Indian reported. "If one of the Sahibs will pick it up . . . There it is.

"This time I had matches in readiness . . . What is the matter with the Sahib's hand?"

Ardwyn was standing as he had been standing before the mishap to the candlestick but he was holding his right wrist with his left hand and his face was contorted with pain.

"She bit me," he said. "I know it was a woman. I felt her hair . . ." The three women of the company leaned forward in their chairs and looked at one another appraisingly.

"I'm so sorry," murmured Mary Williams contritely. "It is really my fault. If I hadn't jolted the table and upset the candlestick this horrible thing could never have happened."

"It's nothing to be upset about," said Ardwyn. "I can fix it. I have been chewed by wild animals before."

"No," put in Tolliver, "please don't get all agitated. I ain't even surprised at Ardwyn gettin' all chewed. Nothin' surprises me in this menagerie. I ain't even surprised when they put on the lights an' I see you there in your chair."

"What do you mean?" demanded Mary Williams.

"Oh nothin' at all," explained Tolliver with an exaggerated penitence. "Nothin' at all except when I saw you goin' dizzy I thought you might fall an' miss the chair. And Mr. Ardwyn . . . Maybe you didn't notice . . . But that letter . . . It's gone."

Who bit Lawyer Ardwyn on the wrist and stole the letter taken from the motorcycle cop? Who shot the engineer at FYX? Why did sweet Mary Williams faint—if she really did faint? What became of the bearded pirate? The next installment will offer new clews and present new complications for those who are hoping to get some of that $500 in gold to be awarded by Radio Digest for the correct solution at the finish. Be sure to read the next installment!

STRAIGHT-8 ON THE WEST COAST

I HAVE built or rather changed over my super to the Straight-8 as published by you so thought you might like to know how it is working. I got no European stations during the test, but my attached list includes 90 stations logged between January 13 and February 5. You will note this includes the East coast with 6KW, WSB and WGY, Mexico with CZE and CZF, Canada with CFCT, CNRV, CKCD, CFCN and CFAC and all those worth talking about in between.

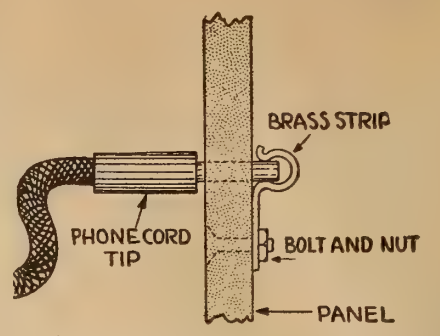
You know we have to get our Eastern stations at a time when all our local stations are also on and I have, within 200 miles of me, 10 of 500 watts, 2 of 5,000 watts, 1 of 750 watts and 2 of 1,000 watts with many of lesser power. Also you know WLW is 2,000 miles from me and 10 kilocycles from KPO, WHT is 1,800 miles from here and 10 kilocycles from KHJ, WDAF is 1,400 miles distant and 10 kilocycles from KGO while WBAP, also 1,400 miles away, is only 10 kilocycles off of KFI's 5,000 watts, but I get them and use an aerial 150 feet long; so you can guess what I think of the Straight-8.

I was using an ultradyne, so simply took out the coils, made the new one and put them in the right places. Have Amperites on all tubes in place of rheostats and think they are the only thing. The only change I made was in the number of turns on the grid coil of the oscillator which I reduced 4 turns from the specifications. I trust this may be of some interest to Messrs Christen and Fournier.—J. B. Fox, Exeter, Calif.

(Editor's Note—Letters such as this are most encouraging to the technical staff. Few readers take the trouble to advise us when Radio Digest sets work well; they seem to take it for granted they should. "Grief" letters are also welcome, however, as they show us where we might improve our descriptions of receiver construction).

Phone Cord Tip Jack

The attached sketch shows an easily constructed phone cord tip jack I devised. A short piece of brass strip, one-quarter to one-half inch wide and a short



machine screw are all that is necessary. The machine screw can, of course, be either round or flat head.—Eugene Wilson, Jr., Bentonville, Ark.

Cabinet Corner Pad

A thick round corn pad, moistened, will adhere readily to the foot of any receiver. This will not only prevent scratching of the table but will remove

many of the microphonic noises.—William Fischer, 1193 Twenty-ninth street, Milwaukee, Wis.

WHT Has Frequency Indicator

CHICAGO.—If you want to determine exactly what is 400 meters on your receiving set, tune in on WHT, Chicago. A frequency indicator has been installed on the transmitter and the wave will not vary to less than 399.99 or more than 400.01 meters.

Norwegian fishermen at Stavanger are now using a microphone with telephone attachment to listen for the movement of shoals of fish. Airplanes are used for "spotting."

Piano virtuosos are so hard on the two pianos in WSAI's studios that it is necessary to have them tuned weekly. The pianos are used 20 to 30 hours a week.

Look into each real record of International Test Week, and quite likely you will find a Penetrola behind it. Never was the stage so perfectly set to prove that *Penetrola plus almost any set* surpasses the very costliest set alone. Europe, brought in like local broadcasting, confirms the audibility meter tests in which Penetrola multiplied signal strength 188 times!—ahead of the detector! Penetrola results, based on exclusive, perfected Walbert principles, are the reason for the radio industry's intense interest today in the Walbert Isofarad circuit.

The New Radio Book How To -

Operate Sets
Construct Parts
Improve Reception
Understand Radio
Assemble Circuits

The greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest, it supplies the demand for a book covering every phase of Radio. Starts at the beginning with simple explanation of Radio reception, with technical explanations of the different parts and leads right on to the more advanced instruction. A complete handbook serving as a ready reference in the Radio field. It gives suggestions on parts and sets which will prove to be a money saver. Blue prints and diagrams are essentially an important part of this book. Special chapter is devoted on "How to Operate," which gives detailed information on the operation of many well known sets.

A general information is vital to the knowledge of anyone interested in Radio. It gives a complete list of all broadcasting stations with a colored map showing their location. The workshop kinks will save you time and money. Now is the time to take advantage of this exceptional offer. **Mail coupon today!**

RADIO DIGEST,
510 N. Dearborn Street,
Chicago, Illinois.

Enclosed find $5.00 for one year's subscription to Radio Digest. The new Radio Book, "Radio Receivers," will be mailed FREE, postage prepaid. This offer only good on subscriptions sent directly to this office, not through agents or agencies.

The Reader's View

Upholds V-63

Having read Mr. H. G.'s article in February 6, 1926, wherein he takes exceptions to the complaint of V-63, evidently believing the complaint unjustified.

Now I am one of the listeners here in Pittsburgh who has been tormented by the station, viz. WIR, for the last six months, and I can assure Mr. H. G. that I am not using a blooper either. Suffice it to say that I have copied code from this station on R. A. C. supers from the old second harmonic to the new Radiola Z8, and surely you understand that this cannot be done theoretically without the use of the second beat against the last detector.

I have seen nights here in Pittsburgh where interference from this station would drive KDKA in on RCA super in twenty-one places and I have had this happen on my own receiver, which is an 8-tube 201A type machine. This outfit can bring in KFI through WJZ and WRC without any difficulty so I believe you could not call that exactly "sloppy."

The greatest interference caused here is distortion produced in every kind of receiver and very often abrupt fading is caused on the local stations, and at other times vicious cracks and screeches. These effects are undoubtedly caused by heterodyning.

It seems to me that you have been a little hasty in your criticism and if you feel you have anything to teach us about receiver design, the writer will be very glad to pay your expense here and back if you can demonstrate this fact. I would like to state further that some of you fellows are going to get a new idea on this interference problem some of these days, to the effect that short wave transmitters are contributing a very large portion to our troubles where powerful amplifiers are being used. There is one within a few blocks of me which has a note resembling raw A. C. The disturbance all around here is of the nature of static to the average receiver, namely shock, yet there is no relief in sight. R.L.B., Pittsburgh, Penn.

Did It Occur to You?

Answering "C. A." of Columbus, Ohio, under "Should Answer Letters," let me say that I think "C. A." is a poor sport. Which would be the easier to do: 10,000 persons write a post card to the artist or station heard from, or for one person to be compelled, as "C. A." suggested, to answer each of the 10,000 cards received, all to different addresses? I wonder if he gave his article any thought before sending it in. It would cost 10,000 persons one cent each to send a card to the station thanking them for the free concert, whereas, it would cost the station $100 to answer the 10,000 cards. I believe he'd better think and apologize to our good stations who entertain us each and every evening. W.L.P., Monticello, Ill.

The Perfect Announcer

Have noticed in your columns lately that there have been numerous complaints concerning the announcers at our different stations not letting the Radio audience know to whom it is listening. During the last week, I found these kickers an ideal announcer.

If they will tune in CZE, Mexico City, Mexico, I am sure they will be satisfied as I believe he is the best I have ever heard. If he don't suit them, I am afraid there is no hope for them. D.W.E., Fairview, Ill.

Against Cute Announcing

I would like to have space in your paper to say a few words in regard to announcers. I notice that several commented on not being able to locate stations on account of a great many of them playing several numbers without announcing the call letters or the station.

My experience along this line is that I find some complaint regarding not announcing the call letters or location of stations, but the most annoying thing is to pick up a station that you are not familiar with and have the announcer blur the call letters and location with his cute way of announcing the call letters and locations that no one who is not familiar with it can understand what he says.

I presume everyone is annoyed with this as just about one-half of the announcers have some cute way of announcing their stations. This, however, is not annoying to anyone that knows what stations they are as they receive them after they have had them several times but it is very annoying to the person or persons that pick them up for the first time. J.J. W., Beaumont, Texas.

Trouble in Cape Breton

I notice that R. F., Sperling, Manitoba, Canada, says he would like to see more on the readers' page from Canadian listeners about Radio conditions in Canada.

We in Cape Breton seem to be out of luck this winter, as we are hearing very little except code harmonics from the Marconi high-power station at Glace Bay. On Monday nights 10BA, Glace Bay, gives us some good programs which are contributed by local talent. It comes through well for a "5-watter."

The Canadian license fee of one dollar per year is used by the government in controlling and eliminating interference—at least, it's supposed to be. We Cape Breton fans get much interference from the Marconi station at Glace Bay, its harmonics coming in on every three or four degrees of the tuning dials.

I would like to see other fans who have had the same trouble write in.—W.M.P., Cape Breton, Nova Scotia.

More Appreciation Needed

I read your editorial, "Program Coming in Fine," in the issue of February 6. I agree that the reading of telegrams, letters or little talks between numbers might be annoying to some listeners in, but not to all. In the first place, it gives the Radio fan a chance to acquaint himself with the announcers, the entertainers, and also hear a word about other fans scattered over the country. It would surely be tiresome to listen to music, each number being reeled off one after another, with "mechanical" announcements between the numbers. And what about the popular announcers? We like to listen to their voice, and sometimes hear a word about themselves. The fans who complain about the telegrams being read between numbers are the ones who usually spend their evenings twisting the dials, tuning in the different stations, and not listening to any of the programs broadcast, their sole enjoyment being to get as many stations as possible—and, perhaps, annoy other listeners in with re-radiation noises from their sets. There are too many stations on the air. The thing to do when an announcer starts to read a telegram is to switch over to another station, but the chances are you'll miss the call letters of the station unless you have patience—and time—to wait. More appreciation of efforts on the part of the announcers to please the many listeners in is needed.—J.L.L.

Radio Operated Lights Keep Flyers On Course During Inclement Weather

Special Wireless Beacons Proving More Efficient and Easier to Follow Than Former Code Signals; Planes Cannot Get Lost with New Directional System

A SPECIAL type of Radio receiver, which permits air pilots to maintain a course through darkness and fog toward a Radio beacon is the latest development in Radio and aeronautics. This improved Radio receiver or indicator is visual, in that the pilot does not have to listen in continually for the code signals which keep him on his route; he merely watches three tiny electric lights on his dashboard. They are operated by the Radio signals picked up when his receiver is properly tuned on the beacon, and indicate to him whether he is on his proper course or veering to the right or left.

Pilots Lose Themselves

Radio beacon finding, or directional flying, tests have been conducted for some time at McCook field, in Dayton, the pilots using the Radio beacon at Wilbur Wright field, which sends out a series of guiding signals for their use. The development of this system, patterned somewhat after the marine methods, has been through the cooperation of the signal corps and air service experts at McCook field and the air mail service. In the tests, pilots frequently flew from the field and lost themselves in the air, trusting to the Radio beacon to guide them home. In this they were always successful within a radius of about 200 miles.

How the Lights Work

The original system was called the equi-signal system, in which two signals transmitted simultaneously from the beacon had to be kept at equal strength to assure the pilot that he was on the proper line or flying toward the beacon. A development made during the past year is an improvement. It is known as the interlocking signal system. Two distinct signals are still sent out, but they combine to form a third character when the airplane is on the right line. If the aviator veers to the left of the course he hears only one signal, the Morse letter "A," transmitted in code. When he is off the course to the right he hears the Morse letter "N" in code.

If flying exactly on the prescribed course these two letter signals combine to form a continuous repetition of the code letter "T," or a series of dashes. Hearing the series of dashes continually, he is sure his route is toward the beacon, but when this series breaks up he is either to the right or left and must change his course until he again picks up the continuous signals.

Less Concentration Needed

The difficulty found with this method in flying toward a beacon was the constant attention required by the pilot, who has several other things to do when flying his plane. Dependence upon his ears required too great concentration, increasing the chance of error. To correct this difficulty and make it easier for the pilots, the visual indicator was devised, and phones dispensed with for actual flying, though they may be used for instructions.

Three small electric lights mounted on the instrument board in front of the flyer, when properly connected with his special receiver, flash and go out, depending upon his course. The unbroken series of "T" signals, or dashes, which is picked up by the set when the two signals are received with equal intensity, operates a relay which causes a white light to flash. This is the proper course light, the constant flashing of which shows the pilot that he is flying toward his beacon. When the plane is off the route to the left a red light flashes; when on the right the green lamp flashes. The port and starboard signals used at sea are followed in flying.

A new Radio beacon of this type is now being erected at Monmouth, Ill., under the supervision of the McCook field Radio experts. When completed this beacon will be a valuable guide to the air mail pilots.

FOR CLEAR, QUIET "B" POWER

RADIO Storage "B" Battery

12 Cells 24 Volts *Lasts Indefinitely—Pays for Itself*

Economy and performance unheard of before. Recharged at a negligible cost. Delivers unfailing power that is clear, pure and quiet. Latest development of the world's oldest and largest exclusive makers of transformers. For those who wish the finest reproduction of programs to be had. May be used with any set in place of regular audio hook-up. Autoformers are $5 each at dealers'.

THORDARSON ELECTRIC MFG. CO., CHICAGO

Microphone Voice Is Deceiving to Those Who Would Describe Speaker

DENVER.—Attempts at sizing up Radio announcers by their microphone voice have come to be the newest of pastimes among listeners, judging from dozens of speculative letters being received here at KOA, Rocky mountain broadcasting station of the General Electric company.

Just because an announcer speaks with a deep bass voice is no indication he is "tall and thin," or that he sings bass or baritone, has gray hair or is of light complexion.

Experience shows that the microphone voice is most deceiving, a careful check of KOA fan correspondence proving that Radio voice speculators miss their mark no less than nine times out of ten.

So far as KOA's audience is concerned, unusual interest appears to be centered on R. F. (Ralph Freese). Contrary to the theories of listeners, who have endeavored to figure him out, he is a lyric tenor and not a basso; he is of medium build and average height and not "tall and thin" and has fair skin instead of dark.

He Comes From Kansas

Born in Kansas, Freese, as a youth, spent his vacations working on a wheat farm and around his father's flour mill. On completing high school, he engaged in newspaper work and subsequently attended the Cincinnati Conservatory of Music and the University of Cincinnati. After school hours he engaged in social settlement work.

In 1921 Freese undertook to walk from Cincinnati to Hutchinson, Kan., a distance of approximately 1,000 miles, the outcome of a wager with his old classmates in college that autoists are not generous.

Gets Many Lifts

"Our wager stipulated that I was to hike across the country along the main traveled roads and was not to ask a single motorist for a 'lift,'" Freese says in describing his experience. "The trip took less than a month and I don't recall walking more than 100 miles altogether. In fact, offers from autoists to 'jump in' were so numerous that walking became a pleasant diversion."

MYSTERY SERIAL IS HIT

(Continued from page 3)

only glad to have a share in the development of this new branch of literature but are hoping that one of our listeners captures the grand prize."

This was the tenor of the replies of most of those who were asked to join in the presentation of the air drama.

Following is the list of stations which will broadcast the weekly episodes of "A Step On the Stairs" with their own dramatic artists:

WOR, Newark, N. J., (405.2m-740kc); WHAR, Atlantic City, N. J., (275m-1090 kc); WGY, Schenectady, N. Y., (379.5m-790kc); WEAN, Providence, R. I., (270.1m-1110kc); WNAC, Boston, Mass., (280.2m-1070kc); WSB, Atlanta, Ga., (475.9m-630 kc); WRC, Washington, D. C., (468.5m-640kc); WMAQ, Chicago, Ill., (447.5m-670 kc); WCCO, Minneapolis-St. Paul, (416.4m -720kc); WOC, Davenport, Ia., (483.6m-620kc); WLW, Cincinnati, O., (422.3m-710kc); WHO, Des Moines, Ia., (526m-570kc); WBAP, Ft. Worth, Tex., (475.9m-630kc); KTHS, Hot Springs, Ark., (375.8m-800kc); WOAW, Omaha, Neb., (526m-570 kc); KOA, Denver, Colo., (322.4m-930kc); KGO, Oakland, Calif., (361.2m-830kc); KGW, Portland, Ore., (491.5m-610kc).

Time schedules for the broadcasting, so far as they have been received are published on the program pages.

CLASSIFIED ADVERTISEMENTS

Classified advertisements in Radio Digest produce results. Have you a receiving set to sell? Do you want to buy a Radio? A classified advertisement in this column will sell your set.

Rates are twenty cents a word for each insertion, five per cent discount for four insertions, ten per cent for thirteen insertions, fifteen per cent for twenty-six insertions, twenty per cent for fifty-two insertions. Name and address to be included at above rate. Cash should accompany order. Minimum of ten words.

Objectionable and misleading advertisements not accepted. Forms close three weeks prior to date of publication, which is Saturday.

STATION SUED FOR LEASEE'S REMARK

For First Time in History, Broadcaster Is Made Defendant in Personal Libel Suit

OKLAHOMA CITY, Okla.—For the first time in the history of broadcasting, a Radio station has been made defendant in a personal libel suit. Action has been taken against KFJF, here, for $20,000 for alleged libelous statements made by Rev. Lincoln McConnell while the station was leased by him.

Rev. McConnell was for many years an evangelist prior to occupying a regular pulpit and his talks still have the fire of evangelistic flavor. Recently he gave a widely-advertised talk on "The Octopus," which is the general term he applied to the liquor industry. The atmosphere was favorable for reception and the sermon spread far and wide. During his talk he mentioned certain matters regarding the official conduct of Undersheriff Friss of Oklahoma county, to which Mr. Friss took exception and the following day filed suit against Rev. McConnell for $75,000, and against KFJF as the disseminator for $20,000.

Experience and a little study of the art of tuning are necessary for the successful operation of any Radio receiver.

Don't Tune by Guess
KNOW the wave length your set is tuned to
KNOW your dial numbers for each station in America
KNOW whom you are receiving without announcement
You can do it all with RADEX
At most good Radio Shops **25c** or sent pospaid coin or stamps
RADEX, Box 143-N Cleveland, O.

New Revisable LOG
Loose Leaves—Large Colored Radio Map FREE

New 62 page log. Corrected sheets published as changes in calls, wave lengths, owners, addresses, watts, etc., occur. 468 stations. 4 dial settings, remarks, etc. Tuning suggestions. Station lists by wave lengths—by states, etc. Trouble aids. Dictionary Radio Terms, Repair Hints, Trouble Preventers. Chart showing dial setting for each wave length. Ideal Aerial. Other valuable information. So convenient. Worth many times small cost. Only $1. Pay postman after log and large FREE map arrive. Postpaid if pay with order. Money refunded if not delighted. Order today—now. Postal will do.
Radio Printers, Dept. 9413M, Marengo, Ill.

ARE YOU THE MAN

?
Are You the Man Who Sees Opportunities Ahead for Real Money Making?
Write for literature, terms and prices at once.
You, Too, Can Make Powerola
Send $1.00 for wiring diagrams showing parts used and how to make any set or circuit (one to eight tubes) operate satisfactorily from A.C. or D.C. current.
POWEROLA RADIO CORP.
Dept. R.D., 1845 Broadway New York

Nightingale
6-tube Set with Integral Loud Speaker $75
A wonderful, sharp tuning set of beautiful tone, made complete in our own factory. Five tube assembly suffices for most stations, but volume can be tripled by using 6 tube terminal. No wasteful neutralizing condensers but perfect balance of parts. *See Nightingale dealer or write to*
THE GUTHRIE CO., GRAFTON, OHIO
Makers of the famous Songbird Line

HARRY LOSES TRAIN BUT SAVES SHILLING

LONDON.—When Sir Harry Lauder, the world's famous Scottish comedian, came here to broadcast from 2LO recently, he promised his wife that he would be back in Glasgow the next night, leaving London by the 10 a. m. train.

About 10:01 a. m., he dashed into the depot, breathless, followed by a bellboy carrying a bulky grip.

"Why didna ye hold it up a minute?" he despondently asked a porter. "This is the first time in my life I have ever lost a train."

In his transmission from 2LO Sir Harry included a message to Lady Lauder, listening in Glasgow, thereby saving a shilling on a telegram.

"I am always saving," he explained, with a whimsical smile.

The heart of the vacuum tube is the filament.

For better reception SHIELD your RADIO
Perfect shielding materials, write for prices.
Stage Bros. Mfg. Co., Lincoln, Nebr.

$1.50 for Your Old Radio Tubes
regardless make or condition, toward purchase of each new standard $2.50 tube. (WD11 or WD12 tubes not accepted). Positively guaranteed. We do not sell re-built or bootleg tubes. Agents wanted.

RADIO 'RITHMETIC

Multiply distance by adding a *RECTIGON*

A SIMPLE solution for so big a result! Want band music? Try KDKA. Jazz? Theatricals? Maybe you'll find it at WBZ, KYW or KFKX. What your local stations won't provide can be obtained easily from somewhere else.

How well you receive radio entertainment depends upon the condition of your batteries —*and that's up to you.* With a Westinghouse Rectigon on the job both your "A" and "B" batteries can be kept fully alive to the greatest possibilities of your set.

And it's easy as can be. Just snap on the cords and turn on the current. There's no muss or fuss; no acids; no chemicals, and no noise. The Rectigon more than pays for itself within a short time.

WESTINGHOUSE ELECTRIC & MANUFACTURING CO.
SOUTH BEND, INDIANA

The Westinghouse Rectigon Battery Charger

© 1926, W. E. & M. Co.

No storage-battery radio is complete without a RECTIGON.

Westinghouse manufactures, also, a complete line of Micarta radio panels, Micarta tubes and instruments.

I WON'T BLOOP CLUB IS GETTING RESULTS

LEARN TO OPERATE SET AND HELP CLEAR AIR

Stacks of Pledge Cards Evidence Co-operation of Stations, Clubs, Newspapers and Listeners

As the I WON'T BLOOP CLUB was organized as a medium through which Radio listeners in could receive education in the operation of receivers and through the appliance of the education received and by cooperation reduce preventable interference, immediate results were hardly expected. It will take some time before the air will be cleared of the blooper pest, but the response to the campaign of the Radio Digest for unified action by the listeners themselves has been a revelation. The movement has not only been welcomed but has been enthusiastically received by the fans of both the United States and Canada.

On the Pacific coast, where the word "bloop" has never been used to any extent to specify the dial interference, the campaign has acquainted the section with the name and is uniting the listeners in an endeavor to eliminate that form of interference. A meeting of the Radio Trades Association of Southern California is to be given over to the discussion of ways and means the dealer can use to help eliminate the blooper.

Broadcasting stations, newspapers and listeners' clubs with charters in the I Won't Bloop club are mailing stacks of pledge cards to the Radio Digest each day and, along with scores of individuals, offering suggestions as to methods and helpful hints in limiting interference. A great many demands have been received for the complete series of articles being run in the Radio Digest on "How to Eliminate Blooping and Man-Made Static." Altogether, the cooperation is well organized and it remains for the members of the club to apply the knowledge in operation gained and fulfill the pledges made as applications for membership in the club.

Have You Done Your Part?

Are you willing to cooperate with your neighbor for your mutual advantage? Are you willing to learn the correct operation of your type of receiver? Do you know whether or not you are causing interference? Have you filled out the pledge card printed at the top of this page? If you have not applied for membership in the I Won't Bloop club, do so today. Get your friend and have him join with you. Study the anti-bloop articles appearing in this magazine; learn the causes of blooping and operate your set to prevent it. Then you will be doing your part toward clearing the air for better Radio reception.

Test Your Set

H. J. K. suggests that owners of Radio receivers make the following test to determine if their sets bloop. Tune in some station and then turn up your rheostat or manipulate your regenerative control until the tube is in oscillation and the set starts to howl. Then shut off the set and get in touch with some friend and ask him to tune in the same station while you tune. If he gets a squeal you can be assured that your set is blooping. If you are, correct it.

Be a regular fellow and do your share.

Broadcast River Stages

CINCINNATI.—Reports of the stages of the Ohio river will be broadcast from Crosley WLW here at 10:00 every morning except Sunday when it will be given at 10:30 a. m. Central time.

DUNCAN SISTERS ON THIS WEEK'S COVER

THREE guesses as to the individuals who compose our "Study in Black and White" on the Radio Digest cover this week.

Hush! Wait a minute! You are all correct, the whole million of you!

Of course, one guess was enough, it could have been none other than those inimitable darlings, the Duncan sisters, Vivian and Rosetta.

They are regaling Philadelphia audiences with their big musical hit, "Topsy and Eva." Sometimes they sing to the Radio audiences of WLIT, which furnished the picture on the cover. Rosetta says the microphone always gives her a thrill. She likes to announce as well as do her regular stuff. Rosetta takes the piano to give the regular accompanist a rest when they are guests of the studio. Other members of their cast also have participated in the WLIT programs. You probably know that Vivian plays "Eva" and Rosetta "Topsy."

PLEDGE CARD **Radio Digest** PROGRAMS Illustrated I WON'T BLOOP CLUB

Reg. U. S. Pat. Off. & Dom. of Canada

I pledge myself to operate my Radio set to reduce radiation or blooping. If I am unable to make my present set operate properly, I further pledge myself to replace it with a receiver that will create less interference.

Broadcast Experiences of Deep-Sea Divers in Sydney

SYDNEY, Australia.—A recent novelty, so far as Australia was concerned, was the broadcasting of the experiences of a couple of divers on the bed of Middle Harbor, Sydney, seventy feet under water. One of the divers was a professional and the other a member of the Royalty society who took the dive in the interests of scientific knowledge.

Milwaukee Elks' Minstrel Show Broadcast by WSOE

MILWAUKEE, Wis.—WSOE, the school of engineering station, recently broadcast by remote control the annual minstrel show of the Benevolent Order of Elks held at their club house. A three-hour performance was held, with choristers, end men and Chauncey Yockey, interlocutor. The show was arranged by the Wisconsin News.

Looking Ahead

Radio Apparatus Manufacturers Estimate That There Are Now 20,000,000 people in the United States who may be listed as regular listeners in. There are about 550 broadcasting stations. Uncle Sam has to keep a ministrative eye over the common rights and welfare of this large population and has delegated the job to Secretary Hoover. Read about Hoover here next week.

Hard Working Housewives Who Have Little Time to Visit beauty parlors and sanatoriums, but still desire to appear lovely to the eye of the man of the house, are finding much comfort and a measure of practical advice through a series of triweekly matinees with experts at the microphone of KOA, Denver. Read how it is worked out in the next issue of Radio Digest.

Radio Stations Now Broadcasting the Dramatization of the Radio Digest especially written serial, "A Step On the Stairs," comprise the strongest league of American stations ever brought together to handle a single feature. The story grows. Situations are becoming more and more complex and mystifying. Don't fail to read the fourth installment next week.

The Second Article on the Four-Filter Super which appears in next week's issue, goes into the laying out and drilling of the panel, sub base and shields. The alterations necessary in some of the parts to adapt them perfectly to this outfit, which is the technical editor's own set, are gone into also.

The Campaign Against Blooping and Man-Made Static, of which the series running in current issues is the backbone, has now covered blooping from all angles and reaches the locating and eliminating of electrical interference as evidenced by hums, clicks, buzzes and hisses. If bothered by some such unknown trouble, these coming articles will enable you to help receiving conditions in your neighborhood a great deal.

NEWS BRIEFS FROM THE BROADCASTERS

GAY MUSIC OF "PINK LADY" KGO DRAMATIC EVENT

Rotary Boys Band at WTIC—WRC Chooses Champion Fiddler—French Songs at WJZ

The famous musical comedy success, "The Pink Lady," the story of which is based on the French farce, "The Satyr," will be produced over KGO, Saturday night, March 20, at 8 p. m. Pacific time. Carl Anderson, of the KGO staff, will direct the production before the microphones.

* *

WTIC will offer a program by the Rotary Boys band of fifty pieces at 8:30 p. m., Saturday, March 13. This band is sponsored by the Hartford Rotary club and is under the leadership of William Tasillo, director of the Cinderella Ballroom orchestra.

* *

Through contests at WRC, Washington, D. C., the champion fiddler of the Middle Atlantic states has been chosen. "Uncle Am" Stuart of Bristol, Virginia, is ready to match his honors against all comers.

* *

One of the bright spots in WJZ's program last week was the recital of French songs by the internationally known soprano, Madame Adele Bliss.

* *

"An Hour in the Shadow of the Shamrock" is the title under which the WLW instrumental trio and the Crosley male quartet will present a program through WLW, Cincinnati, Wednesday, March 17, at 10 p. m. Central time. Another St. Patrick's Day celebration to be broadcast through WLW will be the entertainment features of the Irish Fellowship club, which will be picked up from the Hotel Gibson roof garden from 6 to 10. Johanna Grosse, studio organist of the WLW staff will also provide a program of Irish melodies during her concert which begins at 11 p. m.

* *

A replica of a musical program broadcast through Station WL of Olso, Norway, will be sent into the air through WLW, Cincinnati, Tuesday evening, March 16, by the Formica concert orchestra, under the direction of William C. Stoess.

* *

Jazz specialties, trick songs, blues, fox-trot ballads and a liberal sprinkling of old-fashioned waltz numbers are now being given the ethereal right-of-way in a late dance program at KOA every Wednesday evening, featuring Eber Grubb's Broadmoor Rhythm Rustlers.

* *

Frances G. Weller, whose name became well known through her work at Station KQV, Pittsburgh, has given up her Radio work for the time being. She will write critical articles for the Musical Forecast.

* *

Songs of the South interspersed with the very latest popular dance tunes are put into the air nightly by WSM, Nashville, Tennessee, when Francis Craig and his orchestra open the regular evening broadcasting period with their dinner concert from Hotel Hermitage.

* *

An outstanding feature among the Radio programs of Chicago broadcasting stations is the new Chicago theater concert ensemble, heard every Sunday over WGN, during the Chicago theater Sunday noon musical hour.

* *

The little golf bug is beginning to bite. Many Radio devotees will want to hear Archie Simpson, professional of the Clovernook Country club and instructor in the Business Men's club, Cincinnati, tell how to play the game. He will give fifteen-minute talks every Thursday evening at 6 p. m. Central time, through WLW.

* *

Harry Jenson's Night Hawks, known in southern Connecticut as the Palais Royal orchestra, now broadcasts Friday evenings at WTIC, from 11 p. m. to midnight. This orchestra needs little or no introduction to Connecticut fans.

* *

WJAZ, Chicago, is varying its program to please all listeners by devoting two nights a week, Wednesdays and Saturdays, to continuous dance music from the Opera club.

* *

The famous Hindoo poet, philosopher and lecturer, Dhan Gopal Mukerji, gave a dramatic talk at WMC, Memphis, last week. "The Spirit of the Jungle," was the subject of the lecture. Mr. Mukerji, whose home is in Calcutta, is a graduate of several universities.

WILL FORECAST RADIO RECEPTION

DOES BROADCASTING HURT BOX OFFICES?

MANAGERS OF THEATERS ANSWER PRO AND CON

Shubert Interests Defend Broadcasting As Aid in Increasing Receipts Of Productions

NEW YORK.—Does broadcasting a play hurt the box office receipts? That is the question that theatrical managers have been asking themselves for some time. Their answers have been both pro and con. Now the Shubert interests have come out in the defense of broadcasting.

Early in October, Lee and Jake Shubert permitted WJZ to broadcast their play "The Student Prince." The week following the broadcasting of the play, the receipts fell off, but, it did the same at the other theaters, so it was not traceable to broadcasting. However, after two weeks, the advance sale of seats began to jump until the house was sold out each week.

Try It on "Princess Flavia"

The road companies of the show did a tremendous business, all of which was traceable to the fact that the Student Prince was broadcast and people throughout the country heard it.

Now, after four months, the Shubert brothers have again broadcast another of their plays. This time it was the show "Princess Flavia," starring in the leading role Evelyn Herbert, daughter of the late Victor Herbert, who was known for his music in numerous musical comedy and operetta scores.

The play was broadcast through WJZ here on March 7, from the studio of WJZ. At the present time, the mail received indicates, the box office receipts will increase instead of falling down. Perhaps after all this success on the air, other skeptical theatrical managers will permit their shows to be broadcast.

222,000 TELEGRAMS GREET KFNF PARTY

Anniversary Celebration Features Continuous Program Lasting Thirty-Four Hours

SHENANDOAH, Ia.—If telegrams are an indication of popularity, then KFNF, the Henry Field Seed Company station here, must be one of the most popular stations in the country, for on its recent anniversary celebration, featuring a continuous program lasting thirty-four hours, over 222,000 telegrams were received.

And they are still coming in! In addition, the letters have been keeping the Shenandoah post office busy, and no effort has been made to count them.

The anniversary program began at noon one day and continued through to 10 p. m. the next night. Over ten thousand people visited the KFNF studios during the two days.

Transportation Clause Threatening Radio Bill

Believe Commerce Restrictions May Prove Stumbling Block

WASHINGTON.—Considerable talk and speculation has resulted from the amendments to the White Radio bill by the merchant marine and fisheries committee among members of the house and officials of the government connected with Radio activities.

The prevailing opinion is that Section 4, which prevents the transportation in interstate commerce of Radio apparatus or tubes upon which restrictions are placed, may be the cause of considerable discussion and perhaps be a serious stumbling block in the way of passage of the bill.

The White bill has been placed on the house calendar where it would take its turn among a large number of other bills. It is the hope of Representative White that a special rule may be obtained for the immediate consideration of the Radio bill.

Karolus Cell Trials Held

BERLIN.—Trials of the Karolus cell process of telephoto-transmission are being made at present between Berlin and Leipzig, daily.

BLIND PIANIST GETS REPERTOIRE BY AIR

PHILLIPSBURG, Kansas.—Although George Newell is totally blind, he is able to keep abreast of the musical times and satisfactorily fill the difficult position of pianist in a motion picture theater, here. Through long practice, he is able to memorize a composition at one hearing, and he writes that each evening after the show is over, he goes home and listens to Station KFI. By this method he keeps his repertoire up to date.

RADIO FIRST TO INTRODUCE STAR

Radio scored a decided "scoop" over moving pictures recently when, two nights after she had created a sensation with the Metropolitan Opera at New York, Miss Marion Talley, 19-year-old Kansas City girl, was introduced and "shown" to the Radio audiences through WJZ and a number of other stations throughout the country.

DONATE RECEIVERS TO HOMES FOR DISABLED

Listeners to Station WGCP Asked to Name Institutions

NEWARK, N. J.—The Splitdorf Electrical company of this city has announced its intention of donating ten complete Radio installations to ten deserving institutions for disabled aged or sick, the presentations to be made on April 15.

In order that these ten sets might go to the most deserving homes, the Splitdorf company is asking listeners of Station WGCP to pick the institutions which will benefit most from the use of the sets.

Spokane Fights Interference

SPOKANE, Wash.—The Radio Listeners association here is planing a series of conferences with Spokane's wholesale and retail Radio dealers for the purpose of obtaining their cooperation in the association's campaign for elimination of interference, according to an announcement by Dr. C. Hale Kimble, president.

Judge Has "Revenge" On Radio Announcer

Broadcaster of Time Signals Finds No Judicial Leniency

WASHINGTON, D. C.—Revenge is sweet, especially when it can be brought about in a perfectly legally constituted manner.

This is the opinion of Judge John P. McMahon, ardent Radio enthusiast, who was presiding over traffic court when Walter C. Myers, broadcaster of the Arlington time signals from NAA, was brought before him to answer to charges of speeding.

Myers admitted exceeding the speed limit, but stated that he was hurrying to the broadcasting station to start the ten o'clock signals.

Judge McMahon told the defendant that many people would not care if he never got there to interrupt the political and musical programs that are on the air at that hour. Thereupon the magistrate imposed a fine of $15.

GOVERNMENT IS WORKING ON PLANS TO GIVE OUT REPORTS

Station WCAJ Pioneering in Effort and Bureau of Standards Experimenting to Make Information as Reliable as Weather Reports

By Thomas Stevenson

WASHINGTON.—Forecasts of Radio reception conditions by the government, somewhat along the lines of dialy weather reports, is a development anticipated for the near future.

Such a daily service to the millions of Radio fans has been considered by several government agencies at Washington. Experimental work has been done by the bureau of standards to establish the connection between the weather and Radio reception.

Officials of the bureau of standards are none too well pleased with the progress of these experiments, but they are confident the time will come when they will know more about it.

WCAJ Already Doing It

Weather bureau experts do not believe the experimental work has yet progressed to a point where it would be safe to forecast whether it might be possible in the near future to prepare daily Radio reception forecasts.

Washington officials have been watching with particular interest the experiment of the Nebraska Wesleyan university in preparing daily Radio forecasts.

For the past several months, J. C. Jensen, of the department of physics of the Nebraska Wesleyan university, has prepared a daily Radio reception forecast which is broadcast through Station WCAJ at 4:30 p. m. Central time.

"As a result of years of study and investigation," says Mr. Jensen, "the United States has come to be depended upon as a reliable source of information concerning weather conditions. Farmers cut their hay when fair weather is predicted, and city folks delay their automobile picnics over unpaved roads when the forecaster says 'Thunder storms probable.'

Many People Dependent on Conditions

"With so many people now depending largely on Radio for their entertainment, and with the quality of that entertainment varying so much from night to night, any plan by which receiving conditions may be predicted with reasonable accuracy should be of general interest. If the Radio fan can be forewarned that static will be unusually bad, he can change his plan for a Radio party, and do something else.

"If he knows beforehand that signals will be weak from the southeast but good to the north and west, he can save time by tuning directly for Los Angeles, or Denver, or Minneapolis, instead of saying 'Why can't I get Havana tonight?' after a prolonged effort. That this very thing may soon come about as a regular feature of weather forecasting is not at all improbable.

Progress of Studies to Date

"Many studies have already been made in this field. Among them may be mentioned the researches of Dr. L. W. Austin of the naval laboratory at Washington, Dr. G. W. Pickard of Boston, Professor Van Cleef of Ohio State university, the American Radio Relay league, and the bureau of standards.

"It is well known that heavy static is worst in the southeast quadrant of a low barometer area, and that the cloudy to clear days following the passage of a storm are favorable for Radio work. It is also known that signals are stronger at night than in the daytime, and that fading is much less troublesome in daylight.

How WCAJ Reports Are Made

"In the Radio laboratory at Nebraska Wesleyan university the measurement of signal audibilities and the recording of fading curves has received considerable attention. A paper on the relation of Radio audibilities to weather conditions, by M. P. Brunig, was published three years ago in the Monthly Weather Review. Being located in the center of the United States with broadcasting stations in every direction, this laboratory has unusual opportunities for plotting fading curves from the four points of the compass, and hence from regions of different

Indians Originate Our Motif

NOTED Composer Holds That Typically American Music Is Derived from Chants and Songs of Love and War by Noble Red Man

THANKS to the loud speakers and the head phones we laymen are learning more about the finer things in music. It comes to us in profusion. There are so many kinds sometimes we are a little confused. A twist of the wrist and a bubbling streamlet comes purling into the room from one direction. We bathe in it until the idea occurs to us that we would like something different. Another turn of the dial and another stream fountains into the room with a different character of music.

We discover that different nations produce their characteristic melodies. The Russians have their "Volga Boat Song"; the Italians their high-keyed arias; the Germans their thunderous harmonies; there are the plaintive strains of the Orient; the vivacious and rippling cadences of the Spanish themes. The French, English, Scotch and Irish all have their peculiarities.

But what is the characteristic American motif?

Here we are, a melting pot of all the nations, with original American stock running back not more than four hundred years and that stock coming from the other side of the world. Out of the conglomeration of human breeds have we developed a distinctive type of music?

"Yes, indeed, we have," responds Thurlow Lieurance from the Sears-Roebuck station, WLS, Chicago. "Our purely American musical strain ante-dates the arrival of Columbus. It is voiced by the aboriginal American—the red man of the forest, the lake, mountains and plains.

"It breathes the moaning and sighing of the trees, the laugh of splashing waterfalls, radiance of the flowers, the murmur of the deep flowing rivers, the trill of the birds, the cry of the untamed creatures of the forest—each a living voice in the heart of the Indian as he weaves them into the song for the lover, worship of the unseen spirits, praise of the warrior, voice of the hunt and accompaniments for his many dances."

And Mr. Lieurance should know for he has made the study of Indian music his life work. He has transcribed the primitive refrains into modern scores, which, in turn, have been translated into all the civilized languages of the world. Nowhere else is there a North American (*Continued on page 24*)

Thurlow Lieurance, composer of "By the Waters of Minnetonka," calls Indian music American motif.

ONLY the American Indian is entitled to credit for a distinctive and typical theme for American music, according to Thurlow Lieurance, well-known pianist and composer who presented a recital recently over WLS, Chicago. His famous song "By the Waters of Minnetonka," was inspired while visiting a Sioux village in South Dakota where he heard the Indians sing the legend of the lovers of opposite clans in their own tribe who ran away and submerged themselves with their canoe beneath the waters of Minnetonka.

Morning Cloud, (above), sweet singer of the Sioux singing the Minnetonka legend into the WGY microphone at Schenectady. Below are other members of the Sioux warriors who visited the WGY studio with Col. Miller (seated, center) and old Ezra Meeker of Oregon trail, seated at left.

Below are members of the Onondagas who broadcast their idea of typical American music from the WGY studio. It had a faint resemblance to Swiss yodeling, critics said.

WMBB Owner Believes in U. S.

ANDREW KARZAS Proves "America Is Land of Opportunity." Makes Millions in Few Years Building Theaters and Ballroom Palaces in Chicago and Its Suburbs.

By HAROLD P. BROWN

SOMETIMES good citizens weary of the phrase "America is the land of opportunity." They think it is trite, merely obvious, just something to say when one has mentioned the weather and the state of one's health. Ponderous orators work it to death during the month of June when they stand up before the graduating classes and proclaim impressively that "America is the land of opportunity."

But I know a man who takes it seriously, always did take it seriously and made millions because he did. His name is Andrew Karzas and he is the power behind the generators of the WMBB broadcasting station located on the Trianon, "the world's most beautiful ballroom, Chicago."

He's a terribly shy man for a pusher and a get-there. He loves dignity and abhors blatancy. He won't thank me at all for this story because I have so much to say about him. He would rather that I utilize this space to describe the alluring charms of the truly remarkable ballroom. But I believe Radio listeners will be more interested in this personality who believes in American opportunity and who made WMBB possible.

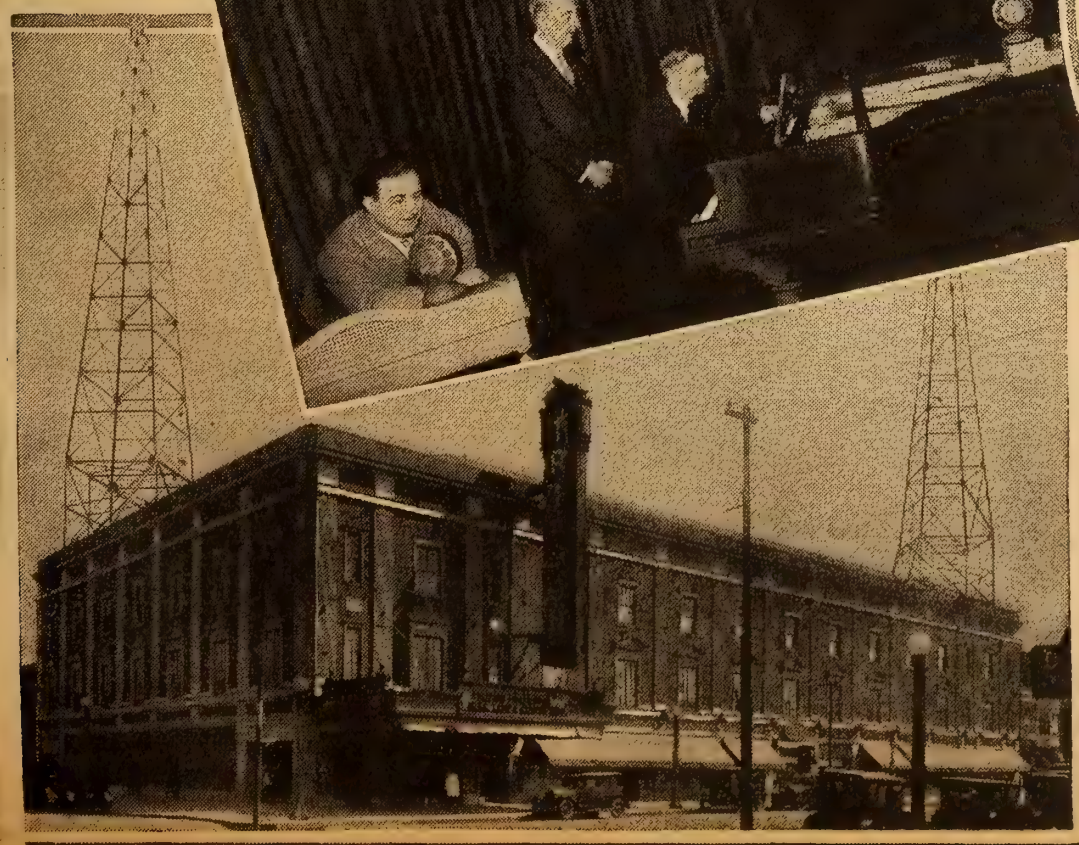
When she is not engaged in musical drama, Miss Lola Schofield (above) has helped make the WMBB programs pleasant with her dramatic soprano voice, while lively dance music may always be depended upon from Dell Lampe's Syncopators (below). They finish by singing "W-M-B-B Chi-ca-go".

ANDREW Karzas came to America from Athens because somebody over there told him that opportunity was here. He is of good parentage, has uncles and cousins who are up in the government and army over there but that was not the kind of opportunity Andrew wanted. It was not the kind of opportunity he pictured for himself in America. The family purse did not afford him any special advantages in getting his start. But he had a head and a sturdy body and he went into business immediately.

Pennies, nickels and dimes became dollars and dollars became opportunity. He took another step on the ladder and I first knew him when he moved into a little stall on Sixty-third street, east of Cottage Grove avenue, lately abandoned as a shoe store. He called it the "De Luxe Theater." His younger brother, William, joined him and the two of them put in long, arduous and industrious hours. I don't believe the place would seat 200 people but every seat was doing its share. A year or two of that and Andrew moved into the Drexel, which was the real de luxe theater in the next block.

He took a great interest in Woodlawn and the neighborhood affairs. School children were given special entertainments, sometimes with all the profits going to a local cause. But everybody took a liking to Karzas. The mothers felt kindly toward him and the fact that he was a Greek made not the slightest difference to the rather exclusive Woodlawn Business Men's association.

Director J. B. Lampe (standing) in the WMBB studio in the Trianon ballroom (below).



Andrew Karzas (above) who found American opportunity no idle saying.

IN FACT the community was proud of him. He certainly was showing the rest of us around there that America is the land of opportunity. It was not hard for him to have an ordinance passed the next year condemning an alley in the block across the street. It was of no use to anyone but himself, anyway, as he owned all the property to the point where it connected with an adjoining alley. A row of stores went down under the sledges of a wrecking company and in their place there sprang up a picture theater that was declared at the time by the trade papers to be the most beautiful picture theater in America—"The Woodlawn."

It was a tremendous success. At every performance people stood in long lines waiting to get in. It made big money. Andrew had an office in the basement. He still has his office there. Then came the first realization of his most ambitious dreams. He went to Europe and looked around for an exact crystallization of his ideas, came back and built the Trianon (*Continued on page 8*)

a STEP ON the STAIRS

By ROBERT J. CASEY

Radio Dramatization by FRED SMITH

Illustrations by HILMER C. OLSON

Synopsis of Preceding Chapters

GRIM and ghostly mystery settled down on the old manor house of the Turners on Pelican Bay shortly before events chronicled in this story. The manse had come down through one hundred and fifty years of sea-faring Turners and then Jeremiah Turner was found dead with a bullet in his head on the hearth of the gun-room floor. They carried his body out the door reserved exclusively for the removal of the dead masters of the house. Soon after, the body of Peleg Turner, a brother, followed the same course. He seemed to have died from natural causes.

Lawyer Ardwyn, his executor, summoned the relatives for a weird seance in the deep shadowed hunt-room, lighted only by a candelabra. A letter left with the attorney had stated that the departed Peleg would attempt to communicate his discoveries beyond the grave through the Radio. The story opens with the party assembled. Only John Carton, a favorite nephew, is missing. He had been suspected of the crime. Henry Millis, the caretaker, had been startled by the arrival of a man in a gray overcoat from the stormy waters of the bay. The man said he had been called to the meeting, but Hari Singh reported later to Henry that he had never arrived at the house.

The clock struck twelve. There was a scratching sound in the receiver. A few syllables were uttered. Then followed an interruption. The voice of the announcer at FYX, a nearby broadcasting station, called for help and a shot was fired. The listeners who were sitting in absolute darkness rushed for the locked exits in confusion. They already had heard ghostly sounds on the stairs and a mysterious tapping similar to an SOS signal. Finally, when a bit of candle was lighted, it was found that Milford Jones, one of the guests, was missing.

Tolliver, another guest, was appointed to investigate the FYX shooting. He found that a stranger had broken into the broadcasting station, shot the engineer and escaped unidentified. The wounded man was taken to a hospital but Tolliver discovered a trail of blood and picked up a letter which he handed to Ardwyn at the table. Just as the lawyer was about to open it Mary Williams, a friend of Carton, and sought in marriage by another cousin, Henry Graves, accidentally knocked the only candle to the floor.

In the darkness that followed Ardwyn felt the hair of a woman brush his hand and his wrist was caught in a savage bite. Another candle was lighted. The letter had disappeared.

THE STORY CONTINUES.

Mary Williams accepted the bit of jewelry from Ardwyn's bandaged hand and looked at it complacently. If the lawyer, watching her from beneath lowering eyelids, had wished to test her, he received no satisfaction.

CHAPTER FIVE

Trail of a Tigress

A SENSE of guilt sat heavily on the harried occupants of the hunt room. Men and women moved restlessly in their chairs and eyed one another appraisingly the while they kept up that brave show of nonchalance which is man's instinctive armor against fancied suspicion. Ardwyn, intent upon his bleeding wrist, gave no sign that he noticed what was going on about him. The clock struck one. Aunt Helen sighed, and in doing so acted for virtually all of the eleven who had braved the terrors of Peleg Turner's house.

"Only one o'clock," came a voice from the shadows. "Only an hour and it has seemed like three worthless lifetimes."

Hari Singh, calm as always, came forward to inspect the lawyer's wound.

"I can dress it, Sahib," he said. "The cut is only superficial. But of course such things are dangerous unless we attend to them at once."

"I suppose so," Hari Singh," replied Ardwyn. "But I can speak only through hearsay. I cannot remember ever having been chewed up by a woman before.

"I think, ladies and gentlemen, that it might be well for us to interrupt this session. It was Mr. Turner's wish that we continue this effort to communicate with him as long as it might be humanly possible to do so. But some of us might not be able to stand a continuation of this experience without a recess. You have coffee, have you not, Hari Singh?"

"Yes, Sahib, there is plenty of coffee in the kitchen and there are sandwiches in the ice box. I can attend to that in a moment after I bandage Sahib Ardwyn's hand."

Aunt Helen, who had been sitting fanning herself distractedly, was suddenly brought back to her normal self.

"Mr. Ardwyn," she called. "Mr. Ardwyn. Couldn't I make the coffee? I'd be very willing to—and I could serve the sandwiches, too, if we all could go into the library where we'd have some light."

"That might be a good plan, Mrs. Holmes," agreed the lawyer. Naturally I should like to have my hand attended to and I do not know how long it will take Hari Singh. At one-thirty we shall make another attempt to hear the message of Peleg Turner over the Radio. Until that time you may go wherever you please, ladies and gentlemen, although I must ask that you do not leave the house whatever the provocation."

Instant approval from all quarters of the shadowy room greeted the suggestion, and almost before the lawyer had finished speaking most of the guests were on their feet—trooping toward the door after Aunt Helen. Ardwyn had started to follow them when he noticed a slim figure in the gloom at the end of the table.

"Aren't you going, too, Miss Williams?" he inquired.

Mary Williams shook her head.

"No, Mr. Ardwyn," she said. "I feel too weak to walk even as far as the library. I think it may quiet my nerves a bit just to sit here and rest."

"You are sure you will not mind being left alone here in this room?"

"I shan't mind it at all, Mr. Ardwyn. There can be nothing wrong with the room, once the people have gone out of it."

The lawyer coughed queerly.

"That candle won't last long," he said. "And it will be dark in here when it goes out. Strange things happen here in the dark, Miss Williams."

"I feel that they might happen just as easily anywhere else in this house," she replied.

"Yes," he admitted with no hint of a double meaning in his tone. "Anywhere you might be it would not be at all illogical to expect trouble. Come, Hari Singh, let us get this job done."

MARY WILLIAMS settled back into the chair as their voices blurred in the outer hallway. The shadows seemed to settle down about her and she was scarcely discernible in the wavering candle light. She sat with her eyes half closed but she was very alert and tense and she was on her feet instantly when the door creaked slightly and a man stepped out of the hall into the halo of the candle.

"Henry Graves," she breathed half to herself. "What are you doing here?"

"I might ask the same of you," he answered easily.

"I stayed here because I wished to be alone," she told him. "I don't think I need to tell you that."

"And I came back here because I wished to be with you," he stated, mocking her tone and manner. "And I hardly think I need tell you that."

"Don't be foolish, Henry," she admonished him. "This is neither the time nor the place for one of your usual scenes."

"Ho hum," he said. "You do not know how beautiful you are Mary. There is never a place where I shall be able to look at you without loving you and there is never a time when I shall be discouraged from asking you to marry me."

"I have told you repeatedly that I don't wish to have anything to do with you."

"I know that, Mary, but I have not given up hope. There may be a time when you will need me . . . And I am not entirely convinced that tonight isn't the night."

"Just what are you talking about?"

"We understand each other, Mary. You are intelligent and I don't think lengthy explanations are necessary at all. I have asked you to marry me as a sort of personal favor many, many times. You know that."

"Yes, please don't bother to enumerate. Go away, Henry, and leave me alone."

He looked at her for a moment unperturbed.

"I'M NOT going to go, Mary, until I have said what I came to say," he declared. "When I have finished you can decide what you intend to do. I have talked of love for love's sake long enough. Now I am going to go at this matter from a business standpoint."

"What?"

"I know it is a bald way to put it, but my meaning is clear. You have gotten yourself all tangled up in a nasty mess tonight, Mary. You've gone one step too far and you'll never get out of it by your own wits. You need help. That's what I am offering."

"Mr. Graves, I haven't the slightest idea what you are talking about. You may be crazy or intoxicated. But in either event you are insulting."

"I am offering to marry you, Mary. I am offering to keep your secret and get you out of here so that nobody will dare breathe a suspicion against you. But I am candidly offering my aid on condition that we leave here at once and go to the minister's house in Portsmouth."

HEAR This as a Play from Your Favorite Station. The Schedule Appears on Page 13.

"I have a light," came the voice of Hari Singh. . . "Why it's Mr. Ardwyn with blood all over his face. . . And Miss Williams. . . Stand back, please. She's not dead. . . What's this in her hand?"

Even in the candlelight the increasing whiteness of the girl's face gave unmistakable evidence of her anger.

"Henry Graves," she said. "I hate you. I have always hated you. I could see in you just the oily scoundrel that you are showing yourself to be. What have I to conceal? What secret have I that needs the protection of a man like you? Get out of here before I call Mr. Ardwyn and have you thrown out."

"I said I should stay here until I told you what I came to tell," retorted Graves calmly. "And I shall do that, Mary. I don't think you will care to call for help from anyone but me. I may state the case:

"Hari Singh has told me that he saw you near this house on the night Jeremiah Turner was shot. You were out late on the night when Peleg Turner died. A moment ago some person—some woman—bit Frederick Ardwyn on the hand. Your chair was empty. I wondered what you were up to and I made sure. You're a queer girl, Mary, but I don't mind that. I'll take care of you if you give me the chance."

When Mary Williams replied, her voice was hoarse but otherwise perfectly controlled and she clipped her words with icy precision.

"Are you insinuating," she asked, "that I killed Jeremiah Turner?"

He sighed as if in slight patience with such trivialities.

"I don't care whether you did or not, Mary," he said. "I love you. I—" He stopped suddenly and both sat upright.

"THE step on the stairs again," whispered Mary. "Someone is coming down the stairs"—and then she breathed audibly in relief as the figure of Ardwyn came into silhouette momentarily against the light that filtered from the library.

"It's Mr. Ardwyn," she whispered. "You had better be going."

"Your answer is no, then," he asked harshly.

"It will always be no," she stated. "And I warn you that if you cross me in any fashion I shall scratch your eyes out."

"Very well, Mary," he said as he arose. "I can guarantee that you will get the opportunity. If Ardwyn weren't coming in here the chance might come sooner than you had expected."

"Going out, Mr. Graves?" came Ardwyn's voice. "Well, no matter, I shall keep Miss Williams company myself." Graves did not reply as he stalked out.

"The evening seems to have gotten onto the young man's nerves," observed the lawyer.

"Yes," admitted Mary. "He seemed displeased when I told him that I wished to be alone."

Ardwyn laughed.

"And I suppose you are suggesting that other company might not be any more welcome," he said. "Well, I came purely as a matter of business. I had something to say to you that I thought had best not be said before the others. This is your brooch, isn't it?" He held a trinket under the candle light where she might see it plainly.

"Yes," she said. "It is mine. I didn't even know that I had lost it."

"That is natural enough, considering the excitement of the last hour. There is nothing significant in the loss of a brooch or in failure to notice its loss. But what I wanted to tell you is that it has been in queer company. The woman who bit my wrist a moment ago when the candle was overturned and the letter was taken from the table there, was wearing this brooch. It got tangled in my watch chain when I tried to catch her . . ."

CHAPTER SIX

A Door Opens

MARY TURNER accepted the bit of jewelry from Ardwyn's bandaged hand and looked at it complacently. If the lawyer, watching her from beneath lowering eyelids had wished to test her, he received no satisfaction. Her manner was quite as it might have been had he found the bauble in the street and returned it to her in the full light of day instead of here in the most malign room of an accursed house.

She laughed, a bit nervously, perhaps, but without effort.

"It would be easy to convict me on this evidence," she admitted. "I should have left the brooch at home. Someone may have dropped it there just to direct attention toward me. That is possible of course."

"The woman who chewed my wrist was wearing the brooch, Miss Williams. It is hardly possible that she could have foreseen she might get it entangled with my watch chain."

"It is very puzzling," the girl agreed. "And I have no brains for puzzles. I don't like to think. It makes my head ache."

Ardwyn made a gruff noise in his throat.

"On that point, Miss Williams, I respect you very much indeed," he told her. "You need not try to mask yourself from me. You would be a dangerous foe."

"I'm not at all dangerous," denied Mary Williams. "But I am upset about all this. Mr. Ardwyn, tell me the truth. Why are we here?"

"I have already told you everything I know about it. Peleg Turner's last letter was self explanatory."

"Bosh," she said with some heat. "There is something more to it than a crazy seance with a Radio set. I have admitted that I am simple, but I am not that simple.

"Something has been going on in this room that cannot be ascribed merely to the panic of the weird crew that you have assembled here. I have felt that all along."

"I have felt it, too, Miss Williams. I shall admit that to you. And I shall admit something more. I know instinctively that the murderer of Jeremiah Turner is in this house at this moment." He paused significantly.

"You are looking at me, Mr. Ardwyn," Mary Williams replied with odd composure. "Am I to take it that you, too, suspect me of having been implicated in that?"

"SOMEONE else has suggested it?"

"Henry Graves suggested it. He wished me to marry him as the price of his silence. And now you . . ."

"I have not gone so far as to make such a suggestion, Miss Williams," Ardwyn broke in, "but I can say candidly that I do not fathom you. I should like to know, for instance, why you chose to stay here alone in this room after the others had left."

The girl murmured impatiently.

"I shall have to tell you that because there is no getting rid of you," she told him. "I stayed here because I expected somebody to come in through that front door and I couldn't trust anybody else in the place—not even you—to keep the vigil."

"Through the front door," the lawyer scoffed. "That is silly. I pointed out once before, tonight, that the door is locked and barred."

"I know that," the girl admitted. "I can't explain it any more than I can explain how a stage magician takes rabbits out of a hat. But I know this: the door was open once before while we were locked in here. One man of this company went out through it."

"Jones probably got out some other way."

"Any other exit was as closely locked as the front door, Mr. Ardwyn. One gets nowhere by substituting one mystery for another.

"When the door opened I felt the draft before Aunt Helen did," Mary continued. "Somebody brushed past me in the dark—somebody came in—and then somebody went out again.

"If legend is worth anything the one who went out probably will be a corpse by this time, but the one who came in first will be back again and the time won't be long now."

The lawyer looked at her in frank amazement.

"You seem to be very confident about this matter," he observed.

"I have every reason to be," she said. She leaned over the arm of her chair and picked up a pair of shoes.

"LOOK at these," she said, "extending them toward him—shoes—men's shoes. They are damp from melted snow—that shows that whoever wore them has been out in the storm since we came in here.

"On the other hand whoever wore them was suddenly frightened away and left in his stocking feet. It is natural to suppose that nobody could long wander about there through the drifts in his bare feet. Our intruder will be back here looking for his shoes."

"Why should he have taken his shoes off?" demanded Ardwyn, still skeptical.

"Whatever his purpose was in this room, he did not wish to be detected," the girl said. "Whoever it was came for some sinister purpose, not to listen to the Radio. I know that you don't trust me, Mr. Ardwyn. But I am asking you to stay here, now that you know what I know, and see for yourself what happens."

For a moment the lawyer was silent.

"Very well, Miss Williams," he said at length. "I shall stay here and I shall see what I shall see. But I may say in advance that once I find out

(Continued on page 29)

CLAIMS RADIO WILL LIMIT NEWSPAPERS

EDITOR DECLARES PRESS WILL BE SUPERSEDED

Predicts Papers Will Be Greatly Improved by Becoming Purveyors of Public Intelligence

LONDON. — Hamilton Fyfe, famous journalist and editor of the London "Daily Herald," the leading organ of the English labor party, has declared in evidence before the broadcasting investigation committee, that the daily newspaper as it exists today is destined to be superseded by Radio.

Mr. Fyfe expects no such change for a long time, but says the press should meet it ungrudgingly, and not put artificial obstructions in its way, as such a development will be advantageous both to the public and to journalists.

"Radio in the future," said Mr. Fyfe, "will be fitted not only in all houses, but to all trains, street cars, busses, and in all public places. In a short time we shall all carry ear phones about with us and be able to pick up messages wherever we are.

Describes Future Newspaper

"This will change newspapers from collections of entertaining scraps to organs of opinions, purveyors of intelligence for those who study world events. Those who regard papers simply as a help to passing time will find Radio news enough for them.

"Those who want full information, competent criticism, market details and prices, sport, literature, and art articles, or any other special line, will continue to read newspapers. The benefit to such people and to journalists will be great. Circulations will be smaller, prices higher, advertisements less important. Journalism will become once more a serious profession. Important news will not be sacrificed to snappy, spicy items, divorce case and murder trial reports.

'Sunshine Man' in Chicago with Joy

Billy B. Van, "Gay Paree" Star, Affiliates with WJJD to Organize Sunshine Club Chapter

CHICAGO. — Billy B. Van, "The Sunshine Man" and comedian extraordinary, whose work was prominently featured recently in Radio Digest, has come to Chicago. As a result, rays of sunshine are already radiating from the Moose station, WJJD, at Mooseheart, with studios in the Palmer House here.

When Billy came to this city he took steps immediately to form a new chapter of his Sunshine club. WJJD was elected and he began his work there for a month, starting March 1. He can be heard every Monday, Wednesday and Friday at 6:40 p. m. Central time. Tune in this stage philosopher and tune out all gloom and sorrows.

His work at propagating sunshine will long be remembered in Boston and New York. "Just going to spread a little sunshine in the Middle West," said Billy Van when interviewed, "so I'm working over WJJD."

Maybe you think that's all he has to do. No, Billy is a busy man. His main business in Chicago is manufacturing laughs as leading comedian in "Gay Paree," a musical comedy full of pep and merriment, and with much in its favor. It's showing at the Apollo theater here. Then he is a business man, too. He invented the formula for Pine Tree soap, the only soap that contains pine oil as a blended constituent and that will lather in salt water.

But then, you would expect Billy to invent soap — something to brighten up the dark corners.

Yes, while here he will run a Sunshine limerick contest, as he did in the East. The one held in Boston was won by a little blind girl, who received an expensive Radio receiver as first prize. The judges didn't know she was blind until after the prize had been awarded, but how well it all turned out!

Just smile away your troubles and everything will always turn out right, says Billy.

Program Aids War Vets

SPOKANE, Wash. — A Radio musical program held here recently netted $700 for the fund for disabled veterans of the World war, according to Mrs. H. B. Graybill, of the State Federation of Women's clubs, whose auspices it was under.

WEAF ANNOUNCERS CAUSE FAMILY ROW

NEW YORK.—A great controversy has raged for some weeks past in a New Jersey household, according to a letter received by WEAF. It all started over the announcing of WEAF causing disagreements among members of the family as to who was announcing. One member of the family would insist with positiveness that it was Graham McNamee. Another was equally certain that it was Phillips Carlin. The third, and youngest, argued that it could be none other than James Haupt. In order to preserve the peace in this home, WEAF has sent an announcing schedule which is adhered to.

BODY ACROSS WIRES BURNS OUT STATION

MONTREAL, Canada.—A charred body lying across several wires gave mute evidence as to the cause of the short-circuiting of the entire system of Station CKAC, La Presse, here, recently. The electrocution put the station out of commission and brought a loss of approximately $5,000, besides the inconvenience and embarrassment of having the program stopped. But no mourners of the dead victim have been located, as it happened to be just an ordinary little brown mouse. Every one of the fourteen rectifying, oscillating and modulating tubes, were destroyed.

J. B. LAMPE TAUGHT LOPEZ TRICKS

Among the bright lights of the many brilliant features of Station WMBB, Chicago, are the Lampes. J. Bodewalt Lampe (left) is the general director of the music at Trianon ballroom. His son, Dell, (right) directs the Dell Lampe orchestra and the Syncopators. The father taught Vincent Lopez much of what he knows.

WMBB BELIEVES IN U. S.

(Continued from page 5)

ballroom—the "WMBB—World's Most Beautiful Ballroom." The real society of Chicago—first families and all that—opened it for him. They simply overwhelmed him with congratulations. It was his first million-dollar enterprise.

The American Bond and Mortgage company found Andrew Karzas could be trusted with money as far as he wanted to go. He borrowed and paid his obligations when they were due. So other enterprises soon blossomed. East, west, north and south Karzas spread out. His judgment was unerring. Half a dozen theaters, some of them with investments running as high as $5,000,000, were under way. From Hammond, Indiana, where the Calumet steel development shot values skylarking in the course of a few months, he had the foundations of one of the finest picture theaters in the country under way. He bought a big corner at Cottage Grove avenue and Seventy-ninth street, in the heart of another big real estate boom. He recently opened his Northcenter theater, another palatial house. In June, the Woodlawn, the theater which put him in the millionaire class, will be torn down and a whole block of store buildings will go down with it for the square on four streets. It will be the location for his greatest and grandest—the most wonderful moving picture theater in the world.

On the roof of the Trianon spangles the antenna of the broadcasting station. It has been on the air for two years now. All of the beauty and charm, however, are within the four walls. The ballroom is an elliptical area, with a system of specially designed indirect lighting. It is adorned with gorgeous draperies, boxes, balconies, colonnades and a floor that is the ultimate of the engineer's skill.

J. Bodewalt Lampe and his son, Dell, were brought from New York to take charge of the music and it is the Lampe orchestra which furnishes the supreme delight of WMBB programs. Miss Lola Schofield, dramatic soprano, has been identified with the station since its beginning. The present announcer is "Colonel" Edwin House. The "colonel" derives his name through his reputation as a singer during the war in the army camps in France. He has traveled over the country as the leader of a cowboy band and is well known to vaudeville. The studio music is under the direction of Preston Graves who also serves as accompanist. The senior Lampe is nationally known as a composer and often writes the Trianon orchestrations. He writes special music for special occasions.

Is America the land of opportunity? Ask Andrew Karzas.

KGW in New Studios

PORTLAND.—Station KGW, here, recently dedicated the new duplex studios which have been under construction for the past two months. Both offices and studios are now on the eighth floor of the Oregonian building. The suite consists of two offices, a reception room, two studios and an announcer's booth and control room. A new 1,000-watt transmitter is being installed and will be on the air in April.

SEND THREE SOLOS AS TRIO BROADCAST

PLAYERS KEEP TIME BY USE OF EARPHONES

Organ, Cello and Violin Parts Picked Up at Different Points and Broadcast As One

MINNEAPOLIS.—WCCO, the St. Paul-Minneapolis Gold Medal station, presented a unique program recently when three soloists, located at points from 10 to 20 miles apart, played a trio which was sent out through the studio transmitter. In three different cities the artists played their parts into microphones and kept in time with the other two through means of earphones. The three parts were collected by the "fader" panel and so controlled and modulated that they went out on the air as one number.

The participants in the test were: E. J. Dunstedter, who played the organ in the State theater, Minneapolis; Oscar Baum, violinist, who played at the St. Paul studio of the station; and Lionel Bilton, cellist, who played before a specially installed microphone at the transmitting station eighteen miles northwest of Minneapolis and St. Paul.

Those who heard the broadcast said that it was impossible to detect from the results that the musicians were not all playing in the same room.

Hero of Sea Tells of Antinoe Rescue

Captain Fried Welcomed on Arrival and Program Is Broadcast from Salon of Steamer

NEW YORK.—Another milestone in the progress of Radio looms. Broadcasting stations are now trying to get a scoop over other stations in broadcasting nationally-known figures. When Captain George C. Fried and the heroic crew of the S.S. Roosevelt returned to this country, all the stations wanted to be the first to broadcast his homecoming address.

To Station WOR, in cooperation with J. Spencer Smith, president of the New Jersey board of commerce and navigation, goes the distinction of having arranged the first official welcome to be accorded in the United States to Captain Fried, on the arrival of the S.S. Roosevelt at Hoboken, N. J.

Program from Ship

Promptly at noon, Monday, February 15, the ceremonies were broadcast through WOR direct from the main salon of the S.S. Roosevelt and consisted of music and speeches of welcome and homage to Captain Fried and his crew. The ceremonies were opened with a speech by Thomas H. Rossbottom, general manager of the United States lines, presenting J. Spencer Smith, who in turn introduced Governor A. Harry Moore of New Jersey. Engineer-Commander A. Knothe reiterated the sentiment expressed in London recently to Captain Fried by His Majesty King George.

Captain Fried then broadcast his emotions on his safe return to the United States and included his experiences in assisting the stricken crew of the S.S. Antinoe. The U. S. A. Sixteenth Infantry band was ordered by Major-General Charles P. Summerall to attend the function throughout the ceremonies.

Given Police Escort

The function was given the approval of the state of New Jersey by the passage of a resolution in the state assembly recently. An embossed copy of the resolution was presented to the captain and crew of the S.S. Roosevelt by Senator J. Henry Harrison. A police escort preceded the party to the dock at which the ship tied up.

During the ceremonies Captain Fried was so overwhelmed by the speeches made that in the middle of the presentation of the copy of the resolutions he broke down and had to leave the salon of the ship and go to his rooms. Upon his return he was cheered by the crowds gathered for the event.

Dedicate New Broadcaster—Birmingham, Alabama Tech

BIRMINGHAM, Ala.—WAPI, the Victor Hanson broadcasting station of the Alabama Polytechnic institute at Auburn, Ala., was dedicated recently with a special program of music and speeches.

This new station is capable of sending with 1,000 watts of power, but it is probable the full capacity will not be used for some time. The station is of the latest design. It has a wave length of 248 meters, the same as WBRC of Birmingham, Ala., and WIOD of Miami, Fla.

BUREAU STRIVING TO FIND SERVICE AREAS

KNOWLEDGE WILL HELP IN GIVING WAVE LENGTHS

Zone of Real Effectiveness Covered by Broadcaster Is Much Smaller Than Expected

WASHINGTON.—What is the "complete service area" of a broadcasting station, and how far can absolutely reliable reception be obtained with a Radio receiving set? These are questions which the bureau of standards is attempting to solve.

According to Dr. J. H. Dellinger, chief of the bureau of standards Radio laboratory, "if we set up the most rigid standard of say complete service in adverse atmospheric conditions at all times of the day and night and year for the average crystal set, then the actual intensity measurements would seem to indicate that the radius of the circle served by a 500-watt station will not exceed ten miles; that a 5,000-watt station will cover about thirty miles, and a 50,000-watt station will not cover much over 100 miles."

Real Service Zone Is Small

More sensitive receiving sets and better atmospheric conditions, Dr. Dellinger says, greatly extend these distances.

"Actual operation of high-powered stations has proved advantageous," Dr. Dellinger adds, "in broadening the complete service area, but this area is much more limited than many expected. Subjected to the test of positive and reliable service at all times and all weathers, it will be found that the real effectiveness of a station falls within a comparatively small zone.

"For some reason or other, the area is not always a circle, and it varies in different parts of the country for the same power. The department of commerce is undertaking the important task of determining these service areas. This will give information on which to base more efficient allocation of wave lengths.

Fans Give Contributions To Old Contest Fiddler

Word Picture by Announcer Brings Gifts from Listeners

HARTFORD, Conn.—A number of Radio fans were so moved by an announcer's word picture of John Comfort, of Stafford, Connecticut, aged fiddler who took part in the state contest, that they sent contributions to the station and asked that they be passed on to Mr. Comfort.

WTIC's announcer, who sat in the wings, back stage of the theater, found several of the old gentlemen to be especially interesting characters and from time to time told the Radio audience his impressions. This led him to describe Mr. Comfort, who lives on the Stafford town farm and who had been obliged to sell his violin a number of years ago to pay for operations which, however, were unsuccessful in restoring to him the sight of one eye. He is 84 years old and found it difficult to rise from his chair when it came his time to play.

Radio Hits Japan Movies

WASHINGTON.—Radio interest has resulted in a bad slump in the revenue derived from motion pictures in Japan, according to a report to the department of commerce.

"UNCLE BOB" GIVES FULL TIME TO KIDS

CHICAGO.—Already having mounted the plane of "Radio's Honor Roll" because of a long line of wonderful achievements in his Radio work with the nation's young, "Uncle Bob," the erstwhile Walter Wilson, had nothing left to sacrifice to his chosen vocation than to retire from business life and devote all his time to his Radio activities and "The Curb Is the Limit" club.

That is just what happened. Work was stacking up. A steady stream of Radio letters and one thing after the other demanded more time than one man could give. He soon found that he had to choose between his office and Radio, but reflection upon the thoughts of thousands of his juvenile friends and the enthusiasm with which they sought him as their big friend, led Uncle Bob to step out of business life.

Thus, Uncle Bob is the big uncle of Westinghouse Station KYW, Chicago, where each day he meets his uncounted fireside listeners, and where for more than two years he found the inspiration that enabled him to carry on a noble work among the children.

Now that Uncle Bob has stepped out of the business world, we find him the devoted "Radio Uncle" of KYW, lending cheer and laughter to all and spending his spare time among the less fortunate youngsters in hospitals and occasionally making a personal appearance in nearby cities where he always is greeted by a horde of cheering youngsters.

Firemen Quartet Leader Killed

MILWAUKEE.—Herman Glander, a city fireman and leader of the Milwaukee Firemen's quartet which has been heard every other Tuesday over the Marquette University-Milwaukee Journal station, WHAD, was recently killed instantly when his car skidded onto a railroad crossing in the path of a fast mail train.

Station 6XBR Gallops Over Country Getting Broadcasts for Big Brother

Portable Broadcaster Picks Up Programs on Short Wave and Transmits Them to KFWB to Send Out to Listeners, Eliminating Telephone Connections

By G. L. King

TELEPHONE permits and extensions cut no figure in the young life of Broadcasting Station KFWB, Hollywood, California. KFWB ties in anywhere within automobile distance of its station through its little brother, the short wave portable, Station 6XBR.

For instance, Marion Talley, the brilliant young star of the Metropolitan Opera in New York decides to take a few weeks' vacation in California. Her whim is to go camping up in the hills near Los Angeles. While there she has consented to sing her "Caro Nome"—the song that brought her instantaneous fame in New York.

Frank N. Murphy (above) chief electrical engineer of Station KFWB who designed and built the superportable transmission set 6XBR.

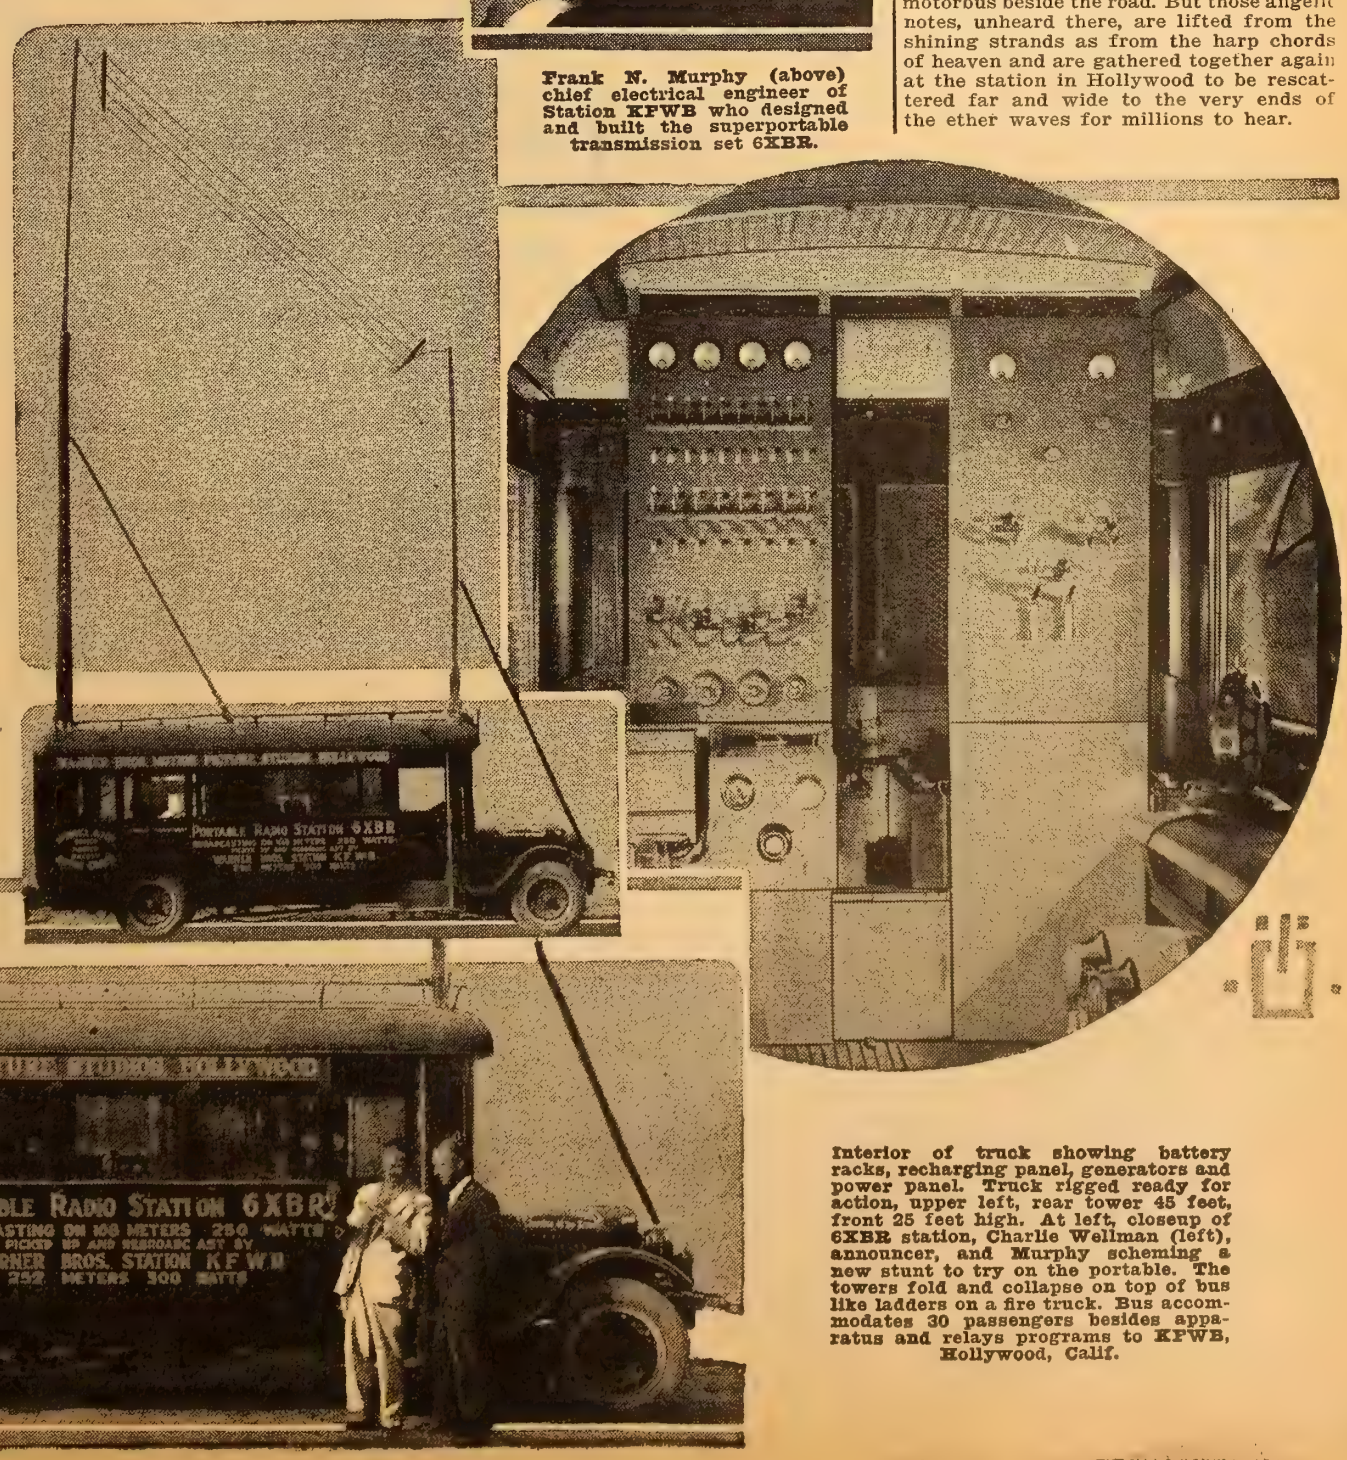
There are no phone lines near the camp. But a representative of KFWB wins her permission to broadcast. A little later the word is flashed to headquarters in Hollywood. An order goes out from the executive office. A man in a garage rolls out a machine that resembles an ordinary motorbus except that it has a rack of structural work folded up on the roof like the extension ladders on a fire truck.

The bus glides up to the curb in front of the KFWB studio. The technical staff, accompanists and announcer, waiting there, hop aboard and the bus roars down the street.

Out through the country and up into the hills it speeds away until it comes near to the camp where Miss Talley is enjoying herself. Then it runs into a by-way and the passengers climb out. There is a sound of metal against metal, clicks and snips and the apparatus on the roof of the bus rears itself to a height of 45 feet. There are two towers and between them stretches a four-wire span—obviously an antenna.

Follows then the rhythmic rumble of an engine and hum of generators, all in a subdued tone, scarcely audible twenty-five feet distant. The tubes are warming up. A stretch of cable is carried into the camp. The microphone is properly placed and tested. All is ready. Miss Talley steps to a position indicated by the director. Another artist has a violin. Perhaps there is a cello and flute. They begin to play and the voice of the 19-year-old girl, the wonder of the hour, pours forth the golden notes that so entranced her eastern admirers a short time ago.

There are no wires to the KFWB station—only the short antenna, atop the motorbus beside the road. But those angelic notes, unheard there, are lifted from the shining strands as from the harp chords of heaven and are gathered together again at the station in Hollywood to be rescattered far and wide to the very ends of the ether waves for millions to hear.



Interior of truck showing battery racks, recharging panel, generators and power panel. Truck rigged ready for action, upper left, rear tower 45 feet, front 25 feet high. At left, closeup of 6XBR station, Charlie Wellman (left), announcer, and Murphy scheming a new stunt to try on the portable. The towers fold and collapse on top of bus like ladders on a fire truck. Bus accommodates 30 passengers besides apparatus and relays programs to KFWB, Hollywood, Calif.

Champ Fiddler Almost Failed to Play In Finals Because Wood Pile Was Low

Uncle Bunt Stephens, After Placing in Preliminaries, Tells Henry Ford He Can't Compete Because He Left Home Without Leaving Enough Fuel Cut Up

NASHVILLE, Tenn. — Uncle Bunt Stephens, world's champion old-time fiddler, who won the blue ribbon at the recent contest held by Henry Ford in Detroit, and who was heard in a special concert from WSM, the National Life and Accident Insurance company's station here, on a recent Monday night, almost didn't win! His story is interesting.

When the contest was first started and the preliminaries were being held, Uncle Bunt didn't know whether he could get away from his little farm or not. He lives in a small cabin near Lynchburg, Tennessee. But he was finally prevailed upon and went forth into the back yard to chop a sufficient supply of kindling to last two or three days. He told his wife he had to go to Nashville and maybe to Louisville in the elimination contest.

He took third prize in Nashville in the first preliminary, just managing to be in the first three that went to Louisville. When he got to Louisville, he was awarded second prize in the second elimination. Upon his arrival in Detroit, he met Mr. Ford and told him very frankly that he couldn't stay for the big party, that he had to get back home.

Mr. Ford inquired as to why he had to get back home and he found out that Mr. Stephens didn't leave enough wood for his wife to last more than three days. The world's richest man caused a wire to be sent to W. K. Parks, his agent in Lynchburg, and told him to stock the house with provisions and anything the little family needed. He won first prize and was entertained in the palatial home of Henry Ford, located in Highland Park.

Mr. Stephens is a man well past life's meridian, although he couldn't be classed as old. He has simple tastes. His little home sits about a hundred yards back from the road, which is by no means a main highway. Life has been very hard for him in many ways, but he has remained serene.

He has practically no means, or did not have any until the blue ribbon was pinned on his thirty-three-year-old fiddle. But in spite of the fact that he is a poor man as regards this world's goods, he refused an offer of eight thousand dollars for his trusty fiddle, which hangs on a nail above his bed.

STATION WLW GIVES THIRTY-HOUR PARTY

CINCINNATI. — Thirty hours of continuous broadcasting is the station record established by the Crosley Radio corporation's super-power station, WLW, Cincinnati. This program marked the fifth birthday celebration of the station. Thousands of congratulatory messages were received from listeners.

To Investigate Station NAA

WASHINGTON, D. C.—The interdepartmental Radio advisory committee has been requested to take up the problem of interference of NAA, the navy broadcasting station at Arlington, Va., and make some suggestions as to how the trouble can be eliminated.

For months local Radio fans have been complaining of NAA because of harmonics it is apparently quite impossible to tune out.

Station WSWS Is on Air With Program of Features

CHICAGO. — WSWS, formerly WCEE, and now the new commercial station of the Bligh Whittington company with studios in the S. W. Straus company building here, is on the air. Preliminary schedules announced by Director Junkin indicate nearly all day will be occupied by features of interest to women, and entertainment and information for the farming territory of the middle, south and far west.

Add Two Beautiful Studios To Station WIBO Pick-Ups

CHICAGO.—Two beautiful new studios have been added recently to the pick-ups used by WIBO, Nelson Brothers-Russo Fiorito Orchestral exchange station here. The Uptown Conservatory of Music is the owner of the two studios from which broadcasts will be made over WIBO. Invitations, issued over the air and through the mail, brought several thousand people to attend the opening and dedication of the conservatory studios.

MUSIC TAX CLOSES REMOTE CONTROLS

Two Big Los Angeles Hotels Drape Input Panels and Others Are Just Standing By

LOS ANGELES.—Due to the exorbitant tax demanded by the American Society of Composers, Authors and Publishers for the year 1926, it is not unlikely that every remote control in the city of Los Angeles, as well as Hollywood, will be forced to go off the air.

Two nationally-known hotels, the Los Angeles Biltmore and the Ambassador, have hung dust drapes over their input panels already, and several of the other remote controls are staying on the air temporarily until something definite can be obtained from the society. It is generally understood that a remote control in Los Angeles has to pay a tax of $12.50 an hour, in addition to a yearly fee, which is also duplicated by the station itself while the remote control is on the air.

One remote control, that of Leighton's cafeteria, released through KHJ, has decided not to use the American society's works for the ensuing year, but the majority of the outlying studios feel that they should have access to all music or else sign off for good. And at present prices the game isn't worth the tax.

FORECAST CONDITIONS

(Continued from page 3)

barometric conditions, in the same evening.

"On the basis of these studies, a daily radio forecast is prepared by myself and broadcast from WCAJ at 4:30 p. m. The following forecast made for December 15, 1925, is typical:

"'For eastern Nebraska: A good Radio night; free from static. The best ranges may be expected from the east, northeast, and northwest. Considerable fading is probable from the south.'

"While it is freely acknowledged that factors other than weather conditions are involved in fading, and that the predictions are not always 100 per cent accurate, it must be borne in mind that weather forecasts are not unfailing, after a century of endeavor. It can at least be said that results thus far obtained are encouraging, and that with continued cooperation on the part of the investigators a satisfactory system of Radio forecasting may be expected in the near future."

School Given Station

CHAMPAIGN, Ill.—Boetius H. Sullivan, who last April made a gift of $100,000 to the University of Illinois, has made another gift of $11,500. Both donations are to be used in the construction of a Radio station in honor of Mr. Sullivan's father.

ATWATER KENT RADIO

Let the March winds blow you trade!

Here are five facts for your March calendar:

Every Sunday Evening
The Atwater Kent Radio Hour brings you the stars of opera and concert, in Radio's finest program. Hear it at 9:15 Eastern Time, 8:15 Central Time, through:

WEAF	*New York*
WJAR	*Providence*
WEEI	*Boston*
WCAP	*Washington*
WSAI	*Cincinnati*
WCCO	*Minn.-St. Paul*
WFI, WOO	*Philadelphia alternating*
WCAE	*Pittsburgh*
WGR	*Buffalo*
WGC	*Davenport*
WTAG	*Worcester*
KSD	*St. Louis*
WWJ	*Detroit*
WEAR	*Cleveland*
WLIB	*Chicago*

Fact No. 1

February being the best month in the year for radio reception, the second best is—what would you say? December? January? No, March—with April not far behind. The United States Bureau of Standards so reports after a year of testing.

Fact No. 2

In the face of the belief that radio is a fall and winter sport and September the month of the Great Revival, the public bought more sets and speakers last March than in September. Balmy April was as good a sales month as September.

Fact No. 3

Sturdy and reliable Atwater Kent Radio is distinctly year-round Radio.

Fact No. 4

Atwater Kent sales support knows no slump. Atwater Kent advertising is year round advertising.

Fact No. 5

The Atwater Kent Radio Hour is the weekly concert to which all other radio programs are compared.

* * *

Pretty strong facts? Put them under your hat. Use them on the next customer who tells you he's going to put off his purchase until next season.

TELLS WOMEN HOW TO MAKE APPLE PIE

BETTY CROCKER GIVES HER RECIPE FOR DESSERT

Although It Was First Made in England, Fruit Pie Is American Dish Through Conquest

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

FRUIT pies were known as early as the year 1600, and apple pie was probably among the first fruit pies. The pies of those days, spelled "p-y-e-s," were not the same as the luscious two crust pies we enjoy today. They were a sort of tart with one crust, and in other ways were quite different from the present day pie. No doubt the early colonists brought with them the English apple pie which is a deep dish pie with a top crust, but no lower crust. Henry C. Finck contends that even though apple pies were brought to us from England they are truly American "by right of conquest, improvement, and countrywide use," and I believe most of us agree with him.

Much to Be Considered

In discussing the preparation of apple pie, there are many things to be considered. It will be easier to take up the different steps in pie making, if we have our recipe before us. This is the recipe for apple pie: 1½ cups Gold Medal flour, ½ teaspoon salt, 1 cup shortening, ice water—5 tablespoons, 6 medium apples, ½ cup sugar, 1 teaspoon cinnamon, 1 tablespoon butter.

Method: Sift flour once before measur-

(Continued on page 12)

CONSTANT CARE IS SECRET OF BEAUTY

CAN the years really make us look younger? "Yes," answers Madame Polly, who lectures over WHN, New York, every Monday afternoon at 5 o'clock, "if the years are not allowed to bury us in an accumulated pile of powder and rouge, mascara and sophistication, mental disturbances and unnatural living."

Madame Polly is sixty-five years young. She possesses a figure that a woman of thirty would be proud of. Her hair is pure white and it frames the youngest looking face imaginable. She is a professional woman whose business for years has been making other women beautiful, and who practices what she preaches.

For fourteen years, she tells, she attended Miss Lillian Russell in the work of her beauty upkeep.

Polly's greatest claim to beauty fame is the texture of her skin. Women who have attained fifty years as a rule have complexions that lack a certain oil luster that the young invariably possess, the shine which indicates healthy gland action. Youth can afford to powder it off. But age, Mme. Polly asserts, "makes a big mistake in doing this."

"I never use powder—never!" she said. "I'll just show you what it does." She powdered her face. Gone was that freshness. She wiped it off and again proved the truth of what she said.

"Rouge? Yes, I rouge," she added. "But delicately, of course. Powder, never! The powder settles upon the folds in the skin and exaggerates them frightfully. It does everything to age the face and nothing to freshen it.

"I never have used hot water on my face. For years I have cleansed my face with a good cream, and have used cold water on it every single day, but never hot."

Madame Polly's hair is of a most exquisite texture, beautifully white and live looking, which she attributes to the rinse in camomile tea, made by steeping camomile flowers to the color of weak tea. Even hair can be kept young.

NUTTY CLUB TO GIVE ADVICE TO LOVESICK

THE Radio listeners have had their characters read, have been taught bridge and chess, have been taught to cook, and what not, by Radio, but WBBM, Chicago, is, we believe, the first to broadcast advice to the lovesick.

Miss Sally Chickenroost of WBBM, Chicago, each Sunday evening from 12 midnight on, when the famous Nutty club of WBBM is in session, answers all questions of the heart. If the "Mrs." doesn't love you because you stay up till 4 a. m. listening to the Nutty club, Sally will fix you up. If the dog takes all of papa's affection, write to Sally and she will answer your question from WBBM through the Nutty club.

SHORT WAVES

By Marcella

"Bobby" (Robert W.) Griffin's personal description is requested by two ladies—Biddy and Thelma. Isn't it great to be a popular Radio announcer? Bobby is assistant announcer at WHO, Bankers Life, Des Moines, and here's the data: Age, 26; height, 5 feet 6¾ inches; weight, 150 pounds; eyes, blue; hair, brown. Married? Read the report from WHO, as follows:

"Bobby was born in the 'Show Me' state; went to grade school, high school and college in Kansas City, Mo., Des Moines, Albia, Ia., and St. Louis; went to war before the rest of us knew there was one on; trundled an ambulance there and in so doing he gathered in a souvenir that entitles him to membership in the most exclusive organization in existance—the Disabled American Veterans.

"To one young lady who craves a comparison of Bobby's voice and appearance, we are glad to inform her that her fondest hopes would surely be realized were she to have the opportunity of meeting him. We sincerely wish she could drop into the studio some afternoon, when he is ensconced behind his desk in the control booth, with the late afternoon sun casting an auroral glow about his handsome head—forming a sort of halo—and his genial smile working overtime. We fear she would fall—hard! And now for the best news of all. Bobby is without marital affiliation, either past, present or contemplated."

Marcella is indebted to a Station WHO friend for this colorful description, and we wish to take off our hat to the gentleman. The two paragraphs are just what my readers like to know.

* *

Paul Ash famous jazz band leader appearing at McVickers theater, Chicago, and broadcasting over KYW, may have a street named after him, "Paul Ash Lane." It was a section of alley extending by the stage door of McVickers before several thousand high school girl Ash fiends were inspired with the idea of petitioning the city council to name it. Yes, the irresistible, auburn-haired Paul is married.

RECIPE FOR APPLE PIE

(Continued from page 11)

ing. Sift flour and salt together. Cut in the shortening. Add enough ice water to make a stiff dough. Turn out on a board and divide the dough in halves. Roll out one crust to fit the pie tin. Fit the crust into the pan lightly. Do not stretch the dough. Fill the crust with apples which have been mixed with sugar and cinnamon. Dot with the butter. Moisten the edge of the undercrust. Fold top crust in half, making several cuts through which the steam may escape. Cover the pie with the top crust. Press the two edges together with a fork. Trim off edges of crust. Bake 40 minutes. Have the oven very hot for the first 5 or 7 minutes, 500 degrees Fahrenheit. When the crust begins to brown, reduce the heat. Finish baking in a moderate oven, 380 degrees Fahrenheit. This amount will make a pie nine inches in diameter or six good servings.

If you wish a rich flaky top crust on the pie, dot it with one tablespoon of butter after the crust is rolled out. Fold several times and roll to fit the pie tin.

Keep Materials Cold

In making pie crust, if all of the materials and utensils are cold, the dough is easier to handle and you will have better results.

The directions say to cut in the fat. We use two knives or a chopping knife for that purpose. The fat should be very hard and cold. If you work it in with the fingers, your fingers warm it and press it into the flour. The pastry is much better if the fat is cut or chopped in until it has the appearance of corn meal. You may do this with a chopping knife or with two knives cutting across each other like a pair of scissors.

Cover Board with Canvas

Use just enough water to make a paste that will hold together. Good pastry should be so cold and dry that practically no flour is needed on the board. That means that the paste should not be at all sticky. If you add too much water, you must work in more flour, and kneading pastry makes it tough. In this recipe made with Gold Medal flour, 5 tablespoons of water is the correct amount, but add that amount very gradually. Any pie paste, and particularly a rich flaky paste may be handled more easily if a canvas covering is placed over the bread board. Any fine canvas or firm toweling will answer the purpose. To cover the rolling pin, a child's white stocking with the foot cut off is very satisfactory. Fasten the ends of the canvas firmly on to the board, and rub flour into it before rolling the paste.

It is always better to allow the finished dough to stand for some time before using it. Roll half of the dough at a time, rolling it in the shape of the pan. Ease the crust into the pan. Do not stretch it as it will shrink a little during baking. Some cooks trim the bottom crust as soon as it is in the pan, but I think you can secure a better edge, especially for juicy pies, if the crust is not trimmed until the top crust is on and the edges fitted together. The edge of the undercrust should always be moistened before the top crust is put on, in order to make the edges stick together better.

When cutting holes in the top crust, be careful to keep the holes near the center. If they are too close to the edge, the juice will run out.

Keep from Running Over

It is quite a problem to keep an apple pie from running over. Having the edges firmly pressed together and the holes near the center will help some. Many cooks like to place a small paper funnel in the center of the pie so that the juice will bubble up in the funnel rather than running over on the stove.

There is one more item that would be added if this pie were made in my kitchen, and that is, "serve with cheese," but no doubt many of you are not as fond of cheese as I am.

SHORT WAVES

By Marcella

(Continued from page 11)

who has charge of KYW's afternoon frolics, Tuesday, Thursday and Saturday, is "Sen" (A. W.) Kaney. Yes, he's also married.

* *

Val McLaughlin ex-WOC Sandman and later at WOAW, is now in Chicago, according to reports, but we do not believe she has made a definite connection with any of the stations. Will try to learn more, "Jayhawker," to answer your inquiry.

* *

Ted Lewis of WHN fame is NOT the former prize fighter and champ, "L.L." Who wrote the "Prisoner's Song?" Well, Guy Mussey holds the copyright, although there is a serious controversy on. I don't believe Morrel Moore of WHB is related to Al Carney of WHT. Jack Little is touring the stations, but I don't always know in advance where he is going to be next. Tommy Malie has been lost. Haven't heard from him for a long time. Paul Small is reported to be working for some St. Louis music house. Sammy Stept is in New York and often heard over WJZ. The "Silver Masked Tenor" prefers to remain, and is, a mystery. Even I do not know who he is.

* *

Bonnie Ann would know more of L. P. or Lester Palmer of WOAW, Woodmen of the World station at Omaha. Well, Lester is 25 years old, American born of Swedish extraction, member of the English Lutheran church, and belongs to the Tangier Temple Shrine. He is studying law and in June will hang out his shingle. Not only is he program director and announcer, but he writes songs. "Truly I Do" and "Won't You Believe in Me?" are two of his recent hits. Sounds suspicious, doesn't it, even if he is single?

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do by best to answer here. MARCELLA.

ADVANCE PROGRAMS FOR THE WEEK

Saturday, March 13

Headliners Today

Eastern	Central	Mountain	Pacific
8:15 p. m.	7:15 p. m.	6:15 p. m.	5:15 p. m.

WJZ (454.3m-660kc), WGY (379.5m-790kc), Leiderkranz concert.

8:30	7:30	6:30	5:30

Schedule for

"a Step On the Stairs"

Broadcast as a Play

GREETED with an ovation everywhere it has been presented as a Radio play, this thrilling mystery story by Robert J. Casey, appearing exclusively in Radio Digest, is making Radio history. "Something new," "Destined to have a big future" and "Keep it up" are but a few phrases heard in its praise. "A Step On the Stairs," dramatized by Fred Smith, pioneer in this field and managing director of the United States Radio society, is being presented weekly from the following eighteen leading broadcasting stations.

WHERE AND WHEN TO DIAL

WOC, Davenport, Palmer School of Chiropractic. Third episode at 10:30 p. m., Central time, on Friday, March 12. Fourth episode same time March 19. Dial 483.6 meters or 620 kilocycles.

EPISODE THREE

THE SETTING

EPISODE Three continues in the high-beamed hunt-room, the room that has been the scene of strange and mysterious crimes, of the Turner manse. The guests who had gathered there to hear a message from Peleg Turner, have waited patiently until Tolliver returns from the Radio stations to report that murderous deeds have been afoot there, too. Just as he displays a letter he has stolen from the motorcycle cop at the station, Mary Williams seemingly faints, throwing out her hand and upsetting the candle. In the resultant darkness, Ardwyn, the lawyer, lays hands on a strange person, but is bitten viciously on the wrist and he lets go. He cries out, Hari Singh comes with a light, order is restored, and the letter has disappeared.

We now discover our group, still in the dim light of a candle, anxiously bidding Mr. Ardwyn have his wound dressed without delay.

THE CAST

Frederick Ardwyn.....Peleg Turner's lawyer
Aunt Helen Holmes.....A relative
Henry Graves.....A mysterious man Mary had known formerly
Hari Singh.....Indian servant of Peleg Turner
Mary Williams.....A youthful guest

BARNYARD SOUNDS THROUGH WLW

A daily feature at two stations is Dean Fossler, organist at the Chicago theater. His playing of this mighty organ may be heard from WGN during the noon program and on WMAQ's dinner concert. To the right is Martha Rowland Brown, studio accompanist and bedtime story lady at WSM.

FAVORITE SCREEN STARS AT KFWB

High Lights of the Week

HEAR the cows lowing, the cocks crowing, the pigs squealing and other sounds familiar to the farm during the 8 o'clock program Saturday from WLW. Whether these sounds will be reproductions or the real thing is not known. Better tune in and find out who the artists really are.

The Sunday classical programs given over the WEAF chain have charmed the ear with more than one famous artist. This Sunday's programs will be given by Edward Johnson, tenor and Joan Ruth, contralto. A motion picture frolic winds up the evening introducing Warner Brother stars at KFWB.

Let the Severino mandolin quintet serenade you early in the evening Monday at WGY. This quintet can play all the old romantic tunes which breathe of moonlit nights and fair senoritas. The fresh young voices of Camp Fire Girls will enhance the microphone of WSB.

Mishel Piastro, concert master of the San Francisco Symphony orchestra, and one of the greatest living artists of the violin, will give a recital over KGO, Tuesday evening, March 16, assisted by Lev Shorr, Russian pianist. Piastro will be on the air between 8 and 9 p. m. Pacific time, and will play five solo numbers.

No blues on the air Wednesday. Tune in at any station anywhere on your dial and Irish songs will float in through the loud speaker for this is St. Patrick's Day and all the stations are celebrating. The Dennis Sisters have returned to WEBH and promise a real auld Erin program on this night. The Four Musketeers will invade WHO this same evening with appropriate songs.

Thursday marks the opening of a new vaudeville feature at KGW, Portland. It will not be necessary now for Portland fans to patronize the two-a-day. This station plans to bring the best talent to them. A new feature is also introduced at WGY which shows that spring is on the way. "Fly Fishing on a Canadian Lake," is the title of the first fish talk given by Dick Shaw.

"Elijah," a tremendous oratorio seldom given by any musical organization, will be produced Friday by the Apollo club at WLS, Chicago. A distinctive musical feature will also go on the air at WBAL when typical Negro music will be broadcast by the choral club of Morgan college.

WBZ's pleasing programs are due to the delightful lady to the left, Miss Emily W. Sturtevant, who not only plans them, but often visits over the microphone with her invisible friends. Vincent Lopez, above, as he looks announcing his orchestra numbers Tuesdays over WEAF chain.

Sunday, March 14

Fritz; musical program, artists, Grace Lutheran church.

KLDS, Independence, Mo. (441m-680kc), 11 a. m., Stone church service; Robert Miller, organist; 3 p. m., Watson Memorial M. E. church; Watson Memorial M. E. choir; Hazel Cook, organist; Rev. W. E. The mammoth organ recently installed in the concert hall of the Peabody Conservatory of Music at Baltimore, by the munificent bequest of the late James Leakin may now be enjoyed by fans through WBAL. Frederick D. Weaver, sitting at the keyboard of this beautiful instrument, has been chosen official organist. A welcome visitor at WOC, Davenport, is Charlotte Warren Anderson, left. Her soprano voice has graced many programs at this station. The Atwater Kent program this Sunday will be given by two great artists, Edward Johnson, right, and Joan Ruth. This program may be heard over the WEAF chain.

What Dare Broadcasters Say?

BECAUSE he broadcast a sermon from Station KFJF, Oklahoma City, in which he attacked Under Sheriff C. W. Friss, of that city, the Rev. Lincoln McConnell has caused the station to be sued by the under sheriff for a mere twenty thousand dollars. Mr. Friss charges in his suit that Reverend McConnell's criticism of his law enforcement methods was entirely too vehement and virulent.

This news item brings an interesting point up for discussion. To what extent are broadcasting stations held accountable for slander and libel? It occurs to us that the same rules apply here as apply to newspapers and periodicals.

Grant Milner Hyde, of the department of Journalism, the University of Wisconsin, has made a careful study of libel as it applies to newspapers. He says:

"The exact nature of libel is an indefinite thing, depending as much upon circumstances and the verdict of the jury as the law, and no newspaper can fulfill its office as dispenser of the news without now and then laying itself open to libel action. It is practically impossible to print all the news, at the time when it should be printed, without running into danger of hurting someone's good name to a damageable extent; but for one libelous statement that results in legal action and recovery, ten as serious go by unnoticed.

"A libelous statement is an untruth that hurts someone's private, professional, or business reputation. The old basis, 'the greater the truth, the greater the libel,' no longer holds good; now only an untrue statement is libelous.

"But all untrue statements are not libelous; they must hurt someone to be libelous.

"Just what constitutes damage to one's character is the question concerned. In general, any statement that holds an individual up to public contempt, ridicule, scorn, or shame, if untrue, is libelous—to accuse him of a loathsome disease or suggest lack of morality or integrity in his business or private life. In the case of a professional man, anything that suggests lack of skill or knowledge, or charge incompetency is libelous, but the statement must 'touch him' in his professional capacity. The same applies to business concerns and enterprises.

"Public officials, while open to criticism in their public capacity, cannot be attacked as private citizens or accused of moral or mental unfitness for office. Criticism must be concerned with their official acts.

"But any of these accusations or implications is harmless of libel if the newspaper can prove it true. When it is untrue, and the victim wishes to retaliate, he can do so only by bringing suit and recovering such damages as the jury thinks are equivalent to the injury he has suffered.

"The case is not decided on the basis of the newspaper's intent or innocence of malice, but on the basis of the injury suffered by the victim. This is true except when the statements may be such as to lead to a 'breach of the peace' and the evident motive results in criminal proceedings against the publisher."

It is obvious as public disseminators of news and thought, broadcasting stations fall within the same class as newspapers. The same libel law should apply. Mr. Hyde defines what libel is and how it can be committed.

The question whether or not Station KFJF has committed libel depends on what Rev. McConnell said. If what he said was true—we have no way of knowing inasmuch as the details of his message are not given—and only the public capacity of Under Sheriff Friss was attacked, it would seem that Mr. Friss will recover nothing.

Another thing Mr. Friss will have to prove, is the exact message of Rev. McConnell. Perhaps he will be able to produce in court stenographic copies of the broadcast as received and witnessed by reliable witnesses. This certainly will be necessary before he can hope to prosecute his suit.

The Friss vs. KFJF suit should be watched with interest by broadcasting stations and the public, as the decision reached will seriously affect the future of Radio as a medium for the expression of opinion.

RADIO INDI-GEST

Hay! Hay!! Hay!!!

Gee, it used ter be real lonesome livin' down here on the farm,
With no kind of real enjoyment to pass the time away,
Especially in the evenin' after all the chores were done,
And you kinda felt all fagged out from a long and tiresome day.

It wasn't much enjoyment or real entertainin' like
When you had to sit and listen to the common lot of talk
About the crops and weather and threshin' crew and such,
Or how the mule that Pa just bought could only eat and balk.

But, gee, it sure is different now since Pa brought home a set
Of Radio, they call it, and strung around some wires.
Well, gosh, we just sit down now and twist some funny knobs
And we can hear real music from orchestras and choirs.

Gee, it sure is wonderful for we can hear all kinds
Of funny talks and speeches and news and gosh it's fun,
It sure ain't tiresome now to sit around the house
In the evenin' after supper when all the chores are done.

RURAL RUBE

Heard Nothing—Was Flaming Mad

Editor Indi-Gest: One of the Eskimo hot mamas, heer in Fairice, has got me puzzled. Every time she lissens to my loud speaker she terns from her lether complecksion to a brite red. After she turned to red six times, I lissened to the speaker and herd nothing. I want to know what she herd to make her tern red. Always as ever,

KITTLE DRUMMER

Well, Kittle Drummer, most hot mamas are puzzling, but the ones we HAVE HEARD ABOUT wouldn't even listen to reason, much less a loud speaker. She must have herd (darn it, you've got us doing it) Jack Little's "Then Everything Will Be All Right."

Get Out Your Black Peas

Last Week we nominated Noah for membership in the FAMOUS FANS club because his Ark could handle any wave length. Now come dissenting voices. Eloise R. says he was not so good because water on his masts caused him to be grounded on Mount Ararat.

We might add that he also had too many regenerative sets aboard and as a FAMOUS FAN he was all wet. Anyway one of the family should be included. We nominate Noah's son—he was the first "HAM." Shall we take both or either into the club?

Alice In Blooper Land

Speak gently to the blooper boy,
And beat him when he squealses;
He may not do it to annoy,
Or know just how it feelses.

SANTA FE BALDY

Stop Before It Is Too Late

We had to give up the idea of the Call Router described in last week's issue. We forgot that the trains were never on time and the names of the cities hollered by the train caller couldn't catch up with the programs from the different cities. So we have torn up the device and are now going to arrange the parts so the spiel of the train caller can be used on the chain programs.

And No Prescriptions

WASHINGTON, D. C.—It is understood that the governor of North Carolina is anxious to erect a broadcasting station at Raleigh, the capital of the state, which will be owned and operated by the state. At this time there are no wave lengths available for such a station and the department of commerce has so notified the governor.

Let's see now, What is it the governor of North Carolina wants to say to the governor of South Carolina? Oh, yes,—"Its a long time between wave lengths."

Keep In Readiness Yeggs

Students of crime have the opportunity of keeping in touch with crime in greater Cincinnati through the broadcasting of bulletins supplied by the police department. These broadcasts are given through the Crosley WLW station daily at ten-fifteen and four-thirty o'clock. Emergency bulletins are broadcast immediately upon receipt in the studio.—WLW News Bulletin.

Jimmy Valentine announcing. This will most likely avoid some messy affairs and increase the number of perfect crimes. Cooperation between police and apprentices will be assured and will avoid any chance meetings. The emergency bulletins will rectify any miscarriage of plans. Diplomas will be issued to those who complete the extension course. Graduates will serve internship in Chicago.

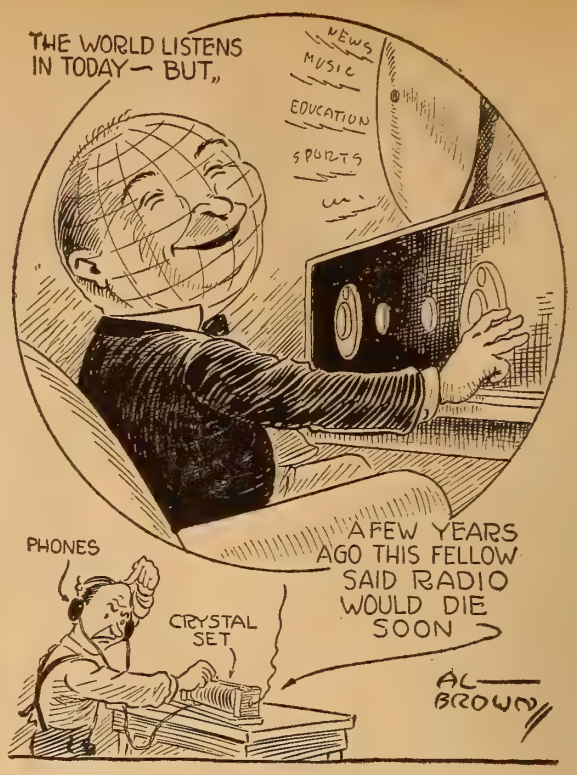
Where Have I Seen You Before?

The Secretary of the I Won't Bloop Club handed us a letter he received from VKY, in which VKY said, "I enclose my pledge card properly filled out and I'm in earnest about it. No strangers, not even my wife, can dial around on my set at night."

We shouldn't put that in the column because there was a little note enclosed for us that kinda put us up-stage. Such nice things were said. The boss should know.

INDI

The Changing World



Condensed

BY DIELECTRIC

Another of those attractive feature concerts by the Formica orchestra from the studio of WLW, Cincinnati, brought solace to a discomfited soul seeking escape from the clatter and crashing of static to peaceful musical tones. Some of the selections played were chosen from among the works of Italian composers—assuring melodious music, while later numbers were entirely popular and picked at random from the mass of material at hand supplied by American composers. What matters a mere title, when the magic rythym of jazz is permeating the silent places to jaded mortals new vim and a chance to move their bodies in contravention to the laws of locomotion. Page the Trombone Player, please.

When you pick out good programs while Old Man Static is spreading himself all over low and high frequencies, you are either on top of the stations broadcasting or mistaking static for snare drums. What I heard the past few nights was static with programs breaking through occasionally. Station WHO, Des Moines, came through with a pleasing program of popular music rendered by the Serenaders, who are familiar to most audiences this station addresses, and erased every vestige of irritation caused in the past—not by these musicians but by other means.

Graham won a cup a few months ago, which the publisher of Radio Digest presented, entitling him to the conviction that he (Graham MacNamee) surpassed all other announcers in the world in most respects. If there is the conviction, there is no evidence of it. for he is manifestly striving to improve that perfection in several ways. During the Atwater Kent concert, in which Anna Case sang and Mr. Corliagno pleased with his excellent violin playing, this improvement was noticeable. The interjected remarks were boiled down somewhat, attracting less to himself and more to the artists and their work.

Florida broadcasting stations have been careful to select those slogans which sound the most enticing, for instance, "The Land of Sunshine," by which listeners are introduced to the Jacksonville station, WJAX. The announcer there indulged in that old stall—just a moment please—so vexatious and frequent a short time back. He did it, however, to let his remarks sink in about the superlative attractions of the city. They had a dance orchestra playing, incidentally.

If you never heard Dan Beddoe sing you have missed a musical treat. His tenor voice is most ingratiating and he knows how to use it to touch the heartstrings. He sang the other evening in a program including a very good mixed quartet. The latter attracted at least one high state official, the governor of Pennsylvania, who sent in a request to the station, WSAI, Cincinnati, for them to sing "Abide with Me." Funny I can't seem to find anything to correct in the management of WSAI. Commendation is better.

Among instrumental trios entertaining the Radio public, the Liberty string trio should be given a prominent place. With several other features of interest scheduled for that hour I, for one, stuck to WLIB, Chicago, that none of the concert should be missed. All the selections were of a piece—good. Not too heavy, nor yet so sentimental as to be cloying. It is a hard medium to strike, this midway plane. There is nothing to say except pleasantries for the evening's music. Again the announcer comes in for mention.

ABC Radio Fundamentals for Everybody

Chapter X—Radio Receiving Circuits (Cont.)

By Milo Gurney

FOLLOWING Radio's stampede of buying, with the advent of broadcasting, together with the flooding of the market with receivers in which regeneration was intentionally used, came the efforts of several engineers with receiver designs in which intended regeneration was absent, together with arrangements wherein the inherent regeneration within the tubes and their associated wiring was such as to circumvent the regenerative patents.

The earliest efforts along this line were similar to that shown in figure 24. In this circuit, the Radio frequency transformers used were of the untuned type, their design varying from that of the tuned type, in that, in place of having air cores, the design included iron cores. With this method of construction it was quite impossible to tune them to resonance, hence a compromise wave length was selected at which such transformers worked most efficiently, while the broadness of their tuning permitted a fair amplification over the balance of the wave bands then used.

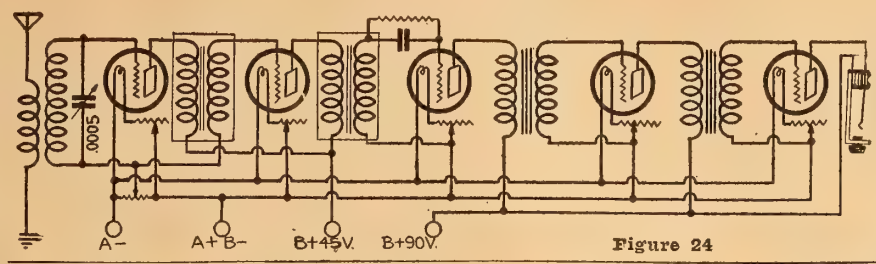


Figure 24

The Oscillation Control

An oscillation control was possible by the employment of a potentiometer across the "A" battery and the connecting of the grid returns to it. At times only the first or input stage was so arranged. With this arrangement it was possible through varying the potentiometer slider to maintain the tube just under its oscillating point, with a resultant gain in selectivity and signal strengh.

One or two manufacturers marketed quite acceptable receivers employing this system of radio frequency; however, with the enlargement of the broadcast bands, caused by the release of wave lengths from two hundred to five hundred and fifty meters, untuned radio frequency transformers could not well be designed which would function satisfactorily over the total band. Consequently they lost their popularity. Insofar as the writer can learn, no one at this time is using circuits employing the use of this type of transformer, hence we may pass on to it's successor, the air core tuned radio frequency transformer and it's associated circuits. They were first exploited and brought to popular demand through the introduction of the neutrodyne circuit as designed by Prof. Hazeltine, of Stevens Institute of Technology.

The Neutrodyne Receiver

The neutrodyne is essentially a tuned radio frequency receiver. By this it should be understood that the radio frequency transformers used in this type of receiver, in place of having iron cores, (as do the untuned type) have windings which are placed upon an air core form and are tuned to resonance with a variable condenser. Another factor which differentiates this type from that of the untuned class is that the control of tube oscillation with the use of a potentiometer is done away with and small adjustable condensers are used. They are so connected to the circuits of the receiver as to neutralize the inherent feed back capacity effects present in the wiring and the plate and grid elements of each tube.

A typical neutrodyne circuit is shown in figure 25, the numerals "a" and "b" indicating the location of the neutralizing condensers in the circuits, while "c" and "d" identify the air core type radio frequency transformers. These transformers differ not only in the use of air cores but also structurally, with reference to other air core transformers, in that their ratio of primary to secondary windings is very high, but also in the placement of the primary relative to the grid end of the secondary winding.

Angle of Transformers

Many Radio Digest readers who are familiar with the arrangement of parts within a neutrodyne receiver, have possibly felt that the peculiar angle at which the radio frequency transformers were mounted—each to the other—was the big secret accountable for the success of this circuit. May I correct this impression by stating that such is not the case? Were the coils individually and properly shielded, then the angle at which they are placed could in no wise affect the circuit's operation. Its total efficiency is accomplished by the design of the radio frequency transformers used and the method employed for the prevention of oscillations created through interstage feed back or coupling.

The angle of placement in the unshielded types of neutrodynes, to the contrary, is quite essential, for the prevention of interstage coupling effects. This angle is not fixed, but is entirely dependent upon the size or diameter of the coil, its winding length, and the center-to-center spacing of the coils.

The circuit enjoys a distinct advantage, in that the tuning of one of the variable condensers does not largely affect the associated circuits, hence the setting of the second and third tuning condensers should nearly agree as to dial numerals.

(Continued on page 24)

Radiotone Loud Speaker

Now *Only* $19.95
Was $25.00

The BEST Radio Affords

$1.00 down!

With the Radiotone all the family can enjoy your radio at the same time!

Yes, Genuine Radiotone loud speaker—the same loud speaker that is selling everywhere for $25.00—now at a sweeping cut price, only $19.95 and on easy monthly payments, besides! Only $1.00 with the coupon below brings the Radiotone to your home on approval for 30 days! No radio is complete without a loud speaker—a *good* loud speaker. The whole family may "listen in" at the same time, leisurely—instead of taking turns at the headphones. Or if you have a loud speaker now that isn't satisfactory, that doesn't bring in stations loud and clear, this is your opportunity to get a first class loud speaker—yes, the best and we'll *prove* it on this offer—at an astounding rock-bottom reduced price, direct—and on easy, monthly payments besides!

Makes Your Radio Complete

The Radiotone is the last word in sound reproduction and amplification for radio sets. It is super-sensitive. Brings in distant stations with full volume so every one in the room can hear distinctly and easily. Wonderful clearness and absolute purity of tone. No distortion. No crouching in front of the loud speaker to hear announcements.

The Radiotone has a 14-inch horn made of Thorite in one piece without seam or joint, accoustically correct. This eliminates the metallic clang you often hear in other loud speakers. The reproducing unit is entirely enclosed at the base of the horn. The well balanced construction does away with all vibrations. The Radiotone has a graceful shape with a beautiful black florduline finish. It stands 23 inches high and weighs only 15 lbs. No extra batteries needed for the Radiotone—just plug it in as you do your head set. Nothing to wear out or get out of order. Sent complete with cord and plug.

30 Days Trial!

When the Radiotone comes, there's nothing to pay. Use it freely at our risk, on trial for 30 days. See how much more use and fun, you and all the family get from your radio with this loud speaker. See how loud, clear and distinct the Radiotone brings in all stations—better than any other loud speaker you've ever heard, giving you the best that is in your set. After 30 days trial if you think you can get along without the Radiotone, return it to us and we will refund your dollar plus all transportation charges. No red tape. The trial costs you not a cent.

Straus & Schram, Dept. R-9413 Chicago, Ill.

Enclosed find $1. Ship special advertised Radiotone Loud Speaker. I am to have 30 days free trial. If I keep the Radiotone, I will pay you $3.00 monthly, total reduced price, $19.95. The Radiotone is to become my property as soon as you receive the final payment. If not satisfied, I am to return it within 30 days and you are to refund my money and any express charges I paid.

Radiotone Loud Speaker No. Y8728A—$19.95

If you have ever bought goods on credit by mail, tell us from whom. If there is anything else you wish to tell us about yourself, write on a piece of paper and enclose it with this coupon. But the coupon alone, fully filled out, ought to do.
That's all we want to know and we're ready to ship the goods at once. No formalities. No C.O.D. We trust rich and poor alike when they merely show us that they are honest.

$3.00 a Month

But if you decide to keep the Radiotone, pay only $3.00 a month until you have paid the special reduced price—only $19.95. See if you can equal this offer anywhere on such amazingly liberal terms. You'll scarcely feel those small monthly payments. Surely, now, you can afford to have the Radiotone—*the best loud speaker*—and get the most fun out of your radio set for all the family.

Send Coupon NOW!

Seize this opportunity on this special offer. Only $1.00 with the coupon brings the Radiotone on 30 days' trial, satisfaction guaranteed, your dollar refunded if not satisfied. Send the coupon *now* while this special offer lasts.

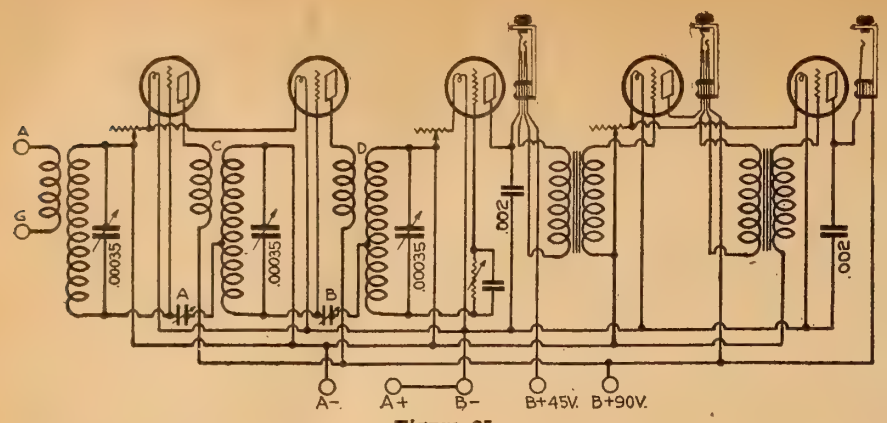

Figure 25

A B C'S OF RADIO SETS

(Continued from page 23)

The first or left condenser, which tunes the first grid circuit, as well as the antenna circuit, may be also caused to "fall in step" with the dial readings of the remaining two condensers, providing the capacity is such as to keep the resonance curve of the input coil common to that of the remaining stages. Therefore, any variance, as far as dial settings are concerned, of the first with relation to the others, may be chargeable to having an aerial whose capacity is too great.

While this circuit's popularity is somewhat over-shadowed by the army of compensated tuned radio frequency circuits now flooding the market, it will ever remain as a distinct forward step in Radio engineering, and the incentive back of the design of compensated types of tuned radio frequency sets.

A word relative to, and of possible assistance to, those owning receivers of this type, is that in general, a single wire aerial of not over seventy-five feet in length, including the lead-ins, is advisable for best operation, while in congested areas one of fifty feet will no doubt serve even better. Long aerials, of necessity, possess a greater resistance than those of medium length, and the writer knows of no greater obstacle to selectivity than resistance contained within an aerial.

If you have wondered why your receiver (irrespective of type) tunes broadly, it is an excellent idea to not only inspect your aerial, but also the ground and try to improve not only the ground connection, but likewise the insulation of the aerial, and look well to the possibility of shortening it. Who is there among you who would cast the first stone, in criticism of added selectivity, and who is there among you who can justly blame the broadcasting station for poor selectivity, who has not looked well toward keeping his own house in order through possessing not only a good aerial, but also a good ground?

(In next week's issue, Mr. Gurney will continue with his explanation of radio frequency type circuits with compensated circuits of this type being featured. Several hook-ups will be given to illustrate this type.—Editor's note.)

INDIANS BEHIND MOTIF

(Continued from page 4)

Indian. Nowhere else is there music as he sings it. Mr. Lieurance believes it is typical. He has made hundreds of phonograph records of these chants and visited practically every tribe on the continent.

Not long ago he spent considerable time with the Sioux Indians on their reservation in South Dakota. There he picked up a melody that has made him world famous. From it he composed the song, "By the Waters of Minnetonka."

To the listeners of WLS Mr. Lieurance told the story of the song. He sang the basic notes as the Indians sing them. Then Mrs. Edna Wooley Lieurance, his wife, sang the song as he had written it. The legend relates that two lovers of the Sun and Moon clans of the Sioux Indians, loving against tribal law, fled to escape torture and sank together in the waters of Lake Minnetonka, located in Minnesota, near Minneapolis. On moonlight nights they return with their phantom canoe and their paddles can be heard dipping in the water as they sing.

That Indians had an understanding of music before the arrival of the white man was said by Mr. Lieurance to be proven by the discovery of flutes carved from bone with holes to permit the sounding of musical scales which were made previous to the time of America's discovery by Columbus. He played "From the Land of the Sky Blue Water" on one of these flutes.

Real Indian music as rendered by the Indians themselves recently was broadcast by the General Electric station, WGY at Schenectady, N. Y., when it was visited by Sioux warriors and a party of Onondagas. The average listener did not report wild enthusiasm over the esthetic harmonies on this occasion as they were produced in the raw. But the element was there and with the imagination of a good American composer to whip it into a staff chaperoned by a proper clef it could doubtless have become a typical American song.

Powel Crosley Vacationing

MIAMI, Florida.—Scarcity of living quarters here has failed to mar the pleasure of Powel Crosley, Jr., prominent Radio manufacturer of Cincinnati, who is concluding a month's vacation of rest and recreation aboard his palatial motor-yacht "Muroma," off the coast of Florida. The yacht owned by Mr. Crosley is a beautifully furnished boat, with sleeping quarters for ten guests and with a completely furnished dining room.

To Improve Crystal Detector

WASHINGTON, D. C.—In Radio receiving circuits employing a crystal detector, if the detector is shunted across approximately one-half the inductance coil, the sharpness of tuning and selectivity of the set in broadcast reception will be greatly improved, according to a statement recently issued by E. B. Hudson of the Radio laboratory of the bureau of standards here.

For accuracy, simplicity, and speed in tuning, for clarity and fidelity in tone, for decorative beauty and value —the Crosley 5-tube RFL-75 stands unchallenged and unapproached. Hear it once and no other set will ever quite satisfy you . . . $75 without accessories.

THE CROSLEY RADIO CORPORATION, Cincinnati, Ohio

CROSLEY·RADIO

BETTER · COSTS LESS

Perhaps you, too, can cut your "B" battery costs in half. Just follow the chart. It gives you the secret of "B" battery economy.

THOUSANDS of people have made the discovery that Eveready "B" Batteries, when used in the proper size and with a "C" battery*, are the most economical and satisfactory source of radio current.

On sets of one to three tubes, Eveready "B" Battery No. 772, used with a "C" battery, will last a year or longer, usually longer. On sets of four and five tubes either of the larger Heavy Duty Eveready Batteries No. 770 or No. 486, used with a "C" battery*, will last eight months or more.

These figures are based on the average use of receivers, which a country-wide survey has shown to be two hours daily throughout the year. If you listen longer, of course, your batteries will have a somewhat shorter life, and if you listen less, they will last just that much longer.

Here is the secret of "B" battery satisfaction and economy:

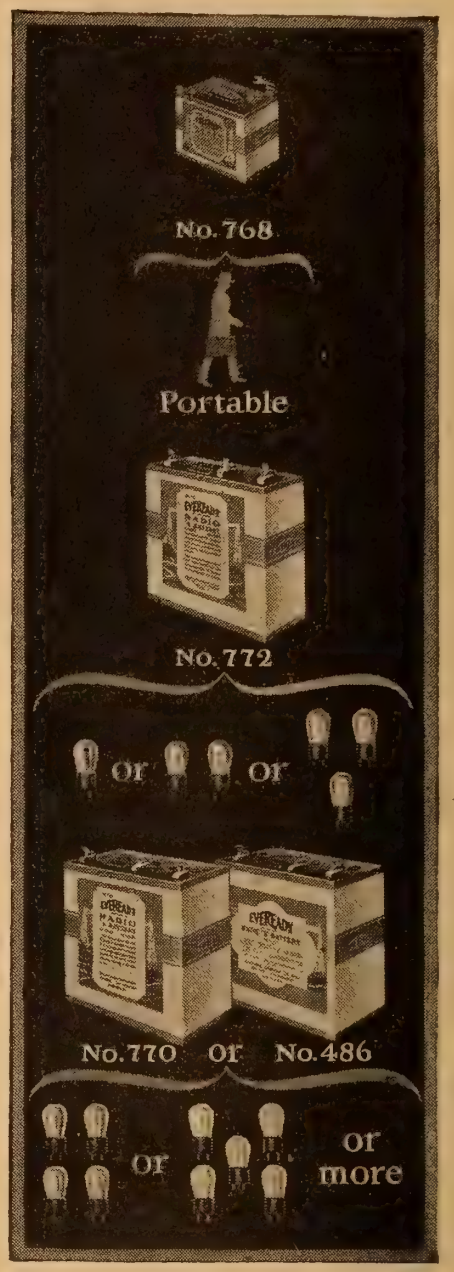
With sets of from 1 to 3 tubes, use Eveready No. 772.

With sets of 4 or more tubes, use either of the Heavy Duty Batteries, No. 770, or the even longer-lived Eveready Layerbilt No. 486.

Use a "C" battery on all but single tube sets.

Eveready give you their remarkable service to the full when they are correctly matched in capacity to the demands made upon them by your receiver. It is wasteful to buy batteries that are too small. Follow the chart.

In addition to the batteries



illustrated, which fit practically all of the receivers in use, we also make a number of other types for special purposes. There is an Eveready Radio Battery for every radio use. To learn more about the entire Eveready line, write for the booklet, "Choosing and Using the Right Radio Batteries," which we will be glad to send you on request. This booklet also specifies batteries for the new power tubes. There is an Eveready dealer nearby.

Manufactured and guaranteed by

NATIONAL CARBON CO., Inc.
New York San Francisco

Canadian National Carbon Company, Limited
Toronto, Ontario

*Note: In addition to the increased life which an Eveready "C" Battery gives to your "B" batteries, it will add a quality of reception unobtainable without it.

1926 Model Four-Filter Super-Heterodyne

Part I—The Original and the Improvements

By the Technical Editor

LAST year this publication carried a series of articles describing the construction of an eight tube receiver which, because of the design of the intermediate transformers, was designated the "four-filter super-heterodyne." So successful was the first model that several friends of Jacques Fournier built others just like it and so did I. As it was first published there was little to criticize about it, if anything. The circuit used was the standard super input, intermediates, oscillator and audio output. It was presented with both a stage of push-pull and two stages of straight cascade amplification.

A never ending discussion in the Radio field has always centered on the subject of whether the intermediate transformers should be iron core or air core. This will probably never be definitely settled to the satisfaction of everyone as there are some excellent arguments in favor of both types. At the same time there are some very funny arguments put forth. Personally, I prefer the air core type but I can still see the points in favor of the other. There is no question but that a long wave transformer can be made to pass more energy at a certain peak frequency if a few strips of enameled very thin transformer-core-iron are inserted within the coils. This, however, is at the expense of sharpness in that particular transformer and it is the plan of those using such transformers to have either the first or last one in the series of the air core type, with a condenser sharply tuning either the primary or secondary to give what has been termed a "filter."

On the other hand I have seen many writers carefully warn Radio fans against the air core transformer on the grounds that if it were made too sharp there would be distortion due to cutting off part of the side bands which carried the higher notes of music. That, to my mind, is one of the funny arguments, as we have made many attempts to design an air core long wave transformer, and tune it, such that it would cut off side bands. If such a unit can be made, it is not with any form of winding or design known generally to the Radio field today. The natural resistance of a coil containing enough wire to reach 5,000 meters, together with the impedance produced by the use of very fine wire and the inherent capacity of any such coil, is enough to produce losses such that the sharpness of tuning necessary to cut off side bands is impossible. If anyone reading this can show me samples of such a unit together with any evidence that distortion resulted from its use, and not from wrong grid bias or too much oscillator energy, we will be only too glad to retract all statements made and drop all reputation for technical accuracy.

Now admitting that a very little more energy can be passed by using three iron core and one tuned transformer over the use of four carefully tuned air core units, let us see what is gained by the use of this latter type. The chief point gained is quietness, that is freedom from noises within the set itself. Just what there is in an iron core transformer that produces the noises, I personally am not prepared to state, but, having built many of this type, and many with air core transformers, I only know that the latter type give far smoother, much pleasanter reproduction. The super, due to its sensitivity, picks up enough noises from electrical apparatus and static without adding to it by parts within the set itself.

The second desirable feature is a marked increase in sharpness and ability to eliminate undesired stations. This feature is dependent, of course, on careful adjustment of the tuning condensers used to tune the secondaries of the intermediate units so that they are all resonant to the same frequency or wave length. Last year, in the articles written by Jacques Fournier, we described the construction of the intermediate units and readers of this series can secure these back issues and build them if they wish. However, since the adjusting to exact frequency is better done with laboratory apparatus, I would advise the purchase of the complete unit, adjusted and shielded, from the concern shown in the list of parts which accompanies this article. This applies to either iron or air core intermediates; unless one has the laboratory driver and knowledge to bring them all to exactly the same peaks it is better to buy them.

Two of the chief improvements which have now been added to this receiver are shielding and resistance coupled audio amplification. Many are the complaints of super-het builders that they get stations at many points on the dials and have broad tuning on powerful stations, especially those nearby. The only cure for this seems to be shielding, either of the input coils, the oscillator section complete, or the entire set. This last named procedure has seemed to me to be the best method, as then one is sure that nothing gets into the set except that desired energy which comes in on the aerial, whether a loop or of the outdoor type. As this set to be described is now built, we have overall shielding of the entire outfit, separation or isolation, of the input circuits from the intermediates, of the intermediates from the oscillator and audio amplification, and of the oscillator from the audio amplification. Complicated as this all sounds, it is surprising how little sheet metal cutting and fitting is necessary to accomplish it.

In this receiver Radio Digest presents

	Total Cost		$109.80

Accessories Needed

1 B Power Supply to Give 135 Volts and 25-30 Milliamperes, 1 Six-Volt Storage Battery, 6 Tubes Small Base 199, 2 Daven MU-20 Tubes, 1 Daven MU-6 Tube, 3 Eveready C batteries.

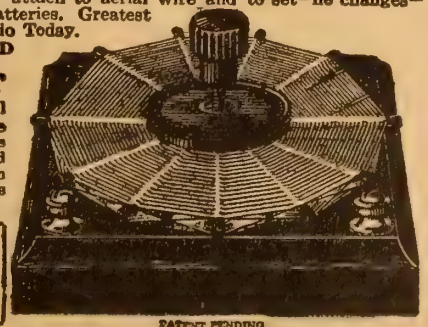
Fred W. Stein.

Steinite Low Loss Interference Eliminator

No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.
OVER 300,000 SOLD

Improved Results With Tube or Crystal Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. ***MONEY-BACK GUARANTEE.***



Mfrs. Famous 1,500 Mi. Steinite 1-Tube Set, $6; Long Distance Crystal Set, $6; Steinite Crystal 50¢—3 for $1

STEINITE 5-Tube Set—$29.75

FREE Descriptive Literature on request.

PATENT PENDING.

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

$1 Postpaid If you are not delighted with results you get your dollar back

Make Your Radio Set More Efficient With Allen-Bradley Radio Devices

IT matters not whether you are building a receiver or own a factory-built set, in either case you can make your set more efficient by using Allen-Bradley Radio Devices in many parts of the receiver. In addition to the various devices for filament control, grid leak and potentiometer control, there also are the Bradleyswitch and the Bradleynier which are easily installed. The one-hole mounting makes installation quick and easy.

TO bring your set up-to-date, replace your old condensers with Bradleydensers and thereby enjoy the selectivity of straight-line-frequency tuning. The condenser is extremely compact and will not interfere with any other parts on your panel. Don't forget the Bradley-Amplifier for perfect audio amplification. This efficient amplifier is a complete unit ready for immediate use in your set. Try Allen-Bradley Devices tonight and hear the difference!

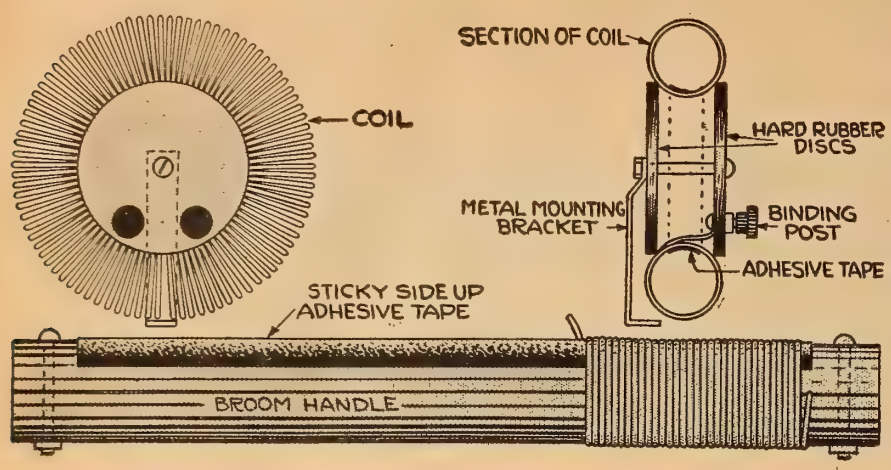
HOW TO MAKE YOUR TOROID COILS



Take a piece of broomhandle about a foot long and split it lengthwise. Bore a hole in each end of both sections about half an inch from the ends so that a nut and bolt may be inserted in each end to hold the sections together. Now lay a piece of adhesive tape over one section as per the illustration; then the desired number of turns, depending on the condensers to be used, may be wound over the tape. Be sure that the tape is laid on sticky side up as it is all that holds the turns of wire together.

After having wound the coil, take out the bolts and slide out one section of the broomhandle, then the other. The coil is now finished except for providing a suitable mounting for it. I cut two hard rubber disks (or bakelite) about one-quarter inch larger in diameter than the inside diameter of the doughnut and bored a hole through the centers of them. I put one of these on each side of the coil and put a pillar on of such a size that when the nut and bolt is tightened up it just pinches the coil a little and holds it firmly in place. For any further information write to F. W. Clute, 206 East Flower avenue, Watertown, N. Y.

FOUR-FILTER SUPER

(Continued from page 25)

resistance coupled audio frequency amplification for the first time. It was for a long time in the experimental stages and, until the makers of this apparatus got it all straightened out, we hesitated about getting our readers in on something that was not a sure thing. Now, however, the Daven company is marketing a complete three stage unit, assembled ready for use, with special tubes to give maximum results, and this three stage unit has been built right into the set.

It has against it, the fact that three stages are necessary to equal two stages of transformer coupling, in volume. It requires 135 volts of B battery on the plates which is the equivalent of three B units of 45 volts each instead of the 90 volts to which most of us have been accustomed. On the other hand, these three stages draw less milliamperes of current from the three B units and distortion is impossible. Even the makers of the finest audio transformers on the market will admit that a transformer, due to inherent characteristics, will favor certain notes in the musical range covered by the human ear and will not be very responsive to audible frequencies below 200 per second. True, some of the better transformers, such as Karas, Thordarson and Amertran, are well nigh perfect and few if any, musical critics can detect distortion in good sets using them. The resistance coupling favors no notes over others. One has the choice therefore of three stages, with amplification that cannot distort, or two stages, that are nearly perfect but not quite.

Low Loss Condensers

Coming now to condensers, of which two of .0005 mfd. maximum capacity are needed: The X laboratories in New York seem to have spared no expense or design to make a condenser with the lowest possible losses. The stator plates are supported at the sides on bars which are in turn secured to the end plates with Pyrex glass buttons. Nothing better than Pyrex glass at such points is now known. The plates are all of highly polished aluminum, so finished that the surface does not corrode and the edges are rounded and smoothed to prevent leakage. Pigtails are provided so that positive contact to the rotor plates is assured at all times, and the bearing arrangements are good.

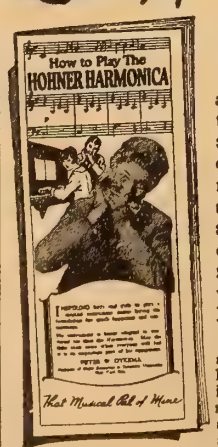
The fact that "old style" straight line capacity types are used will cause comment. There is much in favor of the mechanical construction possible in S. L. C. condensers as against that possible in straight line frequency models. To take care of the well-known bunching of stations at the lower end of the scale that would be the case if the usual dials were used, I have put on some very exceptional dials made by Radiall in New York. They are so constructed inside that, when attached to the shafts of S. L. C. condensers, the stations are spread out on the dial scale at every ten divisions just as if S. L. F. condensers were employed. Just at this time our use of these condensers and dials means a saving to you as the manufacturers are selling them below the original price of $6.00 to make way for their S. L. F. type. You can get .0005 mfd. condensers plain (meaning without attached vernier) for $2.50 each from X Laboratories, 25 West 45th street, New York city.

Range, Selectivity and Control

As those who follow our technical articles know, we always hesitate about stating that a receiver will accomplish any certain range or will go through in any certain locality because so much depends on local conditions, the workmanship and the operation. So far as this set is concerned, I can state definitely that in the same locality in which we have tested all the other sets, it will do more than any of its predecessors in the way of range, selectivity and tone quality. Stations pop in and out as the dials are turned and, even on a sixty-foot outside aerial, the input condenser is really sharp and must be kept in close resonance with the oscillator condenser to land on stations. Programs pour out of the Amplion speaker, used in all tests, with plenty of volume and a purity of tone that makes listening a pleasure. Reproduction is remarkably free from the well-known superheterodyne hissing or breathing sound and it is only by watching the "static crackle" that one can keep the dials in resonance.

(Photos of the inside, and the wiring diagram, together with drilling layouts, will follow in the usual sequence used for previous sets.—Editor's Note.)

"That Musical Pal of Mine"



Close Harmony

We hear a great deal about close harmony these days—on the stage, in the movies, over the radio. But in music and sentiment, appreciation and understanding, nothing can equal the close harmony enjoyed by those who play the Hohner Harmonica.

Hohner Harmonicas are a joy to play and a joy to listen to. Played alone, or in conjunction with other musical instruments, they are capable of interpreting all that is best in music, whether it be popular, classical or operatic composition.

Anyone can learn to play a Hohner with the aid of the Free Instruction Book, available at all leading dealers. If your dealer is out of copies, write to M. Hohner, Inc., Dept. 233 114 East 16th St., New York.

Ask for a Copy! This interesting and helpful instruction book, containing charts, pictures, and musical selections, will enable you to play a Hohner Harmonica with an ease that is most surprising. Ask for a copy!

HOHNER Harmonicas

Photogravures of Your Favorite Artists
GALLERY of RADIO STARS

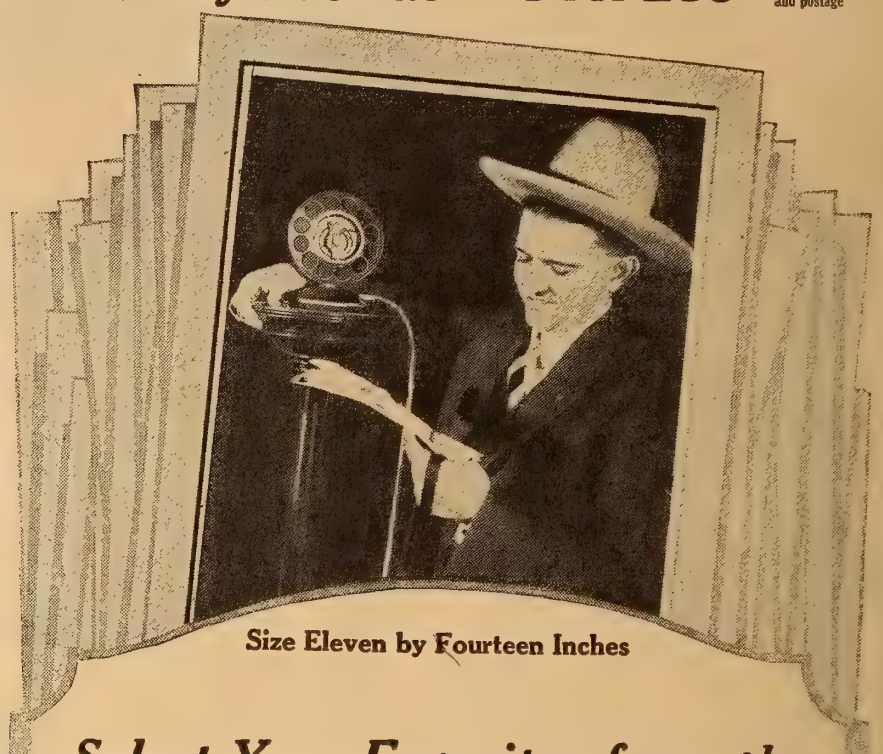
Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

WITH COUPONS **Only 10c Each -- 3 for 25c** To cover cost of mailing and postage



Size Eleven by Fourteen Inches

Select Your Favorites from the Gallery of Radio Stars

1 Wendell Hall, king of ukulele ditties
2 Graham McNamee, 1925 Gold Cup announcer
3 Jack Little, popular wandering balladist
5 Coon-Sanders' "Nighthawks" at KYW
6 George Hay, 1924 Gold Cup announcer
7 Harmony Girls, Edith Carpenter, Grace Ingram
8 Ford and Glenn, Lullaby Boys of WLS
9 "Roxy" Rothafel of WEAF chain fame
10 The Hired Hand, famous "Substitute Announcer" of WBAP
12 Bob Emery, Big Brother of WEEI
13 "Bill" W. G. Hay, ex-KFKX, now of WLIB
14 Happiness Boys, jovial singers of WEAF
15 Lambdin Kay, "Little Colonel" of WSB
16 Leo Fitzpatrick, "Merry Old Chief," WJR
17 Henry Field, 1925 Gold Cup runner-up
18 Al Carney, organ favorite at WHT
20 Vincent Lopez, No. 1 Pennsylvania orchestra
21 E. L. Tyson, pleasing voice at WWJ
23 Art Gillham, "The Whispering Pianist"
24 Paul Greene, announcer at WSAI, "bridge voice"
25 Harry Ehrhart, "Dream Daddy" of WLIT
26 Correll and Gosden of "Kinky Kids Parade" fame, at WEBH and other stations.
27 Norman Brokenshire, popular at WRC, WJZ
29 Jane Novak, Blues Singer of Twin Cities, WCCO
30 Jean Sargent, the original, now at WHT
31 Ralph Emerson, popular organist at WLS
32 Edna Adams, of KPRC
33 Pat Barnes, vaudeville announcer at WHT
38 Walter Wilson, "Uncle Bob" of KYW
40 Ray-O-Vac Twins, known country-wide

How to Stop Blooping and Man-Made Static

Part V—A DeForest Device and New Super Input

By the Technical Staff

THERE will probably be thousands of fans reading this series who have a sincere desire to cooperate in this movement for a clearer ether but who may not care, for one reason or another to build or buy the Penetrola described last week. Penetrola is not particularly expensive and materially increases both range and volume, but many may not care to invest anymore. Therefore, this week, we will describe some slight changes that can be made in a straight Armstrong regenerative hook-up that will eliminate the blooping without the increase in selectivity or range.

About a year ago Dr. Lee DeForest delved into his seemingly unlimited store of Radio knowledge and, with the valuable cooperation of Roy Weagant on the practical design, presented the Radio world with a low cost little unit to be attached to bloopers. In figure 9 is the schematic diagram of a three tube receiver which is either single circuit or three circuit regenerative depending on which pair of dotted line antenna and ground leads are used. If the antenna and ground are hooked onto the coil connected across the variable condenser, and the grid and filament, this circuit classifies as single circuit, while, if they are connected to the primary coil shown at the left, this hook-up becomes a three circuit installation.

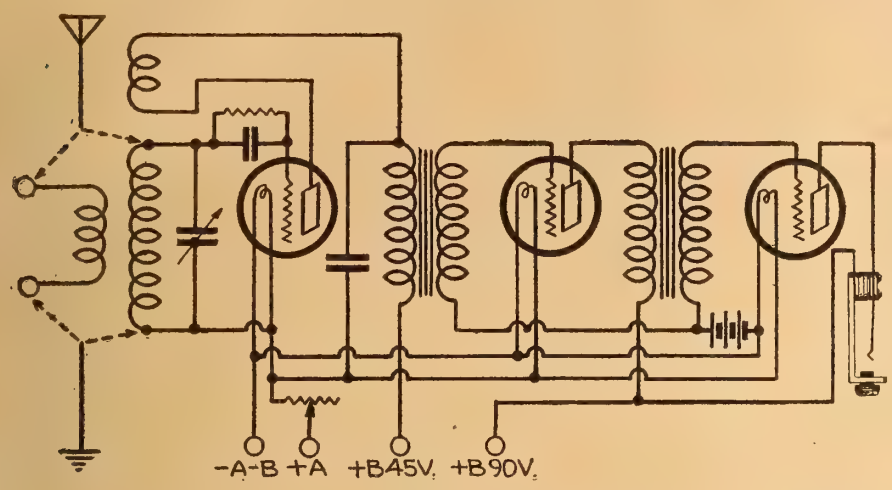

Figure 9

To Prevent Blooping

In figure 10 we have the same apparatus with a couple of slight changes that will prevent blooping. The circuit, as now arranged, works out as follows. The ground, while not shown, connects to the minus A circuit so that the incoming energy sets up a difference of potential, and current, across the grid and filament of the first audio amplifier tube, this current alternating at radio frequencies. Some amplification takes place in this tube and the variations are then found in the plate circuit. The coil shown as B is a choke insofar as radio frequencies are concerned so that these variations are forced into the condenser A.

Since an efficient fixed condenser offers but little resistance to such currents they now go to the tuned grid circuit of the detector tube, at the left of the diagram.

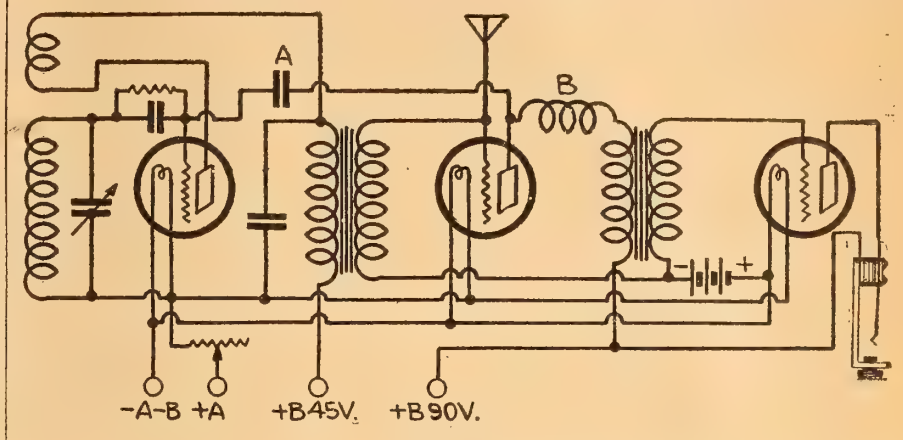

Figure 10

The action from here on is as it was before, the feedback coil giving regenerative amplification and the grid leak and condenser providing rectification and detection. The rectified energy in the form of direct current pulsations is passed into the first audio frequency transformer, into the second tube and then into the second audio transformer and the second amplifier tube.

Have Small Condenser

For satisfactory operation, the condenser A should be very small and fixed condensers are not made in the capacity desired which is about .000025 mfd. This value can be obtained with one of the numerous midget condensers on the market such as Chelton, Gleason, Hammarlund and Continental. Some of the newer balancing or neutralizing condensers will do also, it being only necessary that they have a possible maximum of 50 to 75 micro-microfarads also known as picofarads and printed, yet again, as .00005 mfd. to .000075 mfd. This will readily pass radio frequency currents yet provides a high resistance to the passage of audio frequencies.

There are small chokes on the market, those by Bremer-Tully and Samson being suggested. The primary of a superhet intermediate transformer would do or such a choke could be made by winding 225 turns of number 36 to 40 silk covered

LOUD SPEAKER UNIT

$3.00

The unit will be shipped on a satisfaction or money back basis on receipt of price in money order or currency.

This unit is the secret behind the unparalleled success of Fultone Speaker. Its large diaphragm and bobbins of fine wire are protected from injury by a heavy nickel-plated case through the back of which adjustment is made by means of a special key. The pole pieces are not made from a solid piece of iron but are assembled from 15 laminations of carefully chosen steel.

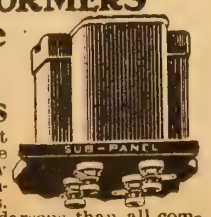
THORDARSON

Super
TRANSFORMERS

Follow the lead of the Leaders



Because leading set builders require the finest tone quality and absolute uniformity in transformers, they use more Thordarsons than all competitive makes combined. Follow their lead—build or replace with Thordarsons. Unconditionally guaranteed. Recommended by best dealers. Audio frequency: 2-1, $5; 3½-1, $4; 6-1, $4.50. Power Amplifying pair, $13. Interstage Power Amp. $8. Autoformers, $5.

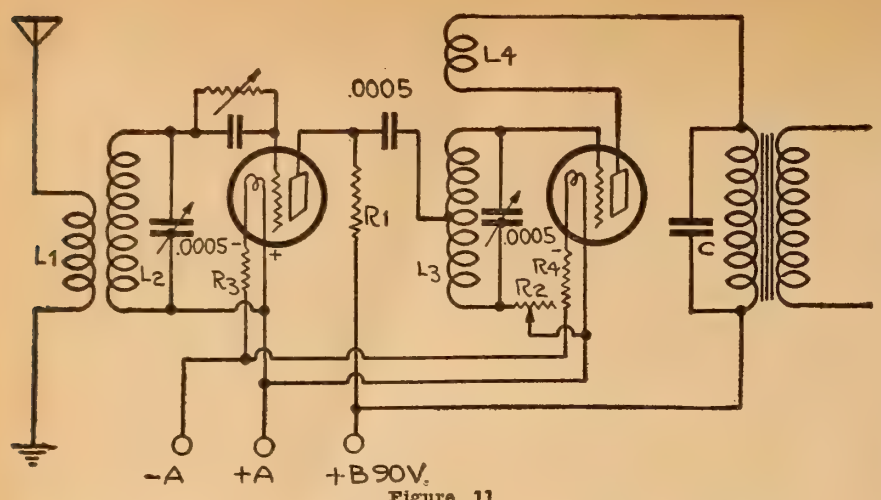

Figure 11

HELP STOP BLOOPING

(Continued from page 27)

wire on a small diameter tube, say ⅝ to ¾ inch. Turns should be wound evenly and side by side. This will effectually block currents at radio frequencies and force them into condenser A but will offer no obstacle to audio frequencies when the program appears on the plate of the first amplifier tube for the second time.

Shield the Cabinet

Lest there be misunderstanding, we want to make it clear that we are not advising the construction of such an outfit with this device built in; this is shown only for those thousands who have receivers of this type already and wish to stop blooping. There are plenty of better circuits to be constructed with few tubes that will not bloop, among them being the circuit of Milo Gurney's in our July 4th issue, that by Skeeters in the August 15th issue and that by Goodrich in the May 23rd issue, all during 1925. So long as a stage of radio frequency amplification is provided that is balanced to make it a one way repeater, there will be no radiation. Such a stage, or a set incorporating one, should preferably be entirely shielded by lining its cabinet with, let us say, number 26 half hard sheet brass.

We also wish to show another method of getting signals off of an antenna and ground circuit into a super-heterodyne in such a way that one way repeater action is obtained and programs can pass into the set without difficulty yet oscillations from the following tubes cannot back up into the antenna and ground system and cause trouble. This came in since the series started from W. Harvey Merwin of Jensen, Fla., and his accompanying letter is reprinted here. The illustration of his circuit which he is discussing is figure 11.

Very Sensitive Arrangement

"Herewith attached" says Mr. Merwin, "is probably the most sensitive arrangement for super-heterodyne there is today. This hook-up has the advantage of not squawking up the neighborhood as it is impossible for oscillation to take place in the first grid circuit, yet there is strong regeneration taking place immediately after leaving the first tube. I would suggest that the antenna coupler shown be wound with half the secondary put on a tube first, then the four turn primary and then the other half of the secondary. Again, you can wind this four turn primary right in beside four turns of the secondary or right over the center of the secondary. This arrangement permits of using only the ground or the aerial where extreme interference is found or terrific electrical device interference (man made static). The ground or aerial may be used alone or, if the super is an exceptionally sensitive one, both may be disconnected and DX accomplished, very often.

"In tuning, the first dial is placed somewhere near the middle of the scale and stations tuned in with the second or oscillator dial, then cleared up with the first. A good strong signal can be heard all over the first dial as a rule but it will be found that unwanted signals and much static can be tuned out with it at certain positions. The first tube is to be a 199 and resistance R3 is a 6V-199 Amperite so this tube can be run from a six volt storage battery. The rest of the tubes are 201-A, although they can be 199s with a 4-volt storage battery and the Amperite would then be a 4V-199.

Tap Secondary Near Center

"Any good tuned radio frequency transformer or tuned radio frequency antenna coupler can be used for the antenna coupler shown, while any good three circuit tuner with the primary removed is used between the first and second tubes and the secondary tapped as near the exact center as possible. The tickler is used as the feedback and generally can be once adjusted and left alone. An important control is resistance R2 in the grid return lead of the second tube and I have variable condensers of .00035 mfd. capacity these grid coils can be 60 turns of number 24 double silk covered wire on a 3-inch tube occupying a winding length of 1½ inches.

The resistance R1 should be a one tenth megohm (100,000 ohms) resistor as made by Daven Resistor Co., at Newark, N. J., preferably mounted in one of their number 50 mountings. Resistance R4 is an Amperite; 4V-199 for the 199 type of tube with 4-volt battery and 1-A for the 201-A tube on six volt battery. The transformer to the right with the fixed condenser across its primary is the tuned filter of the intermediate stages of a super.

(There will be more devices shown for prevention of blooping and several chapters on the locating and prevention of man-made static. If some means of fixing your set has not been shown yet, follow this series closely as all types will be touched on.—Editor's Note.)

Department of Commerce Works with 150 Stations

WASHINGTON. — The department of commerce is now cooperating with nearly 150 broadcasting stations in sending out weather reports and practically all of the United States is within their range. Warnings of cold waves, frosts, floods, heavy snows and other unusual weather conditions are included whenever they are issued. In addition, the department of agriculture is cooperating with a large number of stations in supplying digested agricultural news and special talks.

Legion Notes

March 11, 8:00 p. m. Central time; Station WSB, Atlanta, (428m-700). Georgia Legion department official program: Georgia minstrel, musical numbers, dance orchestra and talk by Colonel Homer B. Watkins, department commander.

* *

March 16, 8:00 to 9:45 p. m. Central time; Station WIAU, Columbus, Ohio, (293.9m-1020kc). Ohio Legion department official program: "Ohio's Legion-Air Birthday Party." Something new in Radio entertainment, musical numbers, and an address by a nationally known person.

* *

Station WDAF, Kansas City, presented an American Legion program on Wednesday, February 17. The Kansas department official program included the Wichita Post quartet, Wyandotte Post Drum and Bugle Corps, a "rare one" by "Doc" Sweeney and talks by the department officials.

* *

Tuesday and Wednesday, February 23 and 24, 8 to 11 p. m., and 12 to 2 a. m., Central time, Station WKAF, Milwaukee, gave the Wisconsin department official program: "The Legion Barrage," featuring the Racine Legion Drum Corps and the Milwaukee Auxiliary band.

A grid leak is essential to the proper operation of the detector tube.

The New Radio Book HOW TO -

Operate Sets
Construct Parts
Improve Reception
Understand Radio
Assemble Circuits

FREE With One Year's Subscription to Radio Digest

THE greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest it supplies the demand for a book covering every phase of Radio from a simple explanation of Radio reception to a technical explanation of the different parts of a set which leads to the best reception possible. The sections on selecting and making sets develops the different types of sets and circuits with diagrams to explain same. "How to Operate" gives detailed information on the operation of all the well-known sets. The section of general information contains a complete Radio map and schedule and a section of workshop kinks which save time and money. Now is the time to take advantage of the exceptional offer as listed in the coupon for your convenience.

Read what one of our readers has to say:

"This is also to say that I received your treatise on radio (Radio Receivers) and I consider it one of the most remarkable and most valuable books on radio that I have ever seen. You are to be congratulated on this work."

DR. HULLINGER GIVES DESCRIPTION OF SET

BECAUSE he won first prize in the Radio Digest contest for best verified foreign reception during international Radio week, Dr. J. D. Hullinger, 108 The Weston, Clinton, Ia., has been besieged by several hundred Radio fans who want to know what kind of set he used.

Dr. J. D. Hullinger

His receiver is an outdoor aerial type of super-heterodyne employing what is known as the "Ultradyne" circuit. The kit used by Dr. Hullinger in making this set was manufactured by the Phoenix Radio corporation, of New York, N. Y.

Cunningham 301A tubes, together with storage A and B batteries, and a cone type loud speaker, are employed. Plate voltages are 48 on the detector and 120 on the amplifier tubes.

Dr. Hullinger is a graduate in Medicine from the Iowa State university, class of 1893, and his career has included teaching school and, as a pastime, playing the cornet in bands and orchestras. He is sixty-five years old.

It was in November, 1923, that he first became interested in Radio. Since that time he has built and bought many different types of receivers.

In divulging to what he attributes his very successful reception, he lists his large size set, good circuit, keeping his batteries always fully charged, his systematic method of listing and logging stations, careful manipulation of dials, and the fact that he is a regular subscriber to Radio Digest.

He assures all correspondents that he will answer all letters, although there may be considerable time taken in doing this.

$500 in Gold

FOR THE SOLUTION OF

a Step On the Stairs

WITH the beginning of this exclusive and pioneering effort in coupling a master serial novelette with its production as a Radio play at a selected few of the country's best broadcasting stations, Radio Digest wishes to announce that $500.00 in Gold prizes will be awarded to the persons who can best solve the mystery.

The story, "A Step On the Stairs," is written by Robert J. Casey, an author whose works in the literary world need no introduction. Furthermore he is well versed in the needs of such fiction for Radio presentation. His work, in turn, is being Radio dramatized by Fred Smith, Managing Director of the United States Radio Society, who can be counted among the first few men to write and present Radio plays.

Read the story and hear it played weekly from the selected stations. Don't miss this thriller, whether or not you intend to submit a solution!

The chosen stations, which will broadcast "A Step On the Stairs" in Radio play form, are given on page thirteen. The days and the hours are listed.

THE PRIZES

The prizes are seventeen in number. First prize is $250; second prize is $100; third to seventeenth prizes inclusive, are $10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story will be published consecutively each week, the first appearing in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unravelling the mystery accurately, will win. The method of preparing the solution—its neatness, legibility, etc.—shall be considered in the selection of the winning solution.

RULES OF CONTEST

1. The contest opened with the February 27 issue. All solutions must be received by Radio Digest not later than midnight of Saturday, May 1. The ninth installment of the story will appear in the April 24 issue. The author's intended and final chapter will appear in the May 15 issue of Radio Digest, together with the announcement of the winners' names.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon but one side of paper, and names and addresses should be written or printed plainly.

4. The decision of the judges, to be named later in the contest, will be final.

Sport Broadcasts

Basketball
Saturday March 13
WIP, Philadelphia, Pa. (508.2m-590kc), University of Pennsylvania-Princeton, 9 p. m. Eastern time.

Hockey
Tuesday, March 16
WBZ, Springfield, Mass. (333.1m-900kc), Boston Bruins-Montreal, 8 p. m. Eastern time.

KNX, Hollywood, Calif. (336.9m-890kc), Hollywood Legion stadium, 10 p. m. Pacific time.

According to Percy W. Harris, editorial manager of the Radio Press, London, WGY was one of three American stations to be heard abroad during the International Week tests. WJAZ and WLW were the other two heard well.

A STEP ON THE STAIRS

(Continued from page 7)

what is actually going on in this house I shall show mercy to nobody."

"That is as I would have it Mr. Ardwyn. Draw your chair over closer to the fireplace out of the light from the candle. You need not be afraid of me. I shall be in front of you."

"An excellent arrangement," conceded the lawyer.

So they sat there while the storm whirled at the windows and the mantel clock ticked off the steps on its round toward two o'clock. From across the hall came an occasional voice. But this was not often. The constraint of the situation was not yielding to such amenities as coffee and sandwiches even with the heartening assistance of electric lights.

"I wonder if the candle will last," said the lawyer.

"You may put it out if you wish," suggested Miss Williams.

"It's a question," pondered Ardwyn. "If your supposed visitor sees the light he may hesitate to come in. On the other hand if we have no light and he does come in we shall be no better informed than we were before."

"Light or no light I don't think he will stay long out there in the snow," said the girl . . . "Look—look—the candle. It's going out by itself . . . It's flickering . . . It's gone!"

"A devilish weird performance," commented the lawyer uncomfortably

"Quiet," whispered Mary. "I don't think we'll have long to wait now." They sat tensely, paying no heed to a guffaw, probably Tolliver's, that echoed from one end of the manse to the other like a blatant sacrilege.

"I hear a scratching noise," said the girl in an awed tone that was less than a murmur. "There it is—the draft—don't you feel it? The front door is open . . . Mr. Ardwyn, Mr. Ardwyn, where are you?"

Then silence save for the shrieking of the wind from across the bay, now suddenly audible, a choked curse, a surprised cry and the sounds of a scuffle. A moment later Mary Williams' voice rose in screaming anguish and terror.

"Mr. Ardwyn . . . Mr. Ardwyn . . . It's in the room . . . The 'thing.' I felt it. It's dead cold like a corpse . . . Oh Mr. Ardwyn, speak to me . . . I'm . . . afraid."

Her voice trailed into silence. There followed the crash of a falling body, a groan, the slamming of a door and the noise of many feet dashing across the hall from the library.

"I have a light," came the voice of Hari Singh . . . "Why it's Mr. Ardwyn with blood all over his face . . . And Miss Williams . . . Stand back, please. She's not dead . . . What's this in her hand?" For the first time his voice betrayed a hint of the panic that had seized upon the company.

"It's part of the grave clothes of Peleg Turner . . ."

Who, or what, entered the hunt-room as Mary Williams and Lawyer Ardwyn sat watching? New thrills in this Radio mystery story next week. Once more the phantom "Step On the Stairs" echoes through the hall and an unexpected visitor makes appearance.

Strange Requests

CINCINNATI.—Charles Meade, who reads poems and paragraphs over Crosley WLW here, recently received two strange letters from listeners to his work. One asked to have Robert W. Service give a poem before the microphone.

The Reader's View

Why Radio Royalty?

I have seen the announcement that Senator Dill is to introduce a bill to tighten the copyright law. As a Radio fan I object to the plan he proposes.

In the first place, the old and new laws only considered the permanency and competition of the copy and that is all that should be considered.

The Radio does not copy but simply amplifies, and does not amplify or copy the copyrighted article but the singers' or speakers' voices, which do not belong to the great Society of Authors and Composers.

The singer bought the right to sing the song when he bought the copyrighted copy and may, or should be able to select his audience. Certain rights go with the purchase of a song—it may be sung correctly or poorly, and the only restriction should be on making a copy which might compete with the author's sale.

I claim that the authors should have been paying the broadcasters all this time, instead of the broadcasters paying the authors.

Instead of being competition, it is really a help in making the composition well known and, no doubt, many a sale has been made by Radio making the song popular. It is not a parallel case with the record people as their records were sold in practically direct competition.

I hope that the broadcasters will wake up and say they will refuse to allow any copyrighted matter to be used by the stations and you will see how quickly the "society" will get busy and make arrangements so that their songs may be broadcast. They know they are hogging matters.

I understand there are only about 5 per cent of the composers in the United States in the society and it is claimed they have banded together to limit production. I think they should be tried under the anti-trust law.—H.B.C., Marion, Ohio.

Plea for Consideration

In reading various articles in this column on the subject of classical and jazz music, I notice the writer usually states his or her preference to either of these types of music. That's all right, everyone is entitled to a preference, but don't you think if all you heard when tuning in was classical music or jazz music continuously it would become boresome? The broadcaster can't cater to one particular individual alone, they have to please many thousands, so they are compelled to broadcast a great variety to please them all. And, I think some of these writers must have a set with a small range of tuning for DX, for I can sit down any night and pick up any type of music I prefer to listen to, on just an ordinary 5-tube set you see advertised everywhere. For myself I can find no complaint to offer about the present day music being broadcast. I have no great preference to either type, although jazz appeals to me more than classical music. I like both. However, old-time music is something I don't like. It strikes me as being coarse and harsh, with many repetitions of refrains. But, if you don't like a program, tune it out and don't start hollering about the faults of the station. They are trying to please their audience.

So, why haggle back and forth over this question "Jazz or Classical Music?" You can get both on an ordinary set with no great difficulty.—A.W., Iowa Falls, Iowa.

CLASSIFIED ADVERTISEMENTS

Classified advertisements in Radio Digest produce results. Have you a receiving set to sell? Do you want to buy a Radio? A classified advertisement in this column will sell your set.

Rates are twenty cents a word for each insertion, five per cent discount for four insertions, ten per cent for thirteen insertions, fifteen per cent for twenty-six insertions, twenty per cent for fifty-two insertions. Name and address to be included at above rate. Cash should accompany order. Minimum of ten words.

Objectionable and misleading advertisements not accepted. Forms close three weeks prior to date of publication, which is Saturday.

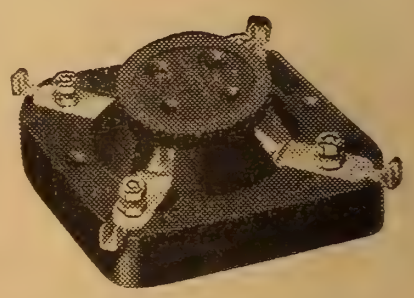
"YOU can always tell a carefully designed set by its parts"—any radio set manufacturer will tell you so.

That's why you find so many sets on the market today with C-H sockets, rheostats and switches. For manufacturers know by careful testing the advantages that hundreds of thousands of radio fans have found in C-H features through years of "building their own."

C-H Low Loss Sockets, for instance, settle once and for all one of the most annoying of all set troubles—loose contacts at the tube prongs. In C-H sockets each tube prong is firmly held in the one piece, *silver-plated*, double grip contacts. Jarring of the set or corrosion cannot alter the perfect contact. They are easily wired and give a finished appearance to any set.

So whether you buy or build—look for the C-H trade mark. It is a guarantee of satisfaction.

THE CUTLER-HAMMER MFG. CO.
Member Radio Section, Associated Manufacturers of Electrical Supplies
1207 St. Paul Ave.
MILWAUKEE, WISCONSIN



The New C-H *UX Socket for the new UX tubes. Same* C-H *one piece, low loss* SILVER *plated, double grip contacts as in the* C-H *original low loss socket with the* ORANGE *shell. Heat proof Thermoplax body—terminals cannot loosen under heat of soldering iron.*

Spring washers under binding posts prevent loosening of hex nuts and assure tight connections. The hex nuts are slotted to permit tightening with screw driver or wrench.

The lugs at the end of the contacts are designed for easy soldering and may be bent down for under wiring.

SOS MYSTERY PLAY MAKES HIT OVER AIR

"A STEP ON THE STAIRS" IS HIGHLY PRAISED

Congratulatory Letters and Telegrams Pour Into Radio Digest from Radio Authorities

Letters and telegrams from all sections of the country confirm the opinions expressed by studio directors and Radio entertainment specialists that the Radio mystery story, "A Step On the Stairs," written especially for Radio Digest, came at the psychological moment when a change in the trend of broadcast programs seemed imperative.

The dramatization of the story into Radario form by Fred Smith has supplied the happy medium between the super abundance of jazz and the extremes of the classical.

Here is the telegram from J. Andrew White, king of descriptive announcers in New York:

"'Step On the Stairs' has them all licked Best thing of the kind I've heard. Played straight by listening at home with the lights turned low, so this is not applesauce. Heaviest congratulations.—J. Andrew White."

Shut-Ins Like Play

A shut-in so blind she had to have another write her letter for her sent this message as typical of the most critical of all kinds of listeners; to the WNAC station at Boston—conservative old Boston:

"I want to send you just a line to tell you how much I enjoyed the first installment of 'A Step On the Stairs.' It is such a relief from the constant jazz and popular songs that are played so much every day they are monotonous. I am a shut-in and nearly blind, so you can understand what the Radio means to me. I wish I might have some more drama and readers as I enjoy them very much. Long live WNAC!"

The letter is signed by Mrs. H. M. Young, 14 Lander street, East Lynn, Mass.

After he had finished the third installment, Fred Smith of Cincinnati, who put in Radario form the story appearing in Radio Digest, came up to Chicago to meet Robert J. Casey, the author. Radio Digest had sought these two men, unknown to each other, but each the best to be found for their respective tasks, to perform this work for the Radio public.

Is Radio History

"How did you get hold of Casey?" was the first question asked by Mr. Smith on his arrival in Chicago. "He has the rare combination of ability as a fiction writer and a knowledge of Radio technique. He knows how to utilize these faculties and has done so in this very remarkable story."

"This is Radio history," said Mr. Smith later, when, with the editors of Radio Digest, he met Mr. Casey at the Hotel La Salle. The two men set next to each other in the grill where a booth had been reserved. The Chicago man was of medium height, plainly dressed, undistinguished except for a heavy gold signet ring that made his soft, well cared for hands more noticeable. His hair was short and his face confirmed the ancestry of his name, especially when the Celtic blue eyes popped wide open at vivacious moments of the table conversation. On the other hand, Mr. Smith was the artist, precise as a professor, speaking at all times with the perfect English and adhering to form even to the manner with which he held his teacup—he had tea—and crooked his little finger, just so. But a man and a man's man with full appreciation for the red-blooded elements in the story. He wore glasses and the hair was thin above his fell developed forehead. The two men, side by side, represented a wide range in a new kind of literature.

"'A Step On the Stairs,' is something that we have been approaching from various angles for several years. It will mark a decided point in the development of Radio art," said Mr. Smith.

St. Paul Fans Excited

"We had a big crowd in the studio and turned out the lights," wrote E. H. Gammons of Station WCCO, St. Paul-Minneapolis, "and everybody in the place got a great kick out of it.

"The most amusing thing in connection with the broadcast was that hardly had we completed it when telephone calls began to come in complaining that some station, FYX, had come on the air and blanketed us. In fact one St. Paul listener was so excited about it that he didn't get the call letters and accused one of the small 50-watt stations in town of having come on the air, and stated that he was going to take the matter up with the department of commerce. It so happened that the station he had in mind happens to have an 'F' and a 'Y' in its code call."

From the many letters written, it is obvious that the trick of turning out the lights while listening to the drama over the air adds 100 per cent to the thrill. It may not be generally known that a darkened room usually adds to the illusions in Radio. When the Radario especially provides for a darkened room the effect is even more noticeable.

DAINTY MARY BRIAN OUR COVER BEAUTY

THAT perfect oval so ardently desired by the connoisseurs of beauty in the feminine head, genus homo, seems approximately attained by the maiden on the Radio Digest cover this week. She is Miss Mary Brian, another of the famous 1926 Wampas Stars, whose face is often seen in the pictures of the Paramount brand.

You know the story of the lucky thirteen who make the Wampas cast each year. All the great motion picture producing companies on the Pacific coast present their young and most promising hopes to the consideration of the Western Association of Motion Picture Advertisers. There is a vote among the members of the association. The thirteen who stand highest are the Wampas stars for the year. Experience has shown that these chosen ones make good and become real stars of the screen.

Take another look at the picture, that flawless, oval contour, and you will not wonder that she is one of the Wampas Stars of 1926.

Mike Starts to Vanish But Mystery Is Solved

Temporary Disappearance Caused by Man Dragging Connection

NEW YORK.—"Mike, mike, who's got the mike?" was the query of Ralph Wentworth, one of WEAF's announcers, recently at a celebration broadcast direct from Carnegie hall, when he suddenly saw the microphone vanishing from him. He was then telling the Radio audience about the parade of the colors which had just taken place.

The temporary disappearance of "mike" was caused by one of the New York friends of Senator Ashurst of Arizona, the orator of the day, rushing forward to greet the senator and not noticing the wire connection to the microphone stretched across the floor. Wentworth managed to clutch "mike" in time to prevent any real break in his descriptions of events for the Radio audience.

Five Veterans of Civil War Broadcast at Station KOA

DENVER, Colo. — KOA's performers during the last year have ranged in ages from a 4-year-old prodigy—Phillip Cooper, Colorado's youngest Radio artist—to five 80-year-old survivors of the Denver Drum Corps, an organization inspired by the Civil war.

Because of death, the drum corps has been reduced from an original group of fourteen persons to a quintet.

Looking Ahead

Peleg Turner Speaks from the Tomb and curses the murderer of his brother, Jeremiah, next week in "A Step On the Stairs." Milford Jones reappears, somewhat the worse for his absence. The best part yet of Mr. Casey's serial will make startling disclosures next issue.

"Radio Owes an Incalculable Debt to the American Boy," says Secretary of Commerce Hoover and he has reference to the ingenuity and inventiveness of boys as they, through Boy Scout and Y. M. C. A. organizations, worked out many problems that have puzzled their elders. Radio Digest has an interesting Boy Scout story about ready for release.

Intense Interest Has Been Shown Throughout the Country in the dramatization of the Radio Digest mystery play. Wherever it has been put on the air listeners have reported surprise and delight at the unusual effects produced. At the Gold Medal Station WCCO Minneapolis-St. Paul, the players made up for their parts. See pictures and story in Radio Digest.

Causes and Locating of Man-Made Static will be the subject of the next article in the Blooping and Interference series. The number of electrical devices in common use that cause clicks, hums and rattle in Radio receivers is surprising.

Assembly and Wiring of 1926 Four-Filter Super is taken up in the third article on this receiver which will appear next week. Large as this receiver is, the wiring is comparatively simple, since the audio amplification is all wired when installed and the shielding is the negative filament circuit.

Readers of Milo Gurney's A. B. C. Series will next get a brief discussion of the super-heterodyne receiver from a theoretical viewpoint. The Rolls Royce of Radio is not so complicated as it sounds but a fair knowledge of what is happening in one is most helpful to the constructor.

NEWS BRIEFS FROM THE BROADCASTERS

KGO TO PICK CHAMPION FIDDLER OF WEST

KFI Gives Artist-Composer Series—Punch and Judy at WLIB—Gilda Gray at CKAC

Old fiddlers from all over the West will gather around the KGO microphones, Saturday night, March 27, and give the world a taste of the music of a generation ago, which is still calculated to tickle the feet.

* *

KFI is presenting an artist-composer series. One of the recent artists to appear at this station was Alice Barnett. Songs and compositions by this American composer were featured during the entire program. Arrangements are now being made for early programs by Charles Wakefield Cadman, Homer Grunn, Halette Gilberte, Heinrich Tandler and Carrie Jacobs Bond.

* *

The squeaky voices of Punch and Judy may be heard nightly over the microphone of WLIB, Chicago. Uncle Walt, who is directing the Radio appearances of these well-known puppets, describes them so well that many kiddies throughout the United States enjoy this new bedtime feature.

* *

Gilda Gray, famous Follies dancer, pleased Canadian fans recently when she gave advice to girls on beauty and dancing, over the microphone of CKAC, Montreal. She gave her talk in French.

* *

Sidelights on boxing in Mexico will interest sport fans over WPG, Atlantic City, Saturday. James Monahan, former intercollegiate lightweight champion of Lafayette college, will talk about his recent experience as referee in this interesting neighbor republic.

* *

The novel feature of WBAL's Sandman circle, which goes on the air every Monday and Thursday evening from 6 to 6:30 p. m., Eastern time, is a Radio serial story for children. "The First Days of Man," an historical story written especially for young folks by Frederick Arnold Kummer is the present serial.

* *

"Memories of Jennie Lind and Clara Schumann," is the title of the program to be given by Anna Barbash, soprano, at WPG, Monday evening.

* *

"Winds, Clouds and Rain" is the subject to be discussed for fifteen minutes over KGO, Monday evening, March 22, by Major Edward I. Bowie, weather man for the western part of the United States. Major Bowie will be remembered by KGO listeners for other talks about how the facts concerning the weather are gathered, charted and forecasts made twice daily in the San Francisco office of the Weather bureau.

* *

Community singing on a large scale is being encouraged by WGN, Chicago. Every evening from 6:55 to 7 p. m., Central time popular ballads and well-known tunes are presented by an ensemble of WGN artists. Listeners are invited to join in.

* *

And still they come! Here is another old fiddler, Andy Hidee, who will broadcast from WLW, Cincinnati, Saturday evening, March 20, at 9 p. m. Central time. He places the fiddle between his knees and bows it like a cello. The other member of the team is Walter Harlan, accompanist.

* *

Fans who listened to Bishop Frederick Fisher recently at WBPI, New York, enjoyed some of the thrills of the hunting trip in India of Kermit and Theodore Roosevelt. Bishop Fisher has been in India with the Roosevelts.

* *

Each month will end attractively at WJZ, New York, with a recital by two favorite Radio artists, Godfrey Ludlow, Australian violinist, and Lolita Cabrera Gainsborg, pianist. These Sunday evening concerts will include the sonatas of well-known composers.

* *

S. L. Rothafel, popularly known as "Roxy," to thousands of listeners, bid a temporary farewell to his many Radio friends recently from Station WEAF. He will broadcast again next autumn when his new theater opens.

* *

During the first week in March, WOR devoted one-half hour each afternoon to talks by outstanding authors of the day. Martha Ostenso, author of "Wild Geese," Homer Croy, author of "West of the Water Tower," and Charles Hanson Towne, author of "Tinsel" were among the speakers.

TO PICK GREATEST ANNOUNCER

COMMISSION DESIRE OF ZENITH COUNSEL

ASSAILS PRESENT KIND OF RADIO ADMINISTRATION

Believes Radio Commission More Equitable Form of Supervision—Organized Labor Also Makes Kick

By L. M. Lamm

WASHINGTON, D. C.—Strenuous demands that congress take the administration of the Radio law out of the hands of the department of commerce and establish a Radio commission were made during the closing hours of the hearings on the Dill Radio bill, which lasted for several days before the senate committee on interstate commerce, of which Senator Watson, of Indiana, is chairman.

Irving Herriott, counsel for Station WJAZ, of the Zenith Radio corporation, and E. F. McDonald, Jr., president of the firm, told the committee that he did not believe that the secretary of commerce should be clothed with his present broad powers for Radio regulation or with those provided for in the Dill and White bills.

He asked that a commission be appointed by the president and that the control of Radio be taken away entirely from the department of commerce.

Says Hoover Can Divide Station Time

Mr. Herriott in opening his testimony gave the history of the Zenith station and some of its troubles which terminated in the federal courts in Chicago, and in which it is expected a decision will soon be rendered. He went on record distinctly as in favor of a bill for Radio regulation and seemed to favor the Dill bill except in that he wants a commission instead of the power being delegated to the department of commerce.

He took the position, in answer to questions of the committee that if the secretary of commerce now has the power, under the present law, to assign wave lengths he must also have the power to divide time for the stations. He called the committee's attention to the fact that Radio is still in its infancy but he predicted that the time is not now far distant when power will be transmitted by Radio for various purposes.

Labor Would Divest Hoover of Power

The number of stations owned by one firm, said Mr. Herriott, should be limited in the bill under consideration. In contention of his suggestion for the Radio commission he said that it could handle the matters more expeditiously and he thought that a provision should be made in the bill "for a fair division of time for everyone."

W. J. H. Strong, representing the Chicago Federation of Labor, told the committee that the Dill bill is not scientifically drawn and that it is not in the interest of public policy. He made suggestions for almost all of the sections of the bill.

He told the committee that Radio should be declared a public utility and that it should be taken away from the department of commerce and placed under the interstate commerce commission. He said that he does not favor the United States government owning any Radio stations.

PASS LAW AGAINST LOUD RADIO NOISES

MOUNT VERNON, N. Y.—There will be no loud noises from Radio receivers or phonographs in this little town, if the aldermen have anything to say about it. The common council announced recently that an ordinance had been passed fixing a penalty of a $5 fine or five days in jail on the owners of phonographs or Radio sets that make too much noise. The aldermen said they hoped the ordinance would check the efforts of "merchants seeking to attract attention by increasing the volume on their loud speakers."

TEXAN SEPARATES VOICES OF SEXTET

CINCINNATI.—Nearly every fan boasts of some performance of his set which makes it quite the best, but the broadest claim for selectivity is made in a letter received by Station WSAI, of the United States Playing Card company, here, in which the writer, a Texan, insists that he uncrambled the voices of the Bicycle sextet at will. At times he served to his guests a tenor solo, regardless of the fact that five other voices were being broadcast at the moment, or occasionally shifted to a duo with the tenor and baritone.

DID YOU SCENT SCENT SHE SENT?

Ruth Fallows is the girl with the atomizer in the above picture taken in the WJZ studio, New York. She was telling her sisters of the Radio audience all about the beautiful scents that come from atomizers and she became so engrossed in her story that she really thought she could send out the odor, just as she was sending out her voice. At least, that's the impression she caused in the studio and, according to letters from fair listeners, she almost succeeded in doing that very thing.

Rochester, N.Y., Giving Programs Over WGY

Former Silent Night of Schenectady Station Now Feature

SCHENECTADY.—Wednesday, heretofore a silent night for WGY, has become one of the biggest nights for the station, and it is sure to gain in popularity with the listeners. That evening is given over, practically entirely, to Rochester, N. Y., and that city has thus far provided three outstanding programs.

The symphony orchestra of the Eastman theater is heard at 6:45 o'clock and this is followed at 8 o'clock by a program by Eastman School of Music pupils, the Little Symphony orchestra, the Rochester Symphony orchestra, or other Rochester talent. The Little Symphony orchestra and the Rochester Symphony orchestra are under the direction of Eugene Goossens. WHAM of Rochester broadcasts all Rochester features simultaneously with WGY.

150,000 Swedish Licenses

WASHINGTON, D. C.—The number of Swedish Radio licenses issued up to the end of February, this year, amounts to about 150,000, according to a report to the department of commerce from Stockholm.

NEW LOCATION AIDING WGBS TRANSMISSION

Fans in Greater New York Are Getting Better Reception

NEW YORK.—Since moving its transmitter from the congested downtown district, WGBS, here, has practically been deluged with letters from listeners reporting that the new location in Astoria has greatly increased the strength of the Gimbel Brothers' station.

Before this step was taken WGBS was heard with excellent quality in all parts of the country, but a great many Radio fans right in Greater New York, principally parts of Brooklyn, found it difficult to tune in to the station. This was due entirely to the mass of steel and other air obstructions in the midtown district.

One of the main features in connection with the new transmitting plant is the fact that it is built on a peninsula of land, and surrounded by water on three sides.

Metropolitan Theater Now Operating from New Studio

BOSTON.—The Metropolitan theater here recently opened its own studio broadcasting through WNAC, the Shepard Stores, with an extensive and exceptional broadcasting program.

The studio has been highly praised by those who are competent to know of the modern mechanical equipment in the average broadcast studio. Every effort has been made by the Metropolitan theater to make this new studio ahead of the times. The latest and the most approved microphones have been installed. Radio engineers have designed the most efficient mixing panels.

Radio Conference at Geneva

GENEVA.—Invitations have been issued to all broadcasting concerns in Europe to attend an international conference in Geneva beginning on March 25. The organizing body is the office international de Radiophonie. The main question to be settled is the definite repartition of wave lengths.

WINNER WILL BE SELECTED BY LISTENERS

Third Gold Cup Award

Annual Contest in Which Fans Will Choose Favorite Announcers to Start Next Week

For the third consecutive year the millions of Radio listeners numbered among the invisible audience will have the opportunity of selecting the world's most popular Radio announcer. Who will be selected this year to bear the coveted title and receive the handsome solid gold cup offered by Radio Digest in its third annual Gold Cup Award?

Two gold cups have already been awarded. In 1924, George D. Hay, formerly of WMC and WLS, now director of WSM, won the much desired trophy. In 1925, Graham McNamee, WEAF's chief announcer, topped the list and won the prize. In 1926—who will win?

McNamee Won Cup in 1925

The race last year was by far more thrilling than in 1924. Graham McNamee, George Hay, Henry Field and Gene Rouse were all possible winners at various stages of the voting. The jockeying up and down of the more popular contestants provided listeners with many surprises.

But when the final count of the 1,161,659 votes cast was made and McNamee's total reached nearly 200,000, the race was over. At that, Henry Field was a close second.

D. P. R. Coats, announcer for CKY, Winnipeg, Manitoba, led the list of Canadian announcers last year, and was presented with a silver loving cup. This precedent will be followed again this year, and the high Canadian announcer wil receive a beautiful silver loving cup.

Radio listeners clamor anew to know who is the world's champion announcer. And to gratify the wishes of the great army of listeners, Radio Digest is again undertaking to aid them in making their selection.

Contest Begins Next Week

The Gold Cup Award is a permanent institution. As long as broadcasting stations continue to broadcast, the Gold Cup Award will be conducted annually by Radio Digest. Each year a solid gold trophy will be awarded to the world's most popular Radio announcer.

Watch the next issue of this publication for further announcements concerning the contest and how it will be decided this year. Full details will be given, and the first official ballot will appear. It is important to have every ballot, beginning with number 1.

In the meantime members of the invisible audience are advised to listen carefuly to the various styles of announcing they hear nightly. What kind suits you the best, who pleases the most?

Say it with ballots, beginning next week.

Each City Has Program On Manitoba's Station

Each Point in Province Can Tell of Its Attractions

WINNIPEG, Canada.—CKY, "Manitoba's Own Station," operated by the telephone system which is owned by the people of the province, is now broadcasting programs by remote control from all the principal cities and towns outside Winnipeg.

The whole purpose of these broadcasts is that of giving each point in the province an opportunity of going on the air and telling the world about its local attractions. The programs are put on officially by the town councils or boards of trade. The broadcasts are performed by the telephone system in the interests of the province.

Private commercial advertising is barred and on this understanding the work is performed at rather less than actual cost. Manitoba is the only province in the Dominion of Canada operating its own broadcasting system and providing broadcasting facilities of this kind to its outlying towns. There are no other broadcasters in Manitoba.

Secretary Hoover Is Real Fan

UNCLE Sam's Radio Spokesman Keeps Receiving Set Near His Desk and Enjoys DX Hunting as Well as Local Programs—Conferences Aid Wireless Progress

By L. M. LAMM

HERBERT HOOVER, erstwhile food administrator of the United States, present secretary of commerce, adviser to the President, and friend of the Radio fans of the country, is himself a diligent fan. He has been called "Czar of the Air," but the title does not suit him. He does not like it.

From time to time the secretary has had all kinds of sets in his home for his personal use, from a small crystal to the most up-to-the-minute tube set. He has tried all these out so that he will better be able to know the conditions under which the fans who have small sets operate. It is known that he has himself experienced many of the inconveniences to which the owner of the small set is subject and for that reason he has all kinds of patience with the kicks of listeners in which reach him almost daily.

Mr. Hoover now has several Radio sets in his own home. One of them, however, is his "pet" and that is installed in his own private study, right alongside his desk, where he does a great deal of work at night. This study has a large open fireplace and it is said that frequently when he is trying to solve a problem he will stop in the middle of his work, light his pipe and play with the dials.

He gets considerable "kick" out of the quality of the programs and the reception. Mr. Hoover is also very much interested in loud speakers and has tried out many of them. Manufacturers of sets and speakers who think that they each have something out of the ordinary frequently send their sets to the secretary to see what he thinks of them.

The secretary is not the only one in his family who is a Radio fan. He has a very handsome set installed in his living room for the use of his family. Mrs. Hoover shares interest with the distinguished secretary in this art. His son, Herbert, who is now away, has been interested in Radio for many years. He has been an amateur and has been very active in his experimental work with Radio. It was probably through this son that Mr. Hoover became so much interested in the subject. It is also through this son that the secretary has a direct contact with the amateur operators of the country.

Sometimes the amateur broadcasters think they get rather a poor show and have to take a lot of abuse from the Radio public in general. One of the most ardent amateurs in the country is Herbert Hoover, Jr., who is seen above with his famous dad, who is the voice of Uncle Sam on all Radio rights and authority. Beside the secretary is Mrs. Herbert Hoover, Jr. So the amateurs should be well represented at Washington. Below is a group well known to Radio fans. Left to right are W. E. Harkness, assistant vice-president American Telephone & Telegraph Co., in charge of Station WEAF, New York; A. Atwater Kent, Philadelphia; Secretary of Commerce Hoover and Congressman Arthur M. Free of California.

EVER since Radio has been an active subject in the department of commerce, and that means practically ever since Mr. Hoover has been secretary, he has been strong for the American boy as one of the greatest assets of the Radio industry. His appeal has always been for the boys of the country and he has looked out consistently for their rights in legislation and regulation, as well as those of the amateurs in general.

Mr. Hoover has always stood for the motto of the service to the public of the broadcasting stations. He believes that this is the real sum and substance of Radio broadcasting at this time.

Many Radio problems are presented to Mr. Hoover daily and, although he has a large corps of assistants to help him, he is fond of dealing with the subject himself. At the present time there are three outstanding problems. They include interference, applications for new broadcasting stations for which no wave lengths are available, and applications for increases in the power of the present stations.

Mr. Hoover frequently talks over the Radio at functions but he does not frequent broadcasting stations, although there are two first-class stations near at hand in Washington, WRC of the Radio Corporation of America and WCAP of the Chesapeake and Potomac Telephone company. He has, of course, been through these and other stations and knows about them thoroughly, being an engineer of note himself.

The secretary is best known, perhaps, throughout the Radio field in all of its branches as chairman of the various Radio conferences, of which he has called four since he has been in charge of the department of commerce.

He has a proclivity for running conferences and is most successful in this field. At the first Radio conference which he convened, about five years ago, there were only some twenty-five people present. This number has increased each succeeding year, until the last conference, held in the autumn of 1925, brought to Washington more than 600, representing every Radio interest, including represent- (*Continued on page 12*)

Fair Listeners Love KOA Chat

DENVER Station Broadcasts Snappy Matinee Program to Please Housewives and Mountain Maids Remote from City Shops and Social Conveniences

By HAROLD P. BROWN

DID you ever know a woman to be "up in the air" about her clothes, her health or what to get for luncheon that would be different and more pleasing than the usual thing?

Quite likely, or you never knew a woman.

Possibly you may know Mrs. Ruth Drumm Witting of Denver. You certainly know her if you live within range of KOA, the "mile-high broadcasting station" of the General Electric company, located at Denver. And, by all means, if you are a woman listener in that widespread area you know Salle Dee and Clara Hoover, both of the same station. All three of these ladies may be "up in the air" a mile high from the sea level but they have all these important things that women are most interested in, down to the last word, in the microphone.

Out where the West begins, women are women, just the same as they are anywhere else. Don't ever doubt that. And if you want special confirmation of the statement it is only necessary that you tune in KOA during one of the triweekly women's matinees indicated on the Radio Digest program pages.

OH, IT'S healthy in Colorado, up there on the mountain roads, of course! You step a little harder on the accelerator and keep your eye pretty close to the highway as you begin to climb the rugged flank and make the sharp curves, but you can't help seeing the cottage up there on the terrace and the thought flashes through your mind, "Man, but this country would be poor picking for a doctor!"

True enough! Still, it doesn't change the fact that women are women where the West begins the same as they are anywhere else. And that accounts for Mrs. Witting who talks health and beauty into the homes of the mountain folks. Mrs. Ezra McPeak, twenty miles up the Pike road, may never have seen a beauty doctor, but she is interested in knowing how to fix her hair and she has those "dizzy spells" and a "touch of lameness" in her "joints" just the same as the casual shopper on Fifth avenue, New York, or the "Boul. Mich." in Chicago.

A nerve tonic? Certainly! Leave it to Mrs. Witting. Just tune in on one of those mid-afternoon relaxing and corrective exercises for women—"Over now, touch the floor with the tips of your fingers, One! Two! Three! . . . Fill your lungs with fresh air . . ." and all the while the piano creases out the effort of exertion.

Just to visualize her listeners a little more clearly, Mrs. Witting often conducts a gymnastic class in the KOA studio.

"LET'S all just forget everything else of the day's routine," says Mrs. Witting to the visible and invisible listeners, "and I can positively assure you if you will take this tonic according to prescription you will feel greatly benefited. Correct daily exercise, giving every little muscle, every little blood vessel, every nerve and tissue a chance to function and carry on the necessary reconstruction of the body, is better by far than all the pills and elixirs in the world. Keep physically well by keeping mentally well. Keep mind and body in harmony by gymnastics."

Mrs. Witting administers her "nerve tonic" in special doses for those who wish to reduce, for others who wish to build up and for all who wish to especially cultivate poise and posture.

Women love Salle Dee (right) because she brings to the listeners of KOA, Denver, the shop windows of the city and describes latest styles. Health and beauty are broadcast from the same station by Mrs. Ruth Drumm Witting (below), and kitchen technique and art of cooking by Clara Hoover (in circle).

Mrs. Witting is followed by a lively half-hour interlude of special music, which includes the latest song hits, chats along airy lines and other incidental features.

Now here is a secret that some folks will be surprised to hear: Following the interlude comes "Clara Hoover." That is just a "nom de Radio!" Her real name is— Pardon! That would be telling too much, more than the lady desires. Anyhow, she is a very highly esteemed society matron of Denver. If you know your Denver society, you may recognize her through the cover-all apron and broad headband as she is pictured here.

CLARA HOOVER, as she is known, has analyzed the kitchen and cooking problem down to the last and final ——.

And don't forget that "women are women" wherever you go — the same problems, the same heart cravings, the same worries—from Augusta, Maine, to Catalina Island, East or West. So Mrs. Hoover says:

"Because the woman's daylight hours are split three ways by family responsibilities, business cares and club activities, Radio talks on these subjects by those who have made of them a special study should prove not only interesting but profitable to those concerned. Especially should this be true of the kitchen and cooking—that never-ending bugaboo to many women." After that she lifts a figurative carving knife and lays open the various mysteries behind the kitchen door. Even a dull minded husband, eavesdropping on the loud speaker, should (*Continued on page 12*)

a STEP On the STAIRS

By ROBERT J. CASEY

Radio Dramatization by FRED SMITH

Synopsis of Preceding Chapters

GRIM and ghostly mystery settled down on the old manor house of the Turners on Pelican Bay shortly before events chronicled in this story. The manse had come down through one hundred and fifty years of sea-faring Turners and then Jeremiah Turner was found dead with a bullet in his head on the hearth of the gun-room floor. They carried his body out the door reserved exclusively for the removal of the dead masters of the house. Soon after, the body of Peleg Turner, a brother, followed the same course. He seemed to have died from natural causes.

Lawyer Ardwyn, his executor, summoned the relatives for a weird seance in the deep shadowed hunt-room, lighted only by a candelabra. A letter left with the attorney had stated that the departed Peleg would attempt to communicate his discoveries beyond the grave through the Radio. The story opens with the party assembled. Only John Carton, a favorite nephew, is missing. He had been suspected of the crime. Henry Millis, the caretaker, had been startled by the arrival of a man in a gray overcoat from the stormy waters of the bay. The man said he had been called to the meeting, but Hari Singh reported later to Henry that he had never arrived at the house.

The clock struck twelve. There was a scratching sound in the receiver. A few syllables were uttered. Then followed an interruption. The voice of the announcer at FYX, a nearby broadcasting station, called for help and a shot was fired. The listeners who were sitting in absolute darkness rushed for the locked exits in confusion. They already had heard ghostly sounds on the stairs and a mysterious tapping similar to an SOS signal. Finally, when a bit of candle was lighted, it was found that Milford Jones, one of the guests, was missing.

Tolliver, another guest, was appointed to investigate the FYX shooting. He found that a stranger had broken into the broadcasting station, shot the engineer and escaped unidentified. The wounded man was taken to a hospital but Tolliver discovered a trail of blood and picked up a letter which he handed to Ardwyn at the table. Just as the lawyer was about to open it Mary Williams, a friend of Carton, and sought in marriage by another cousin, Henry Graves, accidentally knocked the only candle to the floor.

In the darkness that followed Ardwyn felt the hair of a woman brush his hand and his wrist was caught in a savage bite. Another candle was lighted. The letter had disappeared.

Mary was suspected. When the other guests left the room for coffee and sandwiches Ardwyn showed her a locket which she admitted was her own. He had found it caught on his watch chain.

Then she showed him a pair of shoes left by some mysterious visitor who apparently had come through the locked and barred door of death. Mary dared Ardwyn to wait for the intruder's return. The candle stub sputtered out. Mary was heard to scream she had touched a corpse. The other guests rushed into the room and found Ardwyn and Mary both sprawled on the floor unconscious.

THE STORY CONTINUES.

CHAPTER SEVEN

Hail to the Prodigal

THE candle flared reluctantly as Henri Singh applied the match and cast a dim radiance over a scene of chaos. Ardwyn, the lawyer, sat where he had fallen beside a chair near the door. Blood was trickling down his face from a cut in his forehead.

Mary Williams, white and silent, lay on the floor. In her outstretched hand—fluttered by the drafts in which the storm came over the worn sills about the trembling house—was a white scarf. As the crowd stood in an awed circle about them, Miss Williams slowly opened her eyes and Ardwyn attempted to raise himself.

"What happened, Mr. Ardwyn?" inquired Hari Singh.

"Blessed if I know," replied the lawyer hazily. "The front door is barred. But the front door opened just like she said it would. And somebody came in. I think I collided with the edge of the door in the dark."

"Who said someone was going to come in?" broke in Maurice Tolliver. "Do you mean to tell me you were waiting for somebody to come in here and rap you one on the coco?"

"The Sahib is in pain, Mr. Tolliver," Hari Singh cut in. "Would you please not question him."

"Never mind, Hari Singh," Ardwyn told him. "My head is clearing. And one must talk sooner or later.

"I may say, Mr. Tolliver, that your supposition is correct. Miss Williams was expecting someone to come in through the front door and we sat here waiting for the visit."

"It certainly is beyond me," Tolliver went on irrepressibly. "I guess I ain't very inquisitive. But I'm tellin' the world that if any ghost or banshee or what not wants to come in through that door or go out, there ain't goin' to be any interference from me. I'm stayin' here until daylight when I may feel safe about goin' home on the bay road. What happened to Miss Williams?"

Hazel Stanton, who had been holding the wrist of the prostrate girl, looked up at him.

"She's just fainted, I think," she said. "Offhand I'd say she has had a horrible fright."

"No worse than she gave me with that shriek of hers," declared Tolliver. "People with nerves like that shouldn't play around in the dark."

"Miss Williams' nerves are easily the best in this company," Ardwyn declared, still huskily. "She shamed me into staying here and if I hadn't bumped into the door or whatever it was, I probably should have fainted myself."

"What did she see after the door opened?" inquired the girl with the red hair.

"I don't know that she saw anything, Miss Stanton," the lawyer told her. "It was pretty dark in here. And I was only vaguely conscious of what was going on. I think she said something about colliding with a corpse. . . ."

"A CORPSE . . ." The voice was Hari Singh's but barely recognizable. "That bears out what I said. I recognized the white scarf the minute I saw it. With my own hands I put it about the shoulders of Peleg Turner before they laid him in his coffin. . . . It was his mother's scarf. I couldn't be mistaken in it. . . ."

Ardwyn interrupted him.

"She's coming around now," he said. "Stand back a little and give her quiet. We can ask her a little later to tell what happened to her."

"Seems to me you're showing her a lot of consideration," snapped Aunt Helen.

"I don't think I quite understand what you mean, Mrs. Holmes," retorted Ardwyn.

"Well, I notice this. Trouble just seems to be a-followin' her around. It always does follow these flighty young girls. There have been some funny go-in's on in this house tonight and this girl has been mixed up in all of them."

"For that matter, Mrs. Holmes, we have all of us been mixed up in them. It's a bit early to go fixing our suspicions upon one person — particularly before we know what to suspect them of."

And Mrs. Holmes' shrill plaint was not repeated.

On the fringe of the crowd, however, she found sympathy in the whispered commendation of Cousin William.

"I think you're just right about that," he told her in a half whisper. "Yes, indeed. I don't trust that Williams woman, either. And I'd trust Jezebel farther than I would that red-headed hussy who's rubbing her wrists."

"Virtue is its own reward, like I always says, Cousin William," Aunt Helen told him as one philosopher to another, "and I knew trouble was a-comin' when I first laid eyes on these girls. That red-headed Stanton woman is a bad lot, I'm tellin' you that, Cousin William. Mary Williams is bad enough. But I'll tell you somethin' for your own good an' don't breathe it to a soul. Hazel Stanton is worse. . . . Would you believe it, when some woman in this room was chawing the hand off of Ardwyn, that Stanton woman wasn't in her chair!"

"What?"

"I'm not fooling you, Cousin William. I'd not be makin' a joke out of anything so serious an' solemn as this. But she—certainly—was—not—in—her chair."

"But, Aunt Helen, what surprises me is how you noticed it. You had fainted. . . ."

"I recovered, my boy. I ain't never fainted so bad yet that I couldn't tell when evil was goin' on around me. It's just the natural unconscious feeling I have about sin an' wickedness. I know when they're around. The girl seems to be openin' her eyes. She looks groggy but I guess she'll be all right."

"Miss Williams needs all the air she can get," Ardwyn said. "I should suggest that all of you go back to the library and finish your coffee. If Hari Singh will get me a bandage and some hot water I think I can take care of the first aid work."

There was no audible objection to the program. The movement back toward the library was quick enough and concerted enough to be classed as a stampede.

ARDWYN took Miss Stanton's place at the girl's side. "They are gone, Miss Williams," he said to her. "Was there something you wished to say to me?"

"I was not so brave as I had thought," she replied weakly. "I didn't know it would be like that." She shuddered. "It was a dead man, Mr. Ardwyn. I felt his flesh. It was clammy and cold. And instead of trying to hold him I tried to get away."

"Don't bother to talk about it," he suggested to her. "You are all unstrung and probably couldn't remember what happened even if you tried. I should like to get you a stimulant if you wouldn't mind being alone a minute or two."

"I have no choice," she answered. "Anywhere in this house I should feel uneasy. I do not think I shall be any worse off here than elsewhere. The dead man went out with the shoes. He probably will not be back again."

"Just what do you suppose a dead man would want with shoes?"

"I'm sure I don't know. I don't know why a dead man should leave a comfortable grave on such a night as this. . . . All I know is that one did. But don't mind me. I shall be all right with the candle lighted and the door to the hall open. I think I am only half awake now. Nothing seems to matter—and I was dreaming just a moment ago of Milford Jones. I seemed to see him going out through that front door. I seemed to see him dying to keep up the old tradition. . . . But I was not alarmed about it. . . . Oh, don't mind me, Mr. Ardwyn. I'm quite all right, only weak and dizzy."

"I'll get you a stimulant and be back in a moment," he said rising. "Surely we have had our share of excitement for one night."

The girl was vaguely conscious of his footsteps becoming less and less noticeable on the bare parquet floor of the hall. Then came the old silence and the old sounds—the clock, the storm, the muffled voices—and one more dire if no

$500 in Gold

FOR THE SOLUTION OF

"a Step On the Stairs"

REPRINTS NOW AVAILABLE

NATION WIDE interest has been created by this thrilling mystery story. Listeners in sunny California, chilly Maine, the Province of Quebec and old Louisiana are endeavoring to solve the tangle of clews. Because this is true, and so many people are attempting to win part of the $500 in Gold prizes which are being offered, a reprint of the first four installments, complete in every detail, has been printed and may be had for the nominal charge of twenty-five cents, in coin or stamps, to cover the cost of handling. If you have missed one or more of the preceding installments you will want this reprint to help you solve the mystery and win a prize. Address your letter to the Mystery Story Editor, care of Radio Digest. Besides the story there appears in the reprint a number of questions which may be helpful in formulating the solution.

The story, "A Step On the Stairs," is written by Robert J. Casey, an author whose works in the literary world need no introduction. Furthermore he is well versed in the needs of such fiction for Radio presentation. His work, in turn, is being Radio dramatized by Fred Smith, Managing Director of the United States Radio Society, who can be counted among the first few men to write and present Radio plays.

Read the story and hear it played weekly from the selected stations. Don't miss this thriller, whether or not you intend to submit a solution!

The chosen stations, which will broadcast "A Step On the Stairs" in Radio play form, are given on page thirteen. The days and the hours are listed.

THE PRIZES

The prizes are seventeen in number. First prize is $250; second prize is $100; third to seventeenth prizes inclusive, are $10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story will be published consecutively each week. The first appeared in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unravelling the mystery accurately, will win. The method of preparing the solution—its neatness, legibility, etc.—shall be considered in the selection of the winning solution. It should not be difficult for the average reader to study the story carefully and arrive at a logical solution.

RULES OF CONTEST

1. The contest opened with the February 27 issue. All solutions must be received by Radio Digest not later than midnight of Saturday, May 1. The ninth installment of the story will appear in the April 24 issue. The author's intended and final chapter will appear in the May 15 issue of Radio Digest, together with the announcement of the winners' names.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon but one side of paper, and names and addresses should be written or printed plainly.

4. The decision of the judges, to be named later in the contest, will be final.

BEGIN NOW to Read This Thrilling Mystery Story and Hear It Played Over the Air. Perhaps Your Solution Will Win One of the Many Prizes.

less familiar. A step was descending the stairs.

Mary Williams came back to full consciousness with a quick intake of her breath.

"Who's that?" she demanded in a voice no more than audible. "Who is it?"

The steps came nearer. They turned at the hall door and a figure slipped stealthily into the room.

"A man!" she whispered. "A man!" And then in a hushed tone that combined awe, amazement, and the fervor of a prayer: "John . . . John Carton. . . . You have come back to me. I thought you were dead."

CHAPTER EIGHT

The Body in the Snow

WITH an alert eye watching the hall door, John Carton stole across the room and dropped to his knees on the floor between the fireplace and the huge leather chair from which the girl had partly risen.

"I was in the linen closet at the head of the stairs," he explained rapidly. "I overheard what that man said to you and I guessed you might be alone. I had to talk with you."

"John, where have you been?"

"I can't tell you that. I can't tell you anything until this night is over and the police are in the house."

"The police?" she repeated almost unbelievingly. "John, do you . . . want the police . . . here?"

"Why not?"

"But, boy, they have been looking for you. They have been accusing you of murder. Don't you know that?"

"I know it. Somebody killed Jeremiah Turner. I was here. I went away. It looks like what the police would call a prima facie case."

"But you didn't kill him?" she pleaded. "You won't lie to me, will you, John? You didn't kill him. Tell me you didn't kill him!"

"No," he said slowly and a bit coldly. "I didn't kill Jeremiah Turner."

"I knew it, John. I felt it—always. . . . But, oh, you don't know the weariness of all these months I have put in waiting to hear you say it. . . . Who did kill him?"

"I can't talk about that, Mary. There isn't time."

"You are shielding somebody."

"I am not shielding anybody."

"Why did you run away?"

"Hush, Mary, don't work yourself into hysteria. I tell you there isn't time to talk about these things now."

"What did you come back for?"

"To prevent another murder. It's on the books for tonight. I know it just as surely as I know I shouldn't be here now. And I am beginning to wonder if after all I can stop it."

"Murder?" The girl's voice was a trifle skeptical. "Are you sure you are telling me the truth, John?"

"I haven't time to give you evidence, Mary. You've got to believe what I tell you."

"Are you sure Hazel Stanton had nothing to do with your going away and that she has nothing to do with your return?"

He showed some signs of irritation.

"Who is Hazel Stanton?" he inquired. "I never heard of her."

"Don't tell me that, John. I saw the two of you there under the porte-cochere on the night of the murder. I saw her red head in the moonlight. And I saw your white face as you talked to her. . . . I have tried to trust you, John. Why won't you give me a chance?"

"I can't explain, Mary," he admitted helplessly. "I can't say anything that will make you believe in me. But you have to believe in me without explanation. You have to. I came here to tell you . . ."

BEFORE he could finish, the murmur in the library grew ominously louder and the voice of Ardwyn was heard in the kitchen beyond.

"Hari Singh," he was calling. "Hari Singh, where are you? Isn't there anyone in this house knows where the medicine chest is?"

"They're coming back," gasped John Carton. "I didn't know they were in the library. . . . I'm caught!"

"There is some way to open the front door," she told him. "It's been open oftener tonight than in the hundred and fifty years this house has been standing here."

He drew back from her.

"Hush, Mary," he told her. "You don't know what you are talking about. Only corpses have ever gone through that door."

"At least one live man went through it tonight," she countered hastily. "And you've got to get out of here."

"I'll let them take me before I'll try to get out through that door," he declared with finality. "And I guess the game is up. Here's someone now."

"Hari Singh!" breathed Mary.

The Indian looked at the pair as casually as if he had expected to find them there.

"This way, Sahib," he said. "And be quick about it."

"Go with him and God help you," the girl commanded him.

"Good-bye, Mary," he whispered hastily. And he moved rapidly about the table to the door where Hari Singh stood waiting for him. A moment later the side door creaked open and slammed and the guests were moving diffidently back into the room.

"I THOUGHT I heard someone in here talking," volunteered Henry Graves from a point beyond the candle light. "Funny, isn't it?"

"What did Ardwyn send us back here for, anyway?" demanded Tolliver.

"My reputation will never survive this night," sighed Aunt Helen.

"Where is Ardwyn?" growled Henry Graves.

"I'll be there presently," called the lawyer from the hallway. "Hari Singh must have put the medicine in the safe." He pushed through the group at the door and carried a glass of white fluid to Mary Williams.

"I found it at last," he said. "It's a simple sedative. You'd better drink it. You'll need it before dawn. . . . Didn't I hear Hari Singh in here a moment ago? What became of him?"

"I don't know," the girl replied dully. "I heard him say something and then the side door slammed. Maybe he went out."

"Why should he go out in a storm like this?"

"I don't know. I just thought he had gone out."

Tolliver sniffed.

"Why get excited about it, Ardwyn?" he asked. "What's there to be surprised about if anybody in this festive madhouse take a notion to go out runnin' around in the snow or walkin' on his hands or imitatin' a sea lion? Maybe he did go out. An' I'll bet if he did you'll find him wearin' a straw hat."

"Please be quiet, Mr. Tolliver," advised Ardwyn. "If Hari Singh went out he had some good reason for going. Hari Singh is sane—whatever may be said for the rest of us."

A whistle of wind and the banging of the side door interrupted him.

"That's the door now. Who came in?"

"HARI SINGH," called a voice from the hallway. "And he's dragging something in after him."

Then Hari Singh himself joined the conversation with a sharp note of command.

"Will one of the Sahibs give me assistance," he said with only a hint of his usual studied politeness. "I cannot lift him alone." His voice was unsteady from over-exertion.

"Lift whom?" demanded Mary Williams in sudden panic. "What is he talking about? Oh, Mr. Ardwyn, what has happened now?"

"Who is it, Hari Singh?" the lawyer asked him.

"I do not know his name," the Indian replied, "I found him out there in the snow. I think he is dead."

"Dead," shrieked Mary Williams in wild hysteria. "Dead. . . . He can't be dead. He was alive only a moment ago."

Who was it that came in the awful front door as Mary and Ardwyn sat watching? How did she get Peleg Turner's funeral scarf in her hand? Why has John Carton returned? Whose murder did he seek to prevent? And whose body has Hari Singh brought in from the blizzard? Can it be that John Carton has returned to prevent a murder only to be felled himself? Read the fifth installment of Robert J. Casey's story next week in Radio Digest. Perhaps some of these questions will be answered.

The Indian looked at the pair as casually as if he had expected to find them there. "This way, Sahib," he said. "And be quick."

KTNT BOSS THROWS JAVELIN AT HOOVER

CHARGES SECRETARY HAS FAVORED SOME FIRMS

Seeks Senator to Instigate Administration of Radio Affairs Alleged to Be Mismanaged

WASHINGTON.—A senatorial investigation of the department of commerce administration of Radio was asked recently by Norman Baker, owner and operator of Calliaphone Studio K-"TNT" of Muscatine, Iowa, and president of the American Broadcasters, an organization composed of independent stations.

Mr. Baker charges discrimination in the Radio affairs as administered by the department of commerce, stating that the department is mostly interested in the passage of the White and Dill Radio bills because the officials have violated the laws so many times that they now seek protection.

Wants Chain Stations on Same Wave

Before the committee on interstate commerce of the senate, Mr. Baker viciously attacked the department of commerce's activities, and suggested many changes in the Dill bill. He suggested no power over 500 watts be allowed for stations when broadcasting simultaneously, and such stations be located 500 miles or more apart, thus preventing complete monopoly of the receiving set dials which now is the case when a number of stations are connected together.

He urges the same wave length for all stations operating in a chain, and answered those who claimed it is impossible by advising the commitee he has filed for patent on such a system that will enable any number of stations to broadcast simultaneously on the same wave without interference.

Denounces Hoover as Villian

Baker branded as false, or misrepresentations, the data supplied by the departments on some Radio matters, claiming it may have been done to mislead the public.

He further asserted that the department of commerce has discriminated in the allocation of wave lengths, putting capital and powerful interests on the few select wave bands above 280 meters and crowding over 459 stations together between 200 and 280 meters, with great interference. He said there were open wave lengths in New York city, supposedly held for favorites or some powerful station, perhaps WJZ at Boundbrook. He attacked WJZ, the 50,000-watt station at Boundbrook, as to their right, under an experimental license, to broadcast programs and advertising with higher power than others are authorized to use.

Mr. Baker stated he can produce sufficient evidence of discrimination to warrant a complete investigation of the Radio administration in America, which he will start as soon as arrangements can be made with a senator to introduce the resolution in the senate. He added that the White and Dill bills should be defeated because they protect the "interests" more than the public.

TOWNS OF PANHANDLE PLAINS GIVING SERIES

Artists from Different Points in Region Perform at WDAG

AMARILLO, Texas. — The Panhandle Plains publicity programs that have been scheduled at Station WDAG, the Martin broadcast station of this city, have been very successful in their efforts to entertain the Radio world.

The closing series of these programs will be broadcast beginning March 23. During the following three weeks, artists from many different towns in the Texas Panhandle Plains region will be heard over WDAG.

The towns to be represented are: Canadian, March 23; Crosbyton, 24; Post City, 25; Booker, 26; Estelline, 27; Follett, 29; Hedley, 30; Idalou, 31; Lockney, April 1; Miami, 2; Muleshoe, 3; Perryton, 5; Plainview, 6; Spearman, 7; Stratford, 8; Wellington, 9; Ralls, 10; Lorenzo, 12; Mobeetie, 13; Channing, 14. All of the programs will begin at 9 p. m., Central time.

Program on 10 Watts Power Is Received Across Country

PROVIDENCE, R. I.—What appears to be a new broadcasting record was made recently when a program sent from WGBM, here, with but 10 watts of power was received on a loud speaker in the state of Washington. A post card giving the time and the selections played was received at the station saying that the program came in clearly through slight interference from KFWI.

DEMPSEY NERVOUS WHEN FACING MIKE

DENVER. — To Jack Dempsey there probably is one ordeal less trying than facing the microphone for a swing at static. That, say Denver sports writers and observers, is a good stiff battle in a squared circle.

Giant that he is, the heavyweight champion can show his wares before an audience of any size without flinching and, as he declared recently over KOA here, is prepared to defend his title against any challenger, but punching static is an entirely different story.

"Before starting his talk over the General Electric station, the champion was plenty nervous," observed the sports editor of one Denver paper. "First he stood on one foot and then on the other while being introduced to Radio listeners by Freeman H. Talbot, studio director. Next, he slid one hand into his pocket and finally put the other at his back."

In launching his Radio talk, Dempsey explained that his happiest days were the struggles of his early career.

"On all sides," he continued, "I am being asked when I am going to defend my title. In answer, I want to say, I am in the greatest shape of my career. I am ready to defend my title against any man in the world, Harry Wills preferred.

"Negotiations for this bout are shaping up so that I am sure a definite announcement will be made in a few weeks."

ANNOUNCER'S CALL IS IDENTIFICATION

David Lipton, Radio Director of Balaban & Katz, Gives Call to Cash Check

CHICAGO.—Speaking of the power of the press, the power of the screen and the like, hear this tale of the power of Radio.

David Lipton, announcer and Radio director of the Balaban & Katz theaters, who broadcasts over WMAQ, WGN and WEBH, walked into a bank the other day to cash his weekly pay check. Having no account, being a Radio man, he was asked for identification.

He searched vainly through his pockets without finding anything to prove his employment with the firm.

"Say," he asked the teller, "Have you a Radio set?"

"Sure have," answered the money man, "the wife and I listen to it every night."

"Well then," said Lipton, "See if you can recognize this." "WMAQ," he called forth in true Radio fashion, "Broadcasting an organ program direct from the auditorium of the Balaban & Katz Chicago theater."

"You're the Balaban & Katz announcer," cried the teller promptly, "say that was a fine program you gave us last night. Have Fossler play 'Mother Machree' for us some evening," he continued gleefully as he passed the two dollars over the counter to the hard-working man.

Cupid Makes Conquest At Hollywood Station

Billie Dunn and Tom Breneman in Studio Romance

HOLLYWOOD. — Although listeners could only hear the call letters KFWB as the program came over the Warner Bros. "mike," it was really station LOVE broadcasting. Billie Dunn, popular studio pianist of the movie station, thought the day a little warm even for a California winter when a big, handsome newcomer from the East walked into the studio and announced that he was a singer. Later she confessed she capitulated when the singer, Tom Breneman, sang "Take This Rose."

One day the pair showed up at the studio with the announcement of the engagement and shortly afterward cupid finished the job. Now they are back at KFWB, Billie Dunn's fingers twinkling just a little more as she plays and Tom Breneman sings his ballads with just a little more sentiment, a perfectly happy Radio-romantic couple.

WLW Is City Mouth-Piece

CINCINNATI.—Col. C. O. Sherrill, city manager of the city of Cincinnati, has appointed Powel Crosley, Jr.'s broadcasting station WLW, the official mouth-piece of the city. Messages of importance to listeners all over the country will be sent through the station.

The New Radio Book HOW TO -

Operate Sets
Construct Parts
Improve Reception
Understand Radio
Assemble Circuits

REVISED EDITION

FREE With One Year's Subscription to Radio Digest

THE revised edition now contains the greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest, it supplies the demand for a book covering every phase of Radio from a simple explanation of Radio reception to a technical explanation of the different parts of a set which leads to the best reception possible. The sections on selecting and making sets develops the different types of sets and circuits with diagrams to explain same. A seven tube super-het on a panel 7x18 inches, complete with all instructions, illustrations describing the wiring and actual size template is described. Just the thing for a portable this summer. Do you know how to get the best out of your set? "How to Operate" gives detailed information on the operation of all the well-known sets. The list of stations which is complete and revised, now contains all stations classified according to call letter, states and wave lengths. The section of workshop kinks will save the home constructor time and money.

Now is the time to take advantage of the exceptional offer as listed in the coupon for your convenience.

Hartland, Wisc.

"The five tube Traveler, described in your wonderful book 'Radio Receivers' is a 'wow.' It is impossible to go wrong with your new system of wiring pictures. We tour the country ever night."

WHEN KYW PICKS UP THE CONGRESS

RATING with the most beautiful studios in the country, the Congress hotel pickup of Westinghouse Station KYW, is pleasing in its simplicity. The best of furniture and equipment are found therein. The Congress studio has its own staff, the members of which are shown above. At the left in the circle is Miss Eulalie Kober Stade, accompanist and pianist. In the group, left to right, are Miss Stade, Edwin Boroff, director of Congress studio; Miss Florence Pauley, soprano; and Harold H. Isbell announcer. KYW's studios are scattered all over the Chicago loop district. One is located in the Hearst building, and another, probably the most elaborate of the three, is in the Fine Arts building. The transmitter is on the Congress hotel. While its rated power is 25,000 watts, KYW uses but 2,000.

RADIO SERVICE ASKS FOR LARGER BUDGET

PLAN TO SPEND MONEY TO LESSEN INTERFERENCE

New Offices Would Be Placed at Strategic Points and Night Headquarters Force Added

WASHINGTON. — An increased appropriation of $125,000 is recommended for the Radio service of the department of commerce in the appropriation bill for that department just reported to the house by the appropriations committee.

Plans have already been made by the Radio service for the utilization of the increased money to decrease interference. Deputy Commissioner Arthur J. Tyrer, of the bureau of navigation, gives the following account of how the money will be spent:

"We believe we should locate offices in the present centers of sending stations, at strategic points. In each of these sub-offices we should have an assistant inspector and one clerk. The new offices that we propose are at Dallas, Memphis, Los Angeles, Portland, Ore.; Pittsburgh, Buffalo, Denver, St. Louis, Minneapolis and Omaha.

Would Put On Night Inspectors

"At each of these new offices that we propose to locate, we would have an assistant inspector and one clerk. We are proposing to put one new man at each of the nine headquarters ports for night duty. Perhaps the most important broadcasting period is from 7 to 12 o'clock at night and at the present time our men who go on duty at 9 o'clock in the morning are continuing until along in the evening with their work. But it is rather heavy for them, so we propose to put on a night man at each of the headquarters ports.

"Then we propose to have one additional assistant inspector at Boston, New York, Baltimore, Atlanta, San Francisco, Seattle, Chicago and two at Detroit.

To Get Three New Radio Trucks

"We propose to get three new Radio-equipped trucks for locating sources of interference. We propose eventually to have one in each district. We tried one in the Detroit district first, to make sure that it would do what we thought it would do.

"During the time this Detroit truck has been in actual operation it has located 30 sources of serious interference and required the owners of transmitting stations to remedy the same. During this time 53 cities in five states were visited; 48 amateur, 15 broadcasting, 11 commercial, and 14 ship stations were inspected."

At the present time the Radio section is working under an allowance of only $220,525 but the bureau of budget recommends $354,000 for the fiscal year 1927. This was cut by the committee to $335,000 but it is understood that an effort will be made to have the appropriation increased when it is taken up on the floor of the house.

Call for Aid Over Radio Brings Relief To Widow and Children of Storm Hero

Family of War Veteran who Fought Raging Seas on Santa Monica Bay Receives $3,800 After Story Is Told to Listeners In at Station KNX

HOLLYWOOD.—When raging seas and unheard-of high tides swept in on the Santa Monica bay district near Los Angeles during the latter part of February, threatening destruction to piers and shipping and wrecking many of the cottages that had been built on the beach, a war veteran named Harry Hoover was one of the tireless ones who worked night and day saving the lives and property of those who lived on the shore. During the height of the storm he was swept out to sea and, presumably, because his strength had been exhausted in his fight for others, was unable to beat his way to shore and was drowned, leaving a widow and three small children.

The word of Harry Hoover's death came to G. Allison Phelps, Town Crier at Station KNX in Hollywood, who, with the permission and help of Naylor Rogers, manager of the station, decided to call on the Radio audience to help the grief-struck and penniless widow. At the time word came of Hoover's death, the station was booked solid with toll programs but sponsors came forward and donated five, ten and fifteen minutes each so the Radio audience could be told of the tragedy of the drowning, as well as the greater tragedy that faced the surviving little family.

The response was immediate, people phoning in their donations, and others, finding it impossible to get KNX by telephone, came in person to the studio to hand in their contributions. At 12 o'clock, when the station usually signs off for the night, about $800 had been received and the telephone service still was paralyzed with incoming calls, so gathering a few of the artists together KNX continued on the air with a special Harry Hoover program that lasted until 4:30 in the morning.

A few days later G. Allison Phelps took a check for $3,800 to Mrs. Hoover; contributions were still pouring in from all over the country, and means and ways of erecting a fully-paid-for home were being completed.

"It is a thing like that that gets under a man's skin," said Naylor Rogers afterwards, "and that makes this Radio game the biggest and most interesting one I know of."

PLEDGE CARD **Radio Digest** Illustrated PROGRAMS Reg. U. S. Pat. Off. & Dom. of Canada **I WON'T BLOOP CLUB**

I pledge myself to operate my Radio set to reduce radiation or blooping. If I am unable to make my present set operate properly, I further pledge myself to replace it with a receiver that will create less interference.

Make of my set:

Number of tubes is:

Signature .....

Address .....

City and State.....

I am cooperating in this campaign with Station.....

Upon mailing this pledge to Radio Digest, "I Won't Bloop Club" membership card suitable for wallet or framing will be issued.

HAVE you offered to do your share in improving broadcast reception by co-operating with the thousands of members of the I WON'T BLOOP club? Listeners from Alaska to Cuba have joined this movement of the Radio Digest to clear the air, and already reports are reaching our offices telling of improved conditions brought about by neighbors getting together and eliminating dial interference.

Broadcasting stations, newspapers and Radio clubs which have secured chapters in the club and who are acting as individual units of the club, are sending in daily lists.

Do you belong to a Radio club? If so, have the club pass resolutions to follow an I Won't Bloop policy. Get the members' pledges. Fill one out yourself. Do it today. Then follow the pledge to operate your receiver properly.

BALABAN AND KATZ ENTER RADIO FIELD

CHICAGO THEATER OWNERS EMPLOY FOUR STATIONS

Choice Bits of Musical Programs and Entertainment Are Broadcast by Remote Control

CHICAGO.—Balaban and Katz, owners of the Chicago, Roosevelt, Uptown, Central Park and Tivoli theaters, Chicago, have completed arrangements with stations WMAQ, WGN, WEBH and KYW whereby the choice bits of their musical programs are broadcast at intervals during the week.

Studios have been constructed in the theaters controlled by Balaban and Katz and are hooked up with the various stations by remote control.

Stage presentations are broadcast as well as the studio numbers, and the various stars appearing on the programs entertain Radio audiences during the period of their engagement.

The famous Sunday noon concerts of the Chicago theater are broadcast through WGN. The Balaban and Katz Radio review every Saturday night and the dinner hour organ concerts by Dean Fossler are nightly features from the Chicago theater through WMAQ. From WEBH every Tuesday night at 9 o'clock, Uptown theater entertainment is broadcast, as well as every Thursday afternoon between 3 and 4 o'clock.

KYW broadcasts midnight shows from the stage of McVicker's theater Wednesdays and Fridays.

Forbes Fairbairn, former Hearst staff correspondent in Europe and later director of stations WTAS and WCEE, has been appointed director of the Balaban and Katz Radio presentations.

Leon H. Wood Is Heard On Large Grace Church Organ

NEWARK, N. J.—Leon H. Wood, Orange, N. J., organist, was heard over WOR recently on the Grace Church organ, which is generally said to be one of the six largest church organs in the world.

The organ has taken nearly five years to build and is just now completed. It contains 300,000 square feet of lumber, has over 9,000 pipes and over 500 miles of wire. Of further interest, it takes two 20-horsepower electric motors to supply wind for this instrument, furnishing 15,000 cubic feet of air per minute.

Rochester Philharmonic Is Putting Concerts Upon Air

ROCHESTER, N. Y.— The Rochester Philharmonic orchestra has joined the list of notable symphonic bodies that are broadcasting their concerts by "going on the air." This happened recently when its program was carried by both WGY at Schenectady and WHAM at Rochester. Although other concerts have been broadcast from the Eastman theater and its kindred institution, the Eastman School of Music, this was the first broadcasting of an entire performance by the Philharmonic, the famous orchestral unit conducted by Eugene Goossens.

French Chamber Rejects Tax

PARIS.—The French chamber, after a heated debate recently, rejected the proposal to inflict a flat rate tax on all receiving sets in France. The tax was condemned as undemocratic and vexatious and as likely to interfere with a useful branch of public instruction.

'Mixing Panel' Handles Program on Five Mikes

WHT Engineer Installs Devise to Control Group Broadcast

CHICAGO.—Overcoming one of Radio's most persistent difficulties, Reeve O. Strock, chief engineer of WHT here, has installed a "mixing panel" in the control room of the station. By this device, all five microphones and all incoming lines may be used to broadcast a single number, and the volume of sound coming over any one of these circuits can be magnified or subdued in relation to the others.

The significance of this advance in the technical equipment of the station lies in the fact that ensembles and large groups of voices or instruments can now be adequately broadcast.

Balance of sound, Mr. Strock says, may be secured with this arrangement by the operator in the control room. All that is required is the manipulation of volume dials, one dial governing each microphone. During a solo part, for instance, the volume on all other microphones can be decreased and the microphone carrying the solo part can be emphasized.

Other novel effects, such as the approach or withdrawal of music are now possible. A soloist in the studio may be accompanied by an oratorio choir located miles away with no fear that their respective volumes will be unbalanced. In short, this technical improvement makes possible dozens of new effects.

KOA Is Preparing for Big International Music Week

DENVER.—Eight full days of melody, embracing more than one hundred widely varied airway attractions, are planned for an international Radio audience next May, it is announced, when KOA, General Electric broadcasting station, bills Denver's far-famed music week celebration and annual spring festival.

Although this ethereal undertaking is still two months off, staff members are already absorbed in preliminary details of the program, which, it is predicted, will be one of the stellar Radio achievements of the season.

Musical organizations representing close to thirty western cities are expected to participate.

KPRC in New Studios

HOUSTON.—Station KPRC, Houston Post-Dispatch, has been formally installed in their suite of studios in the new building of the newspaper. Two acoustically perfect and well appointed studios are separated with a spacious reception room for those visiting or waiting their turn on the air. The smaller studio is sufficiently large to accomodate a good-sized orchestra or glee club, while the larger one is capable of taking care of a sixty-piece band.

SAYS SECRET RADIO SYSTEM PERFECTED

PRIVATE COMMUNICATION POSSIBLE, IS CLAIM

Devise Involves Use of Three Wave Lengths with Set Working by Combinations

LONDON.—J. D. Chisholm, president of Secret Wireless, Ltd., giving evidence before the broadcasting investigation committee here, said recently his company had perfected a system of secret Radio which enables signals to be received only by those for whom they are intended.

It is possible by this method for individuals to communicate privately with each other by Radio. A head office of a newspaper may communicate with its branch offices, or vice versa, while at the same time a competitive journal may be doing likewise, neither knowing what the other is doing. By this system also a great range of programs operated by different broadcasting companies from different stations can be made available.

"There are," stated Mr. Chisholm, "1,700,000 receiving licenses in force in Britain, and there are probably 5,000,000 'pirates' who are evading payment.

Eliminate License Invaders

"Our system will eliminate the evaders, and the increased demand for the new type of instrument will reduce the price of tube sets. By selling 6,000,000 copies of our weekly programs at two cents each, the broadcasting companies will secure a sufficient revenue. The state might charge twenty-five cents a year for a receiver license.

"The system involves the use of three wave lengths, but there is only one in use at a time. The official programs will inform listeners the combinations to be worked on his receiver.

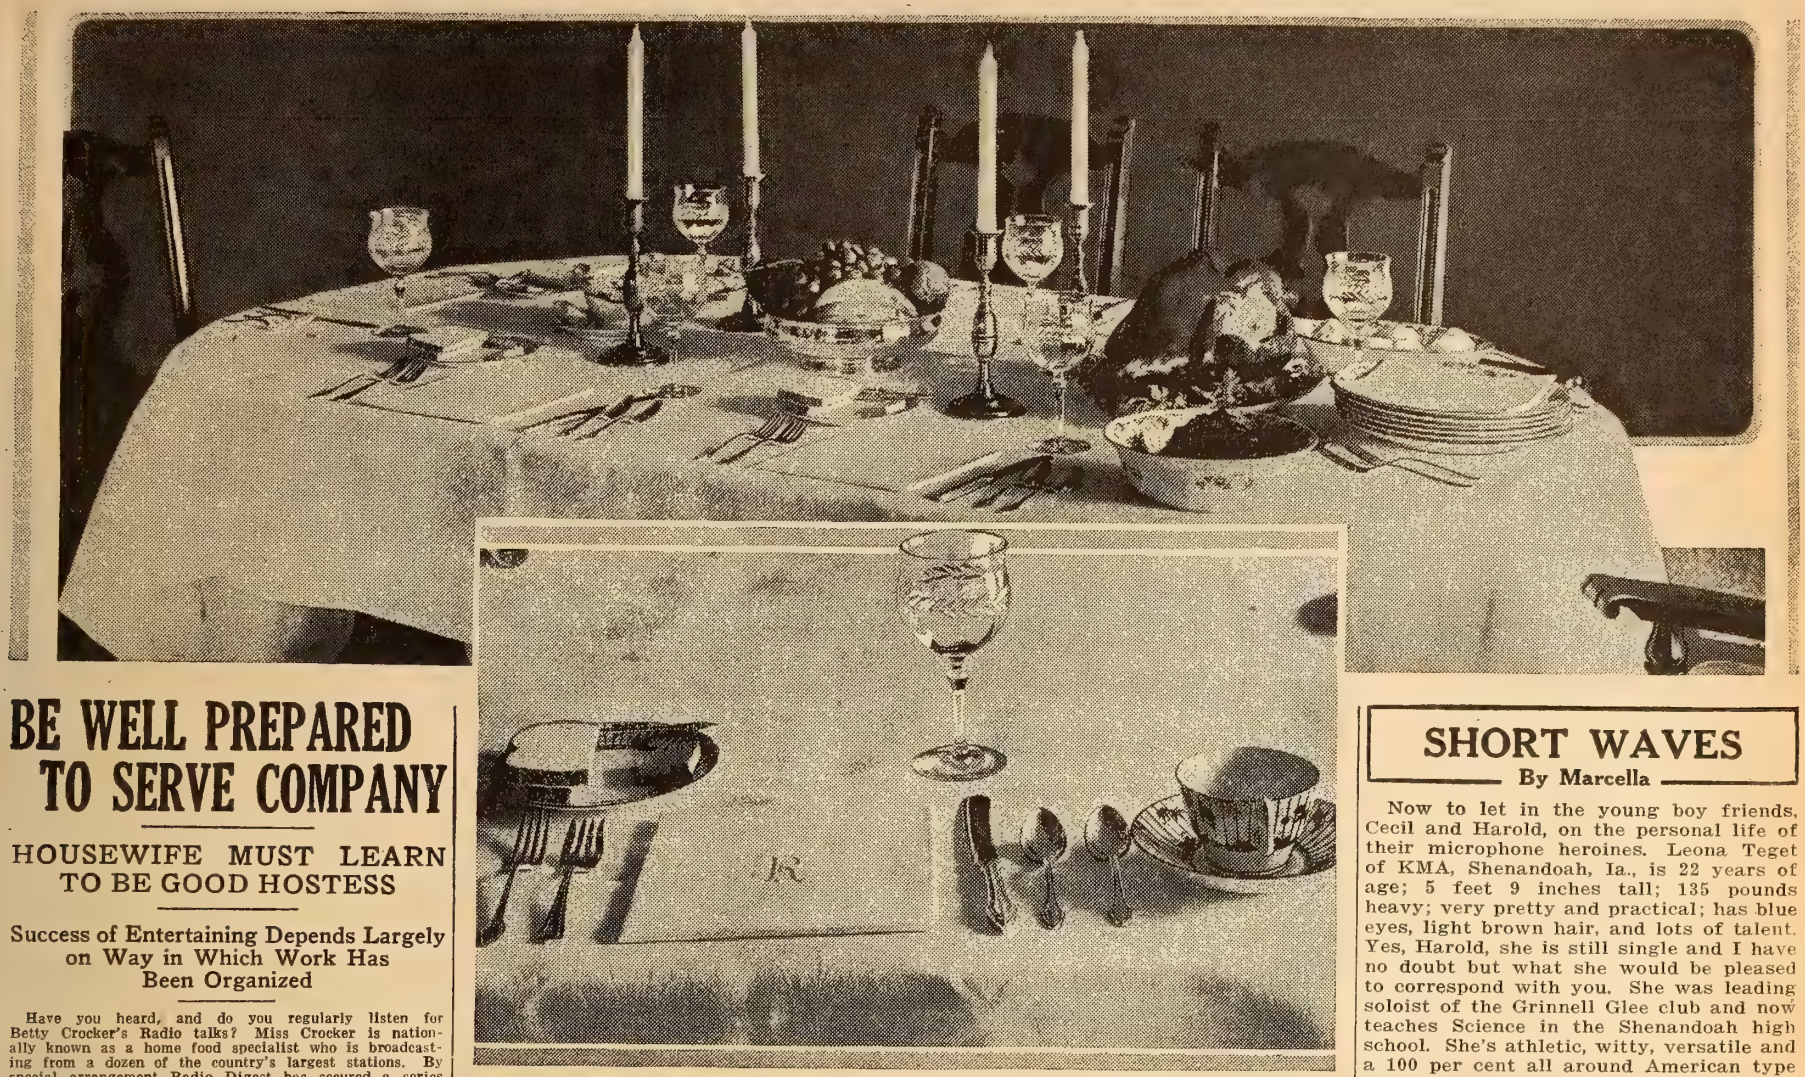
"A foreign power has offered us a seven-figure price for the invention, and the English postmaster general has offered permission to erect two stations to carry out distance and high power tests. There is one novel feature in the transmission, but really the whole invention is in the receiving set."

Name Sixteen Stations as Reliable for Calibration

WASHINGTON.—Sixteen code and broadcasting stations have been found by the bureau of standards to maintain sufficiently constant frequencies (or wave lengths) to justify their use in the calibration of Radio sets. These stations are:

WQL, frequency in kilocycles 17.13; NSS, 17.50; WCI, 17.95; WGG, 18.86; WII, 21.80; WRT, 22.60; WVA, 100; NAA, 113; WJR, 580; WEAF, 610; WCAP, 640; WRC, 640; WSB, 700; WGY, 790; WBZ, 900.

TABLE SERVICE FOR COMPANY DINNER



The table arrangements shown here were made in the home of L. A. Tripp, commercial manager of Station KFI, Los Angeles. KFI is one of the thirteen stations from the Atlantic to the Pacific coast which broadcast the Betty Crocker Home Service talks three times each week and over which Betty Crocker's famous Radio cooking schools are held. This table arrangement was made according to specifications outlined by Miss Crocker.

BE WELL PREPARED TO SERVE COMPANY

HOUSEWIFE MUST LEARN TO BE GOOD HOSTESS

Success of Entertaining Depends Largely on Way in Which Work Has Been Organized

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

IS AN unexpected guest a calamity in your home, or are you the kind of a home-maker who is equal to any such emergency? Is a company dinner a real pleasure for your family, or is it occasion that they all dread? Perhaps you really like to entertain, but have not learned how to do it easily.

Whether or not you entertain easily depends largely upon the way in which you plan and organize your work. Some women never seem to know the limit of their endurance. Because they like to give pretty parties and nice dinners, they plan elaborate refreshments and expensive decorations and then wear themselves out carrying out their plans. 'I am not thinking of parties particularly, but of entertaining in any sense of the word. It seems to me that it is the duty of every home-maker to organize her work so that she can easily entertain an unexpected guest for dinner or have a party for Johnny's birthday without making an invalid of herself or giving the family a case of nerves.

Plan in Advance

Some of you may find that you are attempting to do unnecessary things when you entertain. Cut out the unessentials, and you will find that you can have as nice a tea or dinner or party and with much less trouble. My way of planning in advance for the dinner or party may not be your way at all, but I always find that it is easier to make my plans on paper. I like to go over all the details very carefully ahead of time, so that I know just exactly what I am going to do, and when, and how I am going to do it. The refreshments are planned and the grocery order made out some time in advance. All of the staples, such as sugar, butter, eggs, and Gold Medal flour should be purchased in advance, leaving the more perishable things to come on the day you expect to use them.

In the ordinary household, it is necessary to plan the refreshments according to the equipment. For instance, for the evening party, it may not be possible to serve a certain dessert if you do not have enough of the right kind of dishes. It may be necessary to change your plans for dinner when you consider that you do not have several sets of forks. Such little things make a great deal of difference in the ease with which any party

(Continued on page 12)

By Betty Crocker

SHOULD the bread and butter plate be placed at the right or the left of the plate?

If salad is served with the dinner course, where should it be placed?

How can I serve dinner to ten guests without being away from the table most of the time?

These and similar questions often puzzle the hostess who wants to have the correct service and yet does not have a maid to assist her. Perhaps a few rules to which you can refer occasionally will help the next time you forget whether the salad fork should go outside or inside the dinner fork.

Correct Arrangement of Silver

In laying the table, the silver should be placed one inch from the edge of the table and at right angles to it. The knife should go at the right of the plate with the cutting edge turned toward the plate. All spoons to be used are placed at the right of the knife with the bowls up. Forks are placed at the left. It is easy to know how to place the silver if you remember that it is always arranged in the order in which it is to be used from the outside in; that is, the first piece of silver to be used will be the farthest from the plate.

In case you are serving a meal in which knives are unnecessary, the forks may be placed at the right of the plate instead of the left. The water glass is placed at the right near the tip of the knife and the bread and butter plate at the left at the tip of the fork. The bread and butter spreader is placed across the bread and butter plate parallel to the edge of the table and with the handle turned toward the dinner plate.

Even Napkin Has Its Place

The napkin is placed at the left with the loose edges parallel to the forks and the edge of the table.

Salts and peppers may be placed in front of each guest or between two covers if they are to serve for two guests.

For serving the company dinner, the service should be simple if there is no older daughter or maid to help. A cocktail may be placed on the table before the guests enter the dining room. After the cocktail dishes are removed, soup may be served at the table by the hostess if you have a soup toureen, otherwise, it should be served from the kitchen. The service may be simplified by omitting either the soup or the cocktail, as that will mean serving one course instead of the two.

Holiday Feast Setting

For Thanksgiving or any holiday feast, it seems more fitting to have the meat, whatever it may be, carved at the table. In addition to carving the meat, the host also serves all vegetables to be served on the dinner plate. Perhaps the eldest daughter sitting near can assist him. When meat is carved at the table, the carving knife and fork should be placed directly in front of the host, that is about ten inches from the edge of the table. The carving knife should be placed at the right and the fork at the left with space between them for the platter. All other necessary serving silver should be placed at his right. If you would keep peace in the family, be sure that the carving knife is sharp.

The warm dinner plates should be placed immediately in front of the host, then the platter placed in the space left for it and all vegetable dishes arranged at his right, as is most convenient.

Placement of Accessory Dishes

Accessories such as celery, olives, and jelly, may be arranged conveniently on the table in such a way as to help make the table a really pretty picture. When it is time to serve these foods, ask the guest nearest each to serve himself and pass it on around. Do not forget the necessary spoon or fork to go with each of these foods.

If the salad is served with the meat course, it should be placed at the left of each cover. Vegetables served in small dishes are also placed at the left. It is easy to remember that all service dishes are placed at the left with the exception of the beverage, which is placed at the right.

After one course of a dinner has been served, all foods and serving dishes should be removed first, then the dishes from in front of each guest. The table should be cleared of all soiled dishes and of all food dishes used in one course before the next course is served.

It pays to plan the service of your meal according to the china and silver on hand. If the service is carefully planned, it will not be necessary for the hostess to leave the table more than two or three times during the dinner.

A loud speaker extension in the kitchen is an excellent aid for the woman Radio listener.

SHORT WAVES

By Marcella

Now to let in the young boy friends, Cecil and Harold, on the personal life of their microphone heroines. Leona Teget of KMA, Shenandoah, Ia., is 22 years of age; 5 feet 9 inches tall; 135 pounds heavy; very pretty and practical; has blue eyes, light brown hair, and lots of talent. Yes, Harold, she is still single and I have no doubt but what she would be pleased to correspond with you. She was leading soloist of the Grinnell Glee club and now teaches Science in the Shenandoah high school. She's athletic, witty, versatile and a 100 per cent all around American type of girl.

And Cecil, who inquires about Orhmah Carmean of the same station, will be pleased to learn that she, too, is single, very pretty and full of fun, has coal black hair, rosy cheeks and fair blue eyes, weighs 118 pounds, stands 5 feet 5 inches high, and has lived just 20 years. Don't trifle, however, as she is very sincere and has no make-believe in her. Yes, she does considerable announcing, and she also is associate program director. She attended Tarkio college, Tarkio, Mo.

* *

"H.G.L.," another young man—not a sheik, he notes—admires Ruth Etting of WLS, Chicago, and would know more of her. You should read his praise, "sweetest voice on the air," etc. His hopes are to be dashed in the main, however, for she is married. Anyhow, she is pretty, blonde, has blue eyes, weighs 112 pounds, and was born about a quarter century back at David City, Nebraska.

* *

Leo Fitzpatrick, the "Merry Old Chief" of WJR, is the target of C.E.H. Was Leo always an entertainer? No, except through the news columns. He entertained in that fashion by writing feature stories for the Kansas City Star. When Radio came along he just took hold of WDAF and made it famous. Last year WJR wanted him bad and acquired him. Speaking of his entertaining abilities, he did travel Chautauqua for one summer, but that was after he made WDAF famous, and as a result of the latter achievement.

* *

No, Ethel, this is not Gene Rouse announcing, but I do smoke occasionally. I know Gene, however, and he'll bear me up that I am not him. Where is Gene? I don't know. He did go down to KFJF for an engagement, but I believe it was only for a visit and not a permanent affair. I'll have to hunt him up for you. Yes, "Tot" Kay, WSB's "Little Colonel" entertains me very much.

* *

Speaking of nice, married announcers, D. R. P. Coats of CKY, Winnipeg, is one. Daddy's pride, Baby John Coats, got near the mike while a program was going on and let loose with a series of yells. Papa Coats was able to handle the situation. He stepped to the microphone and announced, "The solo you have just heard was contributed by John Coats." It happens that Winnipeg had a noted tenor, a John Coats, singing there that very day. Many applause cards were drawn by the impromptu solo.

* *

An unsigned note from Terra Haute, Ind., requests information as to the where-

SHORT WAVES

By Marcella

(Continued from page 11)

abouts of three ex-Nighthawks: Don Johnson, Lee Mansfield and Willard Robison. Dean Fitzer, WDAF's Nighthawk chief, tells me that Don Johnson was an operator and did no turn before the mike. Leo Fitzpatrick used to refer to him with the instructions. "Crank the little flivver, Don, and let's go home." Don is directing a new station at Miami, Fla., which is waiting for its license. Lee Mansfield has not played for a Nighthawk frolic for about a year. The crack blind pianist is playing here, there and everywhere. My good informant tells me he last heard him playing for a St. Louis cabaret. Willard Robison, before he became the prima donna he now is, did a great deal of Nighthawking. The chief feels quite proud of the record that followed for Don, now well known for his compositions, "Deep Elm," "Peaceful Valley," "Rythm Rag," and many others, is an exclusive Victor artist and a unit of the great Paul Whiteman orchestra.

* *

Harry Snodgrass, "The King of the Ivories," with J. M. Witten, his partner and ex-WOS announcer, are on the air again. They have added Earl Holbeck, soloist, to their act, and although the advance schedule is not announced, Marcella knows that they appeared not long ago at WREO, Lansing, Mich., and more recently, Feb. 23 to 27, broadcast from KDKA, E. Pittsburgh.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do by best to answer here. MARCELLA.

HOOVER IS RADIO FAN

(Continued from page 4)

atives of the listeners, the Radio dealers, manufacturers and others.

Some months prior to the conference, through his staff, Mr. Hoover lets the public know that the conference is to be called. He then sends out invitations to those who have attended former conferences and others whom he may have learned about. They are asked to let him know if they intend to be at the conference and from the many names he receives he makes tentative committee selections to be added to when the conference actually convenes.

In addition to these tentative committee selections, a program is mapped out so that when the conference actually convenes it will have some basis on which to work. The conference is opened by the secretary in which he generally outlines what has happened since the last conference and tells what he hopes the conference will take up and accomplish.

After a few formal speeches from the floor, the committees are formally appointed by the conference and they get to work on their various programs and when they have reached a conclusion they report back to the full conference which either adopts or rejects them.

While Mr. Hoover has both his critics and his friends it has been generally conceded that these conferences have been one of the most helpful influences in Radio development in this country. Mr. Hoover's official position puts him at the center of all activities where he has the difficult job of trying to please everybody. This is humanly impossible and that there has been no serious friction or reflection on his work seems to speak well for the confidence felt in him by the majority of broadcasters, Radio goods manufacturers and the fans themselves.

LADIES LOVE KOA CHAT

(Continued from page 5)

be able, after one of these discourses, to conduct a raw steak from the butcher's block through the intricacies of the culinary department of his household to the place of honor in the center of the family table.

Naturally, Mrs. Hoover goes into the chemistry of cooking as well as the psychology of the arrangement of dishes and the balancing of menus. One thing that may interest the dull-minded husband in particular is her consideration for the household budget.

Women "a mile high" or wherever they may be are invariably interested in clothes. They may not all have the smart shopping streets and boulevards of the big cities but that does not diminish their interest in the ravishing gowns and hats and other things, frilly and not so frilly, to be seen in the windows. When Mrs. McPeak on the Pike road, twenty miles from Denver, wants to go window shopping she tunes in 322.4 meters for Salle Dee. It's no use trying to imitate Miss Salle's talk. She just does it in her inimitable style as one smart, talkative woman to another. She knows the unspoken questions in Mrs. McPeak's mind and answers them before they could possibly be asked under any circumstance. They all love Salle Dee. She brings them the pretty things almost as vividly as though they were looking through the Denver Dry Goods plate glass windows with their own eyes. She not only tells them the modes of the moment but she gives a fair forecast of what is to come!

Freeman H. Talbot, the KOA studio director, although a mere man, sees in these triweekly matinees for women the fulfillment of a dream. He was sold long ago on the idea that in certain respects women are women over and over again. Out of this conclusion he evolved the afternoon programs that have brought him many thousands of letters from gratified women listeners.

PREPARE FOR COMPANY

(Continued from page 11)

may be managed. By planning ahead of time, you can avoid many last-minute flurries and inconveniences.

Be Well Prepared

Naturally, what is easy for one may be hard, or even impossible for another. One of my friends bakes fancy Gold Medal flour rolls at the last minute for dinner. She has made them so often that it is not at all difficult for her to shape them and see that they rise and bake just right, even in the midst of the many other dinner preparations. Perhaps your specialty is baking powder biscuits or sweet bread or a special pudding, or salad. In any case, it is well to have a few special recipes and a number of stock menus. Serve a special dinner occasionally to your family until you have mastered it. Then you will always have a dinner that you can fall back on and be sure that it will be a success when you have a guest. Don't fuss around about everything but take pride in showing your husband and family how easily you can entertain.

One of my favorite emergency recipes is the cheese and bacon sandwich. This is a hot sandwich quickly prepared and substantial as well as delicious. With it I usually serve coffee or hot chocolate, some kind of pickles or relish, and a dessert. Another menu easily prepared in an emergency is creamed tuna fish on toast, with buttered peas or a salad, a fruit dessert and a hot beverage. The number of courses served should be determined by the amount of preparation and serving that you must do yourself. Many women plan a dinner of many courses without recognizing the fact that the serving will keep them away from the table most of the time and that means a table without a hostess.

Meat Loaf Is Convenient

A good meat loaf is delicious and most convenient for a company dinner because it can be put into the oven to bake before the rush of last minute preparations.

Here is the recipe for a very good meat loaf which has been tested in our kitchen: 2 cups bread crumbs, 2 tbsp. Gold Medal flour, 2½ tsp. salt, ¾ tsp. pepper, 1 small onion chopped fine, ¼ tsp. paprika, ¼ tsp. mustard, ⅛ tsp. sage, 1½ cups milk, 1 egg, ½ lb. ground beef, ½ lb. ground veal, ½ lb. ground pork.

Method: Mix bread crumbs, flour and seasoning together. Combine with the meat. Combine milk with the beaten egg. Add gradually to the meat mixture. Mold into a loaf. Strips of bacon may be placed over the top. Bake two hours in a moderate oven, 375° F. This will make eight servings. An attractive platter may be arranged by placing carrots or beets at the ends of the meat loaf or a border of spiced red apples may surround the loaf.

Cheese and Bacon Sandwich

Here is the recipe for cheese and bacon sandwich: 3 eggs, ¾ lb. cheese, 1½ tsp. table sauce, ¾ tsp. salt, ½ tsp. paprika, few grains cayenne pepper, ¾ lb. bacon, 8 slices bread.

Method: Beat the eggs until light. Add the cheese grated or put through a food chopper. Add other ingredients and mix well. Spread on eight slices of bread cut one-third inch thick. Cut bacon in very thin slices, the length of the bread. Make bacon still thinner by pressing with a broad knife. Cover cheese mixture with bacon and bake eight or ten minutes under a gas flame or in a very hot oven.

WOMEN'S PROGRAMS INDEX

Saturday, March 20

Eastern 9:30 a. m. — Central 8:30 a. m. — Mountain 7:30 a. m. — Pacific 6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.
11 — 10 — 9 — 8
WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.
12 n. — 11 — 10 — 9
WGN (302.8m-990kc) Household hints.
WQJ (447.5m-670kc) Home Economics program; "Story About Famous Pictures," Margey Currey.
12:30 p. m. — 11:30 — 10:30 — 9:30
WGN (302.8m-990kc) Discussion of fashions.
12:35 — 11:35 — 10:35 — 9:35
KYW (535.4m-560kc) Table talk.
1 — 12 n. — 11 — 10
KGW (491.5m-610kc) Household helps, shopping guide.
KMA (252m-1190kc) Domestic science topics.
4 — 3 p. m. — 2 p. m. — 1 p. m.
KJR (384.4m-780kc) Tonight's dinner.

Monday, March 22

Eastern 9:30 a. m. — Central 8:30 a. m. — Mountain 7:30 a. m. — Pacific 6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.
10 — 9 — 8 — 7
WJZ (454.3m-660kc) Women's hour.
WRC (468.5m-640kc) Women's hour.
10:45 — 9:45 — 8:45 — 7:45
WEAF (491.5m-610kc), WFI (491.5m-610kc) Home service talk, Betty Crocker.
WTAG (268m-1120kc) Talk, Marjorie Woodman, nurse.
10:50 — 9:50 — 8:50 — 7:50
WMC (499.7m-600kc) Home economics discussion, Miss Kitty.
11 — 10 — 9 — 8
WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.
WNYC (526m-570kc) Women's program.
WTIC (475.9m-630kc) "Worker's Education," Tillie Lindsey.
11:15 — 10:15 — 9:15 — 8:15
WTIC (475.9m-630kc) "Every Homemaker's Spring Job," Olea Sands.
11:30 — 10:45 — 9:30 — 8:30
KFAB (370.7m-880kc) Fun at 4-H Club Camps.
WTIC (475.9m-630kc) Housewife's forum.
11:45 — 10:45 — 9:45 — 8:45
WCCO (416.4m-720kc) "The Gold Medal Radio Question Box," Betty Crocker.
WDAF (365.6m-820kc), WHT (399.8m-750kc) Home service talk, Betty Crocker.
12 — 11 — 10 — 9
WGN (302.8m-990kc) Household hints.
WQJ (447.5m-670kc) Home Economics program. "Tree Ferns," Maude Jacobs.
12:15 p. m. — 11:15 — 10:15 — 9:15
KYW (535.4m-560kc) Meat talk.
12:30 — 11:30 — 10:30 — 9:30
WEBH (370.2m-810kc) Fashion and household talks.
12:35 — 11:35 — 10:35 — 9:35
KYW (535.4m-560kc) Table talk.
2:30 — 1:30 p. m. — 12:30 p. m. — 11:30
KFNF (263m-1140kc) Mothers' hour.
3 — 2 — 1 — 12 n.
WCCO (416.4m-720kc) Women's hour.
WSOE (246m-1220kc) Cooking chats.
4 — 3 — 2 — 1 p. m.
WJP (508.2m-590kc) Market hints for housewives.
WOC (483.6m-620kc) Home management schedule, Aunt Jane.
WQJ (447.5m-670kc) "Using Up the Sunday Left-overs," Helen Downing. "The Care of the Skin and Hair," Madame Huntingford. "Questions and Answers About Permanent Waving," W. Bivans.
5 — 4 — 3 — 2
KJR (384.4m-780kc) Home helps.
7:30 — 6:30 — 5:30 — 4:30
WKAR (285.5m-1000kc) "How Proteins Preserve Efficiency," Martha Hunter.
7:45 — 6:45 p. m. — 5:45 p. m. — 5:45 p. m.
WKAR (285.5m-1000kc) "Selecting the Accessories of a Costume," Ethel Webb.

Tuesday, March 23

Eastern 9:30 a. m. — Central 8:30 a. m. — Mountain 7:30 a. m. — Pacific 6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.
10 — 9 — 8 — 7
KDKA (309.1m-970kc) Domestic Science. Arts for the Housewife.
WIP (508.2m-590kc) Menu, Anna Scott.
WJZ (454.3m-660kc) Women's hour.
WRC (468.5m-640kc) Women's hour.
10:45 — 9:45 — 8:45 — 7:45
WTAG (268m-1120kc) Talks to Mothers, Rosebelle Jacobus.
11 — 10 — 9 — 8
WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.
WMCA (340.7m-880kc) Home makers' hour.
11:30 — 10:30 — 9:30 — 8:30
WOI (270m-1110kc) "Clothes for Childreq," "Prevention of Colds," Dr. Jean Jongewaard.

ADVANCE PROGRAMS FOR THE WEEK

Midnight at WOC, Davenport and "A Step On the Stairs." Left to right: Mary Williams, Henry Graves, (Mrs. C. H. Walsh in charge of "props"), Lawyer Frederick Ardwyn, Aunt Helen, Cousin William, Station FYX announcer and the revolver.

Here are also closeups of the two leading women characters. In the left corner is Marigold Cass as Mary Williams and in the right corner Lola M. Straw as Aunt Helen. Fans will be surprised to find Aunt Helen so attractive.

Schedule for
"a Step On the Stairs"
Broadcast as a Play
EPISODE FOUR

THE SETTING

THE scene of our drama continues in the high-beamed hunt-room, the room that has been the scene of strange and mysterious crimes, of the Turner manse. Most of the guests, however, have gone into the library where Aunt Helen is serving coffee and sandwiches to all but Mary Williams, who has remained in the hunt-room, ostensibly because of fatigue, but in reality to wait for the return of the owner of a pair of wet shoes which had been left beside her chair. Mary persuades Ardwyn to remain with her. The candle goes out, and almost immediately in the darkness comes a cold draft of air. A moment later Mary cries out in anguish, Ardwyn does not respond, a body falls to the floor, there is a choked curse, a slamming door, and the others rush in, lights in hand, to find Ardwyn with a nasty gash in his forehead and blood all over his face, while Mary Williams lies upon the floor in a faint, with a white scarf in her hand—a scarf that had been buried with Peleg Turner.

THE CAST

Frederick Ardwyn.....Peleg Turner's lawyer
Aunt Helen Holmes.....A relative
Henry Graves.....A mysterious man Mary had known formerly
Hari Singh.....Indian servant of Peleg Turner
Mary Williams.....A youthful guest
Maurice Tolliver.....A youth and relative
Hazel Stanton.....A young lady
John Carton.....Nephew of Peleg Turner
Cousin William.....A relative

RUSSIAN STRING QUINTET AT KNX

High Lights of the Week

UNPRONOUNCEABLE titles to musical selections or tongue twisting composers' names mean nothing to the Hired Hand or his little symphony. Every Saturday night this famous organization struggles with these jaw breakers. Orchestra selections hitherto taboo because announcers feared to announce them are being successfully brought to light at WBAP.

Claudia Muzio, whose golden tones have enchanted opera audiences all over the United States, will sing for millions of listeners Sunday evening when she is heard over the WEAF chain. The western headliner of the evening is the Russian string quintet at KNX.

A continuity program proclaiming spring to the Radio world is the Monday feature at WOS, Davenport. Famous spring songs of great composers will be reviewed. "Memories of Jennie Lind and Clara Schumann" is the title of the program to be given this same evening by Anna Barbash, soprano at WPG, Atlantic City.

Artur Argiewicz, a master of the violin who began his musical education under the eyes of Brahms, will broadcast Tuesday from KGO, Oakland. Argiewicz studied with Joachim, Ysaye and Kreisler, traveling with the latter over Europe, taking lessons between concerts.

Wednesday evening, March 24, KOA will offer another novelty program. Part one, scheduled for 8:15 o'clock, will be a mock trial, to be conducted by prominent attorneys who represent the leading luncheon clubs of Denver. As the feature of part two, Hickville will stage an old-fashioned box-supper and auction party. Si Perkins, who runs the post office and general merchandise store, is expected to contribute much to the success of the gathering. Farmers for miles around will be in attendance, it is reported.

On the equator is the interesting city of Singapore where orientals and occidentals meet. Bishop Titus Lowe recently returned from this strange tropical city will talk Thursday at WIP, Philadelphia.

The Victor hours of music over the WJZ chain have attracted the attention of fans since the famous Radio scoop of the broadcasting of Marion Talley's Radio debut. This Friday two favorites of the Metropolitan Opera company will give the program, Madame Maria Jeritza, soprano, and Emilio de Gogorza, baritone.

Saturday, March 20

WREO, Lansing, Mich. (285.5m-1050kc), 6-7 p. m., Speed-Wagon serenaders; Gold Standard ensemble; 10-12, dance program, WREO, Speed-Wagon serenaders.

WIBO, Chicago, Ill. (225.4m-1330kc), 2-4 p. m., Shutins program; Ted Fiorito, pianist; Dan Russo, violinist; Marie Tully, songster; readings, Wayne Myers; songs, Rita McFawn and Mary Bieber; Louise Lockifer, reader; Clifford Berge, violinist; Al Benson, Gail Bandell; 6-8, dinner concert; Joe North, baritone; Evelyn Nelson, pianist; Florence Osterman, contralto; Ray McKay, baritone; Elsie Orr, soprano; Mary Thrash House, pianist; string trio; 10-2 a. m., popular program; Marie Tully, songs; Dan Russo, violinist; Ted Fiorito, pianist; Wayne Myers, monologist; songs, the Jordans; Ruby Rossini, Lauretta Giles, Tommy Smith.

WJAD, Waco, Texas (352.7m-850kc), 8:30-10 p. m., dance orchestra.

WJJD, Mooseheart, Ill. (370.2m-810kc), 12-1 p. m., Palmer House symphonic players; trio; 2-3, organ hour, Howard L. Peterson; child artists; assembly of 1,250 children; 5:30, instrumental hour; Palmer House symphonic players; Jack Nelson; Victorians; 6:40, Billy Van; 8-9, children's hour; 10-11, feature hour; Senator Harold C. Kessinger; Palmer House Victorians; Jean St. Anne; 12:30 a. m., Knights of the Burning Candle.

WLIB, Chicago, Ill. (302.8m-990kc), 7-7:20 p. m., Uncle Walt's Punch and Judy show; 7:20-7:30, Correll and Gosden; 7:30-8, program; 11-11:20, Correll and Gosden; 11:20-1 a. m., dance music; Correll and Gosden.

WLS, Chicago, Ill. (344.6m-670kc), 12 a. m., Ford and Glenn; 6 p. m., Ford and Glenn; 6:40, Ralph Emerson at our Barton organ; 7:15, WLS studio trio picture concert; 7:45, Jeanette Kling, reader; 8, H. D. Saddler feature; 8:30, Illinois Wesleyan glee club minstrels; 9, Young American artists series; 9:30, Nash band; 10:15-11, Ford and Glenn music shop.

WMAQ, Chicago, Ill. (447.5m-670kc), 6 p. m., Chicago theater organ; 8:30, Rosseter Cole, George Simons; 9, lecture, U. of C.; 9:20, La Salle Extension university quartet.

WMBB, Chicago, Ill. (250m-1200, 7-8 p. m., Trianon duo; Vella Cook, contralto; Frank Bordner, baritone; McCredy and Hart, Harmony duo; 9-11, Trianon orchestra; Woodlawn theater orchestra; Joe Warner, character song; Andy Anderson, baritone; Arnold Stevenson, musical saw; Bob Bennett, piano novelties.

WMC, Memphis, Tenn. (499.7m-600kc), 8:30 p. m., Cooper's Hawaiians; 11, frolic.

WOAI, San Antonio, Texas (394.5m-760kc), 8:30 p. m., San Antonio College of music.

WOAW, Omaha, Neb. (526m-570kc), 6:20 p. m., Francis Potter's banjo orchestra; 6:50, Gilber Jaffy, violinist; Nat Young, pianist; 10:30 Frank Hodek and his Nightingale orchestra.

WOC, Davenport, Iowa (483.6m-620kc), 4-5 p. m., Crescent orchestra; 5:45-6, chimes concert; 7:30-8:30, Broadway Presbyterian church choir; 8:30-9, WEAF; 9-9:30, WEAF; 10:30, "A Step on the Stairs," mystery drama, Episode V.

WOK, Chicago, Ill. (217.3m-1300kc), 4:30-7 p. m., Capitol theater organ; studio program; 10-1:30 a. m., Tearney's Town club orchestra; Carl Lorraine's Pershing Palace orchestra; Husk O'Hare's Cocoanut Grove orchestra; Capitol theater program; studio program.

WOOD, Grand Rapids, Mich. (242m-1240kc), 9-10 p. m., Robert Hazenberg and Robert DeJonge, saxophonists; Alida Vandenberge, pianist; Douglas Latto, violinist; Lillian DeBree, accompanist; Benjamin and Edwin Van Houten, harmonicists; 10-11, classical concert; H. P. Vaughn, baritone; Melissa Dvorak, pianist; 11-12, Regent Roof Radio frolic, Bill Dallavo and his orchestra.

WORD, Batavia, Ill. (275m-1090kc), 7 p. m., "North Shore Line"; 9-10, musical program; 11-12, program.

WOS, Jefferson City, Mo. (440.9m-680kc), 8:20, program, Springfield chamber of commerce; Boy Scout band.

WQJ, Chicago, Ill. (447.5m-670kc), 7-8 p. m., dinner concert, Jack Chapman and his Rainbo Gardens orchestra; Henrietta Nolan, violinist; H. Bundy; Billy Harriss, pianist; Sheppard Levine, tenor; 10-1, a. m., Jack Chapman and his Rainbo Skylarks; H. Lucille Long, woman harmonica player; Eleanor Terry; Romo Vincent, boy baritone; Merrill Carder, baritone; Johnny Poat, baritone; Tell Taylor; Harold Olson, baritone; Clark's Hawaiian trio; artists; 1-2, Ginger hour, Jack Chapman the Ginger Man and Little Skylarks.

WRR, Dallas, Texas (245.8m-1220kc), 6-7 p. m., Jack Gardner's orchestra; 8-9, Mrs. Thomas H. Littlepage's musical program; 11-12 a. m., novelty program.

WSB, Atlanta, Ga. (428.3m-700kc), 8 p. m., G. M. A. glee club; 10:45, entertainment.

WSM, Nashville, Tenn. (282.8m-1060kc), 7:15 p. m., Francis Craig's orchestra; 8, Vanderbilt university; 10, Southern quartet and glee club.

WSOE, Milwaukee, Wis. (245.8m-1220kc), 5:10 p. m., twilight campfire, Boy Scouts; 9, Candygram review.

Mountain Time Stations

CNRE, Edmonton, Can. (516.9m-580kc), 8:30-10:30 p. m., studio program, A. Nizoff, violinist; instrumental quartet; four violinist; Hector MacFadyen, pianist; C. Brissette, baritone; J. Tyler, Spanish guitar soloist; Josephine David, pianist; Mrs. Ethel Willing, soprano.

KFWA, Ogden, Utah (260.7m-1150kc), 4-5 p. m., organ recital, Paramount theater; 5-6, Ogden Radio dealers program; 10-11, "Merry Mad Music Makers."

KOA, Denver, Colo. (322.4m-930kc), 12:15 p. m., Rialto theater organ recital, Marjorie Nash; 6:30, Brown Palace string orchestra; 8, Schoenerman's Colorado orchestra; 8:15, chamber of commerce program.

Pacific Time Stations

CNRV, Vancouver, Can. (291.1m-1030kc), 8:30 p. m., B. C. musical festival; Frances McDonald, pianist; Alice Metz, violinist; Rostland Wilson, soprano; Norma Malcolm, contralto; Sydney Hollis, tenor; Jack Hamilton, bass; Mr. Vivan and Mary Dawson, accompanists; 10:30, Cabaret Belmont orchestra; Bebe Mullar, soprano.

KFI, Los Angeles, Calif. (467m-640kc), 5:30-6 p. m., Kenneth Morse's orchestra; 6, nightly doings; 6:30, vest pocket program; 6:45, Radiotorial period; 7-8, dance program; 8-9, Dan L. McFarland, organist; 9-10, Paul Roberts, pianist; Mutual Motors mirth contest; 10-11, Packard Ballad hour featuring popular songs.

KFOA, Seattle, Wash. (454.3m-660kc), 5:15-5:30 p. m., Around the Towne, KFOA; 7-8:15, Sherman Clay and company studio program; 8:30-10, Times studio program; 10-11, Jackie Souder's club Lido serenaders.

KFON, Long Beach, Calif. (232.4m-1280kc), 6-6:30 p. m., Brayton's theater organ; 6:30-7, amusement information; 7-8, program, Dalton & Hoagland company; 8-9, Press-Telegram studio; 9-11, Long Beach Elks, No. 888, frolic.

KFWB, Hollywood, Calif. (252m-1190kc), 6-7 p. m., dinner music, Fitzgerald Music company; 8-9, program, John Wright, the Right Tailor with Bill Hatch's orchestra; Peggy Mathews, blues singer; Bill Blake, tenor; 9-10, Len Nash and his original Country Boys orchestra; 10-11, Warner Brothers frolic.

KGO, Oakland, Calif. (361.2m-830kc), 4-5:30 p. m., Hotel St. Francis concert orchestra; 6-6:55, dinner concert.

KHJ, Los Angeles, Calif. (405.2m-740kc), 8-10 p. m., program, Western Auto Supply company; 10-11, Don Clark's Biltmore hotel dance orchestra.

KJR, Seattle, Wash. (384.4m-780kc), 7-8:30 p. m., old time songs, Lundquist-Lilly male quartet; 9:30-10, Post Intelligencer studio program.

KLX, Oakland, Calif. (508.2m-590kc), 8-9:45 p. m., studio program; 9:45-10:30, Athens Athletic club orchestra.

KMTR, Hollywood, Calif. (238m-1260kc), 8-10 p. m., KMTR concert orchestra, Loren Powell, director with Neil Russell as soloist; 10-11, Starr Piano company studio.

KNX, Hollywood, Calif. (336.9m-890kc), 5:30, Leighton's cafeteria orchestra; 6:30-7, Atwater Kent orchestra; 7-8, program, Jell-X-Cell company; 8-9, program, John A. Vaughn corp.; 9-10, Order of Optimistic Donuts; 10-11, fights, Hollywood Legion stadium; 11-12, Ambassador hotel dance orchestra.

KOWW, Walla Walla, Wash. (256.3m-1170kc), 8-10 p. m., McDonald school of music; 10-12, Blue Mountain Blue Jay program.

KPO, San Francisco, Calif. (428.3m-700kc), 1:30-2 p. m., Rudy Seiger's Fairmont hotel orchestra; 6:30-7, Waldemar Lind and the States Restaurant orchestra; 8-9, studio program; 9-10, Palace hotel orchestra; 10-11, Waldemar Lind and the States Restaurant orchestra; 11-12, Henry Halsted's orchestra.

KTAB, Oakland, Calif. (239.9m-1250kc), 12-1 p. m., concert; 8-10, program, Breuner's.

KWSC, Pullman, Wash. (348.6m-860kc), 7:30-9 p. m., Garfield high school girls' program; girls sextet; Ukulele four.

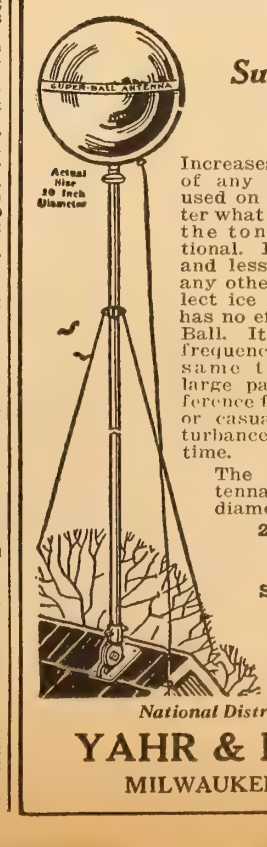
Educational Lectures Are Popular Feature of CKY

WINNIPEG, Canada.—The first series of university extension lectures to be broadcast in Canada was introduced in March, 1923, at CKY, Winnipeg. At that time no definite attempt was being made to use Radio in the dominion for educational purposes.

Prof. W. T. Allison, Ph. D., was quick to seize the opportunity presented when CKY decided to emphasize the educational possibilities of broadcasting and it is thanks to his vision and industry that the university lectures have become so popular with Radio fans in the prairie provinces. The professor is in charge of the Extension Service department of the University of Manitoba. He is also president of the Canadian Authors' association.

SUPER BALL Antenna

What Super Ball Does



Increases the selectivity of any set and can be used on any set, no matter what circuit. Clarifies the tone. Is non-directional. Easier to install and less expensive than any other. It cannot collect ice and snow. Heat has no effect on the Super Ball. It accepts radio frequency signals, at the same time rejecting a large part of the interference from atmospheric or casual electrical disturbances. It lasts a lifetime.

The Super Ball Antenna is ten inches in diameter.

Farm Radio Breaks Monotony

"GIVEN her choice between a Radio and an electric washing machine, the average farm woman will take the Radio. She'd rather have a telephone than a water heater and a piano than stationary laundry tubs."

So says Mrs. H. M. Dunlap, wife of a man from the farm who has been elected to serve his district in the state legislature for thirty-two years. She herself has done all kinds of farm work and knows every phase of farm life in her forty-nine years on the farm.

The farm woman prefers escape from monotony rather than from drudgery, she explains. That is why the preference for Radio, the telephone and the piano over purely labor-saving devices. Her statement is based on a report representing the farm home life of 2,200,000 persons living on 445,987 farms in 237 communities. It is not merely hearsay.

We are glad that Radio helps the farm woman with her burden. It makes the drudgery seem less arduous, for we all can work and live happier with music in our souls.

"Step On the Stairs" Is Hit

ALWAYS at the outset of a brand new enterprise, while it may have been enthusiastically prearranged and planned, there is that moment of doubt when we wonder if the enterprise is going to "go over."

That was the feeling of Radio Digest when "A Step On the Stairs" was planned and started on its way to the stations to be broadcast as a serial mystery drama.

Would the public like it? Did the lines hold their interest? Could it be done so as to please the fans and make them want more?

New York greeted it with a tremendous ovation. J. Andrew White, the famous sports announcer, said, "'A Step On the Stairs' has them all licked. It's absolutely the best thing of its kind I've heard played." Minneapolis-St. Paul's applause, too, was abundant. The Pacific coast was free with congratulations. Chicago met the serial play and was conquered.

And we are glad. We would not want to sponsor and promote an enterprise that is not popular. We hope the public likes this new form of Radio entertainment, and wish to get individual expressions from listeners.

Laughs in the Studios

BROADCASTING stations, like other places, have their little laughs. Humorous happenings repeat themselves at the studios. Among the more common jokes is the entertainer who has his or her telephoned, telegraphed and written applause "planted" or arranged. It's bound to arrive, and many times does before the entertainer has appeared at the microphone.

The thousands of saxophonists, according to Radio program directors, who represent themselves to have been with the original Brown Brothers saxophone sextet, always draw a chuckle. Evidently the sextet was an army at one time or other.

The effusive maidens, worldly unwise, who formerly were matinee idol or movie hero worshippers, enter the comic side of broadcasting by their persistent correspondence. But the wives of the announcers don't mind. They are good sports.

In the same picture fits the adolescent male who hears a rippling soprano and henceforth falls in love. Many are the disillusionments when these youths learn their sopranos are past middle age and have married sons and daughters.

The "Big Business Men" from most anywhere, who are big hearted and willing to entertain their friends over the microphone, make up another class of amusing studio pests. You would think they were doing the stations a big favor, but tactful studio directors are usually able to handle the situation.

So broadcasting stations are human, after all. There are many laughs guaranteed at any studio, but we can't tell you all of them for that would spoil the illusion. Then perhaps you'd lose your interest in the mystery of the microphone.

RADIO INDI-GEST

Fable of the Chimes

Davenport was busy sending
Chimes, as they so often do—
And far off in Indiana,
Listening in and talking, too,
Two old men sat near a speaker
—One was very much impressed
By the beauty of the chimes and
His old crony he addressed:

"Them there chimes is mighty pretty!"
—But the other did not hear.
"Said those chimes is mighty pretty!"
He repeated loud and clear.
Still the other did not hear him—
—Only shook his old gray head—
So the first one fairly shouted:
"Chimes is BEAUTIFUL!—I said."

But the other could not hear him
And once more he shook his head
And confessed again he couldn't
Hear a "bloomin' word" he said!
"I can't hear a thing you're sayin'"
—These sad words his friend he tells—
"I can't hear a word you're speakin'
For them gosh-danged ornery bells!"

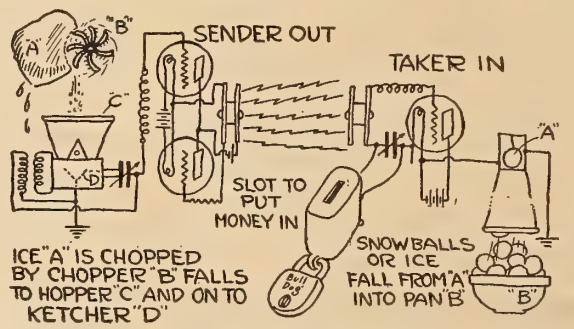
CHARLES ALLEN BRANHAM

What Will Red Grange Do for a Job?

Fairice, Alaska.

Dear Indi-Gest: Thanks for telling me what made Oglahooha tern red.

Here is dyeagram of my new invenshun to ship ice by Radio so the people down to WJAX can get as much water in lumps as they want for thirty8sents. It works kinda cause I tried it out on some eskimauxes and when I turned on the juice, they wanted to use the head



phones for ear muffs. Doc Cook herd of it and told the warden to tell me I'm a genius. So's his uncle.

All you have to do is put the thirty8sents in the slot and turn the dial to the amt of ice wanted and it will come out in frozen snowballs reddy to be served. I'm smarter than the averidge person. Always as ever.

KITTLE DRUMMER

All Right Mildred, Call the Roll

Both Noah and his son, Ham, made the Famous Fans club. Nominations are now in order.

Adam is the next celebrity for your consideration. He has been nominated by three persons. H. Gordon Hooton puts him up for membership because he did not get his "head set" on Eve and "transformer," and by H. M. Boorn because he sacrificed a rib to get a loud speaker. J. S. Neal adds that Adam should have special recognition because the speaker was made out of spare parts.

On My Ray De Yo

I bought myself a nine tube set,
Just twelve more payments to be met—
There's nothing that I shouldn't get
ON MY RAY DE YO.

A station down in Alabam'
Gives a pretty good program,
But all I get is bam—bam—BAM!
ON MY RAY DE YO.

I thought I'd like to hear Denver—
My set would surely bring in her.
The best I heard was whir—whir—WHIR!
ON MAY RAY DE YO.

Some friends of mine did me beseech
To try to tune in on Palm Beach.
I tuned in only screech—screech—SCREECH!
ON MY RAY DE YO.

The paper is before me now—
A farmer wants to trade a cow.
I think I'll see what he'll—al—LOW!
ON MY RAY DE YO.

MELANCOLUMN

A. Conan Doyle—Ask It Not To

Dear Indi: See where a mouse was killed when it short-circuited the system at CKAC. Maybe that's where all the squeals were coming from. Hope its ghost don't come back to haunt us. SHOBIE

Pay Cash and Save Receipts

This is to warn Radio fans not to buy Radio supplies on credit because if shops will recharge batteries they will do the same thing on other accessories. *INDI*

Holding Up His End

Condensed

BY DIELECTRIC

Somewhere I read a criticism of darky melodies to the effect they were presented too frequently. Maybe so, but I'm wondering if that person listened to the Tuskeegee quartet as they sang from the studio of Station WSB, Atlanta. There are some correspondents to Radio Digest who express a preference for jazz to the exclusion of classical music. They were well answered recently in the Reader's View column. These negro melodies are an essential part of American musical history and never so well rendered as by trained NEGRO singers.

Station WGY, Schenectady, selected one of the old melodious Italian grand operas to entertain their Radio listeners—an opera containing at least one aria familiar to all, "The Last Rose of Summer," from Martha. The spirited singing of the chorus was particularly enjoyable, if not the most so of the entire opera. Surely Martha is easily understood.

What has happened to Station WMBF? During the presentation of a dance program we had to await the completion of several numbers before learning the identity of the station. Let WMBF remember there are several broadcasting stations in that booming state, some of which reach farther north and with greater power than it. The station calls demand slight effort on the part of the announcer and must be given as requested.

Despite my good friend, The Third Trombone Player, I am not a soak nor even moist by Volsteadian measurement, yet my dials were carefully set to WRC's wave to listen to the fiery oratory of Senator Edwards, of New Jersey, who preceded Senator Brookhart, of Iowa. The idea of a "forum" as arranged by this Washington, D. C., station is a good feature. It allows us folks back home to hear our brilliant representatives talk on subjects they think we want them to talk about. We do. It sometimes happens they don't take the side we take, though. Until these gentlemen spoke over the Radio, no one knew the anti-saloon league was a super-state, involving entanglements—in spirit at least.

Listening to Radio features seldom make one dizzy, except where a learned professor talks on an abstract thesis, or three stations on low meters play the Charleston in thirds. However, Station WLS, Chicago, made some dizzy flights from Georgia to South Dakota and back, covering the country housing their many stores—the Sears-Roebuck stores of course. Anyone familiar with the cities visited could readily picture them as the director of the tour described various streets with their landmarks. This proved to be an entertaining diversion.

I can find no especial reason for lingering around Billy Penn's statue to overhear what Station WOO has to profer, though at times on the way down from WOAW, or WHO, I stay in Philadelphia a moment or two. On the last occasion it was to find a clear harmonic of the station on about 260 meters. This time listeners were being entertained with dance music from the Hotel Sylvania. The music was not bad at all and, in fact, our stay was beginning to become pleasurable when it came time to sign off for the night. Then the announcer dismissed his unseen audience in a perfunctory manner never approached in the experience of Dielectric by any other station. Really frigid.

ABC Radio Fundamentals for Everybody

Chapter XI—Radio Receiving Circuits (Cont.)

By Milo Gurney

IN the fall of 1922, a considerable furore was created in Radio circles by the advent of a group of circuits called reflex. In these, one or more tubes were so connected as to do double duty through functioning as both radio and audio frequency amplifiers. In these first circuits, the current at radio frequencies went through the tubes progressively, into the detector and then, at audio frequencies, went through the amplifying tubes a second time in 1, 2, 3 order. The straight reflex was followed by another system termed Inverse Duplex. In this system, the energy at radio frequencies first goes through the tubes in 1, 2, 3 order, as before, but the audio frequencies are passed back through the tubes in 3, 2, 1 order. This gives a better balance in that minimum radio frequency energy and maximum audio frequency energy are on the first tube, while maximum radio frequency currents and minimum audio frequency values are on the third tube.

In both systems, either a crystal or tube detector might be used, with the latter favored because of increased stability. In many cases these circuits functioned acceptably, although as a rule they were lacking in sufficient selectively and were difficult to keep in a condition of sensitivity just below oscillation.

In Defense of Reflex

In defense of the circuit, it is but fair to state that the prime reason for its present lack of popularity rests upon the fact that the early efforts showed the need of added research. It is readily possible at present to construct reflex circuits which are not only more selective but compare favorably with many circuits which are less involved in critical constructional details.

A typical reflex circuit is shown in figure 26. This is a three tube idea using a crystal as detector, and comprising a total volume output equivalent to five tubes. The circuit indicates no radical departures from standard reflex circuits, while it is dependent, as all other reflex circuits are, upon a correct balancing of capacities together with the strict avoidance of interstage coupling for successful operation.

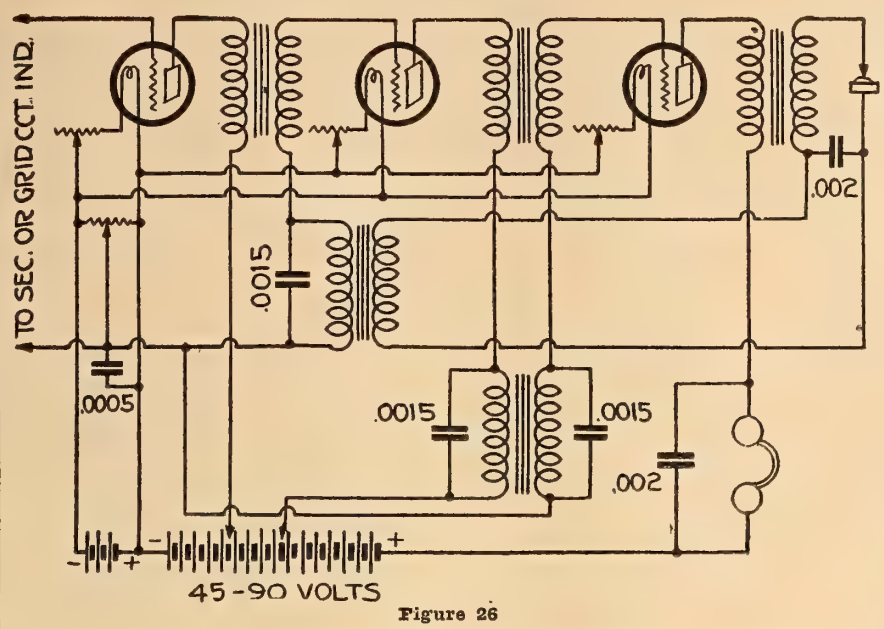


Figure 26

Hazeltine Starts Avalanche

As outlined in last week's article, great credit is due Professor Hazeltine, inventor of the neutrodyne method of oscillation suppression. His work acted as the incentive for a multiplicity of engineers (and others) to bring onto the market a host of "dynes" and what have you, which, as might be expected, were mostly bad. Here and there, of course, there were tuned radio frequency circuits which were worthy of the purchaser's serious consideration.

The outstanding effort along this pathway was marked by this year's offering of circuits which rely upon the Wheatstone bridge method of balancing for the suppression of undesirable oscillations. This system has not only been successfully employed in the contruction of that which is termed as "straight" tuned radio frequency circuits, but has also found its application entirely feasible and of material benefit when used in circuits of the reflex type.

How of Wheatstone Bridge Circuits

A complete digest covering not only the principle, but its application to circuits of the above-mentioned class, was published under the author's name in a series of articles entitled "Recent Advances in Tuned Radio Frequency." These appeared in Radio Digest beginning with the May 29, 1925, issue.

However, in order that those following this series may gain an insight into the method or principle underlying this system, figure 27 is shown as typical of the idea. In explanation, the theory upon which these circuits work is that through the adjustment of the relation existing between the arms of the circuit as shown at points C-1, C-2, C-3 and C-4, the current or signal may be caused to flow only in a forward direction from the input to the output circuit.

Therefore, because of this one-way action, feedback through the tube which causes oscillation is prevented, while a further, very essential, gain is had in both

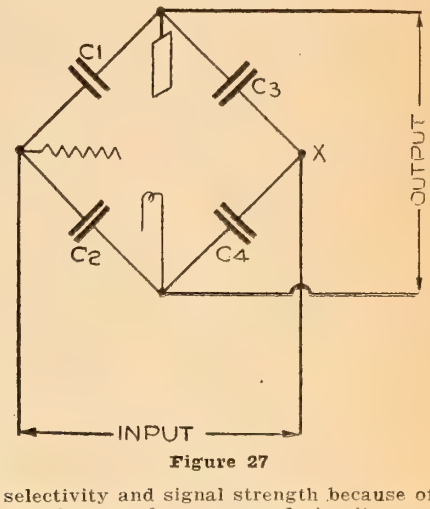

Figure 27

selectivity and signal strength because of the absence of any opposed circuit coupling action.

Reflex Combined in Bridge

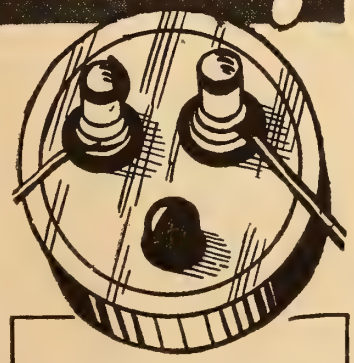
The circuit shown in figure 28 should be of unusual interest to those who are experimenting. It not only employs the Wheatstone balanced bridge principle, but also includes the use of tuned impedance

(Continued on page 24)

No More Static!

NEWEST, most startling invention eliminates static under all weather conditions. No loss of volume. Everything comes in clear and strong. No more exasperating buzzes, squeaks, and howls.

Start to enjoy the pleasure of your radio. Install a Static Eliminator and you can forget all about static forever. And not only that. You will increase the selectivity of your set—you will be able to tune out other stations easier, sharpen signals, remove noises, lessen interference, and prevent re-radiation. Over a half million Static Eliminators in use now. Thousands being sold daily. You will be enthusiastic too when you hook it up to your set and hear the amazing difference.



STATIC Eliminator fits all makes of radio sets. A child can hook it up in half a minute. Lasts a lifetime.

The Static Eliminator is sturdily made to give many years of perfect service. A simple, but effective device that hooks up to any make of set in 30 seconds. Complete, easy to follow directions included with every Eliminator. You will be amazed at the immediate improvement in your results. Mail coupon for your Eliminator now.

Amazing Low Price

$1.00 Postpaid

This wonderful new invention sells for only $1.00. Users say it's easily worth ten times this price because it produces such a wonderful improvement in receiving power and clearness of all radio sets.

Satisfaction Guaranteed

You will be delighted with the results of this remarkable instrument. That's why we guarantee absolute satisfaction. Money back if Static Eliminator is returned within 5 days. Don't be without it another day. Begin at once to know the real joy of receiving all stations without interference. Mail this coupon with a dollar bill—TO-DAY!

"MARVELOUS!" Users Write

"I find your Static Eliminator to be the most wonderful addition to a radio set in all my experience. It sure does the work."—J. J. Aldrich, 172 N. 4th St., Columbus, Ohio.

"Am surprised at the wonderful results I am obtaining. I am now receiving stations with clearness that is truly remarkable."—Thos. C. Smith, 2582 Parve Ave., New York.

"Your Static Eliminator is a great help. It gives me a wide receiving range. Last night in less than one hour, I had about 15 different stations."—R. D. Smith, Box 365, Clermont, Forida.

"I like the Eliminator fine. I wouldn't sell it if I couldn't get another."—Burt W. Thompson, Homer, Mich.

Use a Beldenamel Aerial

THE reason for the unusual efficiency of a Beldenamel Aerial is the great care exercised in its construction. Beldenamel Aerial Wire is made of several strands of pure copper, each coated with many layers of baked Beldenamel. The enamel coating prevents corrosion of the wire surface, and thereby offers a low resistance to the antenna current.

Ordinary bare copper aerials corrode, and the volume and range of the set decreases. A Beldenamel Aerial never corrodes, and therefore the volume and range are not diminished by corrosion. Try a Beldenamel Aerial, in place of your old aerial, and hear the difference.

Interesting Facts About Beldenamel Aerial Wire

Made in 100 and 150 feet lengths to avoid splicing for lead-in wire.

Furnished in distinctive striped carton that is a safeguard against substitution.

Endorsed by leading radio engineers as the best and most efficient aerial.

(Continued from page 23)

in the detector circuit. To make it even more interesting, to this tuned impedance is coupled a combination of inductive and capacitive regeneration.

For fear that some rabid fan may still not be satisfied, and also in order to show some of the complex possibilities of circuit combinations—which work—a stage of reflexing is included.

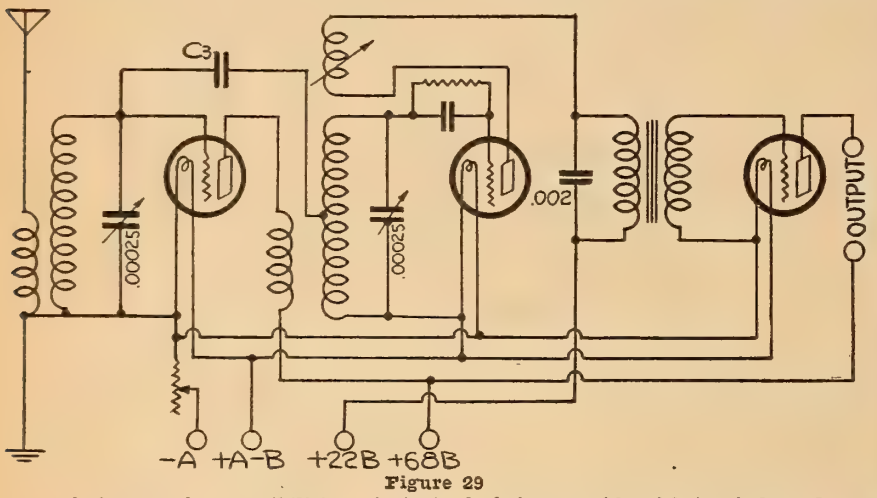

Figure 29

With reference to this circuit, I desire to warn that no values are given at this time, as the circuit will no doubt be offered later in a constructional series. Then a complete treatise will be given.

Another method, or rather application, of the use of tuned radio frequency is shown in figure 29. This uses a stage of tuned radio frequency in combination with a regenerative detector, the former employing the neutrodyne principle for the suppression of annoying oscillations. Properly constructed, this combination has proven very successful and has been marketed in "kit" form by several concerns.

Its regeneration is controllable through varying the inductive relation of the tickler employed, while its successful operation is, in a large measure, dependent upon both a careful selection of tubes to be used and the adjustment of the grid leak employed. It has the objection of only being capable of being balanced over a narrow wave band, such balancing not being independent of frequency, though its total operation is to be accepted as most satisfactory.

Out of pity, I shall refrain from pointing out the "fly in the ointment" chargeable to many so-called balanced circuits, in hopes that, from experience, those who are "mothering" such circuits will be taught the error of their ways.

(In the next article, the super-heterodyne will be described and explained by Mr. Gurney. Read what this author has to say regarding the "king" of circuits.—Editor's Note.)

New Type of Ray

Prof. C. E. Wynn-Williams, of the University of North Wales, England, has discovered a new type of ray, which he declares fills an important gap between broadcasting and Millikan rays.

While these new rays can penetrate air for several inches, they are stopped by all solids, even by gold leaf. X-rays can penetrate one-half inch of lead, as also can the recently discovered Millikan rays. Prof. Wynn-Williams suggests the new rays lie between ultra-violet and x-rays. The scale of the different type of rays is:

1, Millikan rays (one 500,000,000th of an inch); 2, Gamma rays; 3, X-rays; 4, gap (new rays); 5, Ultra-violet rays; 6, Light rays (one 50,000th of an inch); 7, Infra-red and heat rays; 8, Gap; 9, Broadcasting rays, or waves, (up to 25 miles).

An investigation into the conditions for sparking between two electrodes revealed the new rays, which showed their presence by ionizing air so as to make it conduct electricity, as do the x-rays and the ultra-violet.

True cascade amplification has long been the goal of radio engineers because it would utilize practically the theoretical maximum of each tube and give results hitherto undreamed of. The new Crosley 5-tube RFL's incorporate this feature ---and their performance is nothing short of revolutionary... RFL-60...$60, RFL-75...$75 without accessories.

Photogravures of Your Favorite Artists

GALLERY of RADIO STARS

Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

WITH COUPONS **Only 10c Each -- 3 for 25c** To cover cost of mailing and postage

17. HENRY FIELD
1925 Gold Cup Runner Up
SIZE 11x14 INCHES

Select Your Favorites from the Gallery of Radio Stars

1 Wendell Hall, king of ukulele ditties
2 Graham McNamee, 1925 Gold Cup announcer
3 Jack Little, popular wandering balladist
5 Coon-Sanders' "Nighthawks" at KYW
6 George Hay, 1924 Gold Cup announcer
7 Harmony Girls, Edith Carpenter, Grace Ingram
8 Ford and Glenn, Lullaby Boys of WLS
9 "Roxy" Rothafel of WEAF chain fame
10 The Hired Hand, famous "Substitute Announcer" of WBAP
12 Bob Emery, Big Brother of WEEI
13 "Bill" W. G. Hay, ex-KFKX, now of WLIB
14 Happiness Boys, jovial singers of WEAF
15 Lambdin Kay, "Little Colonel" of WSB
16 Leo Fitzpatrick, "Merry Old Chief," WJR
17 Henry Field, 1925 Gold Cup runner-up
18 Al Carney, organ favorite at WHT
20 Vincent Lopez, No. 1 Pennsylvania orchestra
21 E. L. Tyson, pleasing voice at WWJ
23 Art Gillham, "The Whispering Pianist"
24 Paul Greene, announcer at WSAI, "bridge voice"
25 Harry Ehrhart, "Dream Daddy" of WLIT
26 Correll and Gosden of "Kinky Kids Parade" fame, at WEBH and other stations.
27 Norman Brokenshire, popular at WRC, WJZ
29 Jane Novak, Blues Singer of Twin Cities, WCCO
30 Jean Sargent, the original, now at WHT
31 Ralph Emerson, popular organist at WLS
32 Edna Adams, of KPRC
33 Pat Barnes, vaudeville announcer at WHT
38 Walter Wilson, "Uncle Bob" of KYW
40 Ray-O-Vac Twins, known country-wide
41 Art Linick, KYW's Mrs. Schlagenhauer
42 Fred Hamm of WTAS, now WLIB, fame
43 Meyer Davis' Le Paradis orchestra of WRC
46 D. R. P. Coats, 1925 Silver Cup announcer
47 Gene Rouse, WOAW's popular announcer
49 Iris Ruth Pavey, KOA's invisible stage beauty
51 Ipana Troubadours, on the WEAF Chain.

If your favorites are not in this list, send in a request to have them included in the Gallery of Radio Stars.

COUPON NO. 13

This coupon entitles the holder to one photogravure selected from the Radio Digest Gallery of Radio Stars when accompanied by ten cents to pay the cost of mailing and postage.

Three consecutively numbered coupons entitle the holder to three photogravures when accompanied by 25 cents. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

How to Stop Blooping and Man-Made Static

Part VI—Dr. Hull's Amplituner

By the Technical Staff

IT MIGHT be well at this point in the series to insert a brief resume of what has gone before so that those just joining the movement for a better ether can follow clearly. In the first article, it was clearly shown, by excerpts from the reports of various investigating committees, that squealing interference, otherwise known as "blooping," is the direct fault of the broadcast listeners. Some

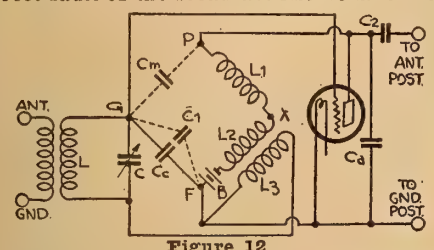

Figure 12

add to this trouble unintentionally, others do it knowingly with total disregard of the rights of others—and then complain about the blooping of their neighbors. Their own blooping is done "so very little" that it is not to be considered.

What Has Gone Before

The second part took up the subject of how and why various types of receivers

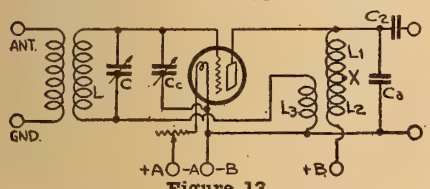

Figure 13

can squeal, and cause interference, and it was explained that the types known as "single circuit regenerative" and "three circuit regenerative" are not the only offenders by any means. We then got into correct receiver operation with some rules for the novice and old-timer alike, and some suggestions for charting the dials as a help against committing this breach of Radio etiquette. The fourth installment went into the construction of the Penetrola, a commercially available device which is a true one-way repeater that permits the entrance of radio frequency energy to the set but does not permit any, in the form of oscillations, to back up into the aerial circuit.

Last week, the DeForest anti-radiation device was explained, and sufficient data was given for the insertion of the two small parts necessary to accomplish DeForest's method. At the same time, an input arrangement that would prevent supers from radiating, was presented. Those who built their own could add this

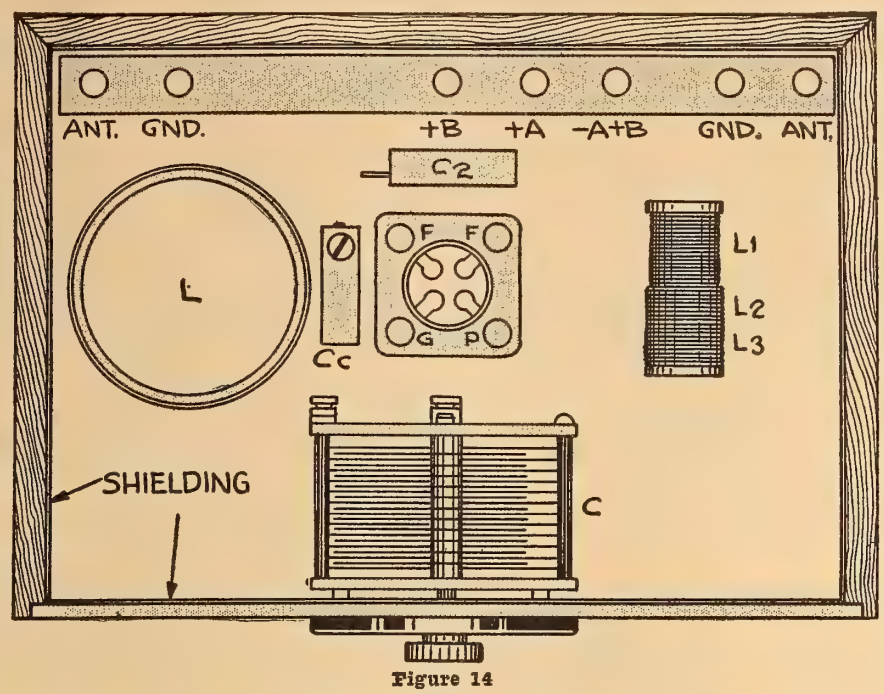

Figure 14

very easily. Perusing back through some of our old issues of the various publications on the market we have come across a very interesting article in the August, 1924 issue of QST, the official organ of the American Radio Relay league, by Dr. Lewis M. Hull, on the construction of a one way repeater which he chose to call the Amplituner. While exact winding data on the construction of the output coil of his device was not given, this has been worked out in the laboratory and full constructional data is now available.

The RFL Bridge

The circuit of this device, drawn for discussion in a bridge arrangement, is shown here as figure 12. To quote Dr. Hull's article: "It consists of a balanced bridge having two inductive and two capacitive arms. The incoming signal is impressed between the grid and filament of an amplifier tube across the two opposite terminals G and X of the bridge. The amplified voltage in the plate circuit of this tube is impressed across the other pair of opposite terminals P and F. The capacity between the grid and plate of the tube, Cm, and the associated wires, constitutes one capacity arm. The capacity between the grid and filament C_1 is increased by a small adjustable parallel condenser Cc upon which the final adjustment is made. Once the balance is attained, the compensating condenser Cc is locked.

"The inductive arms consist of two coils L_1 and L_2 in series in the plate cir-

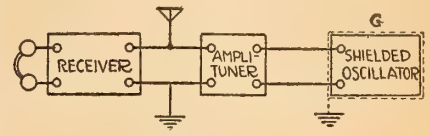

Figure 15

cuit of the tube. The lower terminal of the input circuit is brought to the same a.c. potential as the point X between coils L_1 and L_2 by the use of coil L_3 which is equal to and unity-coupled with L_2. The only reason for using L_3 is to keep the voltage of the plate battery B off the grid of the tube; if the battery were not present, the lower end of the input coil L would be connected directly to X."

This arrangement of Dr. Hull's gives a balance of capacify and inductance around the tube, such that radio frequency currents can enter the tube from coil L and will appear at the output terminals considerably amplified, but cannot pass from the output terminals, back through the tube, into coil L.

To further quote from QST: "In practice, the amplifier is required to do two

MAKE THAT SET BATTERYLESS $1

We will tell you how to make any radio set or circuit operate hum-free and successfully WITHOUT A, B, or C Batteries for . . . . . .

You can now make an **Electric Light Socket Radio Receiver** out of practically any Battery operated set, radio circuit or parts, and eliminate forever all A, B and C batteries, chemicals, chargers, continuous trouble, upkeep expense, disappointments and save easily $75 a year.

Anyone—you, your battery-charging, electrical and radio service man or dealer who follows our instructions—can make it in short time at reasonable expense. Thousands are now doing it and thousands are now in the homes.

It will be as good as **POWEROLA**, the famous 5-tube no-battery electric radio (universal for A. C. or D. C.) now demonstrated and sold thru The New York Edison Co., your local electric light company, radio, electrical or music dealer.

Tested and endorsed by Popular Radio, Radio Broadcast, Radio News and all highest and leading authorities, and engineers, as being powerful, practical, perfect, dependable and constant in performance.

REMEMBER, YOU DON'T HAVE TO JUNK OR THROW AWAY YOUR OLD SET OR PARTS; THEY CAN NOW BE MADE INTO AN UP-TO-DATE ELECTRIC RADIO, THE LATEST AND BEST IN RADIO PERFECTION AND PLEASURE.

Send $1.00 and we will mail you booklet containing 29 new and hitherto unpublished diagrams, information and literature, showing how to transform any old or new radio set, circuit and parts into an Electric Radio.

ATTENTION!

Radio Dealers, Set Builders, Fans, Experimenters and the Trained Men of Radio

Powerola is the Greatest and Sole Remaining "All Year 'Round," Money Making Proposition in Radio Today.

Powerola uncabineted receivers and units enable you, at surprisingly low prices, to supply almost every wish and demand of the people in your Town for a powerful, successful and popular-priced electric radio in a cabinet of their own selection.

Powerola enables you to make electric sets, or convert old or new sets or parts into electric sets, at handsome and continuous profits.

Act quickly before your territory is gone. Send $1.00 for booklet, and ask for literature, terms and prices at once.

POWEROLA RADIO CORP. [Dept. R. D.] 1845 Broadway NEW YORK

HELP STOP BLOOPING

(Continued from page 25)

things besides preventing the backward flow of current from the output terminals to the antenna. First, it must have a capacitive reactance between the output terminals which is equivalent to that of the 'average' antenna in order to allow the direct connection to its output terminals of any receiver designed to operate from an antenna; second, when such a receiver is connected to the output terminals, the resonance load in the plate circuit of the amplifier tube must be of such magnitude as to impress an amplified voltage upon this receiver.

"The provision of a suitable 'antenna-like' impedance, which will allow the receiver to retain its original tuning characteristics does not necessarily mean a fulfillment of the second requirement. A design for the output circuit was finally selected which allows the Amplituner to be operated into any receiver whose tuner is designed to operate at wave lengths from 200 to 600 meters; the receiving (set) tuner may be either single or double circuit, tuned by either series or parallel condenser, or it may consist of a so-called 'untuned' primary closely coupled to a tuned secondary, such as is used in commercial neutrodyne receivers. The design consists merely of the use of a continuous coil for inductances L_1 and L_2, having an inductance of about 500 microhenries, shunted by a capacity at CA of 500 mmf., which gives an effective range of capacity between the output terminals of 300 to 450 mmf., between 200 and 600 meters."

The Parts Needed

When the circuit is drawn in the usual schematic fashion to which constructors are accustomed, it appears as in figure 13. The same identification numbers are used in both illustrations but Cm and C_1 are missing in this second diagram since they are inherent within the tube. The input coil L can be any of the antenna couplers on the market for use in neutrodynes or tuned radio frequency hook-ups to be tuned with a variable condenser of .00035 mfd., shown as capacity C. The small adjusting condenser, used to bring the grid-filament capacity up to the plate-grid capacity, may be any of the small balancing condensers on the market and we would suggest the Walbert listing at $1.00 with a range of 4 to 75 micro-microfarads or the Bremer-Tully listing at $0.90 and going up to 30 micro-microfarads.

A vernier dial such as the Mar-co is advisable although not absolutely essential. The coil L_1 and L_2 is made with 190 turns of number 36 dsc. wire on a ¾-inch tube occupying a winding space of just a little less than 1¾ inches. At one end, and wound tightly over that half of the coil known as L_2, wind on 95 turns of the same wire for coil L_3. The fixed condenser Ca is of .0005 mfd. capacity while the condenser C_2 is anything from .01 mfd. to .5 mfd. A suggested arrangement is shown in figure 14 and this unit may be nicely put behind a 7" by 9" panel. The rheostat is placed below the condenser dial and both are centered on the 9" dimension.

Should Be Shielded

This unit to be really effective, should be entirely shielded with some such material as number 26 half hard sheet brass, readily obtainable almost anywhere and, in Chicago, from Stebbins Hardware Co. A piece is cut exactly the same size as the panel and placed back of it, the condenser and rheostat holes being cut out a little larger to prevent grounding of live leads. The cover of the cabinet used should also be lined, with flexible wires connecting it to the rest of the shielding which is, in turn, connected to the negative A lead. The coils should be placed so that they are well away from the shielding and small bakelite or hard rubber pillars cut from tubing will do this nicely. The socket also, might well be lifted up away from the bottom shield.

Balancing

In connection with the balancing, we again quote Dr. Hull's article; "The method of balancing the Amplituner brings out a very important effect, namely the change of intra electrode capacities in an audion tube when the electron current is flowing. In a commercial anti-regenerative amplifier (standard neutrodynes) local oscillations may be prevented by balancing the tube capacities with the filament unlighted and neglecting the unbalance which follows lighting the filament. But the writer has found that this change may cause as much as 2 to 4 micro-microfarads difference in the grid-plate effective capacity of a receiving tube when the filament is turned to full brilliancy. This is sufficient partially to nullify the one-way action of the Amplituner and to allow radio frequency to creep back through the Amplituner into the antenna. Accordingly, the final adjustment is made as follows."

The following suggestion of Dr. Hull's may not be convenient for everyone to use but is preferable to the usual method of putting a small piece of paper on one of the filament springs while neutralizing. However, if a shielded oscillator (single circuit receiver) is not available, the old system will come pretty close to perfect neutralization. To resume from the original article: "With the filament lit to full brilliancy, the amplifier is placed in the circuit shown in figure 15. The shielded oscillator represents an oscillating regenerative receiver. A receiving set is connected directly to the antenna as shown at the left. This set uses two stages of radio frequency amplification, a detector and an audio amplifier.

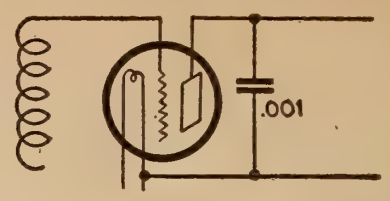
"Both this set and the Amplituner are tuned to the wave length of an incoming C. W. signal. The oscillator G is then tuned to produce a beat note with the incoming signal and the operator listens at the headset T while he adjusts the compensating condenser Cc of the Amplituner. The adjustment is made with a long handle (a one-foot stick whittled to screwdriver edge at one end) so the operator can keep his body away from the Amplituner. At some adjustment of Cc the beat note between the incoming signal and the oscillator G disappears. This 'null point' indicates a complete suppression of the backward flowing current from oscillator G to the antenna. . . . It is possible to make the adjustment at 350 meters and then to operate the Amplituner from 250 to 600 meters without putting into the antenna enough energy to cause interference to other receivers on other antennas nearby."

There you have the complete story on Amplituner as worked out by one of Radio's leading engineers and a pioneer in the development of bridge circuits. All parts with the exception of the special output coil are standard and most of our readers can build Amplituner out of spare parts lying around.

(Beginning with the next installment of this series, the discussion will be on man-made static, and means for checking up on it will be shown, together with remedies.—Editor's Note).

R. F. Circuits on High Waves

I am certain that there are fans whose sets, especially of radio frequency circuits, will not oscillate on high waves. I overcame this difficulty by shunting a .001 fixed condenser from the plate of the de-



tector to the positive of the A. One may need different capacities for other sets, but my receiver works out best with a .001, as shown in the above diagram. Clarence Miller, 601 North 6th St., Kansas City, Kansas.

Radiotone Loud Speaker

Now *Only* $19.95

Was $25.00

The BEST Radio Affords

$1.00 down!

With the Radiotone all the family can enjoy your radio at the same time!

Yes, Genuine Radiotone loud speaker—the same loud speaker that is selling everywhere for $25.00—now at a sweeping cut price, only $19.95 and on easy monthly payments, besides! Only $1.00 with the coupon below brings the Radiotone to your home on approval for 30 days! No radio is complete without a loud speaker—a *good* loud speaker. The whole family may "listen in" at the same time, leisurely—instead of taking turns at the headphones. Or if you have a loud speaker now that isn't satisfactory, that doesn't bring in stations loud and clear, this is your opportunity to get a first class loud speaker—yes, the best and we'll *prove* it on this offer—at an astounding rock-bottom reduced price, direct—and on easy, monthly payments besides!

Makes Your Radio Complete

The Radiotone is the last word in sound reproduction and amplification for radio sets. It is super-sensitive. Brings in distant stations with full volume so every one in the room can hear distinctly and easily. Wonderful clearness and absolute purity of tone. No distortion. No crouching in front of the loud speaker to hear announcements.

The Radiotone has a 14-inch horn made of Thorite in one piece without seam or joint, accoustically correct. This eliminates the metallic clang you often hear in other loud speakers. The reproducing unit is entirely enclosed at the base of the horn. The well balanced construction does away with all vibrations. The Radiotone has a graceful shape with a beautiful black florduline finish. It stands 23 inches high and weighs only 15 lbs. No extra batteries needed for the Radiotone—just plug it in as you do your head set. Nothing to wear out or get out of order. Sent complete with cord and plug.

30 Days Trial!

When the Radiotone comes, there's nothing to pay. Use it freely at our risk, on trial for 30 days. See how much more use and fun, you and all the family get from your radio with this loud speaker. See how loud, clear and distinct the Radiotone brings in all stations—better than any other loud speaker you've ever heard, giving you the best that is in your set. After 30 days trial if you think you can get along without the Radiotone, return it to us and we will refund your dollar plus all transportation charges. No red tape. The trial costs you not a cent.

Straus & Schram, Dept. R-8413 Chicago, Ill.

Enclosed find $1. Ship special advertised Radiotone Loud Speaker, I am to have 30 days free trial. If I keep the Radiotone, I will pay you $3.00 monthly, total reduced price, $19.95. The Radiotone is to become my property as soon as you receive the final payment. If not satisfied, I am to return it within 30 days and you are to refund my money and any express charges I paid.

Radiotone Loud Speaker No. Y8728A—$19.95

1926 Model Four-Filter Super-Heterodyne

Part II—Parts Alterations and Drilling

By the Technical Editor

SINCE a special means of coupling the oscillator pick-up coil into the grid circuit of the first detector (mixer) is used in this set, it will be necessary to add a few turns to the Cruver coil specified. You will note that, at that end of the secondary which is away from the primary, there is quite a space between the last turn and the end ring. In this end ring of Bakelite there is a terminal for one end of the secondary. On the end ring, measure about an inch each side of this terminal screw and drill a small hole through the end ring at each of these points, just large enough to pass a 4-36 machine screw.

In the space between the last secondary turn and this end ring, there are about five wire grooves on each longitudinal bar and on these wind two parallel turns of either number 24 or number 26 dsc. wire, securing the ends to the 4-36 screws just put in the end ring. These two turns will later be connected to the pick-up coil of the oscillator coupler to transfer energy into the first grid circuit without extending this first grid circuit clear across the set to the oscillator section.

Daven Amplifier Changes

We are going to use the binding posts on the Daven Super-Amplifier unit as connecting posts for the batteries to the whole set, and our circuit is going to have negative B connected to negative A; a change or two must therefore be made in the wiring of the Super-Amplifier. As it comes to you, the bus wire connecting the three negative posts on the sockets is connected to the binding post marked negative A, and the binding post marked plus A is connected to negative B binding post. The connection between the three negative filament socket terminals and the negative A post is to be broken and this bus connected to the negative B binding post. The strap connecting plus A post with negative B post is removed. This leaves negative A without connection to anything within the Super-Amplifier.

Consider now the oscillator coupler as supplied by National Master Radio Supply company. Of the two windings on the outer tube, the larger is the grid coil, the smaller is the plate coil. Hold it with grid coil uppermost; now find the protruding terminal of that end of the plate coil nearest the grid coil, in other words the terminal of the upper end of the plate coil. Revolve coil until this terminal is toward you, the grid coil still being uppermost. Directly below this terminal, in the space between the bottom turn of the plate coil and the lower end of the tube, drill a hole for a 6-32 machine screw to be used to support this unit on the sub base with a small right angle bracket.

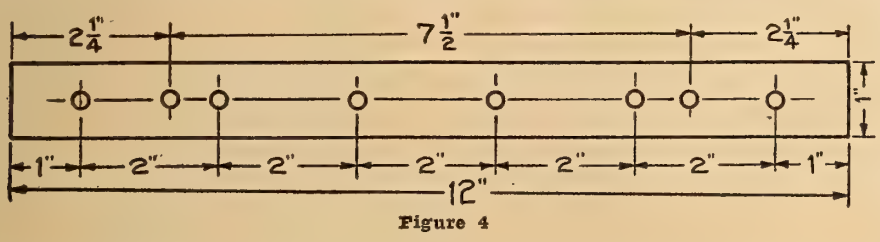

Figure 4

Getting now to the drilling. Figure 2, gives the dimensions for making a drilling template for the front panel and front panel shield. Four pairs of holes, in vertical relationship, will be noticed across the face of the panel. These are for the Kelbrackets. The four holes grouped at the left end are for the input tuning condenser, while those at the right end, in a group, are for the oscillator condenser. The group of four in the center near the top are for the General Radio potentiometer. Below this group is a single larger hole for the toggle switch.

When the full size drilling template has been made, lay it on and either paste or clamp it to the front of the panel. Center punch all holes with punch and hammer and remove template carefully as hole sizes must be followed from it. A piece of the sheet brass must be cut to the exact same size as this front panel and, for the drilling of the two together, I would suggest the following procedure. Have someone hold the panel tightly on the brass sheet which is to go behind it and drill the hole in the lower left corner and the hole in the lower right corner very carefully, watching to see that panel and sheet do not slip out of exact alignment. Do this drilling on a flat wooden surface and the brass will drill out cleanly without breaking out or tearing.

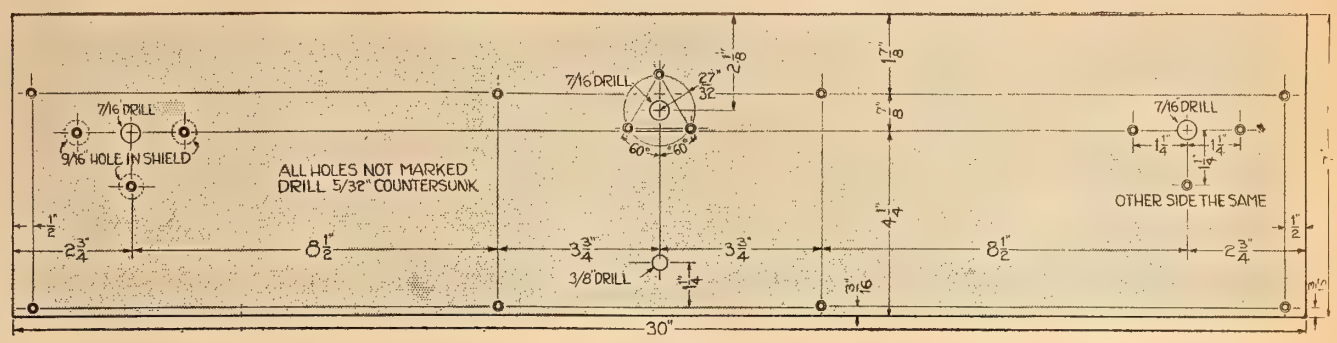

Figure 2

Having put in these holes, slip a round head machine screw through each and put a hex nut on the back, drawing them up tight to hold the panel and sheet tightly together and flat. You can now go ahead with the rest of the holes with confidence that all will coincide, in Bakelite and brass, when through. Drill all holes through first with a 9/64 or 5/32-inch drill and then put through the larger holes called for by the condenser shafts, the potentiometer shaft and the switch.

The panel and the brass sheet can now be separated for separate treatment. Each of the eight bracket mounting holes in the panel is countersunk from the front for which job I suggest a Yankee 45-degree countersink. Now countersink the three outer holes in each condenser group and the three outer holes of the potentiometer group. Turning now to the brass shield, drill out the three outer holes of the left condenser group with any drill up to 9/16 and ream out to that size. This will give clearance of the shield around the three mounting posts of the left condenser. It might be stated at this point that, if readers wish the drilling templates in blue print form and full size, they will be sent on receipt of 40c, sent to Dept. 5 of Radio Digest, 510 N. Dearborn St., Chicago, Ill.

Figure 3 gives the dimensions on holes contained in the sub base and its shield. These are both 29⅜ inches long but, referring to the right end of figure 3, you will note that the sub base is but 7 inches wide while the brass sheet placed under it is 9¾ inches wide, with their rear edges coinciding. Two sizes of holes are shown scattered over this layout, without indication as to size. The smaller are 9/64

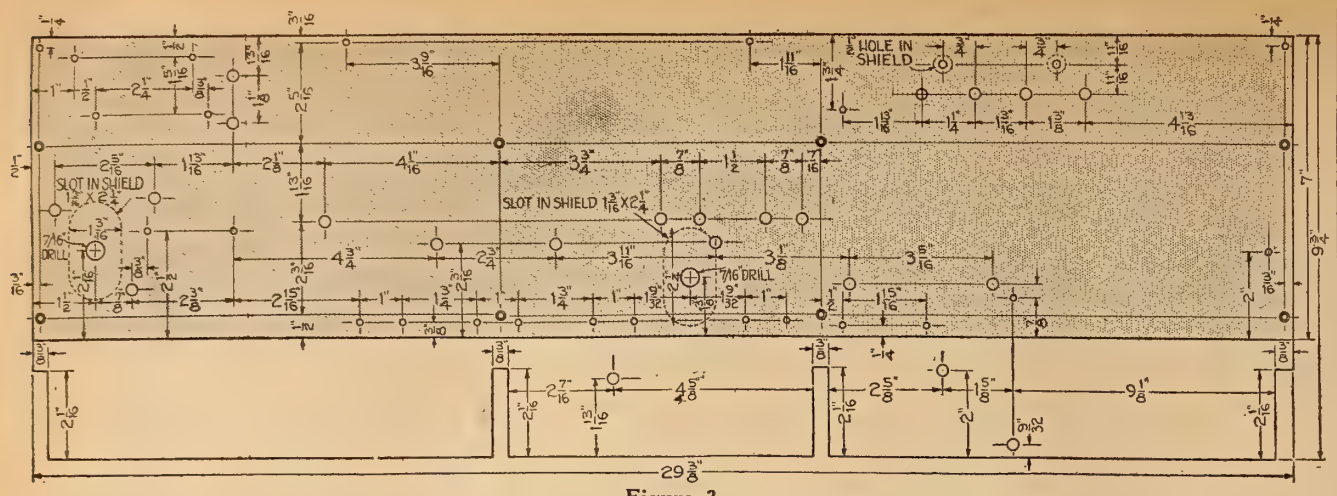

Figure 3

FOUR-FILTER SUPER

(Continued from page 27)

or 5/32 while the larger are ¼ inch. Eight of these smaller holes are encircled to indicate countersinking from the upper-side so that flat-head screws can hold sub base and brass to the brackets. At the left and in the center will be noted a larger hole for the Bradleyleaks.

The small holes placed in the upper left and upper right corners (rear left and rear right) serve no other purpose than to hold base panel and its brass together while drilling. With someone to hold the two pieces with rear edges lined up, drill through these corner holes and then insert 6-32 machine screws with hex nuts. All holes passing through both base and brass can now be drilled. Then separate base panel and the brass sheet drilled with it, and cut out in the brass sheet as shown by dotted lines, for the Bradleyleaks, 1⅛ by 2¼ inches. The four slices in the front edge of the brass can also be taken out; these pass the brackets from above sub base level to below. At the rear edge of the illustration, over toward the right, there are two holes, marked with dotted lines to indicate ½-inch hole in shield. Drill these through the brass separately as they provide clearance around two binding posts later, one for 45 volts and one for 67½ volts.

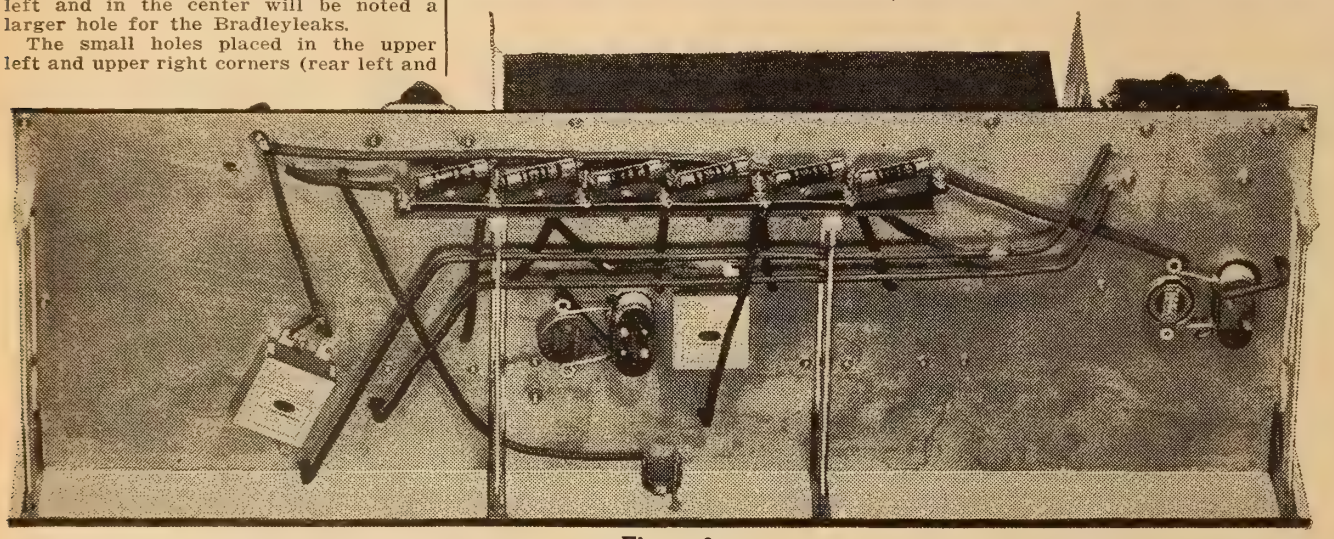

Figure 6

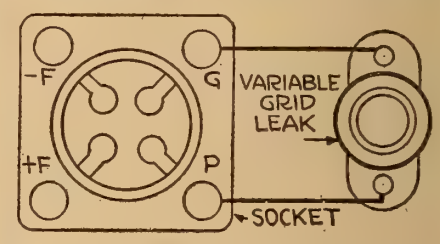
We now turn our attention to the Kel-brackets. As supplied, they would raise the sub base too high above the lower edge of the front panel and the Daven Super-Amplifier tubes would not permit the cover to close. As these brackets are aluminum, they can be easily sawed with a hack saw. Measure up ¾ inch from the bottom on the front leg of each bracket and the same on each rear leg, marking with a finely pointed instrument to get these all exact. Then saw each off. As supplied, the front surface of this bracket is 6⅞ inches, so when this length has been removed the remainder is 6⅛ inches long and the top point will be ⅞ inch from top edge of front panel.

Figure 4 shows the drilling of the small Bakelite strip which mounts on the rear surface of the two center brackets, under the sub base, for the six Amperites. It should be noted that two of these holes, the two used to secure strip to the brackets, are countersunk. Figure 5 is a top view of the completed assembly, while figure 6 is the bottom view. Experienced assemblers can probably proceed with the mounting of the parts but novices should wait for the next article.

(The changes in apparatus, and the drilling, having required so much space, it will be necessary to handle the assembly as part of the next article which will also begin the wiring.—Editor's Note).

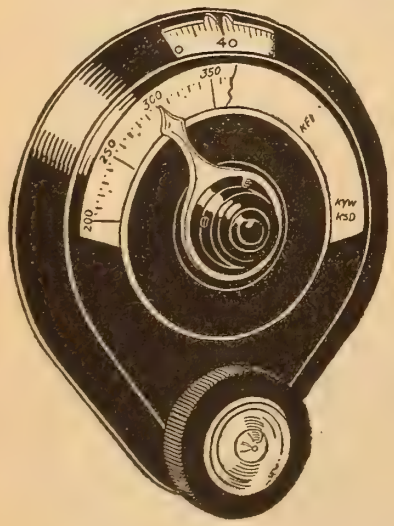
Increasing Efficiency of Tubes

The efficiency of tubes in a set can often be increased by putting a grid leak,



preferably a variable one, across the grid and plate of the tubes.—Frank Knight, 40 Grenadier Road, Toronto, Can.

for **B-T** BETTER TUNING



Use the

B-T

Tuning Control

Fits condensers turning either way. Pointer reads in wave lengths or station call letters, dial reads in degrees.

Geared 12 to 1 with not the slightest indication of backlash or lost motion.

Beautifully finished in black and gold or in brown and gold. Adds to the efficiency and appearance of any receiver.

Black and gold finish.....$2.50

Brown and gold finish..... 3.50

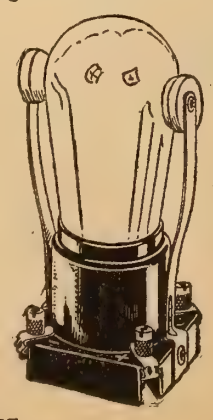
Stop That Noise!

That ringing sound you hear where the panel is jarred. It's a microphonic noise caused by the vibration of the elements within the tube.

STOP IT effectively by the use of a B-T Silent Socket on your detector.

The Silent Socket may also be used on the first audio stage with good results or if desired throughout the entire set. Price $1.25.

The regular type UL Socket is the same as the Silent Socket without the absorbers. Both types take the old or the new UX tubes without the use of an adapter. Good sockets are important. Use B-T Type UL.



Price.....75c each

The Reader's View

Why WJZ Programs Were Out—and In

You will be pleased to note the Radio Corporation of America's reply to my recent request with reference to listing programs from WJZ in Radio Digest:

"Your letter complaining that the programs of Station WJZ were not published in the Radio Digest at hand, and I think a brief explanation of the situation would clarify matters considerably.

"The Radio Digest requires programs three weeks in advance in order to have them published in advance in that periodical. In the past we have not felt that we could issue programs three weeks in advance that were accurate and preferred not to have our programs published unless they were absolutely correct. With the coming of high power for WJZ, our programs are being booked further in advance than ever before. Therefore, at the present time, it is possible for us to supply the Radio Digest with programs three weeks in advance that are practically correct. You will find our programs now in the Radio Digest and think that henceforth they will appear in that publication with regularity.—The Radio Corporation of America."

This information will be gratefully received by the readers of your magazine, particularly in view of the far reaching territory of this new superstation.—R. H. W., Winona, Minn.

Attention: T. H. of Okemah

T. H. of Okemah, Okla., asks, "Whad'ya mean Just?" If he will go to the public library and look up "just, adv." in Webster's International dictionary, he will find, in addition to definitions he mentioned, "now, or a moment ago." Why abuse the announcers? I like to have them tell the numbers just rendered and by whom.

He further states: "Any moron ought to be able to recognize a piece of music after it has been broadcast 100 or 150 times." Of course we are not **all** morons and perhaps that is why a great many of us do enjoy announcing of numbers and cannot see things from his standpoint.—L.M.R., Sterling, Ill.

Announce Call Twice

Let me add to your many timely remarks on improved announcing, a suggestion that I feel would add greatly to the enjoyment of the vast multitude of listeners.

In addition to announcing frequently, give station letters at start and AGAIN at the end of each announcement. Many announcers start with the call letters and all the letters may not be understood. If given again at the end, we have another chance.

All stations desire above all else wide publicity and the good will of the listeners. Above method, practiced consistently, will greatly help them to achieve that goal.—W.E.D., Philadelphia, Pa.

Place for Jazz

Answering E.I.S., Butler, Pa.: I heartily agree with him regarding jazz. Let's have it all put on about 510 or 520 kilocycles. But why condemn one of the most beautiful toned instruments because some so-called musicians can evidently do nothing with the saxophone except shatter the listener's nerves and eardrums with jazz? Has E.I.S. ever tuned in on KOA or KFOA? He can hear some real music from saxophones at these stations.

Now I would suggest that you put jazz where E.I.S. asks but also include with it

(Continued on page 30)

Gets Everything But Noise!

Read this convincing letter from a man who has "listened and marveled":

"Omaha, Nebraska, February 10, 1926.

Kane Antennae Co.,
Gentlemen:
I received 2BD, Aberdeen, Scotland, on a "Kane Antennae," during the recent International Tests. Reception was officially verified by Radio Broadcast Magazine who conducted the tests. I built the Antennae a year ago from one of your blue prints. It has more than met expectations in the elimination of outside electrical interference, as well as in increased volume and distance.
GUY H. CRAMER."

Improves Reception 60%

Entirely eliminates all power noises such as leaky transformers, generators, motor hums, Delco Plants, etc. Cuts static and regeneration howls and squeals in two. Dr. Gehrig of Oakland, Cal., says it improves his reception fully 60 percent. Do away forever with disagreeable noises.

$1.00 *Brings BLUE PRINT Complete Working Drawings* and full instructions for erecting this wonderful Antennae. Just send $1.00 (a check will do. Stamps not accepted). A limited number available. Send TODAY.

KANE ANTENNAE CO.

KANE ANTENNAE

Here and There with the Radio Clubs

An educational committee has been appointed by the Spokane Radio Listener's association to direct the work of giving Radio set owners a better understanding of how to operate their sets most efficiently and recognize sources of interference. A Radio survey to cover the entire city of Spokane has been announced and a questionnaire was published in the Spokane Chronicle. The information gathered will be used in the campaign against interference being carried on by the association and the Washington Power company.

* *

The program committee of the Butte, Montana, Radio club has interest and enthusiasm in the meetings at a high pitch due to the schedule of unusually interesting speakers arranged. At one of the most recent meetings, the speaker was H. W. Manring, of the Mountain States Telephone and Telegraph company, who included in his talk a discussion of the use of vacuum tubes in long distance telephone work. The members then inspected the entire local telephone exchange from batteries to switchboards.

* *

Eastern clubs, attention! Send in your news. Tell us what you are doing.

* *

A Radio club is being formed in Portsmouth, Ohio, to be known as the Scioto Radio club. Its object is "to improve the condition of Radio reception in the city of Portsmouth and vicinity and clear the air of avoidable causes of interference to Radio listeners." Copies of the by-laws, constitution, application blank and membership cards used by other clubs are desired by Frank R. Sodaro, Box 341, Portsmouth, Ohio.

* *

The city of Cheney, Washington, announces a Radio club with full arrangements completed for a place to meet, officers, instructors and speakers. James S. Lane, of the Normal school faculty is chief of instructors; Leon Swank is president.

* *

The Grand Rapids Radio Listeners' league now has over 700 members! A drive is on for a total of 3,000. That's ambition when there are only 7,000 set owners in the city. The way applications are pouring in, it surely looks as if this drive would be successful. The live-wire club even has its service expert in the person of Ewald A. Stein, who runs down interference for the members. Locating four such cases in one week, he cleared the air for nearly twenty per cent of the membership. He finds ft possible to average about two calls a night, but when each "cure" clears the air for a score of others, this is plenty. The league can be reached at P. O. Box 558, Grand Rapids, Michigan.

* *

Up in Victoria, B. C., everyone has to have a receiving license, so when the Victoria Radio club wanted to send out a questionnaire they had a 100 per cent list. The card which was sent to every set

(Continued on page 30)

No More "B" Batteries on Your Radio

At last, a practical reliable "B" battery eliminator for your radio. Does away with "B" batteries; no charging; no replacing. Always 100% efficiency in "B" current. The most revolutionary development in radio.

Genuine Fansteel
Balkite "B" Eliminator
Sent for Only
$1.00 *Down*

U.S.PAT. MAY 27, 1924

The Balkite "B" is connected to your radio just like "B" batteries and attached to an ordinary electric light socket. Replaces "B" batteries entirely and furnishes "B" current direct from regular house lighting current. Always gives current equal to four new and fresh 22½ Volt dry "B" batteries. For sets of five tubes or less. Simplifies radio receiving. More convenient, more economical and more efficient than dry or wet "B" batteries. Operates storage battery or dry cell tubes and gives tubes longer life. Entirely noiseless. Creates no disturbance in reception. Has no bulbs, nothing to break, wear out, replace or get out of order. Requires no change in your set, no extras to buy. Operates from 110-120 AC, 60 cycle current. Measures 8 3-16 inches by 8 inches by 3¼ inches. Current costs only 1-20 of a cent per hour.

$5.00 a Month, if satisfied after trial

Only $1.00 with the coupon below brings the Balkite "B" to your home on trial. Try it out thoroughly before you pay another penny. See how it improves reception. See how much more convenient than using batteries. Judge for yourself how it will save you money and make your radio set more enjoyable. Then, if not satisfied, send it back at our expense and we'll refund your $1.00 plus all transportation charges. If you decide to keep the Balkite "B," start paying only $5.00 a month until you have paid the total price of only $35.00. That's the price others ask for spot cash. We give you the lowest cash price on easy monthly payments you will never feel.

Send Coupon

Don't miss this opportunity to get the genuine Balkite "B" at the rock-bottom cash price on easy monthly payments. Send coupon now while this offer lasts. **Order by No. Y-8578A, $1.00 with coupon; $5.00 a month; total price $35.00.**

WITH THE RADIO CLUBS

(Continued from page 29)

owner is reproduced here with and the information this brought it has been of inestimable value in clearing the ether of noises. With this card was a letter:

"The Victoria Radio club has been requested by the Dominion government to undertake a campaign to lessen interference in this district. The club invites your cooperation and requests you to supply data as to interference experienced by yourself in the past few days. By filling in and returning the enclosed stamped post card as early as possible you will greatly aid this work."

* *

Radio clubs! Insist on every member reading the series of articles now appearing in Radio Digest on the subject of blooping and man-made static. It is the largest collection of authoritative data on the subject yet published. Practical application of all points brought up can be discussed at meetings for the benefit of all.

The Reader's View

(Continued from page 29)

all those screeching sopranos and all singers of operatic stuff in a foreign tongue, and put "breezy announcing, Ford fiddling, infant prodigy stuff and the rest of the high-class RURAL entertainment" where the majority can get at it.—J.W.McC., Bovey, Minn.

Sit Down, T. H. Okemah!

In the Radio Digest of February 27 under title of "Whad'yamean Just?" T. H. Okemah of Oklahoma criticizes broadcasting stations for announcing the names of familiar melodies. Objection is also made to the use of the word "just" in announcements such as: "You have just heard, 'Let Me Call You Sweetheart'," etc.

These criticisms of Okemah's are hardly worthy of consideration, but in behalf of listeners in general and particularly for Okemah's information I wish to say that I also consulted the dictionary (Webster's New Ideal). I found as one definition of the word "just": "Now, or but a moment ago." Therefore Okemah's objection is over-ruled and there is no reason why announcers should not use the word "just," just as they have been doing.

So far as it being necessary to announce the name of a song that is familiar to nearly every one, such as, "Let Me Call You Sweetheart," Okemah should realize that broadcasting stations are not being operated for his or her sole benefit. He or she may be quite familiar with all the popular songs but it should be remembered that there are thousands of people throughout the United States alone who are hearing many of the songs for the first time. Okemah may not survive the shock when I say that only a few days ago I heard, "Let Me Call You Sweetheart" for the first time.—A.J.P., Cement City, Michigan.

CLASSIFIED ADVERTISEMENTS

Classified advertisements in Radio Digest produce results. Have you a receiving set to sell? Do you want to buy a Radio? A classified advertisement in this column will sell your set.

Rates are twenty cents a word for each insertion, five per cent discount for four insertions, ten per cent for thirteen insertions, fifteen per cent for twenty-six insertions, twenty per cent for fifty-two insertions. Name and address to be included at above rate. Cash should accompany order. Minimum of ten words.

Objectionable and misleading advertisements not accepted. Forms close three weeks prior to date of publication, which is Saturday.

(Note—The second part of the station list will appear next week.)

CHALLENGE!

ONE DOLLAR will be paid to the Radio fan submitting the most errors in any one station's listing in this directory. Letters must reach Radio Digest office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be certified by the stations themselves, and NOT by comparison to other so-called accurate broadcasting directors and lists. Readers also must live in same state or province as stations corrected are located. Station verifications must accompany corrections.

That's just how sure Radio Digest is that this broadcasting station directory is correct! To make the challenge fair for everyone, broadcasting stations and their employes are barred from this offer. Why? Because the broadcasters are the source of all the data given herein. They are (or should be) interested enough to answer the inquiry sent them every time data on their station appears. This inquiry contains a proof of their last listing and must either be corrected or O K'd as correct and returned to the Digest. Nevertheless, sometimes the stations are careless and mistakes are made. But Radio Digest is so sure of the exactness of this directory that this challenge is made unconditionally.

With reference to the directory: It appears in six parts, serially continuously; the first four parts are station data listings, arranged alphabetically; the fifth part is a state, city index of stations; the sixth part is a wave length index. The information contained in each station data listing is given in the following order: Call letters, city, state, wave length used, watts antenna input, owner's name, announcer's name, slogan used if any, name of listener in "club," schedule of operating hours, and kind of time used, as "Central," "Mountain," etc.

Six successive issues of Radio Digest will give one the most complete and accurate list of broadcasting stations obtainable. This service is original with this publication, and has been maintained from the start. Right of reproduction without permission of any or all of the data contained herein is denied.

Your Home— Deserves This Radio

Compact-Fits any Corner— A Beautiful Piece of Furniture

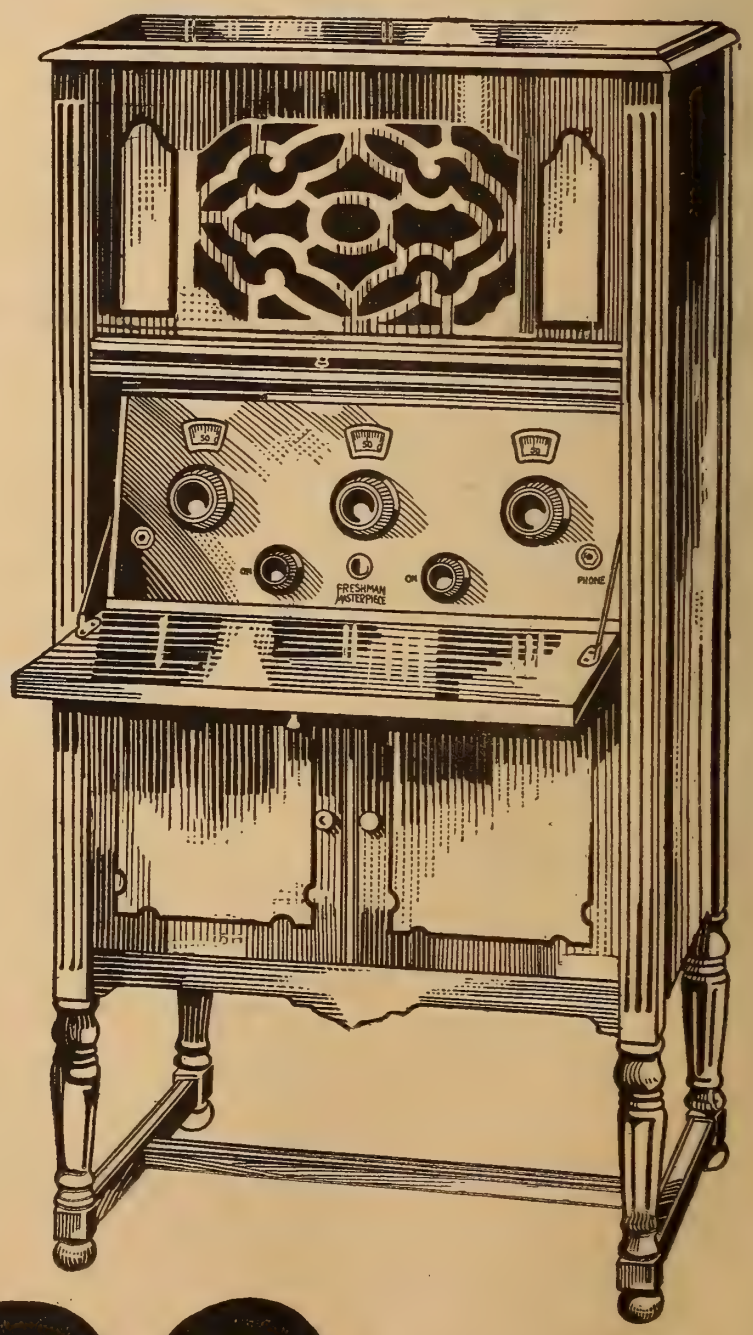
of genuine five-ply mahogany with built-in loud speaker of great volume and superb tone and spacious compartments for all batteries and other accessories—not a single wire being visible.

MODEL 6-F-I

New and Improved

FRESHMAN MASTERPIECE

The Worlds Greatest Radio Value



Freshman's latest sensation has a real appeal to the women of the home. It is compact and comparatively small, giving it preference over clumsy consoles. Contains an especially large tone chamber, made by the manufacturer of the world's foremost phonograph.

When not used as a radio, it can be entirely closed. The top is stationary and provides an attractive resting place for vases and other ornaments, so essential to the women of the house.

The Radio Receiver Women Have Been Waiting For

VIENNA STATION TO INSTALL TELEVISION

BELIN SYSTEM TO BE USED TO TRANSMIT PICTURES

Announcement Has Mixed Reception Because of Invention Selected and Move Thought Premature

By F. M. Delano

VIENNA, Austria.—The new Vienna station looks like being the first broadcasting station in the world to launch out into the broadcasting of pictures by television. It is announced that they have made an agreement with M. Edouard Belin, the French inventor, to adopt his system of television and that M. Belin is coming to Vienna shortly for the purpose of installing the apparatus.

This announcement has had a mixed reception here. While the enterprise of the station is commanded, it is pointed out that they may have acted somewhat rashly, as many hold that the Belin system is not at the moment the best. The Karolus method, which has been launched by the Telefunken people, has warm partisans here, while similar claims are made for the invention of a Viennese engineer, Professor Tschorner.

Another line of criticism is that the Ravag, the company which holds the broadcasting monopoly in Austria, would be better advised, pending the evolution of a foolproof television system, to spend what surplus money it may have on improving its programs, which are said not always to be up to the required standard.

428 Applications for New Station Licenses

List Shows Great Publicity Value of Radio Broadcasting

WASHINGTON, D. C.—The department of commerce has just made public for the first time a list of applicants for new broadcasting stations throughout the United States. The list reveals that 428 new broadcasting stations would soon be on the air if there were wave lengths to accommodate them.

According to officials of the department of commerce, the list indicates the great publicity value attached to Radio broadcasting. At the present time there are 536 stations. If licenses could be granted to the new applicants, it would almost double the total number of stations.

Can Keep Clocks Correct

CINCINNATI.—Radio is affording housewives an opportunity to keep their clocks correct. Correct time is broadcast through the Crosley, WLW, station at 11:55 a. m. and whenever the programs are concluded.

BET YOU NOW WISH WE HAD TELEVISION

THE young lady whose picture appears on our cover this issue is Miss Isabel Dawn, one of the new and most interesting stars of the First National Pictures, Inc. Just now she is appearing before the microphone of WJZ, New York, in a series of Radio playlets provided by the film company. She has received a tremendous mail applause for her success in the title role of "Irene" and when television comes with Radio, Miss Dawn will be fully prepared to perform the double role for the lens and the microphone at the same time.

WLS Is Teaching Women to Buy Better Quality Fabrics

CHICAGO.—To teach women to know, appreciate and buy the better quality fabrics is the mission of the unique Radio textile school for homemakers, just organized by the Sears-Roebuck Agricultural Foundation over its station here, WLS.

Miss Elizabeth Weirick, a noted textile expert, is the director of the new school and will be the principal instructor at its classes, which are held over WLS every Tuesday afternoon from 3 to 4, Central time.

Says Radio Has Increased Circulations of Libraries

CHICAGO.—A stimulated interest in an increased circulation of library books have resulted from the universal popularity of Radio, declares the American Library association, after compiling reports from various parts of the country dealing with the influence of Radio.

Once considered to be a new form of amusement which would divert the interest of the American family and discourage reading habits, public libraries have found in Radio an ally for extending the circulation of good books. Cooperation of libraries with Radio stations everywhere has had a salutary effect, according to the library association. There are now more than forty stations which broadcast regular book news.

Looking Ahead

Accused of Piracy, the Veteran Broadcaster, WJAZ, Armed Her Crew to the teeth, hoisted the skull and cross bones and cut her course directly across the air to meet a wandering wave flying the Union Jack. Sulphuric Smith let loose with a triple octave baritone broadside and caught the Hoover bark in a crossfire. Bloody details in a forthcoming issue of Radio Digest.

It Has to Be Good If It Comes from Milwaukee and that's why the Marquette University-Milwaukee Journal Radio Station WHAD feels obligated to present programs of infinite variety and full entertainment value. Turnvereins and firemen "horn in" to continue the fame of Milwaukee. Read about them, see them in next Radio Digest.

Whose Were the Extra Heads? Who Stepped on Tolliver's Hands? Was someone trying to drug the whole party with ether? Real fireworks begin in the next installment of "A Step On the Stairs." A flashlight throws a weird beam and then strange voices—get new thrills and get your Radio Digest early.

Super-Torrodyne Is An Unusual Super designed by Prof. J. E. Owen of the bureau of tests and measurements at the University of Oklahoma in which the outstanding feature is the use of torroidal coils for the input coupler and the oscillator coupler. The result is no direct pick-up of signals by these units and the only energy traveling the circuits is that which comes in on the antenna. Its construction will be given in the Radio Digest.

Another Raytheon B Power Supply will be presented in the next issue. This uses a compact Jefferson unit combining the transformer, chokes and socket in one case. The wiring is further simplified by the use of a Tobe unit which combines the three filter condensers in one case—wired. Four B voltages of 45, 67, 90 and 135 volts can be obtained.

CLAIMS RADIO WILL CREATE FOLK MUSIC

REAL AMERICAN TUNES TO BE BASED UPON JAZZ

National Authority Says United States Will Develop Individual Type Through Broadcasts

CHICAGO.—Under the withering white glare of the Radio spotlight the average jazz tune curls up and dies six months before its pre-radio allotted time.

Only the virile, the sturdiest of worthwhile compositions of a jazz nature can survive the infinite repetitions within a short space that Radio gives to every new tune. Thus, by the survival of the fittest, America is developing for the first time a genuine lore of folk music, based on jazz.

This is the opinion of Dr. Sigmund Spaeth, author of many volumes on modern music and music trends, and a leading authority on music in all its phases, whose innultrated lectures on the subject over the microphone of WLS, the Sears-Roebuck Agricultural Foundation station, have created a mild sensation and an avalanche of "applause letters."

"There never has been any genuine American music," Dr. Spaeth believes. "For a century and a half we have imitated the European style. We have been insincere in music, posing. Whether we liked the classical or not, we have pretended to do so, to save our faces.

"Jazz is as American as baseball. Jazz is restless, honest, obvious, energetic, vulgar, human, impulsive—a cross section of Yankee human nature in the raw.

"Radio is a refining furnace from which survives the best in jazz music. Gradually a body of music, basically jazz, is being built up that is the first evidence of a truly American folk music."

KOA Spring Cleaning to Overhaul Antenna

Find Dry Denver Air Keeps Wires from Corroding

DENVER.—Prepatory to the pre-summer broadcasting season, KOA's transmitting equipment and towering antenna system recently were given a rigid spring inspection at the hands of the technical staff members.

"Examination of antenna joints and connections, insulators, etc., are important at this time in anticipation of the usual spring winds," declared C. J. LaGue, chief engineer of the General Electric station.

"We were particularly interested to find a complete absence of corrosion on the antenna wires and down leads," he continued. "This condition, no doubt, is explained by the thin, dry atmosphere at this altitude."

Libel Suit Brought Against Station Dismissed by Court

OKLAHOMA CITY, Okla.—The suit against Station KFJF, here, for $20,000 for alleged libelous statements made from the station by Rev. McConnell, while the station was leased by him, has been thrown out of court before even being set on the court calender. The suit was filed by Undersheriff Friss of Oklahoma county, following a widely-advertised talk by Rev. McConnell in which certain matters regarding the official conduct of the officer were mentioned in regard to the liquor industry.

Attorneys for KFJF filed a demurrer, setting up the fact that the station only furnished the equipment under lease; that the Southwestern Bell Telephone company (A. T. & T.) also was a party as their leased wires were involved; also the Oklahome Gas & Electric company (Billeysby company's subsidiary), as their poles were leased. Following this action, the case was dismissed.

OPEN GOLD CUP AWARD FOR 1926

NEWS BRIEFS FROM THE BROADCASTERS

COOLIDGE TO TRY TO TALK TO SOUTH AMERICA

WHAP Engages New Woodwind Sextette—CKY Invaded by 600 Farmers —Law Series from WEAF

An attempt to transmit the voice of President Coolidge, never before heard outside North America, to the countries of South America will be made April 8, by Stations WRC, Washington, and WJZ, New York, when the president formally welcomes the delegates to the first Pan-American Congress of Journalists to Washington.

* *

The success of the recent series of woodwind concerts given from WHAP has led the studio management to engage the services of a new woodwind sextet, which will be heard for the first time next Friday evening, March 19, at 8:30. This organization, the Philharmonic Woodwind ensemble, is recruited from members of the New York Philharmonic orchestra.

* *

When Winnipeg was "invaded" by more than 600 farmers from North Dakota, recently one of the places surrounded and carried by storm was the CKY studio. The microphone was left open as the visitors passed through the studio and every member of the party—with one or two shy exceptions—said "Hello" to his friends who were listening in at home.

* *

Although but a few minutes in length, one of the most interesting programs broadcast by KFI is the weather forecast of Father Ricard put on the air each Sunday evening at 6:45 p. m. Pacific time. For many years Father Ricard has studied the weather in his little observatory at Santa Clara and has evolved a system of

weather prognostication that has proven to be so accurate that even hardy Californians, usually ready to fight at the drop of a slurring remark about California weather, philosophically resign themselves to their fate when the "Father of the Rains" predicts cloudy weather over KFI for the following week.

* *

A popular series of addresses by leading legal lights of the eastern section of the country will be heard by the listeners of WEAF during the week beginning Monday, April 5. These addresses will deal with the important factors of law and law enforcement and are under the auspices of the American Bar association.

* *

As a result of appearances before the microphones of KPO, Reg. Code, San Francisco orchestra leader, has received an offer to bring his dance group to one of the leading hotels of Shanghai, China.

RULES FOR THIRD GOLD CUP AWARD

BEGINNING with the March 27 issue of Radio Digest, the third annual Radio Digest Gold Cup Award opens. All broadcasting station announcers are eligible for entry, either by themselves or by admirers, the only condition being that use be made of the nomination blank which appears on page 2. The Gold Cup Award is for the purpose of determining the world's most popular broadcasting station announcer. To him will be presented a solid, 14-carat gold cup, similar to those given the announcer winners of the 1924 and 1925 awards.

The popularity is determined by means of the balloting of readers of Radio Digest using the ballots appearing on page 2 each week during the period of the contest. The winning announcer will be the one polling the largest number of votes.

Contest Rules

1. The contest opens with the March 27 issue when the first ballot appears, and closes with the last ballot in the August 28 issue. No ballots will be received later than midnight, September 4, 1926. These ballots will be numbered consecutively.

2. Anyone may vote with ballots clipped from Radio Digest. Voting consists in filling in the ballots with the name or nickname of the announcer and his station and mailing to the GOLD CUP AWARD EDITOR, Radio Digest, 510 N. Dearborn St., Chicago.

Bonus Votes

3. When sent singly, each ballot counts for one vote. BONUSES are given your candidate in accordance with the following schedule:

For each four consecutively numbered ballots sent in at one time, a bonus of eight votes will be allowed.

For each eight consecutively numbered ballots, a bonus of twenty votes, etc.

For each twelve consecutively numbered ballots, a bonus of thirty votes, etc.

For a complete series of the consecutively numbered ballots, sent in at one time, a bonus of fifty votes will be allowed.

Prizes Offered

4. The announcer polling the largest number of votes will be declared the world's most popular Radio announcer for 1926 and will be awarded the Radio Digest GOLD CUP. The announcer polling the second largest number of votes will be awarded a beautiful silver loving cup.

5. A beautiful silver loving cup will be awarded to the Canadian announcer receiving the highest vote of all the Canadian announcers entered in the gold cup award contest.

6. In the event of a tie for either of the prizes offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

7. Any question that may arise during the contest will be decided by the **Gold Cup Award Editor**, and his decision will be final.

LISTENERS ASKED TO SELECT MOST DESERVING ANNOUNCER

Prepare to Coronate New "King of the Air"—McNamee in 1925 and George Hay in 1924 Were Victors

For the third successive year the stage is set for the selection of the world's most popular announcer. Once more the victor will be presented with a solid gold cup, the gift of Radio Digest. The Radio Digest third annual Gold Cup Award is under way, beginning with this issue.

Who will prove to be the 1926 champion announcer? Who is it that has proved himself, this year, dearest to the hearts of most members of the Radio audience?

Listeners who remember the 1924 and 1925 Gold Cup Awards have been wondering and asking when they would be given the opportunity of selecting the 1926 champion. Their questions are answered this week.

The great enthusiasm displayed in last year's Gold Cup Award when Graham McNamee won, and the also warmly contested race of 1924 when George Dewey Hay took the golden trophy, is again expected to be overshadowed by the interest when the balloting starts this year.

Purpose of Award

Radio Digest, realizing the strong contact power of the broadcasting announcer, endeavors with the annual Gold Cup Award to determine by an international vote who is the world's champion master of Radio ceremonies. Listeners in every country of the world are invited to participate in the election of the man or woman to be "king" announcer for 1926 and recipient of the Radio Digest Gold Cup.

The annual competition aims not only to pick the favorite announcers, but to raise even higher the already high standards set for announcing. The past two years' awards have proven invaluable in this respect and many Radio personalities have shown marked improvement as a result of the competitions.

Two additional prizes, hitherto not awarded, have been added to the rewards for the winners this year. Both are silver

(Continued on page 8)

1924 AND 1925 GOLD CUP WINNERS

The first two announcers to receive the Radio Digest Gold Cup Award are shown here with the solid gold cup presented last year. Left is George D. Hay, formerly of WMC and WLS, now of WSM, Nashville, who won the first cup in 1924 and was proclaimed world's most popular announcer for that year. Above, Graham McNamee of WEAF, in a pose taken last year just after he had been presented with the 1925 gold cup by Radio Digest. The 1926 cup is shown at the right.

Plan New Cornell Station

ITHACA.—Plans for a 1,000-watt Radio broadcasting station at Cornell university are under way, to rank among the foremost stations in the country. The proposed station will be sponsored by one of the large electric companies, with a gift said to be at least $15,000 for installation.

Scouts Master Radio Tricks

PRACTICALLY All of 800,000 Boy Members Take Keen Interest in Receiving and Sending Skill— Award Merit Badges

By MARSHAL TAYLOR

Mr. Martin calls attention to the Radio Merit Badge awarded to members of the organization who show special enterprise and ability in the science of Radio technique.

ROBINS are back, buds are swelling on the trees, frogs are singing, faint vernal odors tinge the vagrant breezes. Up through vibrant earth mold in the woodlands violets and adder tongues are pushing their tender heads to the warm spring sunshine. Happy hiking days are here, the happiest and most invigorating of all the seasons. And oh for the Boy Scouts with tingling sinews and eager feet tramping on the spongy moss, clambering over the wet stones and skipping through the brooklets of bubbling springs!

Come on, boys, we're off! Hop into the old flivver and away we go to Swallow Cliff and the forest preserve. Let's take supplies for Saturday, Sunday and breakfast on Monday morning at sunrise. What have we? Here is a slab of bacon. Run down to the delicatessen for some weenies—those fat kind—and some buns, hot dogs, Oh Boy! Don't forget to bring half a dozen cans of pork and beans. What else? Ah, the Radio outfits! By all means! What Boy Scout camp is complete these days without Radio—sending and receiving?

Gather around here, Scouts. Which one of you on this trip has an amateur's license? Mickey Meyers—good for you Mickey. Get your stuff together and we'll make a place for it in the back. Too bad you can't get away this time, Bob, but you and Mickey fix it up to signal about six tonight. You will be home from the dentist's by then and we'll tell you what we are doing. What do you say?

Morrell and Allen can bring the big super-het in the other fliv and we'll get the music when the stars are out.

All right! Let's go.

* * * *

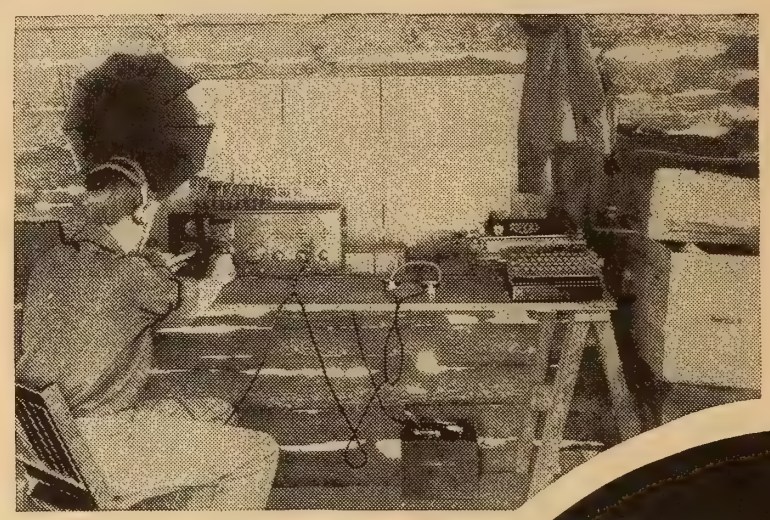
"A RECENT questionnaire sent to Boy Scouts throughout the country," writes E. S. Martin, secretary of the editorial board in New York, "revealed that 95 per cent of them either owned Radios or wanted to. The membership is nearly 800,000, a solid unit working together.

"In Boy Scout camps, the use of the Radio and the interest in it are practically universal, and have been for some time; a Boy Scout troop not having a Radio outfit is a rare exception. This is evident even in the winter camps where six hundred Boy Scouts camped during the holidays at Interstate Park of New York and New Jersey. Radio sets were almost as common as snowshoes and skis."

Here is what a Boy Scout must do to win one of those badges:

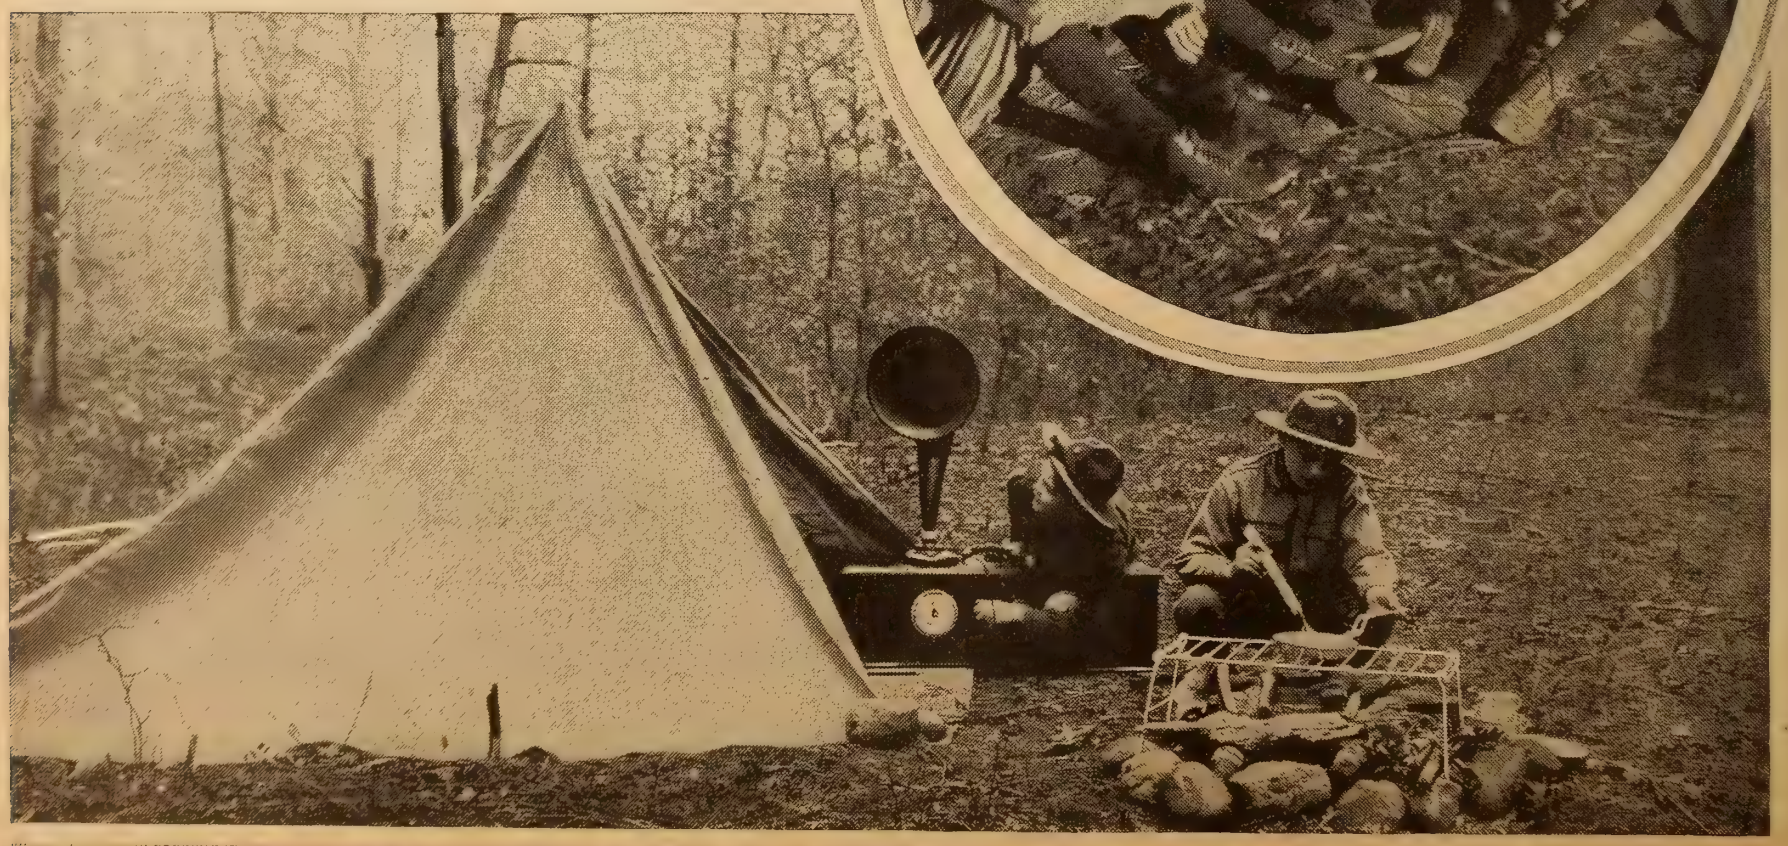
1. Receive and send correctly not less than ten words per minute.
2. (a) Explain how to get in communication with another station.
   (b) Explain how to send a message in proper form.
3. Tell in own words the principal laws and regulations regarding Radio communication.
4. Demonstrate at least ten of the radiogram abbreviations (Q signals).
5. (a) Explain the purpose of a detector and adjust a crystal detector, using a buzzer to test its adjustment.
   (b) Name two minerals used in crystal detectors.
6. Draw from memory, using correct symbols, a hook-up diagram of a complete vacuum tube transmitting apparatus, including generator or batteries, vacuum tube, condenser, tuning helix key, antenna, ground, and the necessary protective devices. Describe each part of the apparatus and explain its function. Explain how to use a wave meter in connection with this transmitting apparatus to secure the proper wave length of radiation.

(*Continued on page 8*)



Scout Fred Clark of Chicago in contact with his home town through a short wave receiving set in Boy Scout camp at Owasippi, Whitehall, Michigan.

Boy Scouts of the Brooklyn Edison company (right) assembled a Radio set while at camp near Lincoln Park, N. J., and spent the evening listening in on broadcast programs. Below are two New York Scouts in their week-end camp near Swallow Cliff in a forest preserve—a two-hour flivver ride from their home.



Twin Cities Thrilled by "SOS"

Portal Players Put Realism in Radio

Mystery Drama at Station WCCO. Mythical Station Causes Furore. Many World-Famous Stage Celebrities Make Debut in Minnesota

By HAROLD P. BROWN

WHEN Longfellow wrote the classic legend of Hiawatha and Minnehaha, he left out one of the most ancient and honorable pleasantries about the Twin Cities, both of which seem to have a reasonable claim to Minnehaha Falls. The famous poet forgot to remember that it was said of old when these two cities grow until they merge into one they shall take the name of "Minnehaha" with Minneapolis taking the "Minne" and St. Paul taking the ———.

Have a care there, Hari Singh! I did not say it! Stand back, I tell you! I saw the cruel glitter in your eye as you thrust your head from behind that curtain across the page. What is that clenched in your hand behind those velvet folds —Ah! Ha!

But Hari Singh does not move. Nor should he. He is one of the famous Portal Players of the Gold Medal Station WCCO, and little cares he for such moss-grown crudities as this mirthless jibe. Hari Singh as he crouches there, motionless, is doubtless listening to a tap-tap-tap in the hallway of the old Turner manse where Lawyer Ardwyn has arranged for the late Peleg Turner to try to speak to his relatives from his grave through a Radio loudspeaker.

These are the WCCO players in the characters of the first great Radio mystery serial, "A Step On the Stairs."

THEY are typical of the brilliance and capability of this big broadcasting station of the Northwest. If ever the twain shall meet—St. Paul and Minneapolis—at a common municipal council, Gold Medal Station WCCO will deserve its share of credit for the unity. Never before was there such a powerful bond between them. Figuratively the station towers stand respectively in the two separate cities, one on the Union station in St. Paul and the other on the Nicollet Hotel in Minneapolis. And from the long span of this theoretical antenna WCCO speaks as one to the whole world. Its motto is "Service to the Northwest."

There is a world of energy and purpose in this station. The staff immediately seized upon the new idea "A Step On the Stairs" as an important phase of Radio entertainment. Going about the business at once of making the most of the opportunity, Mr. H. A. Bellows, manager of the station, and Miss Helen R. Fish, director of the players, arranged for a dress rehearsal and a stage setting to correspond as nearly as possible with the scene described in the story. Each character was chosen because of his or her special talents and understanding of the theme. Each one studied his part seriously and attentively to get over to the unseen audience the utmost intended by the author.

* * *

HOW well the ensemble succeeded is told in a letter by E. H. Gammons, publicity manager of the station. He wrote as follows:

"After listening to two rehearsals of the first episode of 'A Step On the Stairs' last night, I am a trifle shaky today. Although I was entirely familiar with the script, knowing it almost line for line, I must admit that when I sat in the reception room and listened to them monitor the play last night, the cold shivers ran up and down my spine in a way that they haven't for many years, not even during the coldest Minnesota weather. I don't believe Crawford, our colored porter, who listened in with me, will ever be the same color again. We go on at 10:05 tonight, and, unless I am badly mistaken, we have a knockout."

That speaks well for both the WCCO Portal Players, their interpretation, and the scheme of the play. Apparently the presentation fulfilled his entire expectations for the next day he wrote again. There were the usual letters and telephone calls of appreciation but—

"The most amusing thing in connection with the broadcast," said Mr. Gammons, "was that hardly had we completed it when telephone calls began to come in complaining that some station, FYX, had come on the air right on our wave length at the critical moment of the play and blanketed us. In fact one St. Paul listener was so excited about it that he didn't get the call letters and accused one of the small 50-watt stations in the neighborhood of having come on the air (*Continued on page 16*)

Sinister and brooding are the eyes of Hari Singh, portrayed by Vernon C. Miller (above) at WCCO. Joseph Le Vander (right) is the ghost of Peleg Turner and speaks with sepulchral tones.

By careful rehearsing Helen R. Fish (top), director, made "A Step On the Stairs" seem real to WCCO listeners. Cousin William (J. C. Nelson) and Aunt Helen (Katherine Jefferies) above. Portal Players, listening (right).

"I love you, marry me," insisted Henry Graves, a mysterious guest in the haunted home of the Turners, as he whispered to Mary Williams. Graves is played by Paul Thur (above) and Mary Williams is played by Florence Murphy.

SECRETS OF SALAD BY BETTY CROCKER

MANY COMBINATIONS GIVE LIMITLESS VARIETY

Numerous Tasty Dishes May Be Made by Blending of Different Colors and Flavors

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, ESD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

I AM sure that our lesson today is a popular one. In fact, I do not believe there is a more popular subject in the whole realm of cookery than salad. We are always looking for new salads, and the nice part of it is, we usually find them, because the number of possible combinations is practically limitless. Since we make salads of fruits, vegetables, meats, nuts, cheese, eggs and gelatine, it should be easy to have practically a different salad every day of the year. However, that is unnecessary as we prefer to serve our favorite salads over and over again.

Blend Colors and Flavors

I sometimes think we have gone too far in working out new salad combinations, as some of them are rather weird. Often they present a beautiful appearance and yet are unappetizing. Food should be attractive to the eye, and yet by no means should it offend the stomach. An over-decorated salad looks fussy and stuffy, just like an over-decorated room or an over-dressed woman. If you are a real artist, you can combine colors and flavors in a salad as an artist combines colors on a canvas. The different parts of the salad should blend together as tones of music to make one harmonious whole. Be careful that you do not allow a false note to creep in, either as to color or flavor. Salad material should always be crisp and fresh. A wilted salad presents a most discouraged appearance, and is decidedly unappetizing.

Food Values Vary

The food value of a salad varies greatly, according to the ingredients used. A substantial salad may serve as the main dish for lunch or supper. The more simple salads although not so substantial are equally valuable for the acids, minerals, and vitamins they supply to the body. At this time of the year, it is especially important that we serve salads if we would avoid bitter spring tonics later on. Fruit and vegetables are most important in our winter diet. During the cold months, it is not always easy or even possible to get fresh green salad foods, but there are so many possibilities for winter

(Continued on page 17)

INDIVIDUALIZING THE FASHIONS HER WORK

"Georgette"

INDIVIDUALIZED fashions is the interesting topic and life study of "Georgette," known to feminine readers of ninety daily newspapers and several women's magazines by that name or as Florence Vincent George. Besides her great audience of the daily press, Miss George is now broadcasting over the Radio through WEBH, Edgewater Beach hotel-Herald and Examiner station in Chicago. Here she is heard every Monday and Thursday at 11:30 a. m. Central time.

"Georgette" is a style dictator, specializing in presenting original fashions for all the different types of figures and at the Chicago office, over 400 letters a day asking "what to wear" are answered personally by Miss George.

SHORT WAVES

By Marcella

Miss Blarney and another, indeed, several others, want full details about Gayle V. Grubb, or "Gloomy Gus," of Nebraska Buick's KFAB at Lincoln, Nebr. Only knowing that the fraternity pin he happens to be wearing is Sigma Phi Epsilon, I dropped him a note. He answered so well, I shall not retouch his letter:

"Now to begin with your old man here, "Gloomy Gus," likes the girls, especially the little girls, and I have quite a correspondence with little kids all over the country. I might tell you that my eyes are blue except when my wife hits me, and then they are black. What hair I have left is sort of a mahogany brown. After a heavy meal I weigh about 150 pounds and I stick up in the air about 5 feet, 11 inches.

"As you can gain by the foregoing, I am married, have one child—a girl—going to enter her at Atlantic City in about 15 years. I am not a bit ashamed to tell you my age is a good ripe 30.

"As to what I like and dislike, I am a hand for poetry. I spend most of my spare time writing little foolish songs which are one feature of this station. With Wendell Hall, you know, I wrote 'I Don't think So,' and my little song on 'Etiquette' will be published next week.

"Regarding my dislikes, I hate persimmons and alum. That's all but in the event you would like to know something about my clothes, I might say that next week the suit I have on is mine, having squared up with the tailor. Also have my own teeth and wear size 10 shoes."

* *

I regret to have sad news for "Pearl" and "F.T.M." who inquired about Frank Morris, formerly one of the "Boss' Own" entertainers at WTAS, Elgin, now WLIB. Frank died about a year ago from a chronic illness.

* *

Saw Phillips Carlin of WEAF and he admits that he is happily married. "Phil" is about 5 feet, 7 inches tall and of generous proportions which total 192 pounds ringside. His hair is black; eyes, brown. He likes fishing and golf. Invite him out some time. His dislikes are many. F'rinstance, a number of people call him "cute," that always goes against his grain. Another thing he abhors is going into a place and having someone say: "Oh, is he the announcer?" He has even been accused of being the Silver Masked Tenor—a distinction that he cannot claim. No children. He is exceptionally good looking.

* *

The "Silver Masked Tenor" is of average height, about 5 feet, 6 inches tall and weighs in the neighborhood of 180 pounds. His hair is black and his eyes are—well, look at them behind the mask, they're, oh, girls, they're a baby blue! And the mask certainly does show them off to good advantage. Someone accused him of being with the Royal Typewriter orchestra. He isn't! He is very much married and has the cutest little boy eight months old. He dislikes people talking about the Silver Masked Tenor in his presence. He is quite a song writer, and recently finished a song that he dedicated to his wife. It's called "Maureen Mavoreen," and it has a nice air to it—one that you would like him to sing.

New Women's Program Is Feature of WHAD

Milwaukee Station Adds Home Service to Aid Housewives

MILWAUKEE.—In line with the increasing popularity of Radio among women, WHAD has recently added a new service. Planning a dinner, serving a new salad for supper, or arranging a party menu is an easy matter when all the housewife need do is tune in and take notes on the suggestions that Mrs. Ella Liner Lambert broadcasts on Thursday mornings.

Her talks include such subjects as "Better Breakfasts," "A Valentine Luncheon," "Meatless Menus," "Cakes Without Shortening," "Dinners from Left Overs," "Ways of Cooking Inexpensive Cuts of Meat," "Sunday Night Suppers," and other information useful to housewives in the preparation of daily and party menus.

The recipes are given slowly enough so that all of the listeners may jot them down. Mrs. Lambert also answers questions which Radio listeners ask by mail.

WOMEN'S PROGRAMS INDEX

Saturday, March 27

Eastern	Central	Mountain	Pacific
9:30 a. m.	8:30 a. m.	7:30 a. m.	6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.

11	10	9	8

WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.

12 n.	11	10	9

WGN (302.8m-990kc) Household hints.
WQJ (447.5m-670kc) Home Economics program; "Stories about Famous Pictures," Margery Currey.

12:30 p. m.	11:30	10:30	9:30

WGN (302.8m-990kc) Discussion of fashions.

12:35	11:35	10:35	9:35

KYW (535.4m-560kc) Table talk.

1	12 n.	11	10

KGW (491.5m-610kc) Household helps, shopping guide.
KMA (252m-1190kc) Domestic science topics.

4	3 p. m.	2 p. m.	1 p. m.

KJR (384.4m-780kc) Tonight's dinner.

6:30	5:30	4:30	3:30

CNRV (291.1m-1080kc) Women's talks.

Monday, March 29

Eastern	Central	Mountain	Pacific
9:30 a. m.	8:30 a. m.	7:30 a. m.	6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.

10	9	8	7

WJZ (454.3m-660kc) Women's hour.
WRC (468.5m-640kc) Women's hour.
WTAG (268m-1120kc) Talk, Marjorie Woodman, nurse.

10:50	9:50	8:50	7:50

WMC (499.7m-600kc) Home economics discussion, Miss Kitty.

11	10	9	8

WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.
WNYC (526m-570kc) Women's program.
WTIC (475.9m-630kc) "Professional Candy-Making," Dorit Weigert.

11:15	10:15	9:15	8:15

WTIC (475.9m-630kc) "Canning—Why—What and How," Olea M. Sands.

11:30	10:45	9:30	8:30

KFAB (370.7m-880kc) "Difference in Dresses."
WTIC (475.9m-630kc) Housewife's forum.

11:45	10:45	9:45	8:45

WDAF (365.6m-880kc, WHT (399.8m-750kc, WJAR (305.9m-980kc) Home service talk, Betty Crocker.

12	11	10	9

WGN (302.8m-990kc) Household hints.
WQJ (447.5m-670kc) Home Economics program. "Dried and Canned Tropical Fruits," Maud Jacobs. "Specialty Baking Talk," Cleve Carney.

12:15 p. m.	11:15	10:15	9:15

KYW (535.4m-560kc) Meat talk.

12:30	11:30	10:30	9:30

WEBH (370.2m-810kc) Fashion and household talks.

12:35	11:35	10:35	9:35

KYW (535.4m-560kc) Table talk.

2:30	1:30 p. m.	12:30 p. m.	11:30

KFNF (263m-1140kc) Mothers' hour.
WGY (379.5m-790kc) Cooking lesson, Jessie Lane. "The Trend of Spring Hats," Charlotte Weiss.

3	2	1	12 n.

WCCO (416.4m-720kc) Women's hour.
WSOE (246m-1220kc) Cooking chats.

4	3	2	1 p. m.

WIP (508.2m-590kc) Market hints for housewives.
WOC (483.6m-620kc) Home management schedule, Aunt Jane.
WQJ (447.5m-670kc) "Cookie Variations," Helen Downing. "Ornamental Bushes," Adam Schilling.

5	4	3	2

KJR (384.4m-780kc) Home helps.

8:45 p. m.	7:45 p. m.	6:45 p. m.	5:45 p. m.

KSAC (299.8m-1000kc) Girls Room Improvement," Harriet King. "Homemaking as a Profession," Helen Goodspeed.

12:15	11:15	10:15	9:15

KGO (361.2m-830kc) "Character Training in the Home," J. Breitweiser.

Tuesday, March 30

Eastern	Central	Mountain	Pacific
9:30 a. m.	8:30 a. m.	7:30 a. m.	6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.

10	9	8	7

KDKA (309.1m-970kc) Domestic Science. Arts for the Housewife.
WIP (508.2m-590kc) Menu, Anna Scott.
WJZ (454.3m-660kc) Women's hour.
WRC (468.5m-640kc) Women's hour.

10:45	9:45	8:45	7:45

WTAG (268m-1120kc) Talks to Mothers, Rosebelle Jacobus.

11	10	9	8

WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.
WMCA (340.7m-880kc) Home makers' hour.

11:30	10:30	9:30	8:30

WOI (270m-1110kc) "Foods to Make Strong Teeth," Mabel Nelson. "Why Examine Children's Teeth," Lulu Lancaster.

12 n.	11	10	9

WGN (302.8m-990kc) Household hints.
WQJ (447.5m-670kc) "Personal Taste," Lillian Russell. "The Effect of Diseased Baby Teeth on the Health of the Child," Emil Alson. Pep exercises.

12:30	11:30	10:30	9:30

WEBH (370.2m-810kc) Fashion and household talks.

1	12 n.	11	10

KPO (428.3m-700kc) Domestic science talk.

2	1 p. m.	12 n.	11

WGY (379.5m-790kc) "Making a Garden," Mrs. Robert Palmer.

3:15	2:15	1:15 p. m.	12:15 p. m.

WHO (526m-570kc) Recipes, household hints.

4	3	2	1

WIP (508.2m-590kc) Menu talk.
WOC (483.6m-620kc) Home management schedule.
WQJ (477.5m-670kc) "Caramel Rolls," Helen Downing. "The Influence of Games on Children," Mrs. H. Carrier.

4:30	3:30	2:30	1:30

WLIT (394.5m-760kc) Household helps and hints.

5	4	3	2

KJR (384.4m-780kc) Home helps.

5:30	4:30	3:30	2:30

KOA (322.4m-930kc) Housewives matinee.

6	5	4	3

KOA (322.4m-930kc) Culinary hints, Clara Hoover.

6:15	5:15	4:15	3:15

KOA (322.4m-930kc) Fashion review, Sally Dee.

7	6	5	4

KFOA (454.3m-660kc) Today's recipe.

8	7	6	5

WPG (299.8m-1000kc) Fashion Flashes.

8:30	7:30	6:30	5:30

KGO (361.2m-830kc) As a Woman Thinketh.

Wednesday, March 31

Eastern	Central	Mountain	Pacific
9:30 a. m.	8:30 a. m.	7:30 a. m.	6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.

10	9	8	7

WIP (508.2m-590kc) Menu.
WJZ (454.3m-660kc) Women's hour.
WRC (468.5m-640kc) Women's hour.

10:45	9:45	8:45	7:45

WEAF (491.5m-610kc) Home service talk, Betty Crocker.
WFI (394.5m-760kc) Gold Medal Service talk, Betty Crocker.
WTAG (268m-1120kc) Talk to Housewives, Mrs. Lydia Flanders.

11 a. m.	10 a. m.	9 a. m.	8 a. m.

a STEP ON the STAIRS

By ROBERT J. CASEY

Radio Dramatization by FRED SMITH

Illustrations by HILMER C. OLSON

"I have a suggestion," snarled Henry Graves who was waiting at the hall door to help Hari Singh remove the unconscious man to an upper room.

Synopsis of Preceding Chapters

IN THE first place, who killed Jeremiah Turner? Here is a chronicle of the weird and mysterious event that led up to the present installment of "A Step On the Stairs."

Jeremiah Turner was found dead, a bullet hole through his head, in the old Turner manse. His body was carried through the front door, sealed except in time of death. His brother, Peleg, sought solution of crime. Peleg's body soon afterward followed through the door of death, a tradition maintained in the old manse for one hundred years. Relatives were summoned by Peleg's will to midnight seance in room where Jeremiah was killed. Mysterious stranger arrives from bay and disappears on way to house where he told caretaker he had been summoned. John Carton, a favorite nephew known to have been in the vicinity the night of the murder, is missing. He had been seen by Mary Williams, his sweetheart and distant cousin, talking to Hazel Stanton, another relative, outside the house at the time of the murder. Guests, admitted by Hari Singh, East Indian servant, sit in darkened hunt-room waiting for Peleg's voice from the grave, through loud speaker. At the critical moment Station FYX interferes. A scream and pistol shot are heard from the station. One of the engineers is found to have been shot according to report of Tolliver, one of the cousins who had been sent to investigate.

Ardwyn is about to read a letter Tolliver brought from the shooting affray and which he said had been dropped by the gun man. Mary Williams sighs, faints, knocks candle from table, plunging room in darkness. Ardwyn exclaims and says some woman bit him on the wrist. When lights are restored, Mary is still in faint, but letter is gone. Milford Jones, "the bearded pirate" is also found missing and Aunt Helen and Cousin William insist the front door—the door of death—has been opened. All had heard the mysterious steps on the stairs, coming and going and an SOS distress signal. Ardwyn advises all to leave room for refreshments. Mary remains. Henry Graves returns to talk to her, urges his suit for her hand. She repulses him. He insinuates she has a guilty knowledge and was not in her seat when room was in darkness and letter disappeared. He leaves and Ardwyn enters. He shows her locket tangled on his chain when woman bit him. She admits ownership, but says some other person must have used it to divert suspicion.

Mary convinces Ardwyn of her sincerity when she points to shoes left by a strange intruder and suggests that he will return for them. Ardwyn remains with her. The light flickers out. The door opens. Mary screams that she felt a corpse. Ardwyn crashes to the floor, a gash in his head. Hari Singh identifies scarf seized from "corpse" by Miss Williams as one he had put on Peleg Turner at time of his burial.

Hazel Stanton helps bring Mary back to consciousness and Ardwyn recovers from his daze. Suggesting that Mary needs air and quiet, he advises the others to return to the other room. Then he leaves to find her a stimulant. Mary hears a step on the stairs. A man enters the room. It is John Carton, her fiancee. She is amazed, as he is supposed to be in hiding. He tells her he is there to prevent another murder planned for the occasion. He denies that he knows Hazel Stanton. Voices are heard. He thinks he is trapped. Hari Singh enters and secretly lets him out of side door. Before he can return, others are in the room and ask about the voices heard talking with Mary Williams. Hari Singh himself answers, calling for help. He is dragging a body into the house from without. Whose was the body? Read about it in the following installment. Radio Digest will supply reprints of the past four installments for twenty-five cents on application to the Mystery Story Editor.

THE STORY CONTINUES

CHAPTER NINE

The War Council

"WHO is it?" wailed Aunt Helen Holmes. "Won't somebody please look . . . won't somebody?"

There were other whimpered queries from the crowd whose terror was fast becoming voiceless. And then, suddenly, boomed the jarring announcement of Henry Graves.

"Why, it's the bearded pirate," he shouted almost joyously. "Our friend, Milford Jones, who left us so suddenly."

"Yes, that's his name, Milford Jones, I remember now," contributed Hari Singh.

"The man who went out through the front door," continued Hari Singh. "And his skull seems to be crushed."

No one was paying any attention to Mary Williams. Henry Grave's cry had stopped her in the midst of an eerie laugh. Now she stood staring through the crowd at the still figure on the floor of the hall.

"Milford Jones," she repeated as if attempting to convince herself. . . . "Oh, thank God. Thank God!"

They carried the body of Milford Jones into the hallway and laid him out on a rug where the light from the library fell across his face.

"He is not dead," diagnosed Hari Singh. "But he is very far gone. Would the Sahib Ardwyn suggest that I telephone for a doctor?"

"Yes," agreed Ardwyn. "Unfortunately it will take a long time for a doctor to get here. What makes you think his skull is crushed?"

"Look here," Hari Singh suggested. "There is a deep ragged gash in his forehead—no bullet or knife ever caused that."

"Telephone for the state police while you're about it, then. . . . And get Jones upstairs to bed and under covers. He must be frozen in addition to everything else.

"And now, all of you ladies and gentlemen, be seated once more and we shall see if we can get to the bottom of this."

"I don't want to go into that room again," wailed Aunt Helen from the hallway. "There's death in it and you can't see it."

"I am free to accept suggestions for a better council chamber, Mrs. Holmes," Ardwyn told her. "We can't get out of the house until daylight anyway and so long as we're in here one spot is quite as safe as another."

The woman sighed throatily.

"Oh very well," she said. "It's not that I'm afraid of anything. My conscience is clear."

"PLEASE be seated, everybody," advised Ardwyn. "The state of our consciences will not excuse us from the work we have at hand." The guests moved reluctantly to their chairs and huddled back in silence.

"Now then," began Ardwyn from his old place at the head of the table. "We shall make some arrangements for our own protection. . . ." He paused as the voice of Hari Singh, telephoning to the police filtered across the hall.

"No . . . Not dead . . . Dying . . . Beaten on the head . . . Yes, come at once and bring a doctor . . . Bring . . . Hello . . . Hello." And then in a louder more irritable tone . . . "They have cut us off. I think the wire has been blown down."

"We shall be largely on our own resources here until morning," Ardwyn went on, "And it might be well for us to do what should have been done earlier in the evening—learn more about one another . . . Does anybody in this room or in sound of my voice know what happened to Milford Jones?"

"I have a suggestion," snarled Henry Graves who was waiting at the hall door to help Hari Singh remove the unconscious man to an upper room.

"Yes, Mr. Graves," prompted Ardwyn.

"I think you might make a good beginning and save some time if you were to ask Miss Williams just where she fits in this picture. I heard her talking to someone in this room a moment ago when the rest of us were in the library. I don't think she was talking to herself."

"I heard her, too," declared Aunt Helen. "I heard her voice and I was sure I heard a man's voice . . . They were very low but I have good ears."

The company, seemingly glad of a target, any target, turned its combined attention on the girl. She paled perceptibly.

"I-I-don't remember," she said. "I stayed here because my nerves were too upset for me to move . . . But I don't remember any conversation . . . Maybe you heard me talking with Mr. Ardwyn."

"Mr. Ardwyn was in the kitchen looking for something," pursued Aunt Helen. "There was no trouble at all making out his voice."

The situation was tense for Mary Williams and she showed plainly that she felt it.

"I—really I—" she stopped helplessly and then a new factor entered the scene. A tall figure brushed by Henry Graves and took attention away from the girl with a single word.

"Just who are you, anyway?" demanded Miss Williams with sudden directness. "I can't remember ever having seen you inside this house before."

"NO," HE said. "Miss Williams was not talking with the Sahib Ardwyn."

No one noticed the appeal in the girl's eyes as she turned toward him or the trembling of her hands as she clutched the end of the table.

"God help us," she prayed. But that too went unnoticed for her voice was only a thin echo.

"The Sitt was not talking with the Sahib Ardwyn," repeated Hari Singh with much emphasis. "She was talking to me, Hari Singh. She told me she felt a draft and thought that the side door might have blown open. I went there and tried the door. It was closed but unlocked. I opened it and looked out and so found Mr. Jones."

"There's something very unusual about that," declared Aunt Helen. "I heard that voice and it certainly didn't sound like yours."

"I am sorry, Madame," apologized the Indian. "I tried so hard to make it sound like my own and if it sounded like anything else I shall be desolated."

"One moment, Hari Singh," came an unexpected interruption. The eyes of the crowd shifted back once more toward Mary Williams who once more had risen in her place. She was still pale, still nervous, but her voice had a sharp, vibrant quality in it that showed she was no longer afraid.

"Yes, Miss Williams," replied Hari Singh respectfully. "You wish to speak to me?"

"Not to you, Hari Singh," the girl said evenly. "I wish to speak to Aunt Helen Holmes. I should like to know by what right and for what purpose she has been casting innuendoes at me ever since we sat down to dinner. Mr. Ardwyn has suggested that the time has come for explanations. I can see no better place to begin them than right here and no better person to start them than Mrs. Holmes."

"I never heard such impertinence," declared Aunt Helen. "Do I understand you to be accusing me of—well what is it you're accusin' me of?"

"Nothing," stated Mary Williams evenly. "I'm not speaking to you any more than to the rest. All of you have fixed on me to be the butt of your charges. I want to know why."

"It's only that you're so aloof, my dear," broke in Hazel Stanton with poisonous sweetness. "It is only natural that a crowd with nerves jaded as ours have been should look with suspicion on the outsider. . . . You know you Did knock over the candle, and you Did stay here when we went into the library, and you Were talking with someone in here—even if it was Hari Singh as he so gallantly confesses."

"JUST who are you, anyway?" demanded Miss Williams with sudden directness. "If we are going to get to the bottom of this affair we might find out first something of our reasons for being here and I can't remember ever having seen you inside this house before." Hazel Stanton moved perceptibly as the girl emphasized the word "inside."

"I am Hazel Stanton," she said. "I live in Portsmouth. I am the daughter

of a second cousin of Peleg Turner. And I do not concede your right to cross examine me."

"What are you doing in this house?" pursued Miss Williams relentlessly.

"I came here for the same purpose you did," declared Miss Stanton, flushing and paling by turns. "I was invited here."

"Were you invited here the night Jeremiah Turner was murdered?"

"Mr. Ardwyn," appealed the harrassed Hazel, "I demand your protection. This woman has no right to question me, she has no right to cloud the issue by directing suspicion toward others merely because it has been directed toward her. Everyone here tonight—Miss Williams excepted—has remained with the company."

"No, Miss Stanton," came the calm voice of Hari Singh. "The Sitt forgets one other who left the company. We need not count Sahib Jones for he is beyond explanation. The Sitt, if I may remind her, was also away from the others for a brief time. . . . When she left the house to take the air in the blizzard. She will recall no doubt that it was she who opened the side door and that it was she who brushed back almost unnoticed into the house when I was picking up the body of Sahib Jones."

CHAPTER TEN

Hark! From the Tomb

MISS STANTON parted her red lips to speak but was silent. Her pallid skin was deathlike in the glow of the candle and her eyes, wide open now and frightened, burned angrily in shadowy recesses.

"What if I did go outside?" she demanded. "Is it likely that I could ever be a match physically for a man of the stature and strength of Milford Jones?"

"That is beside the point," broke in Ardwyn. "Let us be fair in this thing. We were accusing Miss Williams of something—we do not seem to be agreed on the matter of the indictment—and we were basing our accusations on the fact that she did not display social instincts. What is sauce for the goose. . . ." He paused.

"That is different," the Stanton girl countered warmly. "Everyone knows that I was in the library until just a moment before we came in here. What if I did wander out onto the front porch? I was not gone long enough to bite anyone's wrist or fracture anyone's skull. Perhaps I went out there merely in an attempt to find out why Hari Singh's voice had seemed so different when he was talking with Miss Williams . . . You, as a lawyer, should know, Mr. Ardwyn, that there is no shred of evidence by which I can possibly be suspected of anything except monumental foolishness in coming here at all."

"We shall come to no purpose in arguing about it, Miss Stanton," the lawyer said. "I think it is plain that none of us could have had a hand in the assault on Mr. Jones.

"The police will be here some time before morning and they may have the task of finding out just who is guilty of what. In the meantime we are losing sight of the mission that brought us here."

"We couldn't well help it, you know," broke in Cousin William. "We were a bit distracted. Yes! Yes!"

"I shall admit that, Mr. Caryl. I shall admit that the causes for distraction are not yet removed. But I cannot forget that as Mr. Turner's representative on this earth I called you here tonight for something more serious than bickering about voices in the dark. Compose yourselves, ladies and gentlemen, and at least until the police come, let us try to remember that we are Mr. Turner's guests, just as if he were alive."

"I don't enjoy bein' a dead man's guest," declared Aunt Helen Holmes. "My poor husband, dead and gone these twenty years, would never have permitted me to stay here this long compromisin' my reputation with men that disappear out of locked rooms and get their skulls crushed."

"IT IS not too much to hope that the trouble has ceased for the night," Ardwyn answered her impertubably. "At any rate, we cannot sit around doing nothing and there is still a chance that Peleg Turner may be able to bring to us the help that he hoped to bring when he was dying. But I shall leave it entirely to your own judgment, ladies and gentlemen. Shall we go on with this experiment?"

"Suits me," voted Tolliver affably. "I'm immune. My hair is standing up so straight now that nothing can make it any straighter and I've heard so many shrieks in the night that a few more wouldn't make me bat an eye. . . . Me, I'm all for goin' on with the show."

"I agree with Mr. Tolliver," put in Henry Graves. "I don't think anything will come of it. But I believe that we can force some of our friends here out into the open if we go ahead. Somebody was going a long way to stop this affair and I'd like to know how."

"I think you are stating the case a little baldly," commented Ardwyn. "But at any rate you see the necessity, or perhaps I should say the advisability, of continuing. . . . And the rest of you ladies and gentlemen?"

A grumbled assent that seemed virtually unanimous greeted his query.

"Very well, then," he decided. "We shall renew our attempt to communicate with Mr. Turner. Let us begin by fixing in our minds the cause of his strange request that we come here:

"Jeremiah Turner was murdered in this very room. John Carton, favorite nephew of the Turners, disappeared at the time.

"Peleg Turner came home here to take charge of his property and died almost immediately under circumstances that all of us who were close to him have believed to be peculiar, if not mysterious.

"We gathered here in this room at his invitation as expressed in the letter that he wrote to me just before his death to listen as he attempted to communicate with us over the Radio.

"Now I should like to call to your attention that nothing that has happened tonight has changed the original situation. Someone opened the barred front door that has never been used except to provide an exit for the coffins of the lords of the manor in death. Someone precipitated a riot in the broadcasting station to which our Radio receiver was tuned at midnight. Someone dropped a letter, presumably incriminating, on the floor of the Station FYX power house. Someone, presumably interested in that letter, bit my hand in the dark and stole the evidence. Milford Jones got out of this room through locked doors and barred windows and was found with his skull crushed. But these events, nerve racking in themselves, have contributed nothing to the solution of the mystery that brought the curse on this house. It is my suggestion that we put out the light, and sit here as we sat before, holding hands if necessary to prevent our nerves playing tricks on us, and listen for the promised word from Peleg Turner."

A WAIL that seemed to come from nowhere made itself heard over the minor noises of the storm.

"What was that?" queried Aunt Helen tremulously.

"I have seen from an upstairs window," came a call from Hari Singh. "There is a boat out on the bay—a steamship. She seems to be in trouble. . . . Her lights have gone out."

"Sit quiet, everybody," commanded Ardwyn. "There is nothing we can do. If the boat has put into the bay there is a coast guard station near her."

There was a murmur of dissension.

"The Sahib speaks true," stated Hari Singh. "Her lights have gone out. We could not see her if we wished."

"We have a duty to perform right here," repeated Ardwyn. "A duty to the man whose dying wish brought us here. And it is bitter cold out there in the storm. . . ."

"Suits me," acquiesced Tolliver.

"Put out the light, then," ordered Ardwyn. "Hari Singh will lock the hall door."

"Going out anyway," said Tolliver, clapping the fluttering wick between his palms. "There it's out—and, oh boy, how I miss it."

"Be quiet now," suggested Ardwyn. "I have switched on the Radio."

From the outer distance came another wail of the ship's siren. The ensuing silence was awesome by contrast—terrible in its completeness.

"Why can't we have a light?" wailed Aunt Helen. "It's all just as it was before. Something terrible is going to happen."

"Quiet," muttered Ardwyn. "There is a voice on the Radio. I can hear the generators at FYX."

"I hear something else," moaned a woman. "Listen. . . . We heard it before. . . . The step on the stairs. . . ."

It was plainly audible as the frightened men and women sat breathless in the dark—the creaking of stairs and the tapping sound—three short taps—three widely spaced taps—three short taps.

"What can that be?" came the awed voice of Mary Williams. "Who is it walks up and down those stairs?"

"THIS is Station FYX," boomed the Radio announcer in startling incongruity. "Miss Miriam Hartley will next sing Tosti's 'Good Bye'."

And in spite of themselves, the eleven listened though the creaking of the stairs came as a weird accompaniment to the singer and the wail of the siren broke frequently through the wild organ obbligato of the storm.

. . . "Good bye summer, good bye, good bye. . . ."

The singer broke off in the midst of a phrase and then came the strained tones of the announcer.

"Station FYX will stand by for a few minutes," he said. "There is a ship in trouble on Pelican Bay."

From the outer hall echoed the creaking stairs and the regularly spaced taps. . . . three dots, three dashes, three dots. . . . SOS . . . an incomprehensible message to be lost in a moment as the Radio set picked up the harmonic of a ship's wireless . . . "SOS"—a blatant, whining message that brought terror even to those who could not read it.

"SOS," translated the voice of Tolliver.

"SOS," telegraphed the unseen operator aboard the ship out there on the moaning bay.

And then the hellish symphony of the Radio faded out and a man's voice came slowly, clearly, distinctly through the noises of atmospheric disturbance.

"MY FRIENDS, I bring you a message," said the voice, and a shriek answered him.

"Peleg Turner," screamed a woman in a voice that terror had distorted beyond identification. "Peleg Turner!"

"Do not be alarmed," came the hollow tones from the loud speaker as if the scream of fright had been heard beyond the grave. . . . "I am happy here and I wish no harm to any of you except the one who killed by brother. . . ."

A man swore under his breath. The wind howled in the chimney with peculiar malevolence.

"I am speaking to that one," the voice continued. "I could not rest in my grave without attempting to right the wrong that one did. And I am warning that one, that before daylight, the price will be exacted!

"My friends, my loved ones, the murderer is in this house where you are listening to my voice. And I curse the murderer. . . ."

The voice died away; the whirring noises of the receiver increased in volume and the whining of the code broke in once more . . . SOS . . . SOS . . .

"My God," shrieked Hazel Stanton, "let me out of here! Let me out of here . . ."

Who felled Milford Jones? What disconnected the telephone as Hari Singh called for help? What does Hazel Stanton know? Peleg Turner speaks from his tomb—and accuses a person now in the Turner manse. Read the thrilling effect of this message in the next week's Radio Digest.

$500 in Gold

FOR THE SOLUTION OF

"a Step On the Stairs"

REPRINTS NOW AVAILABLE

SO MANY people are attempting to win part of the $500 in Gold prizes which are being offered for solutions to "A Step On the Stairs," a reprint of the first four installments has been printed and may be had for the nominal charge of twenty-five cents, in coin or stamps, to cover the cost of handling. Address your order to the Mystery Story Editor, care of Radio Digest.

The chosen stations, which will broadcast "A Step On the Stairs," in Radio play form, are given on page nine. The days and the hours are listed.

THE PRIZES

The prizes are seventeen in number. First prize is $250; second prize is $100; third to seventeenth prizes inclusive, are $10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story will be published consecutively each week. The first appeared in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unraveling the mystery accurately, will win. The method of preparing the solution—its neatness, legibility, etc.—shall be considered.

RULES OF CONTEST

1. Solutions must be received not later than midnight of Saturday, May 1. The ninth installment of the story will appear in the April 24 issue. The author's intended and final chapter will appear in the May 15 issue, together with the announcement of the winners' names.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon one side of paper.

4. The decision of the judges, to be named later, will be final.

BOY SCOUTS AND RADIO

(Continued from page 4)

7. Draw from memory, using correct symbols, a hook-up diagram of a complete receiving apparatus, using a vacuum tube detector, including antenna, two-circuit tuner, detector, fixed and variable condensers, resistances, batteries, phones and ground. Describe each part of the apparatus and explain its functions.

8. Describe a vacuum tube and explain its three principal uses, namely as detector, amplifier and oscillator.

9. Explain the differences between continuous wave, modulated or interrupted continuous wave and spark signals. Explain how each kind of a signal is produced and how each kind is received.

10. Construct with your own hand a practical working receiving set and demonstrate its operation for receiving signals from a station 25 miles or more away.

11. Explain how to install an antenna, how to connect it to the sending and receiving set, how to ground it properly and how to protect it against lightning. State the Underwriters' laws for safeguarding Radio apparatus.

Mr. Martin explains how the boys use Radio to carry on their good work:

"'Do a Good Turn Daily.' Such is one of the mottoes of the Boy Scouts. Radio is helping them to make the motto alive and real for themselves and for the people they aid and befriend.

"Good turns are done daily by the Scouts using Radio receiving apparatus. Concerts and lectures are given in hospitals and similar institutions; invalids, the bed-ridden and the shut-in are cheered up, and in some cases funds are raised and receiving instruments purchased or constructed by troops to be given to those who may need them.

"This is taking place everywhere. The Boy Scouts comprise the picked youth of the country—it is no wonder that in every state they have been quick to realize the advantages of Radio broadcasting not only for themselves but for others, and have acted on their understanding.

"So popular has Radio become with the Scouts that on the staff of Boys' Life, the official Boy Scout magazine, is a Radio expert, whose duty is to answer the numerous inquiries submitted by Radio fans. A department on Radio has been included in the magazine."

* * * *

Well, here we are on Swallow Cliff. Let's run the aerial across to that big oak on the other side of the ravine. While Mickey is getting the apparatus together the rest of us will gather some dry wood and start a fire for supper. A match! On this side Allen, can't you see where the wind is? Zowie! There's a flame for you—almost took an eyebrow, didn't it! Bring on that grid and the hot dogs!

Hello, what you want, Mickey? Better hurry up the dogs are sizzlin.' What's that? You got Bob already? Say, you're a whiz. Think you ought to have one of those Boy Scout Radio Merit badges. Tell Bob to take a good sniff. This bacon certainly smells good. Bring the key over closer to the fire, Mickey. Atta boy! Where's Morrell? Funny, you never can find that boy when you want him. Music! Hooray! Now we are all set. These are the happy days, what say, boys! Yee-ow-wow-wow!

OPEN GOLD CUP AWARD

(Continued from page 3)

loving cups. One will be given to the second most popular announcer at the end of the 1926 Gold Cup Award, and the other will be presented to the Canadian announcer finishing at the top of the list of Canadian candidates.

Last year D. R. P. Coats, of CKY, Manitoba Telephone System station at Winnipeg, was highest among the Canadian announcers and was presented with a silver loving cup by Radio Digest after the 1925 Gold Cup Award had ended. It was decided to make this an annual feature.

How to Nominate and Vote

On this page the rules regulating the Gold Cup Award are listed. Any one may make nominations, using the nomination blank appearing at the top of page two. Any one may vote, using the ballot blanks as they are published weekly in Radio Digest during the period of the contest which will not close until August 28 issue.

In voting, however, it is emphasized that the ballots, Number 1 of which appears on page two, will count for many more votes if saved in consecutive series, and cast all at one time. The bonus vote schedule is explained in the rules.

Kenneth G. Moffatt Dies

VICTORIA, B. C.—Mr. Kenneth George Moffatt, "Victoria's Radio Genius" succumbed here recently after a lingering illness, his death marking the passing of one of the greatest pioneers and authorities on Radio that the Dominion has produced.

Mr. Moffatt was the first to broadcast by remote control in British Columbia. He was also one of the first to open a broadcasting station in British Columbia. For a number of years he operated Station CHCE.

"a Step On the Stairs"

Broadcast as a Play

EPISODE FIVE—THE SETTING

WE ARE still in the haunted hunt-room of the old Turner manse. The guests are still waiting for the voice of Peleg Turner to return from the grave through the Radio loud speaker to tell of the mysterious murder of his brother. Suspicions have turned from one to the other of the guests. Lawyer Ardwyn was about to read a letter when the lights went out. In the darkness he gave a cry of pain. Later when the lights had been returned, he said a woman had bitten him on the wrist. The letter had disappeared. Mary Williams repulsed Henry Graves, another guest who asked to marry her. His wooing was interrupted by Ardwyn, the lawyer, who returned to the hunt-room after bandaging his wrist. Ardwyn and Mary are left alone. Ardwyn shows her necklace caught on his watch chain which Mary admitted was her own. The two sit waiting for the door to open. The candle goes out. The front door, supposed to be securely locked and barred, swings open, a figure enters. Mary cried that she has felt the body of a corpse. Ardwyn falls to the floor, a gash in his head. The other guests find them there and a scarf from Peleg's shroud is found clutched in her hand. They are revived. They are unable to explain what has happened. Hazel Stanton assists Mary and on advice of Ardwyn she is left alone to recover her senses. John Carton, a nephew, suspected of the murder slips into the hunt-room. He bids Mary to believe in him, that he is there to prevent another murder planned for the night and that he has summoned the police. Mary is surprised and seeks to hide him when other guests are heard approaching. Hari Singh assists him out the side door. Mary is questioned about the voices. Hari Singh calls for help and drags in Milford Jones who had disappeared from the room earlier in the evening.

THE CAST

Frederick Ardwyn.....Peleg Turner's lawyer
Aunt Helen Holmes.....A relative
Henry Graves.....A mysterious man Mary had known formerly
Hari Singh.....Indian servant of Peleg Turner
Mary Williams.....A youthful guest

To the left is Homer Grunn, one of America's foremost composers and pianists, who plays frequently at KHJ, Los Angeles.

High Lights of the Week

ALTHOUGH the aroma of resin will be absent, those tuned in on WIP, Philadelphia, Saturday night will have ringside seats when the amateur leather pushers exchange blows for the Junior National Boxing championships.

Martha Attwood, who has appeared in all the large opera houses in Europe and who last winter gave a special concert for ex-Queen Sophie of Greece, will be one of the artists to appear during WBAL's third Sunday evening artists' program. With her is appearing Oliver Denton, a brilliant young pianist who has also made a name for himself abroad. The Atwater Kent stars of the evening are Richard Bonelli, baritone, and Helen Stanley, soprano. One Sunday feature which should not be forgotten is the production of "The Dancing Princess" by the Dartmouth players at WBZ.

Among the Monday features are the Scotch folk music at KTHS which reveals the simple spirit of the Scotch peasant, the sophisticated modern jazz music of the Manhattan quartet at WJZ and the college songs of the WHAZ Campus serenaders.

There is not a trick left for the banjo or guitar player when the Ararat Temple Shrine serenaders get through with a program at WHB, Kansas City. Their return engagement for this week is scheduled for Tuesday. This is a headliner no fan should miss.

One of the "Radio Franks" who appeared frequently at WEAF, WJZ and WJY, has left the little circle to tour stations in the United States and Canada. This Frank's last name is Wright and he will begin his travels at WSAI on Wednesday.

Thursday is April 1 and one station, WLW, plans an hour of April Foolishness. The other stations do not mention special programs for this day but fans should be on the lookout for practical jokes over loudspeakers.

Many stations have planned to give the oratorio "Seven Last Words" on Good Friday. Among these is WTIC, Hartford. KGO will also give "The Darkest Hour." An Easter play "The Boy Who Discovered Easter" is the day's feature at WGY.

KYW, "The World Crier," broadcasts news every half hour from 8 a. m. to 2 a. m.

Senator Walsh Asks Senate Probe of "Wired Wireless"

WASHINGTON, D. C.—The question of "wired wireless" has broken out in the United States senate.

Senator Walsh of Montana introduced a resolution which was passed by the senate and which calls upon the secretary of commerce "if not incompatible with the public interest, to report fully to the senate the circumstances attending the discovery of the method of multiplex telegraphy and telephony, the extent to which this system is now used by the American Telephone and Telegraph company, in furnishing communication to the government and to the public and the value of such use annually to the said American Telephone and Telegraph company, and what reduction in rates, if any, has resulted from the free use of 'wired wireless' by the said American Telephone and Telegraph company."

This system was invented by General George M. Squier while he was in the signal corps of the army. Under government rules the patents were made free to everyone.

Radio Car for League of Nations

GENEVA, Switzerland.—Under construction for the League of Nations is a Radio-equipped Pullman car of latest design, to be run with the express trains of Europe or as a "special" in the event of emergency. This car will carry representatives of the league to war-threatened or disease-stricken borders.

The league is hopeful of receiving messages direct from their representatives through the transmitting apparatus on the car and to send orders, suggestions and news to be handled through its receiving equipment.

KIWANIAN IS JAILED ON FAKE BROADCAST

EAST CHICAGO.—One half of East Chicago became enraged while the other half rocked with laughter. And all because Lester Ottenheimer, program chairman of the Kiwanis club struck upon a novel idea and as a result spent two hours in jail.

Ottenheimer announced that he had arranged with Station WGN to broadcast free advertising at a big Kiwanis booster meeting. The president of the club informed the meeting that two million fans were hearing the addresses and the secretary of the chamber of commerce and the mayor orated on the town's greatness for the greater part of an hour.

Then somebody discovered that the microphone had not been connected. The mayor ordered the police to throw Ottenheimer in jail where he lodged until his attorney announced there was nothing in the city ordinances about disconnected microphones. It is said Ottenheimer will be ejected from the Kiwanis club.

AUSTRIAN INVENTS RADIO CALL PHONE

New System Is Reported to Need No Exchange and Permits Private Conversation

VIENNA, Austria.—A new Radio telephone system is reported to have been invented by Emil Marek, an engineer of Moedling, near here, which is described as sensational because it permits Radio telephoning without interference from the outside.

The probability that an outsider will hear is said to be one in 1,000,000. The new system needs no exchange, as all subscribers to the system have sending and receiving apparatus. The person calling the number, dials similarly to that used at the present time.

Since the number corresponds to a certain wave length, the person with the receiver on this wave answers the call. A light on the receiver lights up when the number is called. If the party called does not answer, the receiver automatically registers the calling party's number.

It is said that the transmitter is no larger than an ordinary telephone, and has a range that covers the whole of Austria. Experiments on a large scale will be started shortly.

"Patsy" Is Broadcast Direct From Theater by KFWB

LOS ANGELES.—The first attempt to broadcast a play direct from the stage on the Pacific coast, with the exception of operatic performances, was recently handled by the Warner Brothers station, KFWB, operating in conjunction with the Warner mobile transmitter 6XBR, when one act of the western premiere of the musical comedy "Patsy" was microphoned for the benefit of listeners within range of KFWB.

Reports of the performance came in from all parts of the United States, many writing in that they were able to pick up 6XBR on 108 meters where KFWB itself was inaudible.

Has Air Music Contest

PARIS, France.—The Paris daily "Echo de Paris" is conducting a prize musical competition in connection with Radio broadcasting. So far there are over 600 entries, of which 410 are in the singing group, 63 for violin, 97 for piano and the rest for wind instruments or cello. Of the singers, 313 are women and 97 men.

After the pick of the contestants has been chosen by a series of elimination trials, the performances of the winners will be broadcast in a number of special concerts.

"S-O-S" GIVES THRILLS

(Continued from page 5)

and stated that he was going to take the matter up with the department of commerce. It so happens that this station in question is unfortunate enough to have an 'F' and a 'Y' in its code call."

That's realism with a vengeance. Study the faces of these Portal Players. One of these days you may be proud that you "Knew some of them when." Many famous stage celebrities have come from the Twin Cities and their vicinity.

Only ten, or maybe it was eleven years ago, I sat with Captain Fred Place of the Minneapolis Journal and Charlie Branham of the St. Paul Pioneer-Press at a table in the cafe of the Nicollet hotel where this WCCO studio is now located. While we dined a big eyed little girl, fairly bubbling with the joy of life and living skipped out on the slightly raised platform and sang "Little Gray Home in the West." The patrons stormed her with applause.

A little later I saw this girl singing at a picture theater over on Hennepin avenue, I was entranced and being interested in a motion picture enterprise, I sought an introduction and arranged to have this little charmer do some work for the pictures. She sailed out over the Mississippi in a swaying work bucket attached to a cable and was lowered to a seething, boiling mass of logs going through the foundations of the dam then under construction between the two cities. After that I had her spin around the Speedway as a mechanic for Ralph DePalma. Other thrilling stunts followed and she performed for the pictures with the same charm as she appeared before her audiences.

It happened that Al Jolson came through shortly after and the little girl with the big blue eyes joined his troupe. The next year when I happened to be in New York I saw one name standing out in the bright lights more brilliantly than all the rest. It was "Edith Day" in "Going Up." Edith Day was the little girl whom I had first heard sing "Little Gray Home in the West" there in the cafe of the Nicollet hotel where the Portal Players are now presenting "A Step On the Stairs."

Watch these Portal Players.

Watch the news about WCCO and listen in when the players are on the air.

Light and Power for Twenty Years

No doubt you remember the first automobile you ever saw. Perhaps you'll remember, too, that it bore a shiny little tank marked "Prest-O-Lite" . . . for Prest-O-Lite gave the motor-car its first dependable eyes.

This same company, which has served the automotive industry so successfully for more than twenty years, today serves radio with a dependable, long-lived battery, *of special design*, that brings out the best in any set.

In engineering, materials and workmanship, Prest-O-Lite cannot be excelled. You can rest assured that Prest-O-Lite Batteries are correctly rated and deliver full power at all times. They are attractively priced from $4.75 up. There is a Prest-O-Lite radio dealer or service station near you.

TELLS SALAD SECRETS

(Continued from page 6)

salads that we need never be without them.

I will suggest a number of combinations that are possible at this time of the year. Cabbage, probably our cheapest salad food, lends itself to many delicious salad combinations. The shredded cabbage should stand in cold water until very crisp before using. The combination of shredded cabbage with celery, pimento or green pepper, is always good, and I like to use it with grated raw carrots as the yellow carrot on the white cabbage offers a very pretty contrast. Such a salad may be served with either mayonnaise or French dressing. A combination of cabbage and chopped peanuts is best served with mayonnaise dressing. If fruit is used with the cabbage, a cooked dressing may be preferred. The combination of cabbage, pineapple and marshmallow with cooked dressing is very popular, and cabbage and apple are also used.

With a fish salad made of salmon, tuna, shrimp or crab, use something crisp, such as celery, peppers or chopped sweet pickle. Cabbage may be used in place of celery in such a salad and hard cooked eggs and nuts are often added.

Many Pleasing Combinations

A nourishing salad is made by stuffing prunes with cottage cheese or with American cheese grated and mixed with salad dressing. For a pretty vegetable salad combine green string beans and cubed cooked carrots, or you may use the grated raw carrots. The green and yellow colors offer a pleasing contrast. Sometimes it is best not to combine all of the ingredients. For example, an interesting vegetable salad is made by arranging peas, carrots and celery separately on a lettuce leaf. The green and white colors are more effective separately than if mixed together. Macaroni mixed with apples and celery or with salmon or other fish and pickles make good combinations. In fact, you make macaroni salad with any combination you would use for potato salad. You will find such a salad rather different and very appetizing for a hearty supper dish.

Gelatin salads are convenient because they may be made ahead of time, and molded in various ways. Perfection salad, in which celery and cabbage are used, is a general favorite. A clear tomato jelly salad is also delicious, especially at the time of the year when fresh tomatoes are not available.

Tasty Fruit Salads

The apple, celery, and nut combination is probably one of the most convenient and popular of fruit salads. For a little variety, you may combine the apple with chopped peanuts, or add a few raisins or a bit of chopped green pepper. Grape fruit, and orange is another favorite served with either French, mayonnaise or a cooked dressing. I wonder if you have tried the orange and onion combination that sounds so queer and yet is so well liked? The large white Spanish onions are best for this salad, as they are more mild in flavor than the small ones. Banana salad may be made a little different by combining peanut butter with the cooked dressing before it is added to the bananas.

No doubt many of these combinations are old to you. I have not endeavored to give you anything new or startling because I have learned that what is old in one part of the country is new in another and vice versa. I hope that I have given you at least one suggestion for a salad you have never made before.

SHORT WAVES
By Marcella

(Continued from page 6)

Betty Lou wants to know all about Mac Ohman. I think she means Phil Ohman, the piano wizard. If she does, here is all the scandal that I could find out about him. He was formerly with the "Roxy" gang. After leaving Roxy, he joined up with Victor Arden, another pianist. They traveled under the team name of Ohman and Arden, the piano fiends. They are now in musical comedy. Phil Ohman is exceptionally good-looking, with chestnut brown hair and blue eyes. He certainly can play the piano. His only occupation outside of Radio is the theatrical business. I think that he is married, but I am not sure. I will try to get more information when I see him later.

* *

Isabel and Florence missed my lines about Pat Barnes of WHT and are deeply put out. Far be it from me to keep secrets about this handsome announcer, and inasmuch as his life story was told several months back, I guess I can safely repeat and elaborate a little. He is a handsome, tall and not too slender, brunette, dark, wonderful looking and a man's man. Weighs 168 pounds, stands 6 feet tall, and is 32 years old. Still single, although rumor has spread around that he may not long stay that way. So some of the girls of Isabel's sorority tried to ambush and flirt with him but failed? I'm not surprised, because he is a faithful sort and not the flirting kind. Pat leaving WHT in April? Not to my knowledge.

* *

Jerry Sullivan, WQJ's Chi-CAW-goer, is married, yes. But I can recommend Eugene F. McDonald, Jr., WJAZ's fighting owner, as a most eligible bachelor. About 35 years young, he is, and very handsome, full of pep and personality. I'd marry him myself, but he hasn't asked me yet.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do by best to answer here. MARCELLA.

Who Will Be 1926 Microphone King?

THE third annual Radio Digest Gold Cup Award begins. Fans of a nation will pick their favorite announcer anew. George Dewey Hay won the first cup in 1924. Graham McNamee won the second solid gold trophy in 1925. Who will be the favored "voice" this year?

Announcing standards and personality expressed through the loud speaker are again up for inspection. "Straight" versus "Character" announcers again have their tilt. Which kind of announcer will top the list at the end of the 1926 contest?

Last year over a million ballots registered the listeners' choice for favorite master of ceremonies. The winner, Mr. McNamee, received nearly 200,000 of these. The interest has been growing from year to year in this great effort of Radio Digest to impove announcing objectives and reward the best in the world.

Queer Thing This Radio

IT WAS recently reported in the newspapers that a woman had made a complaint to a broadcasting station that she heard its music when she was walking along the street. At a certain point on this street she heard it. So she wanted the station to quit broadcasting before she lost her mind.

Upon investigating, the officials found that a youth had rigged a loud speaker extension in one of the trees near the spot where the lady heard music. So the mysterious phenomenom was explained.

As Shakespeare said, "There's Music in the Air."

This and other queer incidents reported often leads erroneously to the impression that there is something psychic about Radio. However, when a good technical man gets busy on the case and investigates carefully, he usually finds that the incident, while unusual, is supported entirely upon the scientific laws Radio has always been known to follow.

Speaking of queer tricks of Radio, two readers built short wave receivers. One found that he heard the voice of his friend in his headset. He talked back to his friend through his headset. The friend heard him and replied that all he was doing was talking toward his short wave receiver's panel, and that the panel seemed to pick up the voice. The two were mystified and sought advice from this publication.

It was explained easily. Certain circuits act either as transmitters or receivers. The voice can be sent out by talking into one's headset. As for the reader who talked at his panel, it developed that he had a microphonic detector tube, and as he talked at the panel, his voice vibrations were transmitted directly to the elements of the detector tube, which in turn modulated the wave from his set and sent his voice out on the air.

All according to basic Radio principles it was, yet the two neighbors were puzzled. And why not? Better be careful what you say hereafter in front of your radiating receiver.

Another reader reports that he can hear talk and everything going on around a gas engine nine miles away from his Radio set, provided the gas engine is running. He wants the answer. It hasn't been explained yet, but no doubt will prove to be very simple, and in accordance with understood principles.

The latest phenomenom occurred in a store at Columbus, Ohio, when an electric phonograph of a recently introduced type began to give the market and weather reports, and then finished off with the noon musical program from a broadcasting station a mile away. The storekeeper was amazed and nonpulsed. He sought technical advice.

The technician reported that the phonograph was equipped with a Radio amplifier which electrically reproduced and amplified the sounds registered on the records. The amplifier had been turned on and this acted as an ordinary Radio receiver.

Radio is extraordinary, we grant, but not enough so to make such incidents unexplainable. It is peculiar what outlets Radio programs sometimes take, and it is only human that people should be surprised or frightened as a result. However, be skeptical when such stories are told to you, for they grow less explainable and more mysterious with repitition.

RADIO INDI-GEST

Memories

Oh, how I remember the first Radio we had,
Although 'twas only a crystal set, it made us very glad.
It wasn't much for looks or anything like that,
With a bunch of funny wires and the music always flat.
Compared to sets today, one would classify it "junk."
And the programs we received would be considered pretty "punk."
But we got an awful kick out of galloping around,
And how we'd strain our ears to hear the faintest little sound.
And we never became tired or thought of going to bed,
We'd just sit there and listen with the phones glued to our head.
Those were the good-old, happy days, when everything was new.
Do we remember those old days?—You bet your life we do. THAT RED-HEAD GAL

Hurray! Hurray! Bobette is back. And who don't remember when all the accessories that were needed were bed springs for an aerial and a radiator for a ground? And nobody kicked because they heard sopranos and a little static was no more than the stones in cherry pie.

Says Davenport, "Lend Me Your Ears"

WOC, Davenport, has a listener in who has the unusual gift of being able to click his ears as loud as the ticking of a watch. He has offered to do his stuff before their mike. So far, the program has been held up, awaiting the decision of whether it should be termed a duet or a solo. OLIN RECORDER

Why not use the boy on code? Have the right ear for dots and the left one for dashes. Iowa, famous for its ears of yellow corn and their corn-fed population—may attribute these ears to pop corn.

Broadcast "Fable of the Chimes"

Did you tune in March 17 on WOC when they broadcast "Fable of the Chimes" which headed the Indi-Gest column last week? The poem by Charles Allen Branham was given at the conclusion of the Davenport station's chimes concert.

Signify by Saying "Aye"

Adam made the famous Fans club by a wide margin. He was found to possess a dozen qualifications.

Accept Napoleon, because in his attempt to "by-pass" the Alps he was met with "resistance" which caused him to "switch" his "batteries" to "choke" the enemy "charge." He then established a new "station" with new "lines," by which he was able to "detect" the enemy and cause them to lose "ground." FRANQUE

Franz Gruber, because he composed "Silent Night." The fact that he added "Holy Night" shows just how clever he was. IMA BLOOP

Don't Longfellow come in for consideration for starting bedtime stories with his "Listen my Children and you shall hear?" JONATHAN JAY

Radio Rhymes

Every Easter! Every Easter!
Must I always hear—
"Needa new hat—wanta new hat—
Will you? Won't you?—Dear?"

Every Easter! Every Easter!
All the cash I've made
Goes for this hat—or for that hat—
For the Church Parade!

Not this Easter! Not this Easter!
—I'll not spend my dough!
She can go to church bareheaded
On the Radio!
CHARLES ALLEN BRANHAM

Try and Put It in a Jingle

Listen to this from KFI. It is one of the reasons why speakers are loud.

"Martha Van Hoomissen-Chevallier will play 'Die Tod und die Verklerung,' by Strauss, and accompany the 'Versonkene Glocke,' by Gretchaninnoff, sung by Antoinnette Konorocharakoff."

Moral: Fight on Silent Night

Somebody is wrong. Great statesmen have predicted that Radio will bring about world peace. How the heck can it when it won't even do it in a home. Man in Columbus, Ohio, was lodged in the city prison for giving his wife a black eye after she took two tubes out of their set and broke them because he wouldn't take her out one night, preferring to listen in.

Not a Miracle Play

Dear Indi: From the kind of guys these Turner birds seem to have been, I don't think this Peleg bozo will be able to talk from the dead to the persons gathered in the hunt-room for the reason that there aint no fire clay receivers with asbestos coils. SHOBIE

Depends Upon the Brand

Listen and Learn How to Smoke Meat is Latest

—WCCO News Bulletin

Let's try it, friends. We will start out with Bull Durham in the first lesson. Then a few puffs of Camels and Wild Boars will get us away from vegetarian nicotine. Maybe in the next series we may learn how to chew Brown's Mule. *INDI*

Not So Blind She Can't Wink

Condensed

BY DIELECTRIC

The Cincinnati Conservatory of Music has contributed to the programs of WLW, the Crosley station in that city, some features of genuine merit which Radio listeners realize and appreciate. Arthur Brecht, solo cellist with the Cincinnati symphony orchestra, was another addition to high-class musical offerings, indeed, rivaling in tonal beauty and technical proficiency those recognized as world leaders of the instrument. The sonata form of musical composition has phases of interest to which music lovers are ardently drawn.

In miking some orchestrations, the brass smother the strings so as to leave an unbalanced effect, which is not the fault of the orchestra leader but of the arrangement before the mike. Again, a choir of the orchestra is intended to stand out from the rest, as in picking up a theme for its development. This latter case applied to a portion of an orchestra concert put on the air from the studio of Station WOAW, Omaha, when the clarinets beautifully played their part with accompaniment by the other choirs. It was very well done.

A real treat is in store for the music lover who tunes in on WGN, Sunday evenings at 9:15 Central time. This station has inaugurated a novel feature in their Music Room. The announcer graphically describes the den of an old-fashioned music lover; in one corner is an old square piano, sweet-toned violins adorn the walls and the tables are covered with manuscripts yellow with age. The music master talks and calls the ghost of old-time composers. Each week a different composer's work is heard.

If organ recitals mean anything to you, I would suggest tuning to WEAR, Cleveland, and sampling some of their concerts. Especially commendable was a concert given there recently by Vincent Percy and a group of soloists happily selected for the program. We have on occasion listened to organ recitals where the performer failed to make use of the subtle combinations of stops to produce effects impossible with any other musical instrument, yet no such detraction occurred while Mr. Percy entertained. His work was modestly performed with pleasing result.

The Gold Medal Station, WCCO, Minneapolis-St. Paul, is no slouch when it comes to dance programs and if you doubt that, just try them while the Golden Pheasant dance orchestra is on the air. You may prefer numbers not appearing on their programs, but few will be disappointed with the rendition of such as do appear there. Maintenance of rythym and spirited playing are noteworthy attributes and what more do lovers of dance music demand? Try them out.

The Atwater Kent concerts have produced some remarkably fine musical talent, in fact, many of the foremost artists in the world have, or will, appear before the mike in the studio of Station WEAF, New York. To find what stations are linked in the chain of broadcasters turn to the advance program pages. I shall review two concerts in this paragraph. When the London String Quartet played, their program was notably lacking in contrast, which may be set down as due to unfamiliarity with Radio broadcasting. Comparisons may be out of place, but I make bold to state that the exquisite nuances and virile attack so characteristic in the playing of the Flonzaley Quartet was lacking to a marked degree. Again, we had the good fortune to hear Josef Hofmann, master pianist, in familiar works. A great night.

1926 Model Four-Filter Super-Heterodyne

Part III—Assembly and Wiring

By the Technical Editor

IN LAST week's article, the work was taken through the alteration and drilling stages ready for assembly. The front panel assembly should cause no one any particular trouble so far as the condensers, brackets and switch are concerned. The right condenser mounts tight up against the brass shield; the brass was cut away sufficiently for the left condenser that the mounting pillars could be tight against the panel yet not touch the brass. For use in mounting the potentiometer, cut a cardboard disk the same diameter as the base of the potentiometer and cut small holes in it to pass the three mounting screws and the shaft. This unit is then mounted with the cardboard between the bakelite base and the brass shield; the cardboard is used only to be sure the lock washer around the shaft does not touch the shield.

Sub Base Assembly

The assembly holes in the sub base may need a little explanation. In the rear left corner will be found a hole 1½ inches from the left edge and 1 13/16 inches from the rear edge. To the right of it 2¼ inches is another hole. These are for the pins on which the Cruver coil is mounted. In front of these, and to the right of the Bradleyleak, are two more holes 2½ inches from front edge of sub base and 2 inches apart. These take the Benjamin socket for the first detector, mounted with P and F terminals to the rear. Proceeding further to the right and ⅜ inch from the front edge will be found four pairs of holes 1 inch apart for four more sockets and each is mounted with P and F terminals to the front. This brings us to the third pair of bracket holes. Just to the right of them and only ¼ inch from the front edge, are two holes 1 15/16 inches apart for the oscillator tube socket, mounted with P and F to the front and with more than half the base hanging over the front edge. This will be clear from figure 5. The small hole a little further to right and ⅞ inch from front edge takes the small right angle bracket used to support the oscillator coupler so that it also hangs over the brass beyond front edge of the sub base.

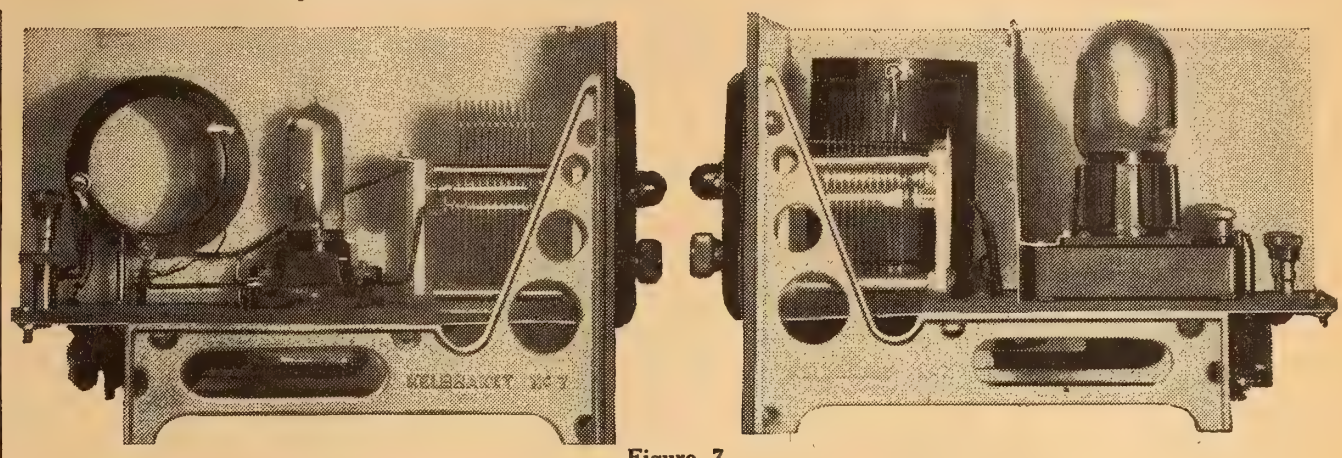

Figure 7

The two small holes near the center lengthwise, 9⅜ inches apart and 5/16 inch from rear edge hold the Master Long Wave Intermediate Unit with two small right angle brackets. Two holes are needed to support the Daven unit in place. 1¾ inches from the rear edge and just to right of the third bracket holes from left is one of these holes; the other is 2 inches from the front edge of the sub base and 5/16 inch in from right edge. Binding posts are placed in the two holes behind this Daven unit and 11/16 inch in from rear edge of sub base. The Bradleyleaks are put in, in both cases, with terminals to the right. Secure the assembled sub base to the brackets, which have

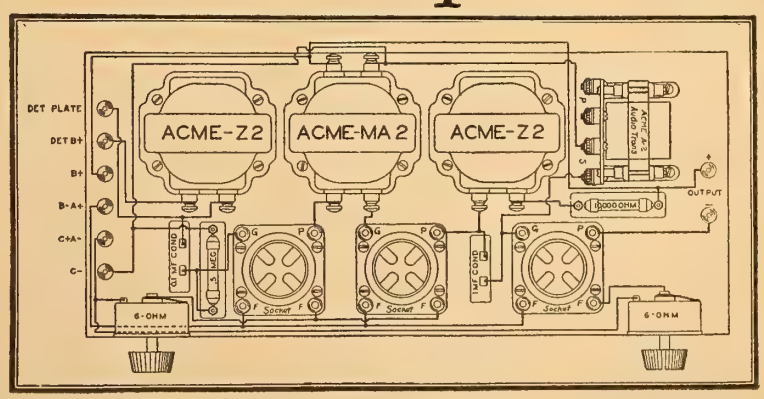
"26 Years Making Good Instruments"

The Last word in audio amplification



Impedance • • • Transformer • • • Impedance

THE diagram above will give you some idea of the very latest step in audio amplification. This is the outgrowth of nearly 7 years of experience in working on proper amplification—the problem of "How well you can hear."

Acme research work has been confined to audio amplification and reproduction, and here you find the latest result. An audio amplifier using the combination of impedance and transformer coupling with over-all amplification greater than two transformers, and far superior in quality, no matter what the type of transformer used. Whatever set you have, just add this amplifier to your detector and notice the difference.

A complete working diagram of the above chart will be sent you for 25c. It is easier to follow than the plainest road map. With this chart we shall be glad to send you free a copy of "Amplification Without Distortion," a famous radio book over 300,000 radio fans have found helpful. It tells the whole story of distortion and how it can be overcome. Use coupon below for convenience. FOUR-FILTER SUPER

(Continued from page 19)

previously been attached to the front panel. Then add the Amperite strip to the back surfaces of the two central brackets and solder the bypass condensers in the positions shown in the photographs, figures 5 and 6.

The wiring of this set begins with the negative filament connections. Using a piece of heavy rubber covered wire, connect the minus A post on the Daven unit, through the sub base and forward to one of the filament switch terminals. The other switch terminal connects, with a 1-inch piece of wire, to the front panel plus A binding post, the connections to all tubes, from the plus A of a storage battery, are completed.

Binding Post Strip

For the antenna and ground binding posts, a small piece of ⅛-inch bakelite is needed, 1 inch wide and 3¾ inches long. A hole is bored in this ½ inch in from each end; ⅞ inch in from each of these holes bore another. These two holes 1 inch apart are for the antenna and ground binding posts while the outer two are for long 6-32 machine screws which go down through ¾-inch pillars and the sub base and are secured beneath the sub base with hex nuts. This supports the binding posts up away from the sub base

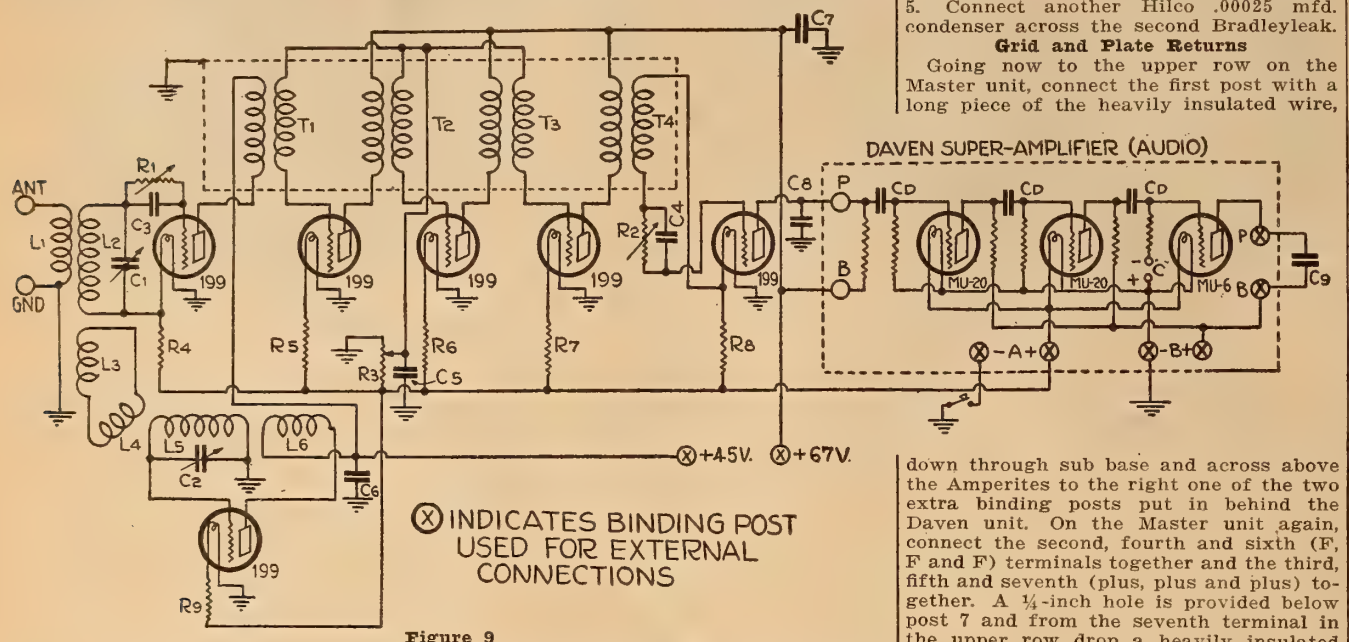

Figure 9

shield. Now connect the front right terminal of the first detector socket to the brass shield below sub base, at a point just in front of the front edge of the bakelite sub base. Similarly, connect the left front terminals of the three intermediate sockets and the second detector, also the front right terminal of the oscillator socket (No. 6). Now drop a piece of wire through sub base from the negative B post on the Daven unit and solder it to the brass shield below sub base. Thus, if the negative of a storage battery is connected to the negative A post on the Daven unit (remember, it was altered) and the switch is closed, connection is made through the shielding to each tube.

Now slip a soldering lug under the positive A post on the Daven unit and to it solder a piece of heavy rubber covered wire which goes down through sub base to the nearest Amperite unit. A piece of ordinary bus bar can then connect the lower right ends of all six Amperites. Now connect the upper end of the left Amperite, with a piece of the heavy rubber covered wire, to the rear left terminal of the first detector socket at left end of set. Call that socket number 1 and the 199 sockets from left to right as 2, 3, 4, 5 and 6. Connect the second Amperite from left to socket 2 at the rear right terminal, the same with Amperite 3 and socket 3, Amperite 4 and socket 4, Amperite 5 and socket 5 (second detector) and connect the upper end of Amperite 6 to the rear left terminal of socket 6 (oscillator). Since the proper terminals in the Daven unit are already connected to the and its shield. With ordinary bus bar connect the left binding post to that end of the primary whose terminal is in the left coil ring and the right binding post to that end of the primary with its terminal in the right ring. Another short piece can connect this right terminal to the right coil support thus connecting it to the shield.

Now connect the left secondary terminal of the coil, forward to the left soldering lug on the stator of the left condenser, bending the wire down so it is but ¼ inch above sub base. It will thus pass over the ¼-inch hole bored just to left of the Bradleyleak. With a piece of the heavy rubber covered wire connect this last wire, down through the sub base to the rear terminal of the Bradleyleak. With another piece of the heavily insulated wire connect the front terminal of the Bradleyleak to the left front corner terminal of socket 1. Connect one of the .00025 mfd. Hilco fixed condensers across the terminals of the Bradleyleak as shown in the photos. There are two soldering lugs on the rear end plate of the X laboratory condenser, so run a wire from that in the upper right corner down to the right end terminal of the secondary of the coil. From the rear left corner terminal of socket 1 run a wire straight to the right and solder to this last wire put in. This completes the input circuits.

A short piece of the heavily insulated wire is used to connect the rear right terminal of socket 1 across to the first lower row (P) post on the Master unit, bending this wire down against the sub base. Speaking now of the lower row of posts on the Master unit, connect the second post to the rear left terminal on socket 2 and the third to the front right terminal on that same socket. The fourth goes to the rear left terminal of socket 3 and the fifth to that socket's front right terminal. The sixth Master post goes to the rear left terminal of socket 4 and the seventh to that socket's front right terminal. From the eighth post, a heavily insulated wire goes down through the ¼-inch hole provided and forward to the front terminal on the second Bradleyleak. The rear terminal of this leak connects up through another ¼-inch hole, provided, to the rear right terminal of socket 5. Connect another Hilco .00025 mfd. condenser across the second Bradleyleak.

Grid and Plate Returns

Going now to the upper row on the Master unit, connect the first post with a long piece of the heavily insulated wire, down through sub base and across above the Amperites to the right one of the two extra binding posts put in behind the Daven unit. On the Master unit again, connect the second, fourth and sixth (F, F and F) terminals together and the third, fifth and seventh (plus, plus and plus) together. A ¼-inch hole is provided below post 7 and from the seventh terminal in the upper row drop a heavily insulated wire through sub base and back to the left one of the two separate binding posts back of the Daven unit. Where this wire comes out below sub base, connect a wire to it and across to left to the right terminal of the 1 mfd. Tobe condenser placed to left of the second Bradleyleak. The left terminal of this condenser is soldered to the brass shield placed under the sub base.

From the left post on the potentiometer drop a heavily insulated wire through sub base and back to the lower terminal of the second Amperite from left. From the right post on the potentiometer drop a wire to the front soldering lug on the 1 mfd. Tobe condenser shown and solder both to the flat shield on which the condenser is placed. From the rear soldering lug on this condenser run a wire up to the center post on the potentiometer. From the eighth post in the upper row on the Master unit drop a wire to the rear right terminal of socket 5.

We now come to the oscillator unit. From the lower terminal of the plate coil on the oscillator coupler run a wire forward between coil and condenser, then to left to the front left terminal on socket 6. Now connect the upper terminal of the grid coil with a short wire to the left stator soldering lug of the variable condenser and continue this wire down and across in back of the coil to the rear right terminal of the socket. Now connect the lower end of the grid coil to the lug on the upper left corner of the rear end plate on the condenser (about 1 inch) and continue the wire forward and to left to the front right terminal on the socket. From the upper end of the plate coil, use a piece of heavily insulated wire and drop it down through the ¼-inch hole provided and back to the right one of the two separate binding posts (plus 45). Where this comes through below sub base connect it to one terminal of a 1 mfd. condenser as shown in the photographs and connect the other terminal of this condenser to the flat shield.

Pick-Up Coil

Two terminals remain on the oscillator coil which are from the pick-up coil or rotor. From each of these drop a piece of heavily insulated wire down through sub base and across to left to the ¼-inch holes provided just below the right bakelite ring on the Cruver coil. Bring them up through these holes and connect one to each of the terminals provided from our special two-turn winding put on the Cruver coil. These wires carry the energy from the oscillator circuit and impress it onto the first grid circuit.

Now to clean up a few odds and ends and we are through. A piece of the rubber covered wire is used from the front right terminal on socket 5 to go straight back and to P post at left end of the Daven unit. Connect the .002 mfd. Hilco condenser across the front left and front right terminals on socket 5. This is condenser C8 in the wiring diagram. From the B post (second from the left) on the

"The Better Condenser"

TOBE

THOUSANDS will build or buy B-Eliminators this spring and summer.

The Public is just beginning to realize the wonderful advantages of them.

If you build a B-Eliminator, make sure that you use TOBE Condensers in it. THE TOBE B BLOCK combines in a single unit all of the filter condensers required, sells at $11.00, and saves you $2.50 over the cost of separate condensers. It saves much space and wiring labor. Dimensions are 4 in. x 2¼ in. x 5¼ in. high.

If you buy a B-Eliminator, make sure that it uses the TOBE Condensers. Most of the good ones do.

And, in building your improved, resistance or impedance coupled audio amplifier and in by-passing the B Battery in your set for perfect reproduction without noise, use the TOBE Condensers.

At your dealers in the distinctive silvered case and silvered carton.

How to Stop Blooping and Man-Made Static

Part VII—51 Types of Interference

By the Technical Staff

A GOOD Radio receiving set is one of the most sensitive instruments made by man. In the bureau of standards in Washington there are some of the most delicate mechanical and electrical devices in the world for measuring weights, lengths and electricity. The most sensitive of these devices, which are operated only by scientists with years of training, is hardly more sensitive than some Radio receivers. The real wonder of Radio broadcast reception is that it has been possible to make these ultra sensitive instruments so simple and convenient to use that persons with no scientific knowledge or training are able to get such wonderful results from them. A good Radio receiver will give understandable reception if the radio frequency voltage received on the antenna is only .0001 volt per foot. Is it surprising that your receiver picks up scores of disturbing noises?

Electrical Interferences

It is not yet possible to prevent static from interfering with Radio reception. Aside from static there are many causes of noises in your receiver. A large number of these are produced by electric devices of various kinds, some of which may be in good condition and operating as they are supposed to operate. It would be possible, of course, to do away with all these noises, but this would be at the expense of giving up all of our modern electrical conveniences, including electrical transportation, automobiles, motors and all household electrical devices. This, of course, is a price none of us would consider paying. Let us take a look at some of the sources of man-made interference, for which list we are indebted to Mr. E. P. Peck of the Utica (N.Y.) Gas and Electric company.

In Receiver or Accessories:

1. Improperly tuned receiver
2. Loose connection in set or speaker cord
3. Defective grid leak
4. Shorting condenser plates
5. Defective fixed condenser
6. Discharged or weak batteries
7. Loose battery connections
8. Defective B battery eliminators
9. Socket trouble
10. Poor tubes

From Apparatus in Your or a Neighbor's Home:

11. Vacuum cleaners
12. Sewing machine motors
13. Violet ray machines
14. Ozonators
15. Door bells and buzzers
16. Switching of lamps, etc.
17. Thermostatic heating pads
18. Some types of oil burners
19. Certain washing machines
20. Vibrating battery chargers
21. Some electrolytic chargers
22. Elevator controllers
23. Bad contact in switch, fuse or socket
24. Set too close to lighting wires

From Outside Sources:

25. Defective transformers
26. Regenerative receivers
27. Sign flashers
28. Commercial code stations
29. Amateur code and phone stations
30. Induction coils
31. Electric street cars
32. Defective rail bonding
33. Heterodyning between stations
34. Overlapping of stations
35. Telephone ringers
36. Telephone and telegraph lines
37. Arc motion picture projectors
38. Motors of commutator type
39. Electric welding apparatus
40. Doctor's X-ray machines
41. Static machines
42. Static produced by belts
43. Manufacturing processes
44. High potential circuits
45. Arcing wires in trees
46. Leaking power line insulators
47. Defective power lighting arrestors
48. Street lamp loose in socket
49. Bad contact in switches
50. Smoke precipitators
51. Defective street light rectifiers.

Fairness to Power Company

This does not cover all possible sources of trouble by a great deal. However, in this list, it is seen that there are ten possible kinds of trouble that can be caused by your own receiver or the apparatus connected to it. There are fourteen kinds of trouble that may occur in the

(Continued on page 22)

Radiotone Loud Speaker

Now *Only* $19.95
Was $25.00

The BEST Radio Affords

$1.00 down!

With the Radiotone all the family can enjoy your radio at the same time!

Yes, Genuine Radiotone loud speaker—the same loud speaker that is selling everywhere for $25.00—now at a sweeping cut price, only $19.95 and on easy monthly payments, besides! Only $1.00 with the coupon below brings the Radiotone to your home on approval for 30 days! No radio is complete without a loud speaker—a *good* loud speaker. The whole family may "listen in" at the same time, leisurely—instead of taking turns at the headphones. Or if you have a loud speaker now that isn't satisfactory, that doesn't bring in stations loud and clear, this is your opportunity to get a first class loud speaker—yes, the best and we'll *prove* it on this offer—at an astounding rock-bottom reduced price, direct—and on easy, monthly payments besides!

Makes Your Radio Complete

The Radiotone is the last word in sound reproduction and amplification for radio sets. It is super-sensitive. Brings in distant stations with full volume so every one in the room can hear distinctly and easily. Wonderful clearness and absolute purity of tone. No distortion. No crouching in front of the loud speaker to hear announcements.

The Radiotone has a 14-inch horn made of Thorite in one piece without seam or joint, accoustically correct. This eliminates the metallic clang you often hear in other loud speakers. The reproducing unit is entirely enclosed at the base of the horn. The well balanced construction does away with all vibrations. The Radiotone has a graceful shape with a beautiful black florduline finish. It stands 23 inches high and weighs only 15 lbs. No extra batteries needed for the Radiotone—just plug it in as you do your head set. Nothing to wear out or get out of order. Sent complete with cord and plug.

30 Days Trial!

When the Radiotone comes, there's nothing to pay. Use it freely at our risk, on trial for 30 days. See how much more use and fun, you and all the family get from your radio with this loud speaker. See how loud, clear and distinct the Radiotone brings in all stations—better than any other loud speaker you've ever heard, giving you the best that is in your set. After 30 days trial if you think you can get along without the Radiotone, return it to us and we will refund your dollar plus all transportation charges. No red tape. The trial costs you not a cent.

Straus & Schram, Dept. R-6413 Chicago, Ill.

Enclosed find $1. Ship special advertised Radiotone Loud Speaker, I am to have 30 days free trial. If I keep the Radiotone, I will pay you $3.00 monthly, total reduced price, $19.95. The Radiotone is to become my property as soon as you receive the final payment. If not satisfied, I am to return it within 30 days and you are to refund my money and any express charges I paid.

Radiotone Loud Speaker No. Y8728A—$19.95

Gets Everything But Noise!

Read this convincing letter from a man who has "listened and marveled":

"Atchinson, Kan.
Kane Antennae Co. Jan. 14th, 1926
Dear Sir:
The Kane Antennae sure does the work. It has cut down local interference until you cannot notice it. Now I am in as bad a place as can be found for radio. So my trouble is over with interference. Showing you that I am more than satisfied, I want the same kind of a Kane Antennae with aerial and counterpoise for my home. I am using this one at the store.
CHAS. MILLER CIGAR STORE"

Improves Reception 60%

Entirely eliminates all power noises such as leaky transformers, generators, motor hums, Delco Plants, etc. Cuts static and regeneration howls and squeals in two. Dr. Gehrig of Oakland, Cal., says it improves his reception fully 60 percent. Do away forever with disagreeable noises.

$1.00 *Brings BLUE PRINT Complete Working Drawings* and full instructions for erecting this wonderful Antennae. Just send $1.00 (a check will do. Stamps not accepted). A limited number available. Send TODAY.

KANE ANTENNAE

FOUR-FILTER SUPER

(Continued from page 20)

Daven unit, drop a wire through the sub base and to the left one of the two separate binding posts (plus 67). The Hilco .005 mfd. condenser is now connected to the OUTPUT binding posts on the Daven unit. An Eveready C battery is set upright against the front panel, resting on the flat shield and just to left of the second bracket from left in front of socket 2; plus to right. From the fifth post in the upper row of the Master unit run a wire forward and to left to the "minus 3" of this battery and from the plus on the battery run a wire down and to right to the center post on the potentiometer. This battery is not shown in the wiring diagram.

Secure two of these Eveready C batteries to the underside of the flat shield beneath the Daven unit and connect them in series, that is the plus on one to the minus 4½ of the other. Two holes (not shown in drilling layout) will have to be put through the sub base 5¼ inches from rear edge and 3 inches and 2¼ inches in from left edge. The strap is removed on the Daven unit connecting the front end of the last resistor to a post close against the third socket. The plus on the C batteries not previously connected is connected up through the sub base to the post close to the third Daven socket and the remaining minus 4½ on the C batteries is connected up through to the front end of the last resistor, putting 9 volts of C on the grid of the third Daven tube.

The layouts for the three remaining shield pieces are shown here. Of the two notched, one goes tight against the left end of the Master unit, while the other fits snugly against the right side of the third bracket from left and passes about ¼ inch to right of the right end of the Master unit. Before putting in this last named one, connect a four-inch piece of flexible wire to the grounding post projecting from the right end of the Master unit and then insert the shield. The end of this wire can now be soldered to the shield at its rear edge. The third and unnotched shielding piece goes between the oscillator equipment and the Daven unit. The screw holding the front right corner of the Daven unit is loosened and a small right-angle bracket is slipped under it, the vertical portion of this bracket being soldered to the shield just put in.

Antenna and ground connections are made to the first and second binding posts at the left rear corner of set. Battery connections are made as follows: Plus A on the storage battery to plus A on the Daven unit, minus A on battery to minus A on the Daven unit. Negative of a 45-volt B unit connects to negative B on the Daven unit. Plus of this first B unit connects to negative of a second one and to the right one of the two posts behind the Daven unit. The plus 22 post on this second B unit goes to the left of the two separate binding posts while plus 45 of this B unit goes to negative of a third B unit. Plus of this third B unit goes to plus B on the Daven. The speaker goes to the two OUTPUT posts of the Daven unit.

If the ends, back, top and bottom of the cabinet are lined with the number 20 half hard brass it will be seen that the input circuit is in one pocket, the intermediates and second detector in another, the oscillator in a third and the radio frequency amplification in a fourth.

HELP STOP BLOOPING

(Continued from page 21)

electric equipment in your own house or in your neighbor's house. There are twenty-eight sources of trouble that ordinarily are outside your house, and, of these, nine may be in power companies' lines. Power companies, as a rule, are very desirous of locating and correcting every case of Radio interference caused by their lines or equipment. A power company is, however, organized for the purpose of delivering electric service to its customers at the lowest possible cost, and they cannot incur unjustified expenses.

Cause Little Interference

Your power company would be subject to severe criticism if it incurred large expenses for things entirely outside its normal business. You can see from looking over this list that only a small fraction of the troubles experienced by broadcast listeners are due to power companies' equipment. The power company cannot undertake to correct Radio troubles not caused by its system, and it should not be called upon to investigate sources of trouble over which it has no control. Every Radio set owner has the duty of finding out whether the trouble is caused by his own set or by something in his house before he calls on the power company. If you are not capable of making the necessary simple tests, or do not care to make them, you should call on the Radio dealer who supplied the set for his assistance and you should expect to pay him for his work.

Join Radio Club

Find out if there is not a Radio club in your locality. Nearly all such clubs now have experts to go out and check up interference troubles, or have the equipment for doing this work by members. Full descriptions of the apparatus used by clubs and power companies for searching out sources of trouble will be presented in later chapters of this series.

(Next week's installment of this series contains the tests for locating the more ordinary sources of trouble and means for correcting these difficulties when found.—Editor's Note).

GOLDENROD GOLD PLATED AERIAL

Used by broadcasting stations and ships at sea for higher efficiency and no corrosion. Approved by Popular Science Institute of Standards, Popular Radio Laboratory, Everybody's Radio Weekly Laboratory and others. Guaranteed to bring in more stations, better reception, greater distance, more volume. Agents and Dealers write.

Radiophone Broadcasting Stations

Corrected Every Week—Part II

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

(The third part of the directory of station schedules will appear next week.)

POWEL CROSLEY JR.

Radio Manufacturer

Linked with the invention of every valued product is the name of some man or group of men. The basic article is invariably a crude affair. Improvements and refinements follow fast. Then comes another pioneer. The production genius who reduces costs to the level of common means.

Often that man's name outlives the inventor's. He, after all, is the benefactor of the people. Several names so associated with the automobile now live in public consciousness, but who can name the inventor of the motor car?

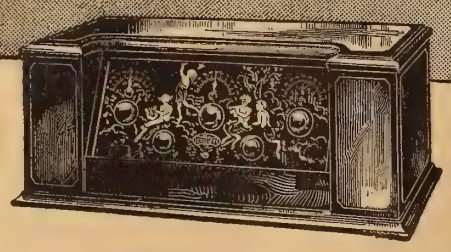
Such a pioneer is Powel Crosley, Jr. . . . liberator of radio from the grip of prohibitive prices. With his genius for reorganization and his talent for applying mass production methods, he has given to the man of modest means joys of radio in common with those of the millionaire. The desired selectivity, sensitivity, tone, volume and volume control, once exclusive to high priced instruments, are now available in Crosley sets at a fraction of the former price.

A trip through the huge Crosley plant is a revelation. Mere machinery takes on superhuman powers, and human powers are multiplied by machines. Operations that once produced only a few units per day, now turn out thousands. Other phases formerly considered so intricate as to demand hand work, are now accomplished by devices that duplicate the dexterity and shame the speed of hands. Multiple drills make many jobs one. Automatic washers heat, treat and wash the parts, that must be chemically clean, in lightning sequence and with positive results.

And in the transformation of hand labor to machine performance the unescapable inaccuracies of human error are supplanted by absolute precision. For example, coils must consist of wires of exact length, wound to a certain tension by a certain number of turns. Variation is inevitable when this is done by hand. But Crosley automatic coil winding assures precise results, uniform tension, micrometer measurement, exactly the same number of turns in every case.

A radio manufacturer who is master of mass production! That is the earned title of Powel Crosley, Jr. And that is the gift that has enabled him to give the public the kind of radio instruments they want at the kind of prices they want to pay.

Four New Radios

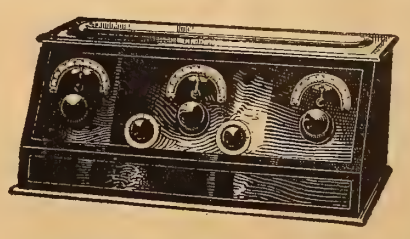


The Crosley 5-Tube RFL-75

Absolutely balanced radio frequency amplification. Non-oscillating under any handling. Exquisite two-tone mahogany cabinet—satin finish. Decorated panel with rose-gold metal fittings. Cabinet holds necessary dry cells. Price without accessories . . . **$75**

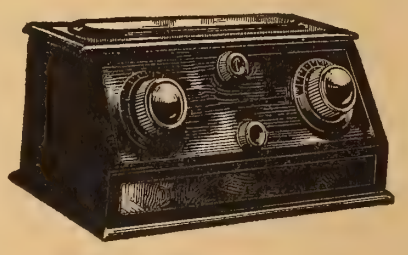
The Crosley 5-Tube RFL-60

Same as RFL-75 but in compact cabinet only 17½ inches long. Truly marvelous selectivity, sensitivity and purity of tone. Art panel—solid mahogany cabinet—rose gold fittings. Price without accessories **$60**



The Crosley 5-Tube 5-38

All the volume, selectivity, sensitivity and fine tone in the best 5 tube set you've heard—plus the CRESCENDON. Two toned mahogany finished cabinet—daintily striped in gold. Price without accessories **$38**



The Crosley 4-Tube 4-29

A beautifully designed set—both to ear and eye. Crescendon equivalent to one or more additional tubes of radio frequency amplification. Two toned mahogany finished cabinet. Price without accessories **$29**

West of the Rockies add 10% to all prices

"If inexperienced in radio, be sure your first set is a Crosley"

It takes neither practice nor mechanical skill to tune in stations all over the country. Children and old people operate Crosley radios easily. They are fool proof.

They are inexpensive. They don't tie up a lot of money.

They have proven their efficiency over a period of years. Thousands of letters report remarkable demonstrations. Hundreds of thousands of sets sold substantiate all claims to excellence.

They are made by a reliable, well known and financially strong concern, that guarantees them . . . absolutely.

The easy operation, tone and volume of these four new Crosley sets delight, not only the expectant beginner; they arouse the most confirmed radio lover to realization that Powel Crosley, Jr., has again made a revolutionary improvement in radio.

And the RFL sets possess *true* cascade amplification. For Crosley has utilized an entirely new patented circuit which achieves cumulative amplification, actually approaching the theoretical maximum efficiency per tube.

The Crescendon

In the 4-29 and the 5-38, the introduction of the Crescendon enables these two highly efficient radios to give almost unbelievable results and has lifted them away and beyond all competition.

The Crescendon is an exclusive Crosley device for increasing the weak signals of distant stations to full volume tones without distortion. Yet with these sets, loud nearby stations can always be softened practically to whispers.

Their striking beauty will please your eye, and your ear will introduce to you new qualities in radio, which you are sure to pronounce a revelation.

See the new Crosley sets at your dealers or write Dept. 49 for literature.

Crosley manufactures radio receiving sets which are licensed under Armstrong U. S. Patent No. 1,113,149, or under patent applications of Radio Frequency Laboratories, Inc.

NEWS BRIEFS FROM THE BROADCASTERS

KGW, PORTLAND, IS NOW 1,000-WATT STATION

Microphone Technique Being Taught in New York—A. A. U. Finals to Be Sent from KOAC

KGW, the Portland Oregonian, expects to have its new 1,000-watt transmitter in operation as these lines are read. Eastern listeners will have a new star at which to shoot.

* *

A school for the study of the technique of performing before the microphone has been opened in New York city at Steinway hall. T. H. Fellows and B. F. Gerald are the founders.

* *

Final matches in the National Amateur Athletic Union championships, to be held at Corvallis, Oregon, April 15 to 17, will be broadcast by the Oregon Aggie station, KOAC, on Friday, April 16, from 8:15 to 11 p. m. Pacific time.

* *

Thousands of sleepless listeners are recommending the Friday midnight programs broadcast by Crosley WLW, Cincinnati. It is then that the "Night Howls" take the air from the Crosley Sky Terriers. Well-known WLW artists perform under nom de plumes.

* *

A canary obbligato heard by WJZ's sharp-eared listeners has been traced to several canaries in cages in the lobby of the Hotel Commodore, New York, where music is picked up from Bernhard Levitow's ensemble. Unknown to WJZ, the songs of the little birds were given audience.

* *

Helene Sullivan, Metro-Goldwyn-Mayer star, is one movie actress who does a regular Radio act. She is heard over KNX, Hollywood, each Sunday afternoon from 4:30 to 5 p. m. Pacific time with her cinema chit-chat.

* *

KOIL, Council Bluffs, Iowa, with the placement of a permanent studio in the Hotel Fontenelle, Omaha, has added the name of Omaha to its location announcement.

* *

Nine hours and thirty-four minutes is the daily average time spent by KPO, Hale Brothers, San Francisco, on the air. About six of the hours are devoted to studio features, while the remaining time is used on remote control pickups.

* *

Mary T. Norton, United States representative from New Jersey, was an honored speaker last week on the congressional forum program broadcast from WRC and WJZ.

* *

WDAF, the home of the famous Kansas City Nighthawks, boasts three studios and one special broadcasting room located at advantageous points in Kansas City. Thirteen remote control pickups are also feeders for a well diversified program.

* *

"The Border Line," a four-act historical drama dealing with the first fifty years of the northwest territory, was broadcast last week by WGY, General Electric station at Schenectady. The prologue and epilogue were by Emma S. Backus.

* *

A cosmopolitan program presenting the themes of all races of the world being taught at the University of Nebraska, was recently broadcast over KFAB, Lincoln, Nebr., by courtesy of the Knife and Fork club and the Nebraska Writers' guild.

* *

John Wilbourn, one of Baltimore's leading tenors and popular as a singer of old English ballads and light operatic selections, has joined the staff of WBAL, as assistant studio manager. Mr. Wilbourn will be one of the regular features on WBAL's musical programs during the dinner hour, 6:45 to 7:45 p. m. eastern time, every Tuesday evening.

QUEEN OF PIANO AND ORGAN IS COVER GIRL

YOU are presented to Miss Eva Sharrard, the dainty, curley-haired Miss on the Radio Digest cover this week. Miss Sharrard is at present favoring Station WAFD, Port Huron, Mich., with her artistry, but she is well known in other cities where her delicate touch on the piano and pipe organ keys has identified her without special announcements to thousands of Radio fans. Her career began in El Paso, Texas.

Old-Fashioned Grannies Win Contest Over Flapper Kind

CINCINNATI.—The modern type of grandmother lost to the old-fashioned kind in the contest conducted by the Crosley Radio broadcasting station, WLW, Cincinnati. Votes were received from all parts of the country, the voters indicating their choice through a postal card. A total of 5,058 postal cards were received up to the time the contest closed. Each of the grandmothers received a number and their identity was kept secret, although a description of the ladies was given over the air.

Mrs. Margaret Poehner, seventy years old, and grandmother of seventeen children, 1919 Kentucky avenue, Cincinnati, won the first prize. Her voting number was 7.

Looking Ahead

When Land Values Began to Swell at Such a Rapid Pace that some speculators made fortunes almost over night it occurred to Dave P. Davis to make more land by filling in a shallow part of Tampa Bay. He built Davis Islands and thereon erected Station WDAE, associated with the Tampa Daily Times. Read about it in next issue of Radio Digest.

Ever See the Bees Gathering Honey from a Sunflower? There's a girl down in Fort Worth, Texas, with a voice that fairly drips with honey. They say she ranks about first in the country for the number of fan letters received. She is only known by the name of "Sunflower Girl." Read this romance in one of the forthcoming issues of Radio Digest.

Next Week's Installment of "A Step On the Stairs" will present disclosures concerning the great Radio mystery that will astound you. There will be some new revelations and a rapid crash of events that will leave you breahtless with surprise. Who killed Jeremiah Turner? Read it next issue and begin to figure on that prize money.

The Super-Torrodyne, a Super-Heterodyne Improvement, as built by J. E. Owen of the University of Oklahoma, will be described beginning next issue. Mr. Owen will give the circuit he used and name the necessary parts.

Don't Bloop! Learn How to Test for Noises by means of the apparatus to be described in the next article of this series now appearing in Radio Digest.

GOLD CUP CONTEST STARTS WITH BANG

16 POPULAR ANNOUNCERS PUT IN RACE ALREADY

Listeners Rush to Enter Nominations—Race Has Indications of Keen Competition—Save Ballots

In but a few hours after the last issue of Radio Digest had been placed on the newsstands, an enthusiastic admirer had nominated "Bill" William G. Hay, WLIB and WGN, and put him in the race early for the 1926 Radio Digest Gold Cup Award.

Other listeners, wishing to place their favorites in the list of candidates for the selection of the world's best for this year, hurriedly nominated fifteen other microphone personalities in the brief time between the appearance of the last issue and the time this issue went to press.

The competition this year for the solid fourteen-carat gold cup and the two additional silver loving cups has indications of an enthusiastic interest.

If your favorite announcer's name is not in the list below of those nominated, fill in the nomination blank at the right top of this page and get him into the running. Then SAVE your ballots for him. Don't miss a SINGLE ballot, for when these are turned in to Radio Digest in a group of CONSECUTIVE numbers, a pleasing and worthwhile bonus of extra votes is allowed the announcer for whom you are voting.

How Bonus Votes Are Given

The ballots, which appear weekly beginning last issue at the left top of page 2, are numbered consecutively. They will appear every issue until the close of the contest with the August 28 issue. Each of these ballots will count for one vote when sent in separately.

But when held until you have four consecutively numbered ballots, and sent in at one time to Radio Digest, a bonus of eight votes, or a total of twelve votes, will be allowed the candidate for whom you are voting.

The larger the number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes, or a total of twenty-eight votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. And for a complete series of ballots, including one from each issue from March 27 to and including the last, which will appear in the August 28 issue, a bonus of fifty votes will be allowed.

Send in nominations or ballots to the GOLD CUP AWARD EDITOR, Radio Digest, 510 North Dearborn street, Chicago.

Sixteen Announcers Nominated

The sixteen announcers who already have been nominated are:

William G. Hay, WGN and WLIB.
Phillips Carlin, WEAF.
The Hired Hand, WBAP.
Harold Isbell, KYW.
Gayle V. Grubb, KFAB.
Robert W. Griffin, WHO.
Pat Barnes, WHT.
Henry Field, KFNF.
E. L. Tyson, WWJ.
Paul Johnson, WCCO.
Lambdin Kay, WSB.
George D. Hay, WSM.
Graham McNamee, WEAF.
Leo Fitzpatrick, WJR.
John Daggett, KHJ.
Richard V. Haller, KGW.

Cup for Canadian

It is interesting to note that the list includes the winners of the 1924 and 1925 gold cups, in addition to men who no doubt prove the strongest contenders for the 1926 Gold Cup Award.

For the benefit of those readers who did not read the details last issue, it is repeated that this year two large silver loving cups have been added to the list of prizes. One will go to the second highest announcer, while the other will be awarded to the highest Canadian announcer at the close of the competition.

In case of a tie, duplicate cups will be awarded the winners.

HINT PLANETS MAY HEAR WORLD

WHITE BILL PASSES HOUSE BY BIG VOTE

RADIO LEGISLATION NOW DEPENDS ON SENATE

Senator Watson Appears to Hold Answer Which Rests on Which Course He Advocates

WASHINGTON, D. C.—After a heavy two days' buffeting, the White Radio bill recently rode a stormy passage through the house which sat as a committee of the whole, placing Radio broadcasting under the control of the secretary of commerce and a proposed federal Radio commission. The bill was passed by a vote of 218 to 124, over a bitter attack led by Representative Davis of Tennessee and other democratic members.

The accepted bill was very much along the lines of a third bill introduced at the present session by Mr. White, although a few minor amendments were adopted, one of which would prevent the secretary of commerce from remitting fines for infractions of the regulations.

The bill would create five zones throughout the country, from which five members, one from each zone, would be appointed to form a federal Radio commission.

Depends on Watson

But at the time this issue goes to press, the listeners in have no assurance that Radio will be legislated. The bill is now in the senate, along with the Dill Radio bill, the main provisions of which are similar. And Radio legislation depending upon the senate, leaves the matter resting in the hands of Senator Watson of Indiana; at least that is the consensus of opinion of the members of the senate.

It is admitted that there is a general appreciation of the importance of Radio legislation in the senate, but there is also a lack of interest and knowledge as to the requirements. His colleagues are depending upon Senator Watson to do what is best.

How and Where?

If Senator Watson sponsors a Radio bill, it is expected there will be a new Radio law enacted at this session of congress, and unless he does get behind and push for the enactment of one, the chances for Radio legislation are very slim. Senator Watson is enthusiastic for government control of the situation, but the question of how and from where it is to be controlled will be the bone of contention.

In the wrangling and milling over whether the secretary of commerce, the department of commerce, the interstate commerce commission, a federal Radio commission or some combination of those groups should exercise power over Radio, the paramount issue of whether or not we should have Radio legislation may be ground underfoot.

Congressman Free Tells How To Make Good Cheap DX Set

WASHINGTON.—If you are not entirely satisfied with your set, it may be a good idea to communicate with Congressman Arthur M. Free, at the House office building, at Washington, D. C., and find out how his son built his. Mr. Free is from California. During the debate on the White Radio bill, he said:

"Any boy can take, as my boy did, a bolt, a little wire, and a crystal which costs a few cents, and make a Radio set and he can listen in on any program anywhere in the United States. If he wants a little better set, he can take a little bit more wire, a few more nuts and bolts and get a tube, and he can make a tube set, paying $2.50 for the tube."

To Hold Hearings April 5

WASHINGTON, D. C.—The Radio copyright bill, sponsored by the broadcasters of the country, has been introduced in the house, by Representative Vestal of Indiana, chairman of the committee on patents to which the bill has been referred. The bill is identical with the Dill bill in the senate.

Joint congressional hearings on the Radio copyright bills now pending in both houses will begin April 5.

A second Radio copyright bill has been introduced in the house by Representative Vestal of Indiana. It is understood that this bill has been endorsed by the American Society of Composers, Authors and Publishers. No date has been set for hearings for this bill but it also has been referred to the house committee on patents of which Mr. Vestal is chairman.

NOW IS TIME TO TRY FOR ANTIPODE ISLES

WANT to hear Australia, New Zealand and Japan? Long distance fans will be gratified to know that just now is the best time of the year to try. Donald Wright, of Terminal Island, Terminal, Calif., reports that he is now regularly hearing 3LO, 2BL, JOAK and JOBK. The latter two are Japanese. The former two are Australian and New Zealand broadcasters. Mr. Wright finds that these stations are best heard between 2:30 and 5 a. m. Pacific time. (This is equivalent to 3:30 and 6 a. m. Central or 4:30 and 7 a. m. Eastern time.) Try for them some morning.

PRISONER ASKS FOR SONG HEARD IN JAIL

CHICAGO.—How the wonderful magic of Radio penetrates even prison walls and sends sunshine into the darkest corners of the world was revealed in a letter received at Station WLIB from prisoner No. 25372 at the Missouri State Penitentiary at Jefferson City, regarding the popular song, "The Lonesomest Girl in Town."

He is an ex-jockey, who in his hey days had squandered the world's goods on the kind of a girl described in the song. He wrote that he was washing other prisoners' clothes to support a one tube set.

SHE'S ONE SOPRANO YOU'LL LIKE

Ruth Heubach is a charming soprano who knows well how to use the microphone and you'll hear her on the WSAI community concert on Monday, April 5.

Station KTHS Offers Big Easter Broadcast

Three-Hour Program to Be Handled by Remote Control

HOT SPRINGS, Ark.—Simultaneously with the first long ray of sunlight as the Easter Sabbath sun climbs over the rim of the world, the carrier wave of Station KTHS, the New Arlington hotel at Hot Springs National Park, Arkansas, will start an elaborate and unique Radio program—with more than 2,000 artists taking part, and a visible audience of more than 10,000.

The program will begin at 5:32 a. m. Central time, taken from Kavanaugh field, Little Rock, by remote control over 55 miles of land wire. The broadcast will be opened by Rev. Harry Knowles and followed by music by the forty-piece Missouri Pacific band and many artists.

ASK FANS' AID IN SHORT WAVE TRY

April 3 Marks Beginning of Month's Test of Five Low Lengths

SCHENECTADY, N. Y.—All listeners who have short wave receivers and who are interested in the progress of broadcasting are asked to cooperate with the General Electric company engineers, who are conducting a series of tests in wave propagation of 32.79 and 65.5 meters. Beginning April 3, special telegraph tests will also be made on 15, 26.4 and 50.2 meters, by 2XAW, 2XAD and 2XAC respectively.

All listeners who can cooperate during these are asked to send their names to the Radio department of the General Electric company so that special report forms may be supplied them.

SHORT WAVE OBSERVATION BASIS OF IDEA

Science Revamps Theory

Dr. E. O. Hurlbut Suggests Possibility of Communicating with Universe by Radio Impulse

PHILADELPHIA.—Strange as it may seem, you may tune in and hear the celestial harmonies that whisper between you and the spheres—you may hear programs for Saturn, Mars and Mercury, to say nothing of the other planets, as they go whirling through space.

Dr. E. O. Hurlbut of the naval research laboratory at Washington, D. C., who recently addressed the Franklin institute, a nationally famous organization in Philadelphia, admitted that there is a possibility of interplanetary communication by Radio. In brief, Dr. Hurlbut said that if interplanetary communication is at all possible, it will be achieved through Radio wave lengths of less than ten meters.

Waves Go Somewhere, But Where?

In the course of his lecture on "The Kennelly-Heaviside Layer and Radio Wave Propagation," he explained that all other waves except those under ten meters collide with the atmospheric layer at an altitude of about 100 miles, and rebound to earth. But those below ten meters are more roving. He inferred that after leaving the earth they just disappear, and at the present time no scientist has been able to determine just where they land.

That they leave the earth is a fact; it is also a fact that they do not come back. Then the question remains: where do they go? Upon the answer hangs the possibility of this generation or of any other finishing the nocturnal repast and then flipping the dials to discover just what April strawberries are selling for on the Saturn produce exchange.

How Short Waves Reach Out

Dr. Hurlbut spoke in a truly scientific light and said:

"A quantitative theory, giving a clear picture of the manner of the passage of Radio waves over the surface of the earth has resulted from the recognition and measurement of the skip distance for Radio waves below forty meters in length. The electrons of the upper atmosphere, known as the Kennelly-Heaviside layer, activated by the earth's magnetic field, play a crucial role.

"The shorter waves are propagated longer distances by refraction in the layer and reflection at the ground. They reach heights of about 100 miles. At this altitude there are ten to the fifth power electrons per cubic centimeter, that is, about ten billion electrons. The theory explains many complex phenomena of fading, directional variation, and reception with vertical and horizontal Hertz antennae."

The layer of which Dr. Hurlbut spoke was named after Dr. Kennelly, professor of electric engineering in the Massachusetts Institute of Technology, and the late Dr. Oliver Heaviside, of England.

Station Changes

Two new stations have been licensed this week, WLB, the University of Minnesota station at Minneapolis, Minn., 500 watts, 277.6 meters, and WJBR, Omro, Wis., 50 watts, 227.1 meters. The following stations have been relicensed: KFUM, Colorado Springs, Colo., 100 watts, 239 meters; KWUC, Le Mars, Iowa, 50 watts, 252 meters; WPDQ, Buffalo, N. Y., 50 watts, 205.4 meters; WRAK, Escanaba, Mich., 100 watts, 256.3 meters.

Four stations have officially changed call letters. KFMQ, Fayetteville, Ark., is now KUOA; Santa Maria, Calif., KSMR; WHAT, Minneapolis, Minn., WGWY; and WKBK, New York, N. Y., WBNY.

WTAQ has moved from Osseo, Wisconsin, to Eau Claire.

Power changes include 1,000 watts for KFNF, Shenandoah, Iowa; 2,000 watts for WEBH, Chicago, and 3,500 watts for WLWL, New York.

Firemen Turn On the Mikes

MILWAUKEE Smoke Eaters Back Again On WHAD After Mourning Radio Leader Killed Answering Alarm. Swiss Cheese Makers Yodle a Hit. Turnverein Assists.

THERE'S a wee sprig and a bit of purple and black over the double doors of Engine House No. 3 on the Milwaukee South Side. It is a house of mourning.

Not so long ago the shining of the engine brass and the general slicking up was made lively by a ragtime jazz piano accompaniment under the nimble fingers of Merritt Ramus. The piano is in the music room which formerly had been the stables where noble horses champed and stomped as the alarms came tingling over the wires. At first the men missed the horses but Tom Saskowski got out his banjo and August Boehm his harmonica. They were so good they played at a benefit show and then they were invited to broadcast over WHAD, the Marquette University-Milwaukee Journal Radio station.

This encouraged others in the department with musical tendencies and Engine House No 3 became a regular musical center. The stall partitions were knocked out and the music room came into being. But there came a day when the lid of the old piano was closed down. Tom and August put away their instruments.

You see, in the first place they were all firemen. Captain Ernest Glander never failed to remind the men of that, although it was he who started the Radio diversion. There was an alarm. Clang! Clang! The apparatus tore out the door. Zip and they reached a railroad crossing—a passing train—the hurtling motor of Captain Glander—a crash and in a moment the veteran fire fighter had passed to his reward.

In the group below may be seen the old ensemble as they used to appear before the microphone and in the chair with his accordion is Captain Glander. The captain was especially appointed by Chief Steinkellner, as the chief said, "to keep the boys from blowing the roof off."

But as these lines are written the boys are planning to go on the air again in a few days. They are going to continue the good work to which the captain gave the impetus. They feel he would be pleased over in the Beyond to know that his comrades are carrying on the job to make people happier. And the listeners over WHAD, the Marquette University-Milwaukee Journal station will be glad to welcome back a feature of the programs they have sadly missed.

There's a corking good quartet and whoever thinks a smoke eater can't sing will learn something to his advantage by listening over WHAD when Tom Murphy, Joe Ross, Adolph Ketelholm and Tom Dugan are announced. Boy, they have volume and distance and harmony and they're there like a four-eleven in a lumber yard or business district.

Milwaukee has given a hint to broadcasting stations in other cities. Why not utilize the talent that sits in the stations day after day between fires? The boys like the fun of producing the music and the fans like to hear them.

Of course WHAD does not depend on the firemen for all of its talent. It seems that Milwaukee is simply overflowing with good music and good cheer. It is one of the traditions of the town. In the West Side Turner hall the old Turnverein has carried on its regular Sunday afternoon concerts for the past seventy-two years. These concerts are now broadcast by WHAD. One of the most popular Turnverein soloists is Helen Schnapp, a soprano with unusual microphone ability.

The four o'clock programs have become especially popular, not only in the city, but in the rural communities and the surrounding towns. Wisconsin is famous for its cheese and there are sections where its manufacture is the sole industry. From Monroe, where the annual cheese fair is held, comes a yodeling quartet which is one of the features of this four o'clock program. All four members of the quartet are natives of Switzerland. During the international tests they sang in the tongue of their fatherland. Miss Jean Gora, dramatic soprano, and Everett Williamson, baritone from Racine, are two of the popular soloists. Miss Bertha Schaller is one of the violin soloists.

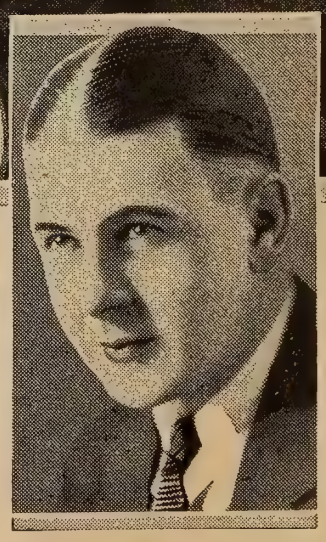
Home parlor dances for small parties are very popular in the vicinity of Milwaukee, and this is made possible in many homes by the Stroebel dance orchestra heard through the Radio receivers from WHAD of the Marquette University-Milwaukee Journal. This orchestra is up to the minute with the latest dances and also furnishes more formal numbers for the more sedate dancers. It draws the line on the remote Ford toddling. From the Marquette University studio may be heard the concerts of the Adelphi orchestra.

A great deal of comment has been made concerning the remarkable clarity of music as it has been picked up by remote (*Continued on page 8*)

When Milwaukee and her neighbors dance at home they tune in the very excellent Stroebel dance orchestra (below) which is versatile, presenting not only the latest jazz but the more classic steps preferred by the sedate.

On Sunday afternoons comes the voice of Miss Helen Schnapp (left) over WHAD from the Turnverein while on Mondays at 4 may be heard Miss Jean Gora (below).

At left is the company of syncopating firemen preparing for a run to the WHAD studio. The late Captain Glander is seated with accordion. Everett Williamson (right) baritone.



"Yo-ho-ho!" Sing Pirates Bold

PIONEER BROADCASTER, WJAZ, Defies "Autocrats of the Air," Makes Minion Walk Plank and Lays Down Brass Band Broadside on Canadian Wave.

Baritone broadside from the pirate broadcaster, WJAZ, by Hivoltz Smith.

FOREWORD: Lieutenant Commander Eugene F. McDonald, commissioned by the United States Navy, sea rover and adventurer into the far north, where he rendered valuable service in the cause of science, has been declared an air pirate by the forces of the government. Returning on his good ship Peary, which had carried him to within eleven degrees of the pole, he received scant courtesy from those who are in power in Washington. He launched his new broadcaster from the Chicago quays, and although she took the air under that pioneer pennant, WJAZ, she was allotted but two hours out of a week's schedule. Chafed by these restrictions, the Commander snapped his fingers at the Department of Commerce and appropriated a Canadian wave which he deemed would cause little grief to any outside the department at Washington. He was then charged with piracy of the air, threatened with a felon's cell and the confiscation of his station. And so our story begins.

HIGH in his conning tower the thirteenth district inspector crouched over his wave meter tester and scowled. And the longer he looked the more he scowled until finally the black cloud on his brow burst into a storm of fury.

"They're off again!" he snapped, sharply and vividly like chain lightning.

"Who?" inquired an assistant with glazed hair and slightly worn patent leather shoes, who stood at a respectful distance and toyed a pencil between his pearly teeth.

"Never mind, 'tend to your work. I knew it, expected it, they're pirates, air pirates. I told you to get Francis. Why haven't you gone? Must I stand here yelling at you all day to get you to do anything? Go! Go! Great jumping Jehosophat, when in the name of Christopher Calliope Columbus—" The inspector was bending over the meter tester.

"Aye, aye, sir!" A fluffy-haired blond, note book in hand, jaws oscillating, stood at attention.

"Very well, Francis. Sit down—and give your chin a rest."

The fluffy-haired blond drew up a chair and paused, before sitting, to deposit his quid of Jolly Tar in the tall brass goboon at the end of the table.

"Aye, aye, sir," he said, solemnly wiping the corners of his mouth with a sepia-tinted hankerchief. "What is it, sir?"

"Told you they're off! They're off! How many times—"

"Yes sir. Yes sir, I was just lookin' at the tape myself. It's only the first race. I gotta bet on Jazzbaby for place in the fifth. I know a bookie—"

"Don't Jazzbaby me! To blazes with the races! I'm talking about these almighty pirates—"

"Beg pardon, sir. With the start they're gettin' the pennant oughta be a—"

"I said WJAZ! WJAZ! They're off their wave. They've pirated a foreign wave and the chief has forbidden. Take a letter; no, a telegram. You chew too much, Francis. Try stogies but don't swallow them. Are you writing that? For Pete's sake, amen!"

"Aye, aye, sir!" Then Francis took the telegram addressed to the chief.

In his high paneled office the chief, in Washington, was dictating orders to six stenographers. Three boys stood in a line to carry messages. The chief opened the telegram from the inspector. In one bounce he hit the ceiling. Coming down to port on the edge of his chair he began to sway and his mouth flew open.

"Who am I? What am I? Why do I sit here? I regulate the air and it is not regulated. Who cares what I say? Am I to be laughed at? What?"

"Aye, aye, sir," The first boy, not being quite certain what he should say, followed the usual formula.

"What? Even you!" The chief might have been Julius Caesar speaking to Brutus as the latter wiped his bloodly blade on his sleeve. "But I shall see who's who and what's what and who is running this air. I'll have that pirate thrown in irons!"

* * *

There were sounds of merriment aboard the WJAZ as Captain McDonald paced trophy bedecked cabin. Hivoltz Smith, craftiest buccaneering baritone on the seven ether seas,

(*Continued on page 8*)

Pilot house (right) of the WJAZ, where the buccaneering crew made ready to swoop down on their unsuspecting prey. And here they are (below) ready for the dirty work. From the left, George Hivoltz Smith, mate; R. Cutthroat Herrick, engineer; Sharktooth Matthews, announcer; Dagger Price, studio operator, and Skullenbones Selleck, station operator. All set for action.

VARIETY OF DISHES MADE OF MACARONI

SPAGHETTI CAN ALSO BE PREPARED MANY WAYS

Miss Betty Crocker Gives Recipes and Supper Suggestions for These Very Tasty Foods

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

IT IS because so many of my Radio audience seem to be unfamiliar with really good macaroni and spaghetti dishes that I like to talk about them often. There is so much to say about these foods and we have so many delicious Gold Medal recipes for them that I simply can't resist giving you a macaroni and a spaghetti dish for our lesson today.

Many women tell me that they tire of macaroni and cheese but that they do not know any other way to prepare macaroni. I am going to tell you some of the many ways in which we prepare macaroni and spaghetti in the Gold Medal flour kitchen. Sometimes we serve it plain with bread crumbs which have been fried in butter, just as noodles are often served. Again, we add hot cream or hot white sauce. Good macaroni properly cooked does not need an elaborate sauce.

We prepare several varieties of macaroni and cheese dishes. Plain macaroni may be served with finely grated cheese sprinkled over the top, or with cheese added to the white sauce and poured over the macaroni. For a baked dish, we often combine layers of macaroni and of cheese with or without white sauce, cover with buttered crumbs and bake. Instead of white sauce, we sometimes pour tomato sauce and cheese over the macaroni. Meat is used with macaroni in any number of ways. An escalloped dish of left over meat may be prepared by using layers of cooked macaroni or spaghetti with the layers of meat and gravy, instead of the creamed mixture. Macaroni combined with chopped celery or ham makes an excellent filling for stuffed peppers. Many women who are fond of chop suey use macaroni in that dish.

Macaroni Salad

Another unusual dish is macaroni salad. That may not sound good to you, but I assure you it is delicious. Combined with salmon and seasonings it makes a very pretty salad. Other delicious combinations you could use are apple, or green pepper, chopped cooked eggs, or fresh tomatoes with a little chopped celery and sweet pickle. Personally, I do not care for cooked dressing on macaroni or spaghetti salad. I prefer either French dressing or mayonnaise, but that of course is a matter of taste.

The macaroni and salmon loaf makes a good one-meal dish that is especially nice for a luncheon or supper dish. It is cheaper than meat and potatoes and takes the place of both. Here is the recipe: 1 cup milk, 4 tablespoons cream, 2 cups stale bread crumbs, 2 eggs, 1 cup cooked macaroni cut in pieces, 4 tablespoons melted butter, 1 teaspoon salt, paprika.

Method: Heat the milk and bread crumbs together. Stir in the slightly beaten egg yolks. Add macaroni, salmon, cream, butter and salt. Either canned or cooked salmon may be used. Fold in the

HOUSEKEEPERS GET ATTENTION OF KOAC

CORVALLIS, Ore.—Afternoon broadcasts for the homemaker were begun recently by Station KOAC, the Oregon Agricultural college here, under the title "The Housekeepers' Half Hour." This service is put on the air each Wednesday and Thursday afternoon from 2:00 to 2:30 o'clock Pacific time. It is in addition to the regular half hour homemakers' program that has been included in the college station broadcasts since last October on Wednesday evenings from 7:30 to 8:00 o'clock.

SHORT WAVES

By Marcella

Jean Sargent, WHT's Jean, is not married. She is just as nice looking as her voice sounds; yes, and her disposition is best typified by the two words—good scout. Age? Well, you know we ladies are a little skittish over such questions, but I will answer it by saying Jean is middle-aged and her hair is a beautiful silver gray, mixed with black. You will find her an extremely interesting person with all sorts of interesting experiences and tales of business. Yessirree—I agree with you in saying she's the best lady announcer on the air—in fact, she's the only one I care to hear.

* *

Yes, K. H. R., Emmet and Dick Long, both of WCCO, Gold Medal fame, are brothers. Dick is familiarly called "the blond Apollo" and he conducts the Nankin cafe orchestra. Emmet is portly and a trifle ruddier. He conducts the Golden Pheasant inn orchestra. The two cafes are directly across the street from one another. According to E. H. Gammons, my WCCO friend and adviser, both boys started playing in bands and conducting them when they were "knee-high to grasshoppers." Dick told him that once he had to borrow a pair of long pants to get a job at Minnehaha Park.

* *

As for H. I. B., try again. "The Merry Old Chief," WJR, and Phillips Carlin and Leslie Joy, of WEAF, all are "handsome as they sound" but married. Sorry they sound single.

* *

Jack Robertson, one of WFAA's "Early Bird" entertainers, is twenty-nine years old and single. Besides that, answering M. A. D. et al, he is extremely modest and blushes furiously every time he gets a mash note. He is quiet in his habits and spends most of his time with his Hawaiian guitar which he loves devotedly. Stands 5 feet 9 inches and tips the scales at 155. He is dark and has extremely dark eyes, which may be termed—ah-h-h—the caressing type.

* *

Wendell Hall, the "Red-Headed Music Maker," is in New York on 455 meters—WJZ. He is billed there for three weeks, two times a week, beginning March 15 and ending this week. Don't know whither after that. Wendell started with is ukulele ditties over KYW "back when"—many years ago—and has been a tremendous success ever since. Probably his best-known composition is his "Rain" song. He courted his sweetheart—now Mrs. Hall—over the air and was married via the WEAF chain. Tall, red-headed, even dispositioned, pleasant and inclined to soften his speech. Has cute little red mustache and a big raccoon coat. Mrs. Hall is best described as a jolly bunch of smiles.

* *

Nick Lucas, the crooning troubadour, formerly a member of the WEBH Oriole orchestra, is now going the rounds of the Orpheum vaudeville circuit. Heard him a week ago in Chicago and he stopped the show. Don't know when he'll be back on the air, but of course he's on the records.

* *

WBAP's "Sunflower Girl" goes under the real name of Bessie Coldiron—a rather chilly cognomen for such a beautiful, talented, Titian-haired Miss of twenty years. The Hired Hand describes her as all a bachelor could desire, and the H. H. is an experienced recommender.

* *

Who was it wanted to know if Graham

Loss of Avoirdupois Cause of WLW Worry

Station Fears Women May Get Too Thin

CINCINNATI.—One of the weighty problems of the Crosley WLW station here, is the possibility of its women listeners becoming too thin. This situation has arisen through their participation in the setting-up exercises which William N. Stratdmann, physical instructor of the Cincinnati Y. M. C. A., broadcasts every morning, except Saturday and Sunday, at 7:30 Central time.

While many of the women devotees to the art of physical exercise have reported they have lost weight, others have reported gaining weight through the same exercises. But it is the ones who have lost their extra fat who are concerning some physicians who believe too much displacement of fat is not healthy, as bodies need fat as much as other things which go to make up a human being.

WOMEN'S PROGRAMS INDEX

Saturday, April 3

Eastern	Central	Mountain	Pacific
9:30 a. m.	8:30 a. m.	7:30 a. m.	6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.

11	10	9	8

WEAR (389.4m-770kc) Home service talk.
WHT (399.8m-750kc) Women's club, Jean Sargent.

12 n.	11	10	9

WGN (302.8m-990kc) Household hints.
WQJ (447.5m-670kc) Home Economics program; character analysis.

12:30 p. m.	11:30	10:30	9:30

WGN (302.8m-990kc) Discussion of fashions.

12:35	11:35	10:35	9:35

KYW (535.4m-560kc) Table talk.

1	12 n.	11	10

KGW (491.5m-610kc) Household helps, shopping guide.
KMA (252m-1190kc) Domestic science topics.

4	3 p. m.	2 p. m.	1 p. m.

KJR (384.4m-780kc) Tonight's dinner.

6:30	5:30	4:30	3:30

CNRV (291.1m-1080kc) Women's talks.

Monday, April 5

Eastern	Central	Mountain	Pacific
9:30 a. m.	8:30 a. m.	7:30 a. m.	6:30 a. m.

WWJ (352.7m-850kc) Tonight's dinner.

a STEP ON the STAIRS

By ROBERT J. CASEY

Radio Dramatization by FRED SMITH

Illustrations by HILMER C. OLSON

Synopsis of Preceding Chapters

IN THE first four episodes of "A Step On the Stairs," which are now available for 25 cents in a special reprint, we find a group of a dozen members of the Turner family in the hunt-room of the old Turner manse. They are nerve-strained and very jumpy as the result of a number of weird incidents connected with the attempted seance whereby Peleg Turner, the last of the house to die, attempts to speak from beyond the grave through a Radio loud speaker and tell them who killed his brother, Jeremiah. Ardwyn, the lawyer, presides. Mary Williams seems to be involved in most of the strange events, and the finger of suspicion is pointed at her by Aunt Helen, a gabby old widow; Cousin William, companion to Aunt Helen; Hazel Stanton, a girl whose relation to the family does not seem entirely clear, and Henry Graves who offers his protection by marriage. His offer is spurned. In the last episode John Carton, apparently Mary's accepted lover, appears in the room after the others have left for refreshments in another part of the house. Mary had fainted when she thought she felt the corpse of Peleg Turner entering the room through the front door, supposed to be barred except for the passage of the dead bodies of Turners going to their final resting place. Ardwyn left to get her a sedative. Hari Singh, the East Indian servant, unexpectedly becomes an ally of Mary when Carton, who seemed to be hiding from arrest on suspicion of the crime, is about to be trapped by other members of the party. The servant lets Carton out a side door.

Before Hari Singh is able to return, the other guests enter the room and demand an explanation of Mary as to the voice that had been heard in the room. Mary evades the questions briefly, but soon Hari Singh calls for help. He is discovered dragging in the body of a man which he said he had found outside the door in the snow. It is Milford Jones, with a fractured skull. He had disappeared earlier during the seance. While suspicions for the various evil happenings are being cast about, FYX starts up. A number is rendered and FYX stands by for the ship's SOS. Suddenly—Peleg Turner's voice comes out of the loud speaker. He curses Jeremiah's murderer whom he says is in the house and will pay the price 'ere dawn.

THE STORY CONTINUES.

CHAPTER ELEVEN

Eleven and Thirteen

A MOMENT later it was impossible to distinguish one voice from another in the mad hysteria that swept through the dark. The shriek of Hazel Stanton died to a sob and men's voices, frankly panic stricken, took up her cry for release. Vainly Ardwyn called for order. The situation had passed beyond his hands. And then, unexpectedly, came a quieting influence from a new source.

It was the voice of Tolliver—bellowing but hilarious—that crashed to the teak rafter through the din of fear.

"Say, cut out the opera," he roared. "This place is getting battier than 'The Bat'." A few of the guests here and there ceased their noise to listen to him.

"What's the matter, Tolliver?" inquired Ardwyn when he could be heard.

"Not a thing, Mr. Ardwyn; not a thing," declared the bellowing voice. "But it seems to me we're takin' quite a lot for granted here. Was that Peleg Turner's voice we just heard on the Radio?"

"Of course it was," moaned Aunt Helen Holmes. "I know it was. I'd know dear Peleg's voice anywhere. We all know it was Peleg Turner's voice—and him in his grave these four weeks. . . ."

"Well, you have it on me," admitted Tolliver. "Me, I'm not so sure. It mighta been old Peleg's voice an' then again it mighta been Abd-el-Krim's voice—or pretty near anybody's voice—or somebody playin' a piano. With a loud speaker like this one you never can tell."

"It was Peleg Turner's voice!" This belligerently from across the room, presumably stated by Henry Graves.

"Who can prove it?" demanded Tolliver scoffingly. "A sawbuck to the man or woman who can show how any man dead or alive would be nutty enough to attempt to put over an idea on a mob of cuckoos like this."

"It was Peleg Turner an' him in his grave these—" Aunt Helen's wail was smothered in the protest of others who felt that their judgment was in question.

"Of course it was Turner's voice," broke in Cousin William Caryl. "Yes! Yes! Who else could it have been?"

There followed a mumbled argument and then a moment of silence through which Mary Williams' voice rose gently but firmly.

"I agree with Mr. Tolliver," she said. "I knew Uncle Peleg very well. I thought it was his voice in the loud speaker. But now I am not so sure."

"Miss Stanton thought it was," retorted Aunt Helen indignantly. "She recognized it just as I did, an' she's just as bright as others around here I could name, Mary Williams." Mary did not rise to the bait. Instead, she called suddenly to Ardwyn.

"LOOK out for Miss Stanton," she pleaded. "Don't let her get near the front door. Watch the front door."

"Let George watch the front door," suggested Tolliver. "Me, I ain't goin' to stir outa my tracks until somebody gets this place restored to comfortable chaos."

"Miss Stanton is not in her chair," charged Mary Williams. "I am right where she was sitting and she is gone."

"Let her go," bellowed Tolliver. "What difference does it make. We still have enough maniacs left to make the evening interesting. I smell something. . . ."

"So do I," said Miss Williams.

"Ether," diagnosed Tolliver. "Just what we needed to complete the program. . . . What's that? . . . Somebody just put something into my hand."

"What?" demanded Ardwyn.

"Leggo!" shouted Tolliver. "Leggo my hand. . . . Aw, doggone. . . . Somebody took it away again."

"Tolliver," called Ardwyn with a queer note in his voice. "Just who are you and what are you driving at?"

"Me, I'm a voice in the dark," replied Tolliver cheerily. "I'm a customer in a three-dollar seat wonderin' how all this is goin' to turn out. If you're askin' me, I've seen worse shows but I ain't been actin' in 'em."

He halted as if with a sudden swelling of the tongue as a stream of light struck him squarely in the face.

"An electric flash lamp," shouted Ardwyn. "Who had that? Who turned it on?"

"It's out again," murmured Tolliver regretfully.

"So far as I know, nobody who came into this room tonight carried a flash lamp," Ardwyn stated calmly. "It wasn't in evidence a moment ago when we needed it. Now I should like the person who is holding it to turn it on again and identify himself."

"Hari Singh!" repeated Ardwyn impatiently. "Open the door and get us a light."

"Where are the matches?" asked Tolliver evenly. "It might be a good start to light our own light. We could yell for Hari Singh afterward."

"The matches were on the table a minute ago," returned Ardwyn. "They're gone now . . . and, ladies and gentlemen, something is amiss here. I do not wish to alarm you but we had better come to an understanding about the matter right away.

"WHEN this seance started we were all grouped about the table. With very few exceptions we should be in the same positions now.

"I should like to have you draw your chairs closer to the table." A sound of moving furnture gave him an immediate response.

"Very well," he said. "Now every one of you will take the hand of the one next to you on both sides, thus making a human chain about the table. If the chain is complete, everyone should have both his hands occupied. If anyone has one hand free, call out."

"All O.K. here," came a report from Tolliver. "Just what kind of a game is this, anyway?"

"Be still, Tolliver," begged the attorney. "Is there anyone who seems to be at a break in the chain?"

"Not on this side," whispered one of the women.

Ardwyn hesitated a moment and then resumed.

"Well, now," he said. "I shall break the chain here and I shall make a circuit about the table to call the roll. I shall touch the head of each of you in passing and I shall count aloud. This gentleman on my right is number one. . . . The lady to the right of him is number two. . . ."

He halted as if with a sudden swelling of the tongue as a stream of light struck him squarely in the face.

There was no response.

"Please don't make a joke of this, ladies and gentlemen," the lawyer begged. "We have had enough mystery tonight and it is essential that we know who turned on the light. . . ." But his plea ended in the unfathomable silence.

"Hari Singh," he called. "Where is Hari Singh?"

"Humph, just what I thought," commented Aunt Helen. "The heathen has locked us in an' gone off somewhere. You might know he'd be mixed up in the scandalous doin's someway."

"What ought to be the total?" inquired Tolliver.

"There were eleven of us in this room when the doors were locked," explained Ardwyn significantly. "Here are numbers three and four . . . and five and six. . . ."

"That makes me number seven," said Tolliver. "Hurry up your game. I'm at the end of the table and it's a long reach between hands."

"A lady—number eight," counted Ardwyn. "Two gentlemen—nine and ten. And I can count myself as eleven. . . ."

He paused with a sudden intake of breath.

"But you haven't finished," came a horrified voice. "There's someone next to me. . . ."

"There is," gasped Ardwyn. "You are right. Here—is number twelve. . . . And another still—thirteen!

"There should be eleven of us here. . . . There are thirteen!"

He repeated the total in an awed tone.

"Thirteen!" And only a terrified moaning broke the silence.

CHAPTER TWELVE

Lights Out

FOR the first time since the invited twelve had gathered in the gloomy hunt-room to keep their weird tryst with death, Frederick Ardwyn was plainly nonplussed. For a chill minute there was no sound of a voice, only the muffled moaning of some woman semi-conscious and apparently afraid to scream lest she attract the attention of the two unidentified visitors. Then, somewhat shaken and making no attempt to conceal his emotions, Ardwyn called loudly for Hari Singh.

As before, his call echoed in the long room without response.

"Can't anyone find the matches?" he called. "Break the chain and look for the matches. They should be on the floor somewhere near the candlestick."

"Maybe we're better off in the dark," suggested Tolliver. "No telling what our new friends look like."

"Shut up and look for the matches," ordered Ardwyn.

"I'm looking," replied Tolliver. "So is everybody else. This is my hunting ground, you—get off my hand! That's the second time somebody has walked on my hand. . . ."

A generator hum sounded in the Radio.

"Quiet a moment," counseled Ardwyn. "There's something on the Radio again."

"Me, I've heard enough Radio," declared Tolliver from under the table. "Get off my hand—doggone it—a man ain't safe even under the table in this place."

"This is Station FYX," came the voice from the loud speaker. "Station FYX signed off a few minutes ago at the request of the coast guard to avoid interference with an SOS call from a boat on Pelican Bay. This station will resume transmission in five minutes. The coast guard station reports a mystery in connection with this call. The ship to which it was traced apparently was not in distress at all. She was overhauled in an attempt to slip through the narrows without lights. It is believed that the call was sent out to create a diversion and draw the attention of the coast guards while some other craft made a landing of contraband somewhere on the bay front. Please stand by a few minutes for our studio program which will be resumed from our studio in Portsmouth."

Tolliver laughed.

"Bootleggers," he commented. "All this riot about some numb wits tryin' to land a launch-ful o' hooch. . . .

"Ardwyn, are you sure you counted right?"

"GET the matches, you fool," countered Ardwyn. "You heard me count. Nobody could have changed places without breaking the chain. The break would certainly have been noticed. There are thirteen persons in this room where there only ought to

be eleven and we'll never know who they are until we get a light."

"Who can they be?" whispered Cousin William Caryl.

"Who am I to say?" replied Aunt Helen Holmes. "All I know is I been actin' a lady ever since I came into this den of evil. An' all I'm prayin' is I get out again."

Her voice cracked for all that she spoke in the mechanical sing-song of the professional exhorter. It was a whimper toward the end.

"Murderers, probably, Cousin William," she said. "Murderers come to kill us all just like Cousin Peleg Turner said they would. Listen. . ."

"I can't hear anything," observed Cousin William. "Nothing but this bull of Bashan under the table cursing about somebody stepping on his fingers.

"Keep close to me, Cousin William, keep close to me. I'm afraid. Pray for a light, Cousin William. Pray for a light."

"If some of you people will let me up we'll see what's going on here," announced Tolliver, exultantly. "I think I've found the matches. Leggo of me. Leggo. . ."

His voice choked off in a surprised gurgle and there came a crash of a breaking chair and a shriek.

"Two can do that," he gasped a moment later, his voice strained until almost unrecognizable. "There's one for you." A second crash sounded through the room.

"The murderers," screamed Aunt Helen. "They're killing him."

"Leggo my neck," commanded Tolliver. Another unheaval shook the table and nearly overturned it.

"Quick — Mr. Ardwyn — quick — on the table. There they are. The matches—I got him now—I got him now. . ."

And then came the slipping feet on the oaken floor and the labored breathing of the fighting men.

"I have the matches," shouted Ardwyn. "Hold him a second . . . just a second. . . We're eight to two. . ."

"Don't light that match!" came a harsh command from close to his elbow. "I'll shoot to kill at the first flicker."

While waiting for the amazing complications to be brought out in the next installment of this remarkable Radio mystery story, try to figure out these questions: Was it the odor of ether that Tolliver thought he smelled? Whose hand held the flash light? Who fought with Tolliver and threatened the first to strike a match? Don't miss a line. Get the next issue as soon as it appears.

LEGION RADIO POST MEETS EACH WEEK

Veterans of World War Not Living Near Organized Chapter Are Eligible for Membership

OKLAHOMA CITY, Okla.—The only American Legion Radio Post in the world holds its weekly meeting every Saturday night at midnight through Station KFJF, here. The post is convened and adjourned in due form and for an hour business is transacted and entertainment enjoyed.

Anyone who saw service in the World war, and who lives where there is no regular post, is eligible to membership. The dues are the same as those of a regular post, $3.00 per year, giving the membership certificate, the American Legion weekly and the Oklahoma legionnaire.

Get On Killer's Trail and Follow It to End

Last Chapters of Mystery Play Hold Many Clews

Do your mystery story sleuthing early—but not too early.

Many last chapters to "A Step on the Stairs" have already been received by the Mystery Story Editor of Radio Digest. But they are premature. No one can, from the facts already in hand, reasonably draw safe conclusions as to the real culprits, nor as to the innocence or guilt of the characters thus far introduced.

Some big surprises are in store for the final installments. Thrills of a new kind, not yet presented, will startle both readers of the story as it now is appearing weekly in Radio Digest and listeners of the drama as it is heard from the various broadcasting stations.

Take this tip. Study every fact thus far revealed from the first chapter to the current issue. Compare the data thus obtained with the new facts to be developed. Match them one against the other. And when you have all of this material together draw your deductions and write that chapter. It's a business proposition. Get it right and Radio Digest will give you a share of the $500 reward.

Get the murderer of Jeremiah Turner, dead or alive, and collect the reward!

$500 in Gold

FOR THE SOLUTION OF

"a Step On the Stairs"

REPRINTS NOW AVAILABLE

SO MANY people are attempting to win part of the $500 in Gold prizes which are being offered for solutions to "A Step On the Stairs," a reprint of the first four installments has been printed and may be had for the nominal charge of twenty-five cents, in coin or stamps, to cover the cost of handling. Address your order to the Mystery Story Editor, care of Radio Digest.

The chosen stations, which are broadcasting "A Step On the Stairs," in Radio play form, are given on page eleven. The days and the hours are listed.

THE PRIZES

The prizes are seventeen in number. First prize is $250; second prize is $100; third to seventeenth prizes inclusive, are $10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story will be published consecutively each week. The first appeared in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unraveling the mystery accurately, will win. The method of preparing the solution—its neatness, legibility, etc.—shall be considered.

RULES OF CONTEST

1. Solutions must be received not later than midnight of Saturday, May 1. The ninth installment of the story will appear in the April 24 issue. The author's intended and final chapter will appear in the May 15 issue, together with the announcement of the winners' names.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon one side of paper.

4. The decision of the judges, to be named later, will be final.

Radio Club Notes

The committee back of the movement to establish a Radio Listeners' club in Evansville, Indiana, communicated with Radio leaders of Cleveland and Indianapolis to obtain detailed information so they could go ahead right. Edward Birdsall, at the head of the Listeners' club of Cleveland, was asked for aid and gave it gladly. Station WFBM of Indianapolis, has also helped the cause. On receipt of exact data from various other sources, the first meeting will be called for adoption of a constitution and election of officers. Indications are that membership will quickly run into the hundreds.

* *

"Montgomery for Better Radio Reception" is the enterprising slogan of the Montgomery (Pa.) Radio club. This club was organized March 3, with 150 members at the first meeting. The president is Joseph Shelley and the vice-president is Harold E. Miller. It is surprising how much Radio interest and desire for improvement in receiving conditions there is in any locality, once somebody starts the ball rolling for the formation of a club.

* *

Janesville (Wis.) Daily Gazette is organizing a club to decrease radiation in that locality and has now joined the long list of newspapers reprinting the Radio Digest blooping series.

* *

Of the thousands who have sent in "I Won't Bloop" pledges, we must put down Harold Shields, Petersbury, Alaska, as being the first to help the cause from this far away state. Antonio Gomez is our first member from Havana, Cuba. Our Mexican friends seem to have been too busy settling who gets the oil profits to join as yet, but there is still hope.

* *

Pennsylvania certainly came through this week and told us what it was doing. Even the dealers have organizations interested in improving Radio reception and recently the Williamsport (Pa.) Radio Dealers association, at one of its weekly dinner meetings, invited Lewis W. Heath, manager of the Pennsylvania Power and Light company, to tell them what his company was doing to eliminate any interference it may have been causing. George Knoll, trouble shooter for the power company told those in attendance of several interesting cases that had been settled satisfactorily.

* *

Getting back to the home town for a moment. Compelled by its rapid growth to seek larger quarters, the Broadcast Listeners' Association of America, Inc., has located in suite 927, 431 S. Dearborn street, Chicago. It is claimed for this organization that it is America's original Radio fans' club, and there is no doubt of its being the largest outfit of its kind.

Officers or members of the staff will be on duty every business day to receive callers and answer mail inquiries. A private branch exchange, Harrison 8527-8528, provides for prompt phone service. The B. L. A. now has local chapters in 23 states. The yearly fee for associate membership is one dollar, and five dollars is the cost of an active membership.

YO-HO-HO SING PIRATES

(Continued from page 5)

sang clear above the rest. It was the "Pirate's Dream." And thus he sang:

"Fifteen men on a dead man's chest—
Yo-ho-ho and a bottle of rum;
Bloopers and static had done for the rest—
Yo-ho-ho and a bottle of rum.
The tenor croaked at the boss'n's mike,
The boss'n brained by a grounding spike;
The basso's throat was sprained belike,
It had been gripped by fingers ten.
And there they lay, all good, dead men
Like break o' day in a boozing ken—
Yo-ho-ho and a bottle of rum."

Then, as the captain paced back and forth, there came a tapping at his cabin door.

"Come in," he said in his deep sea voice and paused expectantly. A tall, heavy-set man in a long raincoat, a drooping black hat and number 14 shoes crushed his way into the room. Striding boldly up to the captain he demanded:

"Are you Captain McDonald, the skipper of this WJAZ?"

"Aye, sometimes I have been so called," smiled McDonald.

Forthwith the stranger pulled from his pocket a summons and began to read.

"And you are therefore commanded," he was reading, when the captain interrupted:

"Forsooth, where do you get that stuff I am to be commanded, aboard my own brig?"

The minion continued to read without so much as lifting his eyes.

"You are finished?" asked the captain at last. The man tendered the folded paper. The captain struck a gong. Two bearded giants stepped into the room, and as villainous a looking team as ever you might find from Yucatan to Timbuctoo. They were armed with cutlasses and dirks and between the two of them they had but two good eyes, the others doubtless gouged out by some drunken brawl or fight on tempest wave.

"Escort the gentleman from the station," ordered the captain. There was the merest shade of a twitch of the commander's right lid and an arch of the brow.

"Aye, aye, sir," that ominous response. An understanding flash passed between those two widowed eyes. The men stepped forward and took the minion by either elbow. He reached for his hip but his hands were caught in lion jaw grips and he found himself moving briskly, his feet scarcely touching the floor. They steered him to the plank that jutted out forty fathoms above the bottom of the ether sea. A hatch door slammed, the plank flipped and the minion stepped into space, floating downward to the waiting scullions who stood ready with mops and pails.

"Wave ho!" Sharktooth Matthews, the lookout announcer, called down from the forward tower. Captain McDonald stepped to the rail in front of his cabin.

"What wave, ho?"

"A 'C'; she is makin' it at 329.5 meters. Leastwise, she flies the Union Jack."

"We'll take it," replied the captain. "Put about, nor'b'nor'west and nail her square. Bring out the forty-eight brasses and tell Hivoltz to let go when ready."

With a crash and a blare all forty-eight brasses, the woodwinds and drums of the staff band hurtled salvo after salvo over the "C 329.5".

"A hit!" shouted the captain. And the cry echoed down the ether lanes, from Hudson Bay to Cape Horn.

"Pirates! If this be piracy, then are we pirates and pirates we shall continue to be until the crack o' doom," he added.

And the day came when the captain was indeed haled before the high court.

"With apologies to the Honorable David Lloyd George," said he, "I ask, what finger wrote the law that makes us pirates in the free air of America?"

Thus the matter stands to this day, with laws and laws and proposals of laws before the national congress and the state. But WJAZ still sails the ether seas and she rides the waves as she wills. The inspectors and the chiefs still bluster and fume but beyond that there is little complaint to be heard, for the pirate captain takes good care not to intrude obnoxiously into the homes of the listeners.

WHAT SHOULD RADIO RECEIVER AVERAGE?

HOW MANY STATIONS DID YOU GET LAST YEAR?

Conditions Surrounding Reception Affect Answers, But Here Are Few Marks for Records

How many stations should a set receive? What is the average? What are a few of the records?

These questions are very popular with listeners. Probably fans with less than one year's listening experience are most apt to ask them, but all are interested.

As a matter of fact, so many conditions enter and affect the answers that no generalizations can be made. Location, congestion of broadcasters, type of set used—all must be considered.

The minimum number of stations received by a good set in an average location, however, should be about eighty. However, if you haven't eighty stations on your log, don't take your set back to the dealer and complain. More than likely conditions are set against you and it is not the set's fault.

What a Few Have Done

During the last year, without solicitation, Radio Digest has received a number of records of reception from its readers. Some of these lists are truly records. Others were not. Would you like to know what some of these fortunate listeners were able to do?

Here are the twelve best:

1. J. E. O'Brien, 26 Dyer Road, Milton, Mass., has logged 402 stations, using a 3-tube regenerative set.
2. J. M. Conrad, Ottawa, Kans., 395 stations, 3-tube regenerative.
3. Mrs. V. A. Johnston, 150 Orchard St., Barberton, O., 345 stations, 5-tube neutrodyne.
4. F. W. Dolley, Lyons Colo., 326 stations, 5-tube radio frequency.
5. Hayden Auto Co., West Newton, Pa., 305 stations.
6. A. A. Franzen, Box 100, Cedar Rapids, Nebr., 296 stations.
7. L. S. J. Cranse, 22 South St., Summit, N. J., 288 stations.
8. F. L. Nelson, 1009 Aschenez St., Pittsburgh, Pa., 277 stations, single tube regenerative.
9. Howard Stowell, 8814 Kimberly Ct., Detroit, Mich., 241 stations, single tube regenerative.
10. W. A. Learo, Montreal, P. Q., Canada, 235 stations.
11. Raymond McGillis, 1720 Iowa Ave., 221 stations, single tube regenerative.
12. Ross Hanch, Route 7, Baraboo, Wis., 203 stations, single tube regenerative.

FIREMEN TURN ON MIKE

(Continued from page 4)

control from the famous Saxe Wisconsin theater through WHAD. The explanation seems to lie in the generous distribution of microphones placed where they will pick up the little stray notes generally lost in the average theater broadcast. It is claimed that twenty-one microphones have been placed in carefully tried out positions so that every tone is recorded and reproduced in the receiver.

The most distant point at which WHAD has been heard is Tahiti, 6,600 miles from Milwaukee. The management early established a rule prohibiting the announcement of names of persons who write in for request numbers or similar purposes.

But, have a heart; don't ever start a fire you can't put out while the fire laddies of Milwaukee are on the air, that is, if it is your intention to turn in the alarm through a Milwaukee station. Because if you should, the chances are the music would stop so suddenly you'd think it was your receiving set that was ablaze and the rest of the listeners never would forgive you.

Upton Sinclair Would Have State-Owned Radio Station

SACRAMENTO, Calif.—A state newspaper, a state bank and a state Radio broadcasting station would be established by Upton Sinclair, the Pasadena author, if he were elected governor, the recently announced Socialist candidate for that office announced in a formal statement of his platform received in Sacramento.

ADVANCE PROGRAMS FOR THE WEEK

Saturday, April 3

Headliners Today

Eastern	Central	Mountain	Pacific
8:10 p. m.	7:10 p. m.	6:10 p. m.	5:10 p. m.

WEEI (348.6m-860kc) Boston symphony.
8:25 7:25 6:25 5:25
WJZ (454.3m-660kc), WRC (468.5m-640kc), WGY (379.5m-790kc) Philharmonic student symphony.

High Lights of the Week

TOLLING of bells, booming of guns, crashing of thunder and yelling of mobs will make "America," the historical pageant given by WOAW in celebration of a fourth anniversary Saturday, an event in Radio. The pageant includes twenty-three episodes, taking the listeners from Columbus through the world war. An event which will interest the animal lover is the talk by Ernest Thompson Seton scheduled at WTIC.

Radio may now be classed with Easter bunnies, colored eggs and the more serious traditions of this season of the year. Easter sunrise services will be broadcast by two Los Angeles stations, KHJ and KFI. Easter Pontifical high mass may be heard by tuning in for KSD at 11 a. m. Central time. Special music will be broadcast during the regular Radio services. Among the special programs are the Philharmonic orchestra concert at WDAF, the Apollo male quartet at KYW and the Atwater Kent program given this Sunday by Albert Stoessel and the New York oratorio over the WEAF chain.

"Ain't Nature Grand!" Fans will find out for themselves if they tune in for WOOD, Grand Rapids, Monday evening. Prominent artists of this city are appearing in the presentation. KTHS serenades Latin America with a Spanish program this same evening.

Norrine Gibbons and her Girl Friend is a team which is rapidly becoming one of the favorite features of the Tuesday evening programs of WLW, Cincinnati. These artists appear at 6 p. m. Central time. Miss Gibbons sings the latest popular songs.

Just an old-fashioned concert given in an old-fashioned way is the entertainment planned by the Operatic quartet for Wednesday evening at WBZ. The talk to be given by the head of Wellesley college at WEEI will attract Wellesley alumnae. President Ellen Fitz is looking forward with pleasure to meeting Wellesley graduates over the air.

Pat Barnes, announcer of WHT, was famous before he went into Radio work for his appearance in his own vaudeville skit "A Buck on Leave." In answer to many requests from fans he will give a Radio version of it Thursday. Eighty voices will be heard over the microphone. Ex-service men will find this production reminiscent of French experiences.

"A Little More of Everything" including their Cockney monologuist and Russian bass will be given by the Radio Raiders when they return for a second appearance at CNRT, Toronto, Friday. These airy highwaymen have found they can enter any home regardless of locks or bolts. Their gay voices will steal forth from a million or so loud speakers.

WDAF, Kansas City, Mo. (365.6m-820kc), 6-7 p. m., organ music; Trianon ensemble; 11:45-1 a. m., frolic.

The mystery play "A Step On the Stairs" is being given at WHO, Des Moines, by the Gifford players of Drake university. The actors shown above are from left to right: A. J. McKim, W. W. Van Oosten, Katherine Atkins, Willard Dullard, and Margaret Orebaugh. Bobby Griffin, at mike, announcer.

New England fans are turning the dials for WNAC to get the thrills of the serial play, "A Step On the Stairs." The leading lady of this group is Jean Sargeant, left, of Boston. She plays the part of Mary Williams in a most convincing manner. The sixth episode will be given at this station Wednesday, March 31.

Tuesday, April 6

WGBF, Evansville, Ind. (236.1m-1270kc), 8 p. m., Evansville Typographical union jubilee.

"a Step On the Stairs"

Broadcast as a Play

EPISODE SIX—THE SETTING

EPISODE SIX continues in the high-beamed hunt-room, the room that has been the scene of strange and mysterious crimes, of the Turner manse. The guests who had gathered there to hear a message from Peleg Turner, have waited patiently until Tolliver returns from the Radio station to report that murderous deeds have been afoot there, too. Just as he displays a letter he has stolen at the station, Mary Williams seemingly faints, throwing out her hand and upsetting the candle. In the resultant darkness the letter has disappeared. Mary Williams and Ardwyn stay alone in the room to await the return of a stranger. He returns, in the dark, and the guests come in the room just in time to find Ardwyn unconscious with a flesh wound on his head and Miss Williams fainted—holding part of Peleg Turner's funeral clothes. The two are revived, and all but Mary leave the room. Then John Carton reappears to Mary and asks her to believe in him. He narrowly escapes the return of the other people and is assisted in escaping by Hari Singh, who then shortly returns from the outside with the unconscious form of Milford Jones. The seance is resumed with the unbelievable result that Peleg Turner's voice comes over the Radio. He curses the murderer of his brother. He says the murderer is now in the house, but shall pay in full ere dawn. The sixth episode now opens.

THE CAST

Frederick Ardwyn.....Peleg Turner's lawyer
Aunt Helen Holmes.....A relative
Mary Williams.....A youthful guest
Maurice Tolliver.....A youth and relative
Cousin William Caryl.....A relative
Announcer at Station FYX.....
A voice in the dark.....An uninvited guest

KFMX, KHJ, KNX, KPO, WABQ.
12 m — 11 — 10 — 9
KPO.

"Ghosts of the Air" are the Phantoms of KPRC, below. They entertain in their novel fashion every other Saturday night from the topmost point in the City of Houston, from the skyline studios of the Houston Post-Dispatch. Phantionette, the tall and stately blond of vaudeville fame, is risking one eye to prove that she and her companion are very much alive. When Albert Stoessel and the New York Oratorio society appear over the WEAF chain Sunday, Ethyl Hayden, left, will be the soprano soloist. Grace Denison Schaffer, right, is the concert pianist who directs the Sunshine programs at WOAW.

FARMERS' PROGRAMS INDEX

Farmer Dinner Concerts

Daily Except Sunday

CENTRAL TIME
KFNF, 12:15-1:35 p. m.
KMA, 11:30-12:30

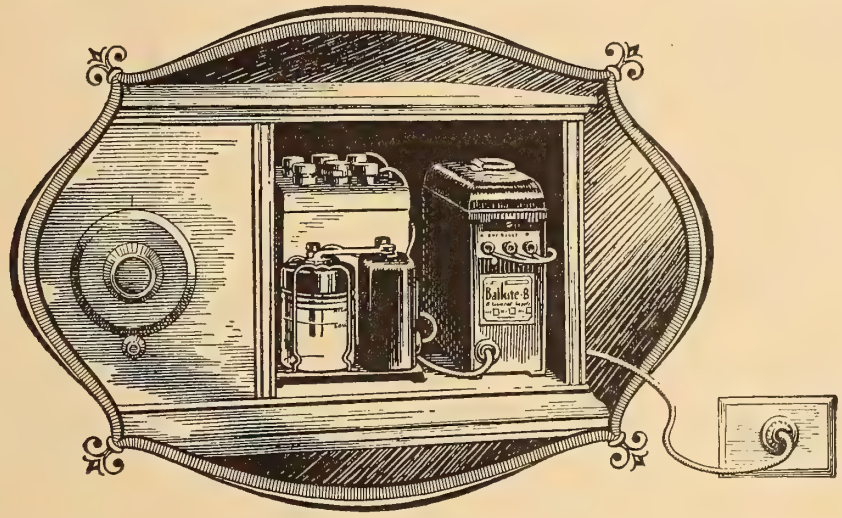
Wilmington, N. Carolina; Portland, Ore.; Toronto, Ont.



Operate your present radio set from the light socket

with Balkite "B" and a Balkite Trickle Charger

The radio set you now own will operate from the light socket. No changes are necessary. You need only add Balkite "B" at $35 and a Balkite Trickle Charger at $10.

Balkite "B"—the noiseless "B" power supply—replaces your "B" batteries entirely and supplies plate current from the light socket. The Balkite Trickle Charger keeps your "A" battery always at full charge, also from the light socket.

This type of installation is the last word in radio convenience and ease of operation. You always have full, even power, exactly as required by the set. *And because you always have full power you secure a quality of reception possible in no other way.*

Both Balkite "B" and the Balkite Trickle Charger are entirely noiseless. Their first cost is the last. Both are permanent pieces of equipment with no bulbs, nothing to replace, break or get out of order. *Ask your dealer.*

Prices slightly higher West of Rockies and in Canada

UNKNOWN GIRL TO BE MADE FAMOUS ON AIR

Don Meaney to Try to Popularize Movie Extra Girl

HOLLYWOOD, Calif.—Probably the first effort ever made to popularize a motion picture personality entirely through Radio has been started by Don Meaney on his KNX midnight frolic over KNX each Thursday night from 12 to 1 a. m. Pacific time.

The name selected by Don Meaney to make known to all America by means of the Radio is Anne Howe. No one as yet has seen her on the screen, she is just an extra girl, with all the qualities that make for screen success, that Don Meaney has taken in hand and promised to publicize throughout the land.

Members of the Wampas, Hollywood's association of movie press agents, are reported to be sticking very close to the loud speakers on Thursday nights to see if Don Meaney can make a success of his new idea in publicity, which is novel, even in jaded movieland.

KPO, San Francisco, Calif. (428.3m-700kc), 6:30-7 p. m., States restaurant orchestra; 8:10-9, "The Resurrection"; 9-10, Palace hotel rose room dance orchestra; 10-11, States restaurant orchestra; 11-12, Henry Halstead's orchestra.

KTAB, Oakland, Calif. (239.9m-1250kc), 8-10 p. m., program, Breuner's.

KWSC, Pullman, Wash. (384.6m-860kc), 7:30-9 p. m., Farmington community program.

Reveals Drifting Snow Discharges Electricity

Fine, Strongly Charged Particles Cause Static Interference

LONDON.—A remarkable discovery which brings a newcomer into the ranks of Radio's static enemies has been made by a German scientist, Dr. Stager.

He has revealed that drifting snow may become electrified and thus cause discharges which can be perceptible in nearby receivers.

It has been known that fine dust or fog or even steam clouds are easily electrified and thus become potential sources of interference, but Dr. Stager has been able to show that fine snow particles when drifting in the Swiss mountains were strongly charged.

Experiments in England have proved that even steadily falling snow can prove a medium for interference. One wonders why these particles must drift before they become charged and where the charge comes from.

Decision Upholds Right to Broadcast Market Reports

CHICAGO.—A far reaching decision clarifying the status of certain classes of Radio broadcasting was seen in the opinion handed down recently by the Cook county appellate court, sustaining the John P. Bowles company, cattle brokers, in an injunction against the Chicago Livestock exchange, restraining that organization from interfering with the daily broadcast market reports by remote control from the stock yards over WHT, which is conducted as a public service by the brokerage concern.

The injunction is the outgrowth of a resolution adopted by the Livestock exchange effective December 1, restraining any member of the concern from broadcasting market reports. The legal ruling was first granted by the circuit court and appealed by the Livestock exchange to the appellate branch.

WOC Heard in Holland

DAVENPORT, Ia.—Word has just been received that WOC, Palmer school station here, was heard clearly in Delf, Holland, during the international Radio week tests.

WRC Sends Farm Programs

WASHINGTON.—The farm Radio programs, arranged by the department of agriculture, have been added to the daily features broadcast by Station WRC, here. The farm information under the heading "Fifty Farm Flashes," together with the "Housekeepers' Half Hour," are being broadcast daily except Saturday and Sunday, from noon to 12:30 p. m., Eastern time. Appreciative rural listeners have written many letters thanking WRC.

Old Fireside Circle Is Brought Back by Radio

Restores to American Home What Other Inventions Took

DENVER.—Radio has restored to the American home what earlier inventions have ripped from it, according to George Sanford Holmes, managing editor of the Rocky Mountain News and Denver Times and a recent speaker over KOA at Denver. Through Radio, he asserts, the familiar fireside circle has been resumed and thousands of homes have been reconstructed.

"Millions thrill beneath the spell of Radio, drawing from the ether, inspiration and information, entertainment and education, recreation and relaxation," he emphasized.

"Upon the broadcasting station as well as the newspaper, rests a deep responsibility to discharge with integrity and intelligence the public trust which reposes inherently in each."

Organ Concert in New York Reaches Ship Off Honolulu

LOS ANGELES.—Organ music from a concert hall in Albany, N. Y., was the treat given California listeners on March 11, when KNX picked up and rebroadcast the program from WGY between 8 and 9 p. m. Pacific time. KNX's rebroadcast of WGY was picked up by Harold Janss aboard the President Cleveland a few hours out of Honolulu, making a total distance of 4,925 miles that the music traveled through the air.

KNX's rebroadcast also was again rebroadcast by KFWO, the Mott station on Catalina Island, thirty miles off the southern California coast.

Big Demand for Radio Book

CINCINNATI.—Librarians in practically all of the largest cities throughout the United States have adopted "Simplicity of Radio," by Powel Crosley, Jr., as one of their standard popular treatises on Radio.

The demand for books of this type may be judged from the fact that the New York city public library uses at the present time fifty-five copies of this book in its main library and branches.

Fred W. Stein.

Steinite Low Loss Interference Eliminator

No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.

OVER 300,000 SOLD

Improved Results With Tube or Crystal Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. ***MONEY-BACK GUARANTEE.***

Mfrs. Famous 1,500 Mi. Steinite 1-Tube Set, $6; Long Distance Crystal Set, $6; Steinite Crystal 50¢—3 for $1

STEINITE 5-Tube Set—$29.75

FREE Descriptive Literature on request.

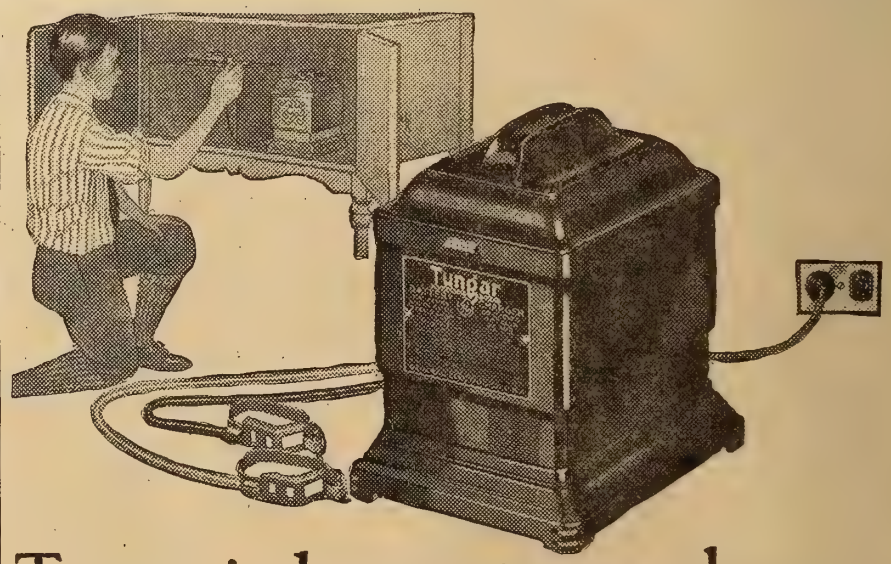
PATENT PENDING.

$1 Postpaid If you are not delighted with results you get your dollar back

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

References: Exchange National Bank, Atchison Savings Bank. Order today—a dollar bill will do.

STEINITE LABORATORIES, 161 Radio Bldg., ATCHISON, KANSAS



Tungar is the easy-to-use charger

Anyone can clip a Tungar to a battery and plug it in on the house current. That's all there is to it.

Attach a Tungar at night—and have snappy batteries in the morning. It will not blow out Radiotrons.

It needs little attention. Only a dime's worth of current consumed for a charge. No wonder "Tungar" is fast becoming the word for battery charger.

Tungar is the original bulb charger. It is a G-E product developed in the Research Laboratories of General Electric.

The new Tungar charges 2, 4 and 6 volt "A" batteries, 24 to 96 volt "B" batteries, in series; and auto batteries, too. No extra attachments needed.

East of Rockies

Two ampere size $18.00
Five ampere size $28.00

60 cycles . . 110 volts

SHORT WAVES

By Marcella

(Continued from page 6)

McNamee ever sang via WEAF? Well, he doesn't. However, he has. Twice during two "WEAF Home Talent" programs and once in an "Eveready Hour" program. All three times he was announced under his own name.

* *

Wayne wants to know what became of the Reese-Hughes orchestra, formerly heard over WHO, Des Moines. The orchestra was then playing at WHO through the courtesy of the Fort Des Moines hotel, of Des Moines, but has since removed to play at the Blackhawk hotel, Davenport. Perhaps WOC will broadcast it some time.

* *

Lillian Madeson, WOAW singer, has not been heard of late there, because the stork visited her recently and made her mother of a bouncing baby boy. Her evenings are now engaged in singing him to sleep.

* *

Chawlie, of Cincinnati, gets mushy with me. Shame on you! You don't know who I am, and wouldn't you be surprised, though, if you ever saw me. I'll admit you sound interesting—but to give you the information, as much as I know, the Coldwater, Miss., station is WREC, wave length 254.1 meters. You probably can't get them any more on account of the congestion. KFKB, late of Milford, Kansas, is a delete now, for Dr. Jones sold out his transmitter to Norman Baker, of Muscatine, Ia., and the latter gentleman has ex-KFKB on the air under the colors KTNT. Walter Tison is the director and announcer of WGHB, Clearwater, Fla.

* *

WCX, Detroit, is back in the hands of C. D. "Chief" Tomy, its original director and daddy. This bit of news no doubt will interest many members of the Red Apple club, at whose meetings the "Chief" will again officiate. For several months back he has been in charge of WGHP, Detroit.

* *

Sammy Stept's location? He's now at WJZ, New York, with Frank Kamplain and Al Bernard, the Record Boys. Sammy still seems to keep his popularity.

* *

Speaking of the "Phantoms" of KPRC, Houston, about whom so many letters of inquiry have been received, I can only add to the mystery. It would be unfair to divulge their identity when they have been so careful to keep it secret. The lady member of the Phantoms—"Phantoinette"—is a stately blonde with curly bobbed hair and blue eyes, and has been on tour in eastern vaudeville circuits during the past two seasons. She does the vocal part of the program, while the male member of the Phantoms is the pianist. He is a round, jovial chap about 28 years of age, 175 pounds heavy, and has dark hair and blue eyes. A civil engineer by education and profession, he prefers Radio entertaining as an avocation.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

BEST MACARONI DISHES

(Continued from page 6)

stiffly beaten egg whites. Pour into a buttered mold or baking pan and sprinkle with paprika. Set mold in a pan of hot water. Bake 40 minutes in a moderate oven, 350° F. This amount will serve six.

Sauce for Loaf

It is not necessary to serve a sauce with this loaf, but in case you wish to use one, I suggest Gold Medal egg sauce, as we have found it to be the most delicious with this particular loaf. Here is the recipe for the sauce: ¼ cup butter, 2 tablespoons Gold Medal flour, ¾ cup milk, ½ teaspoon salt, ⅛ teaspoon pepper, 2 egg yolks, 4 tablespoons lemon juice, grated rind of ½ lemon.

Method: Melt the butter, add flour and blend to a smooth paste. Add the milk and stir until the sauce boils. Add salt, pepper, and egg yolks, and stir until smooth without allowing the sauce to boil. Add the lemon juice very gradually. Serve at once on the macaroni and salmon loaf.

Serve Vegetable or Fruit

With the macaroni and salmon loaf, I suggest that you serve string beans, spinach or any other green vegetable, and stewed or canned fruit with cookies or cake or any simple dessert.

Gold Medal Semolina Special is our second recipe. Here it is: 4 tablespoons butter, 4 tablespoons Gold Medal flour, 2 cups milk, 1½ teaspoon salt, ⅛ teaspoon pepper, ½ cup grated American cheese, ¼ cup sweet green pepper chopped, ¼ cup pimento chopped, 3 hard boiled eggs, 2 cups cooked spaghetti, ¼ cup stuffed olives.

Method: Melt butter, add flour, and blend to a smooth paste. Add the milk gradually and cook 10 minutes. Season with salt and pepper. Add grated cheese, green pepper, pimento and hard cooked eggs. Stir in the cooked spaghetti. Turn into a buttered baking dish. Bake 25 minutes in a moderate oven, 325° F. Remove from oven and sprinkle with chopped stuffed olives.

Daylight Distance Easy for WHT

CHICAGO.—WHT, stationed on the Wrigley building here, claims recognition for having its morning and noon programs heard in Boston, Mass., and Azlo, Texas. Fort Collins, Colo., also reports WHT's daylight broadcasts. The three points are all approximately 1,000 miles from Chicago.

$85,000,000 for Radio Programs

HOW would you like to have $85,000,000? Apply to Uncle Sam and see if he will give it to you. Perhaps he will, for it was recently done for a group of millionaires by our senate and house of representatives and Mr. Coolidge.

The occasion was the refunding of the large estate inheritance tax with a two-year retroactive clause in it. In common speech, this means that $85,000,000, levied against about a dozen millionaire estates and literally in Uncle Sam's pockets, was given back to these estates. No explanation was given as to the cause of this going back two years and taking the burden of taxation off of a dozen dead millionaires to place on millions of living wage earners in the future.

Did your senator or congressman let this go through? Most of them did.

The first reason for this editorial was to propose that Uncle Sam endow broadcasting stations with a fund, say $85,000,000, the interest earned on which principal would be devoted to purchasing first class talent for the Radio broadcasting stations.

An annual fund of five million dollars would be available for this purpose. Uncle Sam could sponsor its expenditure. The machinery for spending this money to improve programs would not be difficult to organize.

Think of the great benefits to the great army of Radio listeners. The problem of who is to pay for broadcasting would be solved forever.

We appeal directly to the heirs of those estates which received the big "divvy" (the rebate of the $85,000,000) to contribute this paltry (to them) sum to the future of Radio. Let their big-heartedness and foresight for the public welfare be expressed in such a permanent endowment.

We will bless forever the first of these millionaire heirs and heiresses who signs up for the outlined proposal. The line forms at the right.

Give Congress the Ether

AS THIS was being written, the house of representatives had just passed the revised White Radio bill. It has gone to the senate for action. Representative Davis, of Tennessee, a democrat, led the principle opposition and offered dozens of amendments, almost all of which were voted down. The other representatives, excepting White of Maine, father of the bill, were practically silent. They didn't know what it was all about and cared less.

The definition of the word "ether" caused quite a furor. Old-womanish representatives almost caused an investigation to be made. They demanded more knowledge of the ether.

Many a scientist would give several years of his life to really know what the ether is. It is such a factor in modern science. Yet we know little about it.

But the house, twiddling its thumbs and puzzling over the definition of a word, passed the bill with minor changes. Probably many important things were overlooked, ignorantly or intentionally.

However, we need a law, despite how much favoritism it may show or how weak it may be. We hope the senate has passed the bill before this issue reaches your hands. If the senate does, and the president signs it, we will be able to get at least a skeleton of an administration for misadministered Radio.

Our "do-nothing" government, as a contemporary publication has aptly labeled the present administration, will have given some sort of excuse for its existence.

Chicago's Silent Night

THE Chicago Tribune is sounding its readers to see what they think about Chicago's silent Monday night with an idea of modifying it in the summer time. There is much to be said on both sides. But Chicago, of course, has a problem individual and different from most cities. New York has an analogous congestion difficulty.

We like to believe that some day, somehow, a receiver will be invented which will be so perfect in its operation that silent nights will not be required to penetrate the local barrage. The romance of distance and the love of variety has not changed.

RADIO INDI-GEST

Grandfather Listens In

I thought the world had plunged ahead
With hard and reckless power,
And all old gentle things were dead
And blown like a dry flower.
And lying lonely here abed,
I had, I fear, grown sour.

But now I feel a different way,
With the heater red and roaring
And the lamp dim and the room gray
And the loud speaker pouring
"When You and I Were Young, Maggie,"
In a tenor softly soaring.

For I see that the young and bold and new
Are only fresh leaves hung
On the old oak standing the ages through;
This Radio, now, has sprung
From the loving toil eternally true
"When you and I were young."

CARLTON CULMSEE

Who's Who In Ioway?

Dear Indi: Last night an announcer at a certain Iowa station, while broadcasting a program from a dance hall by remote control, declared, "Among the guests present tonight, are the mayor and the president of the fair association. In fact, there are hundreds of representatives of the upper and lower crusts of society."

ELOISE

Always Always and Spanish Shawl

This is Station XXXX, Podunk. You have just listened to Whos Whozis and his orchestra playing "Spanish Shawl," "Always," "Spanish Shawl" and "Spanish Shawl." For their next numbers, they will play "Always," "Spanish Shawl," "Always" and "Always."

TIRED TILLY

"A FLOP ON THE STAIRS"

by THE THIRD TROMBONE PLAYER

Episode 1—"A Bucket of Blood"

A SHOT was heard! A woman's voice shreiked through the night air. Then all was still, quiet and almost silent.

(Hot ziggity, this is gonna be good. Watch for the next episode. Agnes, quit chewing your finger nails, and you, Aloysius, stop drumming with your fingers.)

Not a Moving Picture

Dear Indi: I see in your column where our old friend the Night Herd says as how some stations have put on a play and named it "The Night Herd" and how he lows as how folks will think it is about him. Well, he ain't got nothin on me. I see as how they have got an announcer down at WSE, the At——lant——ahh Journal, what they call "Old King Tutt—The Radio Nut." Well maybe someone will think that is me—which it ain't, but my better seven-eights says that if he is a bigger Radio nut than yours truly, then she shore pitties his wife. As ever yours, OLD KING TUTT (Himself)

P. S. Which I says maby he ain't got none.

Where have you been, Tutt? Seems like the last time we heard from you was about 3,000 years ago.

My Pals

Soon the lowing of the cattle dies away and all is still,
Save the howling of a coyote lurking on a nearby hill
Or the sound of brushing bodies when the herd begins to mill—
And I'm alone when light of day has gone.
But there are three pals beside me—one is Shep, my mongrel pet
One's a pinto saddle pony—one's an eight tube superhet.
And there's a host of friendly voices in the ether I can get
To come and keep me company 'till dawn.

THE NIGHT HERD

Machine Has Cold Reception

Dear Indi: Kittle Drummer's ice machine inventshun might be all right, but it looks like it kind of balls things up.

AH GRATTON

Hey, Mildred, Give 'em Cards

Enter the nomination of Michael Angelo to the Famous Fans Club—he was the world's greatest designer of panels.

PABLO

Schouten, because he used the "Horn" to beat Magellan and he DX-ed Tierra del Fuego, and Demosthenes because he actually held a crystal set in his mouth to make him a loud speaker.

ELOISE R.

Mary, Queen of Scots, because she had her head set on a block.

SQUEAKY

Wanted—A Guardian

Dear Indi: Since you have joined the technical department and started fooling with that invention, I'm beginning to worry. Please don't play with matches.

S. P. C. A.

The Truth Will Out

Dear Indi: Have you noticed lately the decreased number of "loving cup" ears? I wonder if its from wearing head phones?

THAT RED HEAD GAL

Sorry, Bobette, but we are prone to tell the truth. We have seen more "loving cup" ears the past year than ever before, since Ponjola, Congressional and Boy bobs have become so popular.

INDI

News of the Week

Condensed

BY DIELECTRIC

Station WTAM, Cleveland, had an unusually good dance program to entertain listeners the other night and during the playing of most of the selections one could easily pick out the drums. It may seem strange to mention that, as though something unusual, but just try to hear the drums in most orchestras and see how unlikely you are to hear them. There are receivers which make the French horn resemble a clarinet and mikes to confound harps and pianos, but just listen for the tympani.

That big prize to follow the completion of the serial "A Step On the Stairs," now running in this paper and broadcast from a number of stations, may loom large while you read of it—and should. While the broadcasting station is putting it on the air, however, you can think of the plot only and the WGY, Schenectady, players took every precaution against the possibility of anyone losing interest while they were dramatizing the story. Much credit is due these players.

A very enjoyable mixed program was given through Station WRVA, Richmond, Va., under the title of the Appamattox Review. The male singers appearing in this were all capable individually and collectively and assured a pleasant evening's entertainment. The gentleman announcing that evening respected the wishes of most listeners in, yet his innermost feelings came to the surface each time he announced, for never was announcing done so consistently on a minor key leaving the impression of complete sadness.

The Rainbow orchestra has received little mention here for some time past and the whole blame attaches to my negligence. They can play, as all know who listen, and play with alluring charm. However, listeners feel when they hear a saxophone—the instrument produces varying effects—few could have failed to note the ability of the mighty sax player as he sallied forth in the vanguard of his fellow orchestra men, recently. Under his guidance the instrument fairly spoke, sometimes seductively and again most mournfully, but always unfalteringly. Hail the sax.

Pontiac, Mich., should be a notable habitation by now for the particular reason of its being the home site of Station WJR; what other reasons there may be do not concern us. Jewett Jesters provide an interesting feature for their programs, even if the jesting is often more in the name than performance. The contributions of these entertainers, when I listened to them, were of the oft-repeated variety in most part and yet you were carried along with the spirit in which they were rendered.

Another Radio jaunt to the home studio of Lambdin Kay found that urbane gentleman as insistent upon quoting at length from "long distance telegraphic requests" as of yore, so "Dubbuye—S—B, THE Atlanta Junnel," etc., finds me willing to subside on the subject. Attention is to be called though to the Meyers orchestra, which does its best to please all in the Radio audience and succeeds admirably.

During the appearance of L. F. Smythe at the console of the organ utilized to bring pleasure to WHO's listeners, we were impressed with the choice of selections favoring an exposition of the majesty of that instrument. This feature from the state of Iowa, is one surely capable of bringing pleasurable response from all interested in organ recitals. The announcing was very precise and left none in doubt of the identity of the broadcasting station. We'll have them all in line.

Construction of B Current Power Supplies

Part IV—Jefferson-Raytheon Type

By George Walters

JEFFERSON-RAYTHEON B POWER SUPPLY
List of Parts

1 Jefferson B Unit, No. 357	Jefferson Electric Mfg. Co., Chicago	$15.00
1 Tobe B Block, small size	Tobe Deutschmann Co., Boston	9:50
3 Tobe Filter Condensers, 1 mfd.	Tobe Deutschmann Co., Boston	3.75
2 Bradleyohms, No. 10	Allen-Bradley Co., Milwaukee	4.00
1 Bradleyohm, No. 5	Allen-Bradley Co., Milwaukee	2.00
1 Formica Panel, 6"x 7"	Formica Insulation Co., Cincinnati	.90
1 Raytheon Tube	Raytheon Mfg. Co., Cambridge, Mass.	6.00
1 Wooden Baseboard, 6½"x 12"		.40
Miscellaneous, such as brackets, wire, screws, etc.		.60
Total cost		$42.15

SINCE the first three B power units were described in the issues of January 30, February 6 and February 13 there have been numerous changes in the apparatus available on the market for the construction of such equipment, and requests came in for a B unit that would provide a 67-volt tap. Accordingly, the writer has utilized this new apparatus and designed a more complete power supply that would give all the voltages anyone could ask.

Jefferson Electric company has combined some of the essential parts into one case and a unit which they call number 357. This includes the necessary step up transformer with split secondary, the protective condensers across that secondary, two large choke coils and a socket for a Raytheon tube. This saves the home constructor much worry in the placing of the parts and much work in the wiring of those parts. As the unit is sold it carries four binding posts on one side for connection to the filter condensers and two on the other side for a negative B and plus 135 B connections. A single post is provided on the case to which the cores of the transformer and chokes are connected. Number 357 is a worthy addition to the Jefferson line and is compactness itself.

Tobe Deutschmann, at Boston, decided that the various small condensers which he makes, that are essential to the construction of Raytheon B units, might well be combined into one case. This works out well since one side of all the condensers goes to negative B and this group connection can be done right in the combination unit. Two such combinations are available, of which the smaller is used here. The larger includes an 8 mfd., two 2 mfd. and two 1 mfd. condensers while the smaller comprises the 8 mfd. and the two 2 mfd. capacities. Since the Jefferson unit requires that the three larger condensers be on one side and the smaller ones on the other, the writer decided to use the smaller of the Tobe combinations and three individual 1 mfd. capacities.

Allen-Bradley have only recently come out with another Bradleyohm, known as number 5, which is well suited to reducing a voltage of 135 down to 90. The number 10 is still to be preferred for bringing down 135 volts to either 67 or 45 volts. The Bradleyohms, it might be stated for the uninitiated, are similar in construction to the better-known Bradleystats and Bradleyleaks, but cover different ranges of resistance values. Number 10, for example, can be varied between 10,000 and 100,000 ohms while there are others ranging from 25,000 to 250,000 and 50,000 to 500,000 ohms. In this B power supply, we use one of the number 5 units and two of the number 10.

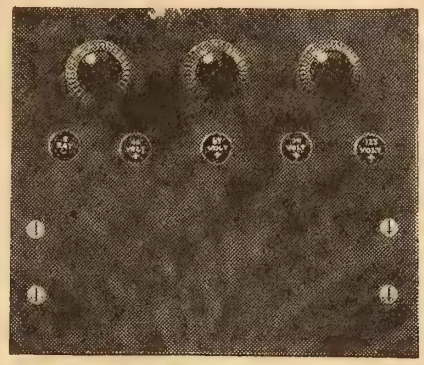

Figure 1

The front view is shown here as figure 1, the top view is figure 2, while the wiring diagram is figure 3. In this wiring diagram, the inside assembly and wiring of the Jefferson combination is shown, but only those wires which connect to this unit from other apparatus must be put in; those shown inside the case are put there by the manufacturer. The front panel can be a piece of scrap Bakelite you may have lying around to measure 6 inches high by 7 inches wide. The baseboard measures 6½ inches wide and 12 inches deep.

Drilling Front Panel

The mounting holes for the Bradleyohms are located as follows: They are all placed on a line 1¼ inches down from the top; a number 10 is placed 1½ inches in from the left edge, another number 10 is centered and the number 5 is 1½ inches in from the right edge. The five binding posts are placed on a line 2½ inches down from the top. The negative B is ⅞ inch in from left edge, plus 45 is 1¼ inches to the right of it, plus 67 is centered, plus 135 is ⅞ inch in from right edge and plus 90 is 1¼ inches to left of 135. Any brackets may be used, those shown being picked up for 10 cents each at a small Chicago Radio store. Whatever make or type you use be sure they are strong and substantial as the baseboard apparatus is quite heavy and someone may try to pick up your completed B supply by the front panel.

Before placing the three 1 mfd. Tobe

(Continued on page 20)

Year after Year leading builders of fine sets use more Thordarsons than all competitive makes of transformers combined —proof they are best!

JEFFERSON-RAYTHEON

(Continued from page 19)

condensers on the baseboard, they should be soldered together, which not only holds the upper two in place but electrically connects the three cases. The bottom one is placed flat, face up, that is with the mounting lugs flat on the table. The other two are placed squarely on top of it. Now considering the pile with the mounting lugs to the right, (as they are placed in the unit) the rear mounting lug on the middle one and the top one is bent downward against the end of the condenser below. Each bent lug and the surface of the condenser below, against which it rests, is scraped bright and solder applied. You then have a pile of three with their connecting lugs all at the left and forming two vertical rows. The bottom one is then secured in place by screws put into the baseboard.

The Tobe combination is placed close to the rear edge with that side which carries the three connecting lugs to the rear and the common negative connection to the front. Jefferson unit number 357 is slightly forward of it with the four binding posts to the rear and the two binding posts in front. Between its two forward legs are the three 1 mfd. condensers. The twisted cord from the Jefferson unit can come out between that unit and the Tobe unit, to either the right or left, it makes no difference.

Wiring is begun at the rear with that which connects the common negative of the Tobe unit with the negative post at the rear of the Jefferson unit (that at the left). Three wires are next put in, as shown in the photograph, connecting the three Tobe terminals, 2, 2 and 8 with C1, C2 and +B. Those four wires complete the filter connections which is certainly simple enough. We now go to the front connecting lug at the left end of the bottom 1 mfd. condenser. A wire is put in passing up to the second binding post from the left on the front panel and to the bottom terminal of number 10 Bradleyohm at the left.

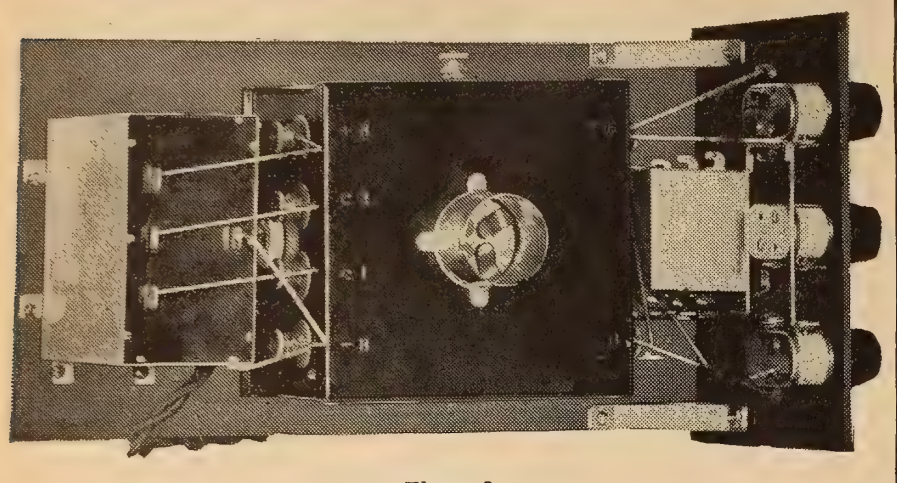

Figure 2

Next connect the front terminal of the middle condenser to the center binding post on the front panel and to the bottom terminal of the center Bradleyohm. A wire is then put in connecting the front terminal of the top 1 mfd. condenser to the fourth binding post from the left and to the bottom terminal of the number 5 Bradleyohm which is at the right. Now connect the negative B binding post on the front of the Jefferson unit to the left binding post on front panel. From this wire, another goes to the right about an inch, and down to the rear connecting lug on each of the three 1 mfd. condensers.

Over on the right side of the assembly connect the other binding post on the front of the Jefferson unit to the last binding post to right on the front panel. From it run another wire up to the top terminal of the number 5 Bradleyohm and continue this to the left to the top terminal on each of the other Bradleyohms. This completes the wiring with the exception of grounding the cases of the condensers. This grounding is accomplished with two wires. A short wire is put in from the upper front corner of the left side of the Tobe unit, forward to the left binding post of the row of four at the rear of the Jefferson unit. Another wire is bent to go from that soldering which holds the top 1 mfd. condenser to the middle one, over to the left to the negative B terminal on the front of the Jefferson unit.

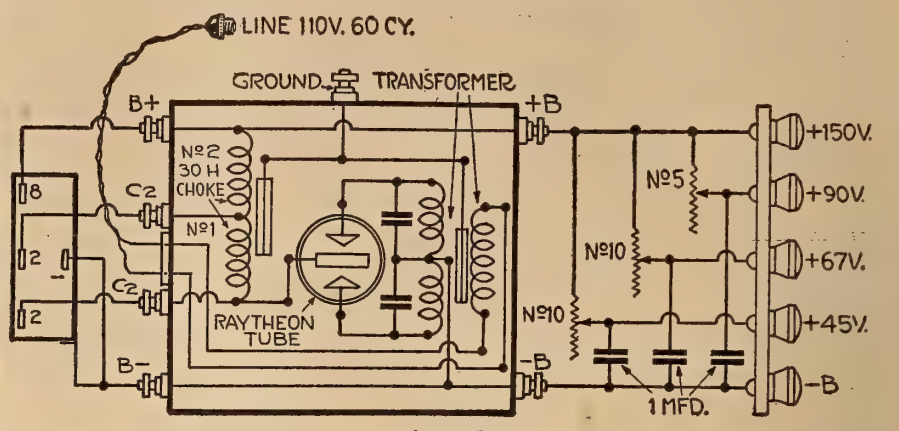

Figure 3

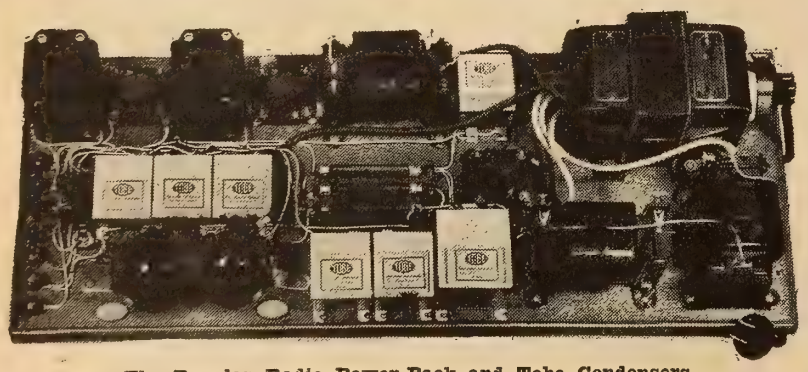
Final Grounding

The connection to the binding post on the right side of the case of the Jefferson assembly is a matter of choice and location. It will be found in some installations that connecting this post to the negative B wiring will prevent hum, while in other cases it may be necessary to connect this to the ground used for the receiver. It all depends on the connections within the set. Try these connections in the order given and one or the other will remove the last trace of hum. This B power supply will furnish 60 milliamperes at 150 volts, which is plenty for any set on the market or yet described in any Radio publication. This 60 Milliamperes can be drawn from the four B plus terminals about as desired, but in most cases it will be found that the 67- and 90-volt posts draw the most current since radio frequency, intermediate and audio amplifiers are usually connected to them. As a rule not more than one power tube is connected to the 135-volt post, although, in the case of three stages of resistance coupling, all three tubes can draw from this terminal. Resistance coupled amplifiers do not draw much current anyway so it works out alright.

(Radio Digest has now presented four B supplies, of three different types and suited to all of the various uses which the Radio sets now in use seem to require. At present no further B power supplies are contemplated but, should the situation change so that further variations are desirable, they will be shown in the earliest possible issue.—Editor's Note.)

An unexpected result was obtained recently when, in order to test the popularity of dance music, listeners who were dancing at one a. m., were asked to notify the B.B.C. Only forty replies were received, and some of these were from the Continent. Dance programs are accordingly being modified to commence at 8 p. m., and cease at 12 midnight.

"The Better Condensers"



The Popular Radio Power-Pack and Tobe Condensers

THE latest Popular Radio Power-Pack Amplifier, using Amertran Transformers and Amerchokes, like that described in Popular Radio for April, 1926. But this has one more stage of audio, for attachment directly to the detector jack of any set. It will give perfect quality with great volume, and in addition, supply B current to the entire set, without batteries.

TOBE CONDENSERS are used throughout,—and permanent satisfaction and quality are thereby assured. Condenser cost is reasonable.

6 TOBE Type 709, 2 Mfd., at $1.75.....$10.50
1 TOBE Type 711, 4 Mfd., at $3.75.....$ 3.75

Total Condenser Cost.....$14.25

Write us today for free drawings of this Power-Pack Amplifier.

The new Jefferson Raytheon B-Eliminator described in this issue of Radio Digest uses the TOBE B BLOCK,—a filter condenser unit that saves money, space and wiring, and which adds to the appearance of any plate supply unit. Look for the trade mark.

CORNHILL BOSTON, MASS.

A&B Battery Charger ONLY $2

SATISFACTION GUARANTEED

This wonderful charger—the sensation of the entire radio industry—charges any type of storage A or B battery, using only a few cents worth of ordinary house current. Works perfectly on either alternating or direct current.

Cannot possibly injure your battery, and will last for years. Many radio fans find it a tremendous success as a trickle charger. Complete and simple directions enclosed with every charger, so that anyone can operate it. There are absolutely no expensive "extras" to buy.

Why pay $10.00 to $18.00 for a charger when you can get this splendid GUARANTEED R. B. Charger by simply signing the coupon below and mailing it to us with two dollars (bills, money order, check or stamps) plus 10c in stamps or coin to pay mailing costs. The charger will be sent postpaid. If, for any reason, you should not be perfectly satisfied, return the charger within five days and we will refund your money.

Mail the coupon at once—TODAY

PROOF

"The R. B. Charger works better than one I paid $16.50 for."—W. McKinley, Louisville.

"I threw away the old costly dry cells. Nothing but storage batteries and an R. B. Charger for me."—Alfred Rosenstein, New York.

"Only wish I had bought an R. B. Charger a year ago."—Robert Merton, St. Louis.

"Don't see how it's possible for you to put out such a wonderfully effective charger for only $2.00. Send me two more for friends."—Henry Benjamin, Cincinnati.

How to Stop Blooping and Man-Made Static

Part VIII—Is It in Set or Outside?

By The Technical Staff

CLOSE TO the end of the last article several tests were mentioned which the set owner could either make for himself or have done by the Radio dealer from whom he was purchasing equipment. The locating of trouble by means of these tests is not particularly difficult as can be seen by study of the following paragraphs.

First test: To determine if the noise in the receiver is due to a fault in your receiver or is actually interference coming in from the air. Disconnect your aerial and ground wires. If there is no reduction in the intensity of the noise, while the broadcast music is stopped by the disconnection, the probability is that the source of the noise is in your own receiving set, in the form of a loose connection, faulty batteries, or defective tubes.

If the disturbing noises are considerably reduced in intensity, or cease altogether, you may be reasonably sure that these noises are due to external causes. Their source may possibly be in your own home—electric motors or electric heating or cooking appliances. Again, these noises may be caused by more distant electrical disturbances of many sorts, or heterodyne whistles from broadcasting stations or receiving sets. Just before disconnecting the antenna you must note very carefully the character of these noises, otherwise you may confuse them with noises originating in the receiving circuit which are caused by its being thrown into an unstable condition by the removal of the antenna lead-in. With some receiving sets, a readjustment to a condition of less sensitivity may be necessary before the antenna is disconnected.

Assuming that the disturbing noises are now shown to come from the receiving circuit, how can one tell that they are not caused by some defect in the antenna or in the ground connection? An examination of the antenna is, for evident reasons, not very convenient and many listeners prefer to leave this to a Radio service man. This action need be taken only after tests upon the receiving set itself fail to indicate the difficulty. If the antenna has been carefully installed it is not likely to give trouble. It is a simple matter to examine the ground wire and determine if it is intact. This should be done while the set is tuned to a local station, and particular attention should be given to the point of contact of the ground wire with the water or steam pipe. In the event of an insecure contact, a grating sound will be produced in the phones or speaker when the wire is shaken near this point of contact.

Most antennas are equipped with a lighting circuit: From cases of intersource of difficulty. While the receiving set is adjusted as for normal operation, the wire leading from the lightning arrestor to ground should be disconnected. If this causes a noise in the speaker it indicates a defective arrestor.

Outside Disturbances

Second test: To determine whether the interference originates in your own house lighting circuit. From cases of interference investigated, it has been found that a great number of these are of a purely local nature, originating in such sources as a lamp loose in its socket, or a loose plug of a heater, or from faulty household apparatus. While the interference is continuous, have someone open the main house-lighting switch for a few seconds, at the same time listening in on the receiver. If the interference stops when the switch is open, the source of the interference is probably in your own circuit. This test should be repeated several times, however, as there may have been a misleading coincidence with something occurring outside at the instant this switch was opened the first time. Many sources of interference do not start again immediately as the switch is closed, so that observations taken at the instant of opening the switch are more reliable than those taken at the instant of closing it.

Extent of Area Affected

Third test: To determine the extent of the area affected by this interference. When you are sure that the interference comes in on the air and does not originate in your own set or in your own house-lighting circuit, you should communicate with others in your district who have Radio receivers. Great care should be taken in making this test to avoid the danger of confusing the interference which originates from different sources, which may appear similar in the receiver.

The most satisfactory way of making this test is for one observer to listen to the interference received on two Radio receivers at different points at the same time by means of a telephone system. To carry out this test, an assistant at the distant Radio receiver should place his head phone (or preferably his loud speaker) near the transmitter of the telephone in order that the observer at the other receiver may listen at the same time to the interference heard on his own receiver at his right ear, while listening to the interference heard at the distant Radio receiver by means of the telephone, at his left ear. This test should be continued for a sufficient length of time to observe a number of variations in the nature of the interference.

In cases where it is not convenient to use the telephone system for this test, the two observers at distant Radio receivers may keep an accurate log of the interference, but in this case they should first synchronize their watches and record any characteristic change in the interference heard, noting the time accurately to within a few seconds.

Fourth test: To determine if any suspected source actually causes Radio in-

(Continued on page 22)

Revolutionizing because of the application of new and fundamentally sound principles to the rectifier.

B-eliminators or parts, specially designed for use with RAYTHEON tubes are made by these and other well-known manufacturers, and are now on sale at your dealer's, Price $6.00:

CAMBRIDGE, MASS.

Build Your Own "B" Eliminator!

RADIO DIGEST shows you, in this week's issue, how to build your own "B" battery eliminator. It's easy to do, will save you money, and will insure better operation from your radio.

For Raytheon and Filament Tubes

Better reception can be enjoyed with higher and constant voltage. A "B" Eliminator insures higher voltage constantly. The current consumption is negligible. The eliminator will take care of from two to ten tubes. For best results in your eliminator, be sure you use the Jefferson 355 Transformer and Jefferson 356 Chokes. No noise, no hum, no distortion with this efficient "B" eliminator. Their cost is no greater, yet they embody distinct advantages. The Jefferson 355 Transformer can be used both for Raytheon Tubes and filament tubes—a unique feature.

Jefferson Essential Units for "B" Battery Eliminators are sold through dealers. If your dealer does not have them in stock, write us and we will see that you are supplied. The Jefferson 355 Transformer sells for $7 (only one is needed); Jefferson 356 Chokes sell for $4 each (two are required).

The Reader's View

You Gotta Know How

Why pick on the single circuit?

In looking through the issue of February 6, I noticed a letter from R. McB. M. of Mansfield, Ohio. Apparently he doesn't like the so-called "single circuit."

There is always a limit to everything. Anybody knows that a single circuit will cause no more interference than some of the other sets, especially the super-het, if it is rightly operated. Of course, some of these respectful people haven't the brains to operate such a set. I would be very glad to teach such people how to operate such a set.

But why make such a fuss over a little thing like this when there is so much good entertainment on this free air of ours?—N. A. F., Cedar Rapids, Iowa.

Another 10-Watt Getter

In Feb. 20 issue of Radio Digest I see that J.M.H., Lake Charles, La., thinks it quite a feat to pick up 10-watt stations on a broadcast receiver and would like to know how it is done. If C.E.J. of Boston does not satisfy him, I will be glad to if he will write to me. I have had WOWL on a loud speaker using three 199 tubes and at a time when the air was full of stations on nearly same wave length. WOWL is located at New Orleans so he should know if this is good reception or not. WOWL says it is.—H.W.H., Vandalia, Mo.

A Friend to Sopranos

Have just read the letter in "The Reader's View" signed C. A., Columbus, Ohio, and, having held the same opinion until the advent of resistance coupled audio, would like to suggest that before condemning the "Old Hen Soprano" we try this type of audio in connection with the W. E. cone speaker.

Have just listened to a soprano solo from WCBD and it was fine.—T.L., Okmulgee, Okla.

HELP STOP BLOOPING

(Continued from page 21)

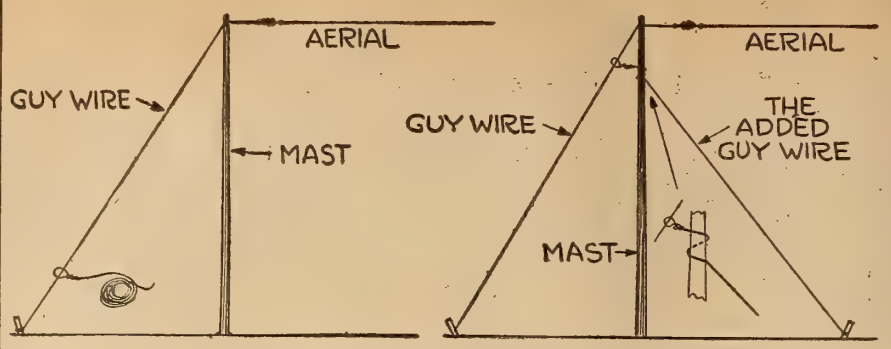
terference. In carrying out this test, either of the systems referred to in test number three is suitable. Great accuracy is required in these tests, for it has been found that many misleading reports have been received from observers who were not sufficiently accurate in their observations. For instance, interference has been reported to be associated with the switching on of the street lights in cases where the interference actually was produced by another circuit which was switched on every evening about dusk. If the observers in this case had noted time very accurately, the source of the interference could have been located much more readily.

Fifth test: To determine from where the interference radiates by means of a portable Radio receiver. In cases where a portable receiver is available the source of interference may be very often traced by this means. Some of the apparatus used by power companies and Radio clubs to locate interference from motors and dynamos, from street lighting circuits and house lighting wires, from telephone systems and high tension circuits, will be presented for duplication by those requiring such equipment. Each listener has the job of seeing that his own set and the electrical equipment in his house are not causing interference to his neighbors. You should also assume some responsibility in the direction of locating troubles outside your house and reporting these troubles. If every listener would do this consistently and conscientiously, it can most definitely be said that the interference in broadcast reception, aside from natural static, would promptly be reduced to an unnoticeable amount.

The staff wishes, at this point, to give credit for much of the information contained in this chapter to E. P. Peck of the Utica Gas and Electric company and M. B. Strock of the bureau of standards. All of the tests suggested have been carefully tried out both for ease of accomplishment by the unskilled and for value in eliminating trouble.

(Next week the series reaches the construction of trouble shooting apparatus and complete data and operating instructions will be included.—Editor's Note.)

TRICK FOR ATTACHING REPAIR GUY



When I erected my aerial mast I put only two guy wires on it. The other night a strong wind came up and blew the mast down. As I was in a hurry to get the mast up again, I neglected to put more guy wires on it. Because it was too much trouble to take the mast down again, I took some wire, looped and twisted one end around one of the guy wires, as shown in the diagram. Then I held the other end of the wire and walked along toward the post. The loop of wire slid up the slanting guy wire to the top. I then walked around the post once and tied the wire where I wanted it. The wire is then to be fastened to the post, making a third good guy wire.—Buell Beadle, Hartford, Kansas.

CLASSIFIED ADVERTISEMENTS

Classified advertisements in Radio Digest produce results. Have you a receiving set to sell? Do you want to buy a Radio? A classified advertisement in this column will sell your set.

Rates are twenty cents a word for each insertion, five per cent discount for four insertions, ten per cent for thirteen insertions, fifteen per cent for twenty-six insertions, twenty per cent for fifty-two insertions. Name and address to be included at above rate. Cash should accompany order. Minimum of ten words.

Objectionable and misleading advertisements not accepted. Forms close three weeks prior to date of publication, which is Saturday.

BLUE PRINTS

Super-Het, Ryan's Simplest Possible 7-Tube Set. Complete instructions, actual size template. How to make a loop. All for 50 cents. Book Dept., Radio Digest, 510 North Dearborn Street, Chicago.

MISCELLANEOUS

Photos of Your Favorite Radio Stars. Ten cents and coupon appearing on another page of this issue will entitle you to one of the photos from Radio Digest gallery of stars. Radio Digest, 510 North Dearborn Street, Chicago.

Radiophone Broadcasting Stations

Corrected Every Week—Part III

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

NOTE.—The third part of the schedule list appears below. The fourth part which consists of the remainder of the list will appear next week.

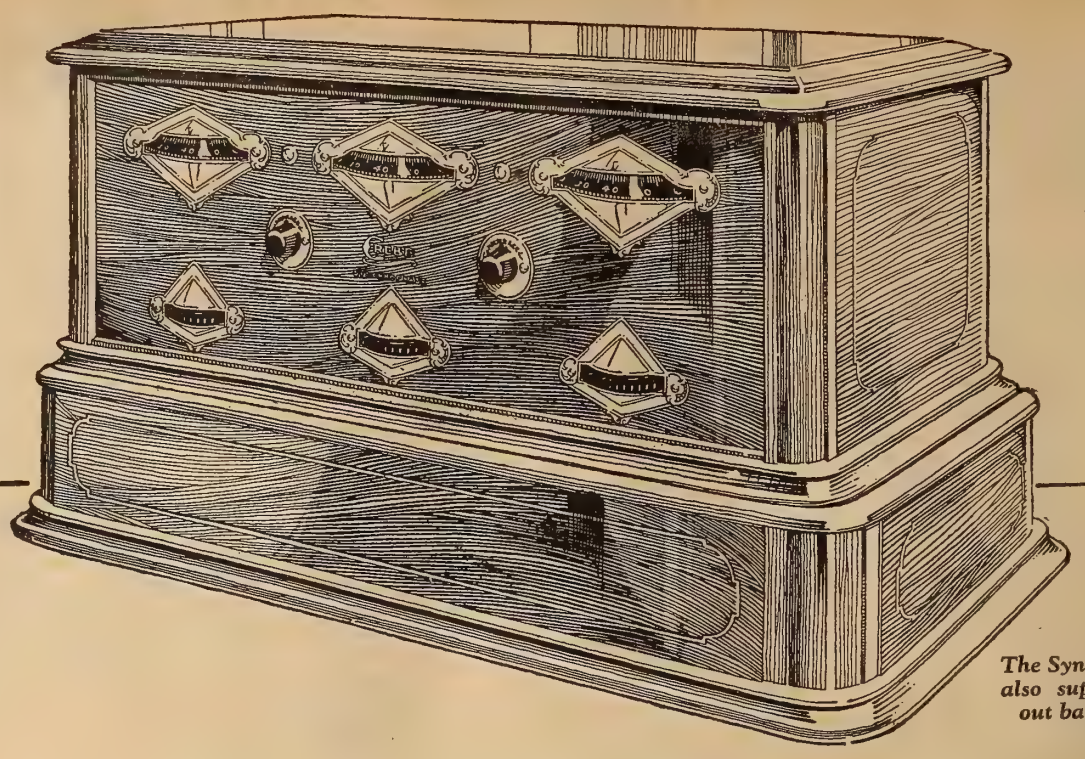
(Note—The fourth part of the directory will appear next week.)

It is written:

"A perfect vase never came from a bad potter's wheel."

When one realizes its origin, the superior reception of the Synchrophase is not to be wondered at.

Doctor Thy



The Synchrophase is also supplied without battery base.

Why the Synchrophase Appeals to the "Fan"

HE, more than anyone else, understands what Grebe quality means. He best realizes why Grebe construction is reflected so surely in the superior reception of the Synchrophase.

The Grebe Synchrophase, built to satisfy the "fan", has quickly won first place in the opinion of the average radio user.

Ask your dealer to show you what Grebe reception means.

McNAMEE AND HAY QUIT GOLD CUP RACE

CONCLUDE ONCE ENOUGH TO WIN FIRST PLACE

1924 and 1925 Victors Establish Precedent—Eighteen New Candidates Entered in Announcers' Race

Stand by for a shock, ye supporters in the Middle West of George D. Hay, WSM, and in the East of Graham McNamee, WEAF, for they have philanthropically and voluntarily decided that they will not try for the Gold Cup Award this year.

The decisions not to run, tendered by the winners of the 1924 and 1925 Gold Cups, arrived by mail almost simultaneously. The two letters were but several hours apart, and each of the past champions voiced the sentiment that one cup was enough for any announcer. It was time to get out of the race and let the other fellows win.

Both McNamee and Hay feel that they would not win again this year regardless of their running, but that the votes which would be wasted upon them should go to someone else.

McNamee Describes Cup

So that ends the race as far as McNamee and George Hay are concerned. The Gold Cup Award editor accepts their withdrawal, and the precedent of "single terms" for Gold Cup announcers is thus established.

Graham is much pleased with the cup he won last year by the aid of his friend announcers and Radio fan supporters. He says:

"The cup graces the top of my Radio set and looks very beautiful in its glass case. The usual comment of friends who see it for the first time is that it is, undoubtedly, the most beautiful cup they have ever seen. I feel the same way about it myself and am very proud to be the possessor of such a beautiful piece of art work."

Nominations Come in Fast

Added to the sixteen nominations announced last issue, eighteen more candidates have been put in the race by listeners in. Old and new names, handling microphones scattered from the Mississippi's delta to the seat of the Canadian government, and from the Atlantic seaboard to the wheat belt, are found in the list. The eighteen new contestants are:

CNRO.....A. W. Ryan
KDKA.....George S. Ryan
KTHS.....G. C. Arnoux
KFNF.....Henry Field
KYW.....Sen A. W. Kaney
WAPI.....W. C. Wall
WCX.....C. D. Tomy
WDAF.....H. Dean Fitzer
WDOD.....John T. Carter
WGN.....Quin Ryan
WHO.....N. Dean Cole
WJZ.....Norman Brokenshire
WJZ.....John B. Daniel
WOC.....Peter McArthur
WOI.....Andy Wolfreese
WOAW.....Lester Palmer
WRC.....Edw. B. Husine
WSMB.....C. R. Randall

If your favorite announcer's name is not in the list above or did not appear last issue, fill in the nomination blank at the right top of this page and get him into the running. Then SAVE your ballots for him. Don't miss a SINGLE ballot, for when these are turned in to Radio Digest in a group of CONSECUTIVE numbers, a pleasing and worth while bonus of extra votes is allowed the announcer for whom you are voting.

How Bonus Votes Are Given

The ballots, which appear weekly beginning last issue at the left top of this page, are numbered consecutively. They will appear every issue until the close of the contest. Each of these ballots will count for one vote when sent in separately.

But when held until you have four consecutively numbered ballots, and sent in at one time to Radio Digest, a bonus of eight votes, or a total of twelve votes, will be allowed the candidate for whom you are voting.

The larger the number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes, or a total of twenty-eight votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. And for a complete series of ballots, including one from each issue from March 27 to and including the last, which will appear in the September 1 issue, a bonus of fifty votes will be allowed.

Send in nominations or ballots to the GOLD CUP AWARD EDITOR, Radio Digest, 510 North Dearborn street. Chicago.

The government of the Dutch East Indies has authorized the erection of a large broadcasting station and the private use of receiving sets under license.

Looking Ahead

In the Next Issue of Radio Digest, readers of the thrilling Radio mystery serial, "A Step On the Stairs," will find a great many enlightening incidents. Real names and real characters will be discovered by the police motor lights. It will seem to unfold most of the mystery—and yet, will it? Draw your conclusions and get ready to write your own answer for one of the big cash prizes.

Pensacola Is One of the Old Towns on the Gulf Coast of Florida. It is one of the old forts, rich in traditions but keenly alive to the trend of modern life. It has established its own broadcasting station, municipally owned and controlled. You will be interested in reading about WCOA at Pensacola, Florida, in our next issue.

Just as Individuals Have Personalities, vivacious or serious and dignified, poised or hoity-te-toity, musical or speechy and educational, so do these characteristics identify various broadcasting stations. A bit of analysis along this line with special reference to WGCP, New York, in a forthcoming issue of Radio Digest.

The "Don't Bloop" Articles Continue. The technical staff, in the next issue, will offer timely advice for the selection of interference inspectors, together with the circuit and constant values for the construction of a portable receiver.

Interested in "Supers"? Professor Owen's second article of his series upon the Super-Torodyne will be of unusual interest to those who enjoy building the latest. Panel layouts and arrangement of parts will be described.

NEWS BRIEFS FROM THE BROADCASTERS

WAR-TIME TUNES WILL BE PLAYED THROUGH WJZ

Lieut. Macready to Speak Over WLW—KSD, St. Louis, Joins Capitol Theater Gang

"Memories of the World War," a collection of 1917-18 tunes made by Capt. Wm. J. Stannard, U. S. army band leader, will be repeated by WRC, Washington, and WJZ, New York, during the latter part of April.

* *

Lieut. John A. Macready, famous for his altitude and transcontinental airplane flights, will speak from Crosley WLW, Cincinnati, on Tuesday evening, April 13, at 7 o'clock Central time.

* *

Station KSD, St. Louis, has been added to the list of broadcasters giving the Sunday evening programs from the Capitol theater, New York. The seven others on the list are WEAF, WCAP, WJAR, WWJ, WCAE, WEEI and WTAG.

* *

The North Dakota American Legion official program will be given from Station WDAY, Fargo, on April 18, from 4 to 6 p. m. Central time. The wave length is 261 meters.

* *

President Coolidge, unable to attend in person, will be one of the many listeners hearing the party of the Exchange clubs of Connecticut, to be broadcast from WTIC, Hartford, on Saturday, April 10, at 8:30 p. m. Eastern time.

* *

Two one-act plays, written for Radio, will be presented on Thursday evening, April 15, by the KGO Players, at Oakland, under the direction of Wilda Wilson Church.

* *

"The Oriental Symphony" is the latest WGN attraction. It is a studio orchestra which plays special arrangements of every one of its selections of popular music.

* *

Over $50,000 worth of presents were given away by the Missouri State Marketing Bureau station, WOS, when an interstate old fiddlers' contest was held last week. Sixteen fiddlers from eight states participated.

* *

Robert Hurd, well-known authority on music and entertainment, has been added to the staff of KFI as program director. His duties, KFI emphasizes, will be as large and important in scope as the leading motion picture directors are to the motion pictures.

* *

Members of the Kittredge Glee club were heard over WGBS, New York, last week in a program of Easter carols and appropriate music aided by the ukulele section of the club. The Kittredge Glee club was founded 35 years ago by the Rev. A. E. Kittredge for the professional and business girl.

* *

The latest "nut" club to take the air is the "Wisecracker Club" of KNX, Hollywood. It is now one month old as a weekly feature. The "Duke" and the "Count" are the "Chief Crackers."

* *

A modern adaption of the old-fashioned almanac is heard nightly from WLIB, Chicago, at 7:20 p. m. Central time. The broadcast's nature is very similar to the type of material found in the almanac, and it precedes the weather forecast for the night and following day.

* *

A New York Liederkranz and a Syracuse dance orchestra entertained listeners in the African rand and veldt recently when WGY's program was rebroadcast in Johannesburg, South Africa, in what is believed to be a record relay. WGY's 32.79-meter wave was received and repeated on a higher wave by an African amateur.

HOLLYWOOD SINGER HAS PERFECT VOICE

MISS Lilyan May Challenger, who adorns our cover this week, is the girl who sings the silver chord during the hour of the Silvertown Cord orchestra at KNX, Hollywood, California, every Monday night from ten to eleven, Pacific coast time. She cherishes a unique distinction in a compliment received from Dr. Lee De Forest, father of the modern Radiophone, who declared that she had "a perfect Radio voice." The tone is contralto and by gift of nature the quality seems to be of a precise vibration that makes transmission practically 100 per cent perfect.

STATIONS READY FOR BASEBALL

BIG PAGEANT TELLS AMERICA'S HISTORY

EIGHT-HOUR PROGRAM IS GIVEN THROUGH WOAW

Listeners Ride With Columbus on "Santa Maria" and Through Events Up to World War

OMAHA, Nebr.—"America," a Radio historical pageant, lasting eight hours, was broadcast here last week by the Woodmen of the World station, WOAW. Written by Eugene Konecky, announcer, poet laureate, and well-known author of the staff of the station, "America" afforded a presentation not often heard by Radio listeners.

Twenty-three episodes revealed through their musical arrangements and dramatic scores the history of the United States since the discovery of San Salvador by Columbus. The elaborate celebration was in commemoration of the fourth anniversary of Station WOAW, the voice of the Woodmen of the World Life Insurance association.

Pageant Covers Nation's History

By means of the pageant, which is believed to be the first ever attempted over the microphone, listeners rode with Columbus on the "Santa Maria," penetrated Florida with Ponce de Leon, looked for the first time down upon the peaceful waters of the Pacific ocean and fought the Indians at Jamestown.

They again sat in on the drawing up of the historical compact aboard the "Mayflower," struck for liberty with Roger Williams at Providence, witnessed the futile dream of the Indian chief, Pontiac, as it was shattered by the white man's power, and kaleidoscopically reviewed the epochal periods of the American revolution, the Gold Rush, the Civil war, the Spanish-American war, and the great World war.

The musical arrangement included choruses, bands, quartets, and instrumental and vocal soloists. Hundreds of ingenious sound effects were created.

INSTALL RADIO SET IN LONG NON-STOP TRAIN

Arrangement Will Make Trip of 226.5 Miles Entertaining

LONDON.—The Great Western railway, one of the "Big Four" of the British railway world, has installed loud speakers in the dining car of the famous Cornish Riviera express which leaves London at 10:30 a. m. daily for Plymouth. In addition head phones will also be available for use in the coaches.

The railway's object is to make the longest non-stop run in the world—226½ miles—an entertaining one for passengers. The trains travel at the speed of seventy-seven miles per hour.

Western Stations Showing Interest in Rebroadcasts

LOS ANGELES.—Due to the great distances in the far West with the resulting prohibitive cost of telephone interconnection between broadcast stations in the various cities, a great deal of interest is being shown in rebroadcasts. The only telephone hook-up between stations in the West is the one between KFI and KPO, a distance of slightly over 525 miles.

Stations KNX, KMTR and KFWB in Hollywood each have portable short wave transmitters mounted in busses which are used to feed programs to the main stations.

The following stations have signed off: KDZB, Bakersville, Calif.; KFAJ, Boulder, Colo.; KFVH, Manhattan, Kan.; KUO, San Francisco, Calif.; WDBC, Lancaster, Pa.; WEBM, portable; WHBK, Ellsworth, Me.

KIND BANDITS GIVE VICTIM FARE HOME

CHICAGO. — J. Elliott Jenkins, wealthy Radio engineer and broadcasting station contractor, was kidnaped here in his automobile on a recent night by seven armed men. His wife, formerly Alexandria Carlisle, famous actress, gave chase but lost the bandit car. However, the kidnaper-robbers were kind and removed but $16 from Mr. Jenkins' pockets, giving him $1 for taxi cab fare home. "I had the time of my life," he told his wife after rejoining her.

TELEVISION WOULD END WAR—MARCONI

LONDON. — Senatore Guglielmo Marconi has declared in an interview with the "Vossische Zeitung" that television will make war impossible two years hence. By that time, in the great inventor's opinion, the problem of sight at a distance will have been completely solved, and it will thenceforth be impossible for any troops to take cover without being "spotted" by the enemy.

DOUG, MARY AND ANNE VISIT WBOQ

Mary Pickford and her husband, Douglas Fairbanks, paid A. H. Grebe Station, WBOQ, a visit recently in the company of Anne Morgan, wealthy philanthropist, and so the picture above was snapped. Mary is pouring her reasons for being a professional woman into WBOQ's mike while Doug strums an obbligato on the Irish harp and Anne looks on amusedly.

In Moment of Weakness, Man Confesses Doing 'Slow Train Through Arkansas'

Thomas W. Jackson of Chicago, Ends Search of Years When He Breaks Down and Tells KTHS Audience He Wrote Book That Sold 7,000,000 Copies

Who wrote the "Slow Train Through Arkansas?"

That question has rankled in the breasts of Arkansasians for, lo, these many moons. The author of same has often been invited back,—to be shot, but so far there has been some confusion as to just who was the "guilty" party. Some thought it was Opie Reed, the famous wit and writer of 60 published books.

But it took Radio to set the question,—and the "Slow Train Through Arkansas" has always been a tender spot down in the "Wonder State,"—to rights.

Opie Reed recently paid Hot Springs a visit on the famous golfers' pilgrimage conducted by the Golfers magazine. Opie came to KTHS, the New Arlington hotel at Hot Springs, and took up ten minutes telling the folks tuned in that he most emphatically did not write same, but that "a fellow named Jackson" did. In fact, he was so emphatic that he forgot to tell any of his famous jokes, except one,—namely that in all the 300 golfers on the pilgrimage,—only one to date had lied about his score.

Two weeks later came Thomas W. Jackson, of Chicago and he also appeared before KTHS' mike to plead guilty to the charge of writing the "Slow Train Through Arkansas,"—which by the way has the record of 7,000,000 copies sold, more than any copyrighted book in the world.

Jackson hastily pleaded guilty, but said he had no insidious intentions to reflect on Arkansas when he wrote it. At that time, he said he used to travel the cotton belt and was a railroad man himself. In those days, he told his Radio audience, the engineers used a calendar instead of a time table and the whiskey dealers sent their shipments via Cotton Belt to prove its age.

Following his talk, which settled once and for all the burning question of the "Slow Train" and its author's purposes in writing it, the neck tie parties tuned in, took a vote and decided to dismiss the charge.

Eastern Man Listens to KFI 100 Evenings

Has Better Reception This Year Than During 1925

LOS ANGELES.—G. Edward Elwell of Bloomsburg, Pa., earned the coveted title of KFI's official listening post when he recently sent in his 100th consecutive log of a portion of KFI's programs.

During 1925, Elwell attempted to get the record of 100 night's consecutive reception of the Pacific coast station, but summer static broke in after he had logged them for 68 times straight. Starting again on November 1, 1925, Elwell has received KFI each night for 100 times and is going strong on the second hundred.

FOUR OF BIG LEAGUE OPENERS ON AIR WITH SEASON'S START

Broadcasters Announce Heavy Schedules Devoted to National Pastime—Many to Give Play-by-Play Results—Majors Start April 13

Four of the eight major league baseball games surely, and possibly more, will go on the air April 13, play-by-play and direct from the diamonds when the royalty of the bats and bases, outfield and pitcher's box, once more get into swing for a grand and glorious bunch of home runs and triple baggers. Principal broadcasting stations scattered all over the country are preparing to make the ball season of 1926 the best known in history.

Ball-Radio fans will have the opportunity of their lives of hearing the diamond news first hand over their receivers. Office boys will not need to hold open season for grandmothers—all they'll need will be crystal sets.

Four Big League Games on Air

The four major league games which will be broadcast play-by-play on Tuesday, April 13, when the Nationals and Americans start their season, and the stations which will give them are:

Brooklyn at New York, WJZ, WGY.
Chicago at Cincinnati, WLW.
St. Louis at Chicago, KOA.
Philadelphia at Washington, WRC.

WRC had not completed arrangements for handling the latter game as this paper went to press, but it is almost certain to be broadcast. Besides the opening game, WRC plans to give play-by-play results this season for every game the Washington American league champions play away from home, beginning on April 21 when Washington plays Philadelphia. Bulletins from other major league games will be announced between innings, and every evening this Washington station will report the complete daily scores in all leagues.

KOA to Give Western League Opener

WJZ and WGY each night throughout the season will give the results of all the major league games, and as usual will broadcast the play-by-play story of the World Series.

Following the opening game between the Chicago Cubs and the Cincinnati Reds, WLW will devote the rest of the season to giving results of all major league games every evening except Sunday at 6:50 p. m. Central time. Sunday evening the scores will be given some time during the program.

KOA, General Electric station at Denver, is going into sports broadcasting this summer very thoroughly. The Denver-St. Joseph opener of the Western league will be given play-by-play on Wednesday, April 14, following the Chicago-St. Louis game on Tuesday. Tennis, golf and other tournaments will be broadcast as they occur.

Chicago Cub Home Games Covered

WMAQ, the Chicago Daily News broadcaster, carrying the authoritative descriptions of Hal Totten, sports announcer, will give play-by-play results direct from the diamond for every home game, except those on Sundays, of the Chicago Cubs. When the Cubs are away from home, only the scores will be broadcast.

Unless one of the Chicago teams figures in the World Series, WMAQ will also broadcast the City Series between the Cubs and the White Sox. Every afternoon, except Sunday, at intervals of fifteen minutes, WMAQ will broadcast the scores by innings for the major league games.

The first home game for the Chicago

(Continued on page 16)

YIPE-YIPE, BOW-WOW, DOGGIE DOES IT NOW

NEW YORK.—Dogs now bark for the morning exercises! A letter just received by WEAF, which broadcasts each morning the "Tower Health Exercises" of Arthur E. Bagley direct from the Metropolitan Tower, New York, asks for an exercise chart especially prepared for Boston Terriers. This Radio "fan's" dog insists on his "Daily Dozen" each morning. Yessiree, it's a dog's life to have to get up every morning and do those setting-up exercises, bow, wow!

Sunflower Girl Vamps Texans

SWEET Singer From Kansas

Returns Soon from Short Vacation to Listeners of WBAP, Fort Worth. Hired Hand Trains Her Voice to Suit Mike.

WE MENTIONED the power of her voice carrying clearly and naturally. There's a reason. It has been the oft-repeated contention of the Hired Hand, substitute announcer of WBAP, that Radio singers should be trained for microphone singing, and not attempt to tune the microphone to the singer. The worth of his contention is clearly established in this case, the initial one he has tried out.

It has been necessary for the Sunflower Girl to pitch her voice lower than was accustomed. She transposes all her music to meet this condition, and by virtue of playing her own accompaniments, the difficulty is not great.

Just who the Sunflower Girl is outside the studio really doesn't matter. The Hired Hand confides that she is a relative. Be that as it may, the Radio fans will wink knowingly and believe it to be just more Truth Society stuff. Her home is in Kansas City to which she has returned for a short stay but will soon be heard again from the Texas station.

The Sunflower Girl smiles and says there is quite a difference between her first record—receiving three letters a week—and two of those—bills, and getting 3,919 letters in five days, her record for one week. Invitations for prolonged visits come frequently; sometimes a proposal for her fair hand slips in; but always there is candy by every post.

NOT by any means the least appreciated of her candy gifts, was a box packed with the candies dear to the heart of childhood: lollipops and licorice and all-day suckers, candy hearts and jelly beans. "Do you know," the Sunflower Girl said, "I cried when I opened that box and the realization came to me of all that it had meant to the donor to send that dear little box to me."

Other gifts include a bear-skin rug from Radio fans in the mountains of Colorado. From Radio fans on an Ohio prison farm came a beautiful pen and ink sketch of the Sunflower Girl, seated before a piano, as visualized by them. Foreign coins are also cherished mementos, as well as the exquisite pearls she wears.

The Sunflower Girl endeavors to answer all letters, but even with the aid of an assistant, it is an impossibility. "You'll tell them that I do so love them all though," she said.

You've heard the Hired Hand say Sunflower's hair is red, haven't you? And you've heard her contradict that it is vermillion, too, haven't you? Honest Injun, it is the beautiful shade of Titian that artists rave over, and a peaches and cream complexion, with nary a freckle to mar it. She is "five foot two" and one hundred and two.

The Sunflower Girl says she received the thrill of her (*Continued on page 20*)

"But wouldn't you like to know her real name?" taunts Hired Hand (below) at WBAP, Ft. Worth, who discovered Miss Sunflower.

She's very shy, extremely modest but, Boy, how this Sunflower Girl (above) can sing! She has been missed sadly during her recent vacation from WBAP.

By SUSAN HAYMES

IT ISN'T very long—only two or three months—since the Sunflower Girl of Kansas first began singing over WBAP, the Fort Worth Star Telegram and Record Telegram station at Fort Worth. It was a voice with a decidedly new lilt in it, with magnetic personality back of it, and a voice that was broadcasting to an unusual degree of clearness and naturalness. From the very beginning, it seemed to excite an unusual interest in the minds of the Radio fans.

They began even then to write letters to WBAP, asking about the new singer. "Please tell us something about the Sunflower Girl," they wrote; and they have continued to make that request with increasing frequency.

Anyone who knows her would jump at the chance of answering these queries about her! She is the kind of person you LIKE to talk about—provided you enjoy talking of people who make you feel happy. Without being in anywise a Pollyanna, she is a record-breaker when it comes to dispensing good cheer.

WDAE Steals Fish Playground

With Miss Dorothy Mason (above) to instruct through the microphone and Isham Jones' orchestra (below) to play there should be no reason why WDAE listeners shouldn't know how to dance.

MILLIONAIRE BUILDS Wall Around Section of Tampa Bay and Fills It up with Florida Real Estate. Antenna Towers where Tropical Fish Once Romped in Glee.

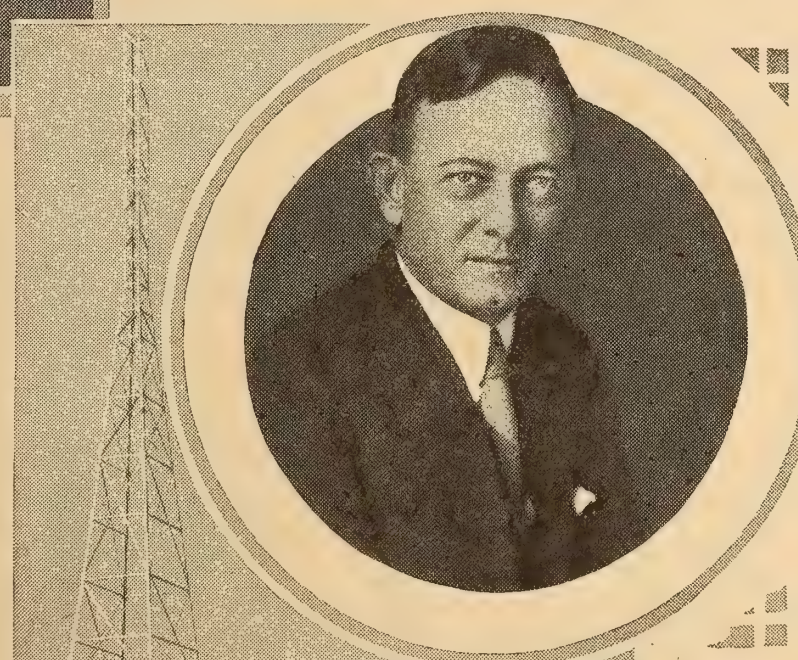
By HAROLD P. BROWN

"FLORIDA," that magic name, "Flowerland," has been in the minds and on the tongues of more people in the United States during the past two years than has the name of any other state in the Union. Yes, it seems as though even glorious California with her own private climate and beauteous scenery must make a slight though haughty bow to the fair sister at the gateway to the Gulf of Mexico.

Every Main street in the country has its local citizen who has turned a pretty penny in Florida, buying and selling lands and estates or town lots. Then there is the enticing languor of the old South, the Spanish architecture, moss draped trees, little lakes of crystal water, long stretches of hard, shell roads and the mellow warmth of a summer sun in winter. Above all, however, is the enticement of riches quickly gained, the vision of cities springing up in grandeur on fronded shores, marble palaces, business enterprises, houses with red tile roofs, great public works, ten-mile bridges, new railroads —prosperity, PROSPERITY!

Although the roads to Florida have been glutted with touring motorists all winter long and embargoes have been placed on freight because of the surplus of shipments, there is no rest from the beckon and call on the part of those who are there and "there to stay," as they proudly declare. Only the limitation of broadcasting waves prevents Florida from bristling with antenna towers from Jacksonville to the Keyes.

But Tampa was lucky. It has the Tampa Times and the Tampa Times was foresighted enough to establish its station, WDAE, five years ago—the first in the state. During the past two years that city has seen a building growth that meant the actual expenditure of $20,000,000. In fact the big hotels and apartments have been springing up in such close proximity that one enterprising real estate man obtained title to a section of land at the bottom of Tampa Bay, built a sea wall around his property, filled it up with a thousand acres of real estate and on this he built a Radio station.



Dave P. Davis (above) who built a thousand acre island in Tampa Bay and set a Radio station in its center (left).

IT WAS largely on an impulse that Dave P. Davis, the builder of the island, decided as an afterthought to add a Radio station. He had recently abandoned all other sports for the DX chase. And it was nothing at all for him to stick to the dials until the morning sun crept into his room. He figured he was not alone in this DX world, so he called in his friend "Tod" Megargle of the Tampa Times after one particularly successful night and they mapped out a 5,000-watt station. He would give those other DXers a new one to put in their log books.

There was the money, the disposition, the location and the goods, but they had not reckoned with the government wave dispensers. No wave was obtainable. Very well, Station WDAE of the Tampa Times would serve for both. A cooperative agreement was satisfactorily arranged. The engineers went to work and two 110-foot steel towers loomed up on the Davis Islands where formerly the tarpons and flying fishes sported in their tropical glee. Facilities for a 5,000-watt transmitter were installed. While work was progressing on a new administration building and studio, temporary quarters were fitted up in the Davis Islands Country club.

But the villain still pursued them. Station WDAE was not permitted to increase its power to 5,000-watts. Donald Thompson, one of the best Radio engineers in the South, scratched his head and got out a pencil. He had a lot of expensive material on hand to play with but he didn't "durst" shoot more than 250 watts at a crack. Like a cat on a wet lawn he got into the middle of it and began to juggle the various parts around in a way no one ever had heard of before. He was in his element. When he stepped out it was something entirely different than it had originally been. Don stood back and beheld the contrivance lovingly, a child of his own. Would it work?

Would it? Ask Robert T. Porter of Honolulu. Ask John P. Hoyt of a town in northern Alaska. Ask a score of other persons scattered from South America to upper Canada, who responded with letters and cablegrams from these ultra DX points to WDAE, Tampa, Florida, that opening night. And WDAE did it and is continuing

(*Continued on page 20*)

CHOP SUEY SOLVES LIST OF PROBLEMS

DISH IS EASILY MADE OF CHEAP INGREDIENTS

Miss Betty Crocker Also Gives Recipes for Cooking Swiss Steak and Soup Stock

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEI, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

BECAUSE of the hundreds of requests coming in, it is impossible to give a whole talk on each subject requested, and so I have decided to give you a collection of recipes for which we have had many requests. The first recipe I am going to give you will answer many questions. It is a good left-over dish, a one-dish meal, and another suggestion for using a cheap cut of meat. It is American chop suey. Here is the recipe:

One-half pound lean pork, 1 onion sliced, 5 cups soup stock, 2 cups celery, 2 tablespoons chop suey sauce, 1 green pepper, ¾ cup uncooked rice, 1 tablespoon sugar, 3 teaspoons salt, ½ teaspoon pepper.

Method: Cut meat in small pieces. Cook pork and onion together in the fat cut from the meat. When partially cooked add celery, green pepper, uncooked rice, soup stock and chop suey sauce. The celery and green pepper should be sliced but not finely chopped. Add seasonings. Cover and let cook slowly until tender. The total time of cooking is about 40 minutes. This amount will serve six. The chop suey sauce may be omitted if you do not care for it, and if you do not have the soup stock on hand, bouillon cubes may be substituted.

Swiss steak is another recipe for which we have had many requests. This is the way we prepare it in the Gold Medal Flour kitchen: Two pounds round steak, ½ cup Gold Medal flour, 3 teaspoons salt, ½ teaspoon pepper, 3 tablespoons shortening, 2 cups tomatoes, 2 tablespoons chopped onions.

Method: Mix flour, salt and pepper together. Wipe off steak with a cloth wrung out of cold water. Pound the flour into the steak. Heat the fat in the frying pan and brown the steak on both sides. Add tomatoes and chopped onions. Cover and let simmer slowly over the fire or bake in a moderate oven, 350°F. The time required depends upon the thickness of the steak. If one-inch thick, it will require two hours cooking. This amount will serve eight. Remember that after searing the steak, the cooking should be done slowly. The flour and tomato will cook down to a smooth paste, making a sauce to serve over the steak. If it should cook too fast and become dry, add a small amount of boiling water during the cooking.

Making Soup Stock

One of the questions that comes in very often is, "What is soup stock, consomme and bouillon?" Soup stock is the foundation soup made of meat with some bones and vegetables added. When it is clarified so that it is perfectly clear, it becomes either bouillon or consomme. The difference between the latter two is that bouillon is darker in color and stronger in flavor.

(Continued on page 17)

MICROPHONE SNAPS HER JOB AT DENVER

Microphone snap shots of human nature, based on colorful experiences and observations of a woman newspaper columnist, comprise the newest attraction over KOA at Denver. This new offering over the General Electric station will be launched the third week in April as a triweekly feature by Marjorie Irene Bond who writes under the pen name of "Cynthia Grey" for the Denver Express.

FROM GARDENS TO CANDY OVER WJZ

New York Station Has Extremely Wide and Varied Schedule for Women

NEW YORK.—The period of WJZ's daily broadcast devoted to the women of the listening audience is now the half hour between 4:00 and 4:30 each afternoon except Saturday and Sunday.

Mrs. Julian Heath, the president of the National Housewives league, with her excellent advice on home economics and daily menu, is an every day feature but the other subjects taken up are extremely varied. There is a shopping service for the out-of-town woman, a course on paper decorations and flowers; a course on the care of the skin and complexion and another which tells the housewife how to care for her garden.

Another regular talk tells her how to make her own clothes while another keeps her informed as to what other women are wearing. Interior decorating is another subject, while the kitchen is not forgotten in a series on the proper use of the gas stove and another series on meats.

Elinor G. Hanna, the candy expert, is conducting a course on candy making with excellent results. The mail response shows that the women are enthusiastic in their praise of the effort WJZ is making to assist them in their household work.

SHORT WAVES

By Marcella

Clyde R. Randall or "CRR" of WSMB, in answer to Jean of Waterloo, is a nice plump little fellow weighing anywhere from 170 to 185 pounds, depending upon the regularity with which he finds time to eat. In addition, he has, as added physical attractions, eight good teeth, gray hair, blue eyes, some freckles but no pug nose, a trace of bow-leggedness and good arches in each foot. His height is about 5 feet 7 inches, but much shorter at times just before pay day. He does all of his announcing by the use of his mouth, various other sounds notwithstanding, and oh yes—he is happily married, although his wife does not come to the studio. His ambition? Just to run inside the first ten for the Gold Cup award. Now I must confess, Jean, that this horrid sketch is not my own. Mr. Randall did it all himself, so you see I am not so cruel to him. I think he's very nice anyway, don't you?

* *

Jerry Sullivan is married, Ruth, but I am sure he would certainly be glad to migrate to one of the Columbus, Ohio, stations to give them "some life," as you say, if he knew how well you liked his work.

* *

Frank Morris, former WTAS singer and entertainer, died about a year ago, I believe it was. This will answer Mrs. J. E. C., Lola and R. W. B. Lola, you did mean Morris, not Morrison, didn't you? I don't know where Eddie and Fanny Cavanaugh are. Wendell Hall is going the rounds. The last three weeks he spent in New York at WJZ. His future plans are to cover the larger southern stations and end up at Mexico City. Art Gillham, the "Whispering Pianist," was in New York for some time, but I believe he is now on tour.

* *

Lola adds that Tommy Malie came to life recently over KYW in a piano-song act with Jimmie Snyder at the piano. So Tommy hasn't deserted Radio after all?

* *

Gene Rouse has joined the fleeting mysteries. Haven't the slightest idea, Mrs. E. M., where he can be. I don't think,

a STEP On the STAIRS

By ROBERT J. CASEY

Radio Dramatization by FRED SMITH

Illustrations by HILMER C. OLSON

Synopsis of Preceding Chapters

IN THE first four episodes of "A Step On the Stairs," which are now available for 25 cents in a special reprint, we find a group of a dozen members of the Turner family in the hunt-room of the old Turner manse. They are nerve-strained and very jumpy as the result of a number of weird incidents connected with the attempted seance whereby Peleg Turner, the last of the house to die, attempts to speak from beyond the grave through a Radio loud speaker and tell them who killed his brother, Jeremiah. Ardwyn, the lawyer, presides. Mary Williams seems to be involved in most of the strange events, and the finger of suspicion is pointed at her by Aunt Helen, a gabby old widow; Cousin William, companion to Aunt Helen; Hazel Stanton, a girl whose relation to the family does not seem entirely clear, and Henry Graves who offers his protection by marriage. His offer is spurned. In the last episode John Carton, apparently Mary's accepted lover, appears in the room after the others have left for refreshments in another part of the house. Mary had fainted when she thought she felt the corpse of Peleg Turner entering the room through the front door, supposed to be barred except for the passage of the dead bodies of Turners going to their final resting place. Ardwyn left to get her a sedative. Hari Singh, the East Indian servant, unexpectedly becomes an ally of Mary when Carton, who seemed to be hiding from arrest on suspicion of the crime, is about to be trapped by other members of the party. The servant lets Carton out a side door.

Before Hari Singh is able to return, the other guests enter the room and demand an explanation of Mary as to the voice that had been heard in the room. Mary evades the questions briefly, but soon Hari Singh calls for help. He is discovered dragging in the body of a man which he said he had found outside the door in the snow. It is Milford Jones, with a fractured skull. He had disappeared earlier during the seance. While suspicions for the various evil happenings are being cast about, FYX starts up. A number is rendered and FYX stands by for the ship's SOS. Suddenly—Peleg Turner's voice comes out of the loud speaker. He curses Jeremiah's murderer whom he says is in the house and will pay the price 'ere dawn. While pandemonium reigns and Tolliver is talking, the beam of an electric flashlight hits him full in the face. Attempts to locate the owner of the light are vain. A human chain is formed to count heads. Instead of eleven people in the room as it should be, there are thirteen! Tolliver hunts matches beneath the table and is engaged in a struggle. He finds them, places them on the table, and suddenly an unknown voice threatens to shoot to kill at the first flicker of a match.

THE STORY CONTINUES.

CHAPTER THIRTEEN

The Unseen Crypt

"WHO are you?" demanded Ardwyn.

"That makes no difference," replied the voice. "I mean what I say."

"Suppose I did strike a match—suppose you did kill me," queried the lawyer, calm enough now in the face of tangible danger. . . . "Do you think you could get out of here with a whole skin?"

"You might try it," suggested the voice. "Your friend with the loud voice seems to be out of it and I don't think there's another man in the place."

"What do you want us to do?"

"We'll come to that. Just now all you're to do is put that box of matches back onto the table. Put 'em down hard enough so's I can hear you do it. . . That's it. . . . Now step back from the table and stand there until I tell you to move."

"I've heard your voice somewhere before."

"Don't be too sure of that." The comment was cruel and incisive. "You'll never get killed for what you don't remember."

"I don't forget," returned Ardwyn with a hint of triumph in his tone. "You have something over your mouth. But I know you now. I. . . ."

"Damn you keep quiet." A sudden movement in the dark told the hypnotized company that the owner of the voice had swung about toward Ardwyn. Then came silence once more. Of all the men and women in the room only two could say what had happened to Ardwyn and neither spoke.

"They've done for Mr. Ardwyn," wailed Aunt Helen Holmes. "They've murdered him. I just know they have. . . . Oh, why did I come here."

"Shut up," advised Cousin William usympathetically.

"Cousin William," gasped Aunt Helen. "Where did you get to? Why you were here just a minute ago. Cousin William."

"Keep still," came Cousin William's voice from the near distance. "Get down on the floor. If they start to shoot you'll be safer there."

"But I don't want to be shot on the floor," protested the woman. "I want to go home. I'm a good decent woman and here there's nothin' but iniquity. . . ."

Her chair creaked in evidence that she had thought better of Cousin William's advice.

"Do you honestly think it will be safer here under the table?" she asked presently in smothered tones. "I'm glad nobody can see me here."

"For Heaven's sake keep quiet," admonished the unseen William.

"FOLKS," came a muttered and unrecognizable message from somewhere near the fireplace. "We're sorry to have caused you this trouble. We didn't expect to find you here, see? But we'll not harm anybody if you just sit quiet and keep out of our way. You'll all be out of here and nobody any worse off, see? Now, everybody . . ."

He broke off with a weird gurgle that blended with the crash of falling glass.

"What's the matter?" queried a guarded voice from across the room.

"A woman," was the somewhat groggy reply from the fireplace. "I felt her hair. . . . Stand back all of you . . . I said there'd be no trouble unless you made it, see? But if the cat who hit me with that vase comes where I can get my hands on her, I'll strangle her. . . ." Once more he interrupted himself, this time with a scream that had barely ceased to echo when the triumphant call of Mary Williams rose clearly over the din.

"I have a pistol now, Mr. Ardwyn," she cried. "What shall I do now?"

A whisper sounded almost in her ear.

"Good," it said. "We can hold our own, now. But don't try to shoot it until you can see what you are doing."

"We shall go on, ladies and gentlemen," declared the voice that had halted Ardwyn's attempt to strike the match. "Even armed you can do nothing and there will be more deaths in this house unless you choose to keep quiet."

"Give in to him," murmured the unseen counsellor, "The night isn't over yet."

"Very well," replied the girl. "I don't know what you are doing here. But I can wait to find out. I shan't interfere with you while you are here providing you do not attempt to interfere with us. But I give you warning that you aren't going to get out of this room."

"We'll take our chances on that," was the hoarse rejoinder.

"Oh don't bother them, please don't irritate them," came a wail presumably from Aunt Helen. "They're murderers. They'll kill us all."

"We'll do just that if you don't shut your trap," declared the spokesman of the intruders. Then came silence, broken only by a whispering in guarded voices near the fireplace.

"If this mob will stay put we can get the stuff out," one of the mysterious conferees said at length.

"They'll stay put," said another. "Dig it out. We can't waste much more time."

Whereupon, through that tense, still atmosphere came a sound terrifying only in its associations, metal striking on brick.

"What are they doing?" demanded a male voice trembling so that it could not be identified.

"Digging for something," came an awe-sticken answer.

The metal continued to clang on the hearth as if the ghostly visitants had not heard the comments.

"GOD hurry the daylight," prayed another unseen vigilant. . . . "What is that smell?"

The clash of iron on tile suddenly was softened and there came a scraping sound accompanied by a slight tinkling.

"Earth!" someone called out hoarsely. "That's it, the scent of earth. . . . Somebody is opening a tomb."

A laugh, mirthless and inhuman, greeted this comment. It came to an end presently in a hysterical outburst from Aunt Helen Holmes.

"What a joke it all is," she chuckled crazily to herself. "I ain't goin' to have a shred of reputation left when I get out o' this house of iniquity. My sainted husband—him as has been gone these twenty years—he always used to say to me, Helen, have 'em get my tomb ready for me before I die so's I'll kinda know where I'm goin.'

"An' right here in this house they're doin' just that but they're too late. They's a corpse right here at my feet an' the grave ain't ready for him."

Once more she screamed with laughter.

"A corpse right here on the floor at the edge o' the rug an' no place to put him. That certainly is a joke on him."

"What are you talking about Mrs. Holmes?" demanded Mary Williams.

"Is it you that's askin' me, Miss Williams?" answered Aunt Helen. "Well then mind your own business. I got enough trouble with dead men and such without worryin' about hussies like you."

"What's the row?" inquired one of the ominous whisperers at the fireplace. "Has the old girl gone crazy?"

"Sounds like it," replied another. "I didn't bring any stiffs in here."

The conversation was suddenly broken off by a sudden cry:

"Hari Singh! Hari Singh! Open the door."

"That's Ardwyn," gasped the first unknown. "I thought you had attended to him."

"I guess I was too gentle with him," said his companion. "There may be trouble now."

"Hari Singh! Hari Singh!" called Ardwyn.

"You yell again and you'll get your throat cut," one of the intruders warned him. There was a sound of moving feet.

"THE front door is covered," Mary Williams announced.

"Where is that cat?" A man snarled angrily.

"I don't know. If I could find her I'd wring her neck. She seems to be floating in the air."

"Don't bother to look," the girl advised. "Just remember what I told you. The front door is covered. . . ." Then came silence, a brief, palpitant silence that was broken suddenly by another call from Mary Williams:

"Watch the hall door. They're at the hall door. They have a key . . . I heard it. . . ."

Almost as she spoke a streak of light appeared in the gloom at the side of the room.

"That's it . . . They're opening the door. Stop them . . . Stop them . . . Don't let them get away!"

And as if in answer to her call came a muffled curse.

"We got to jump for it. That damned Indian is out there. He's got a shot gun."

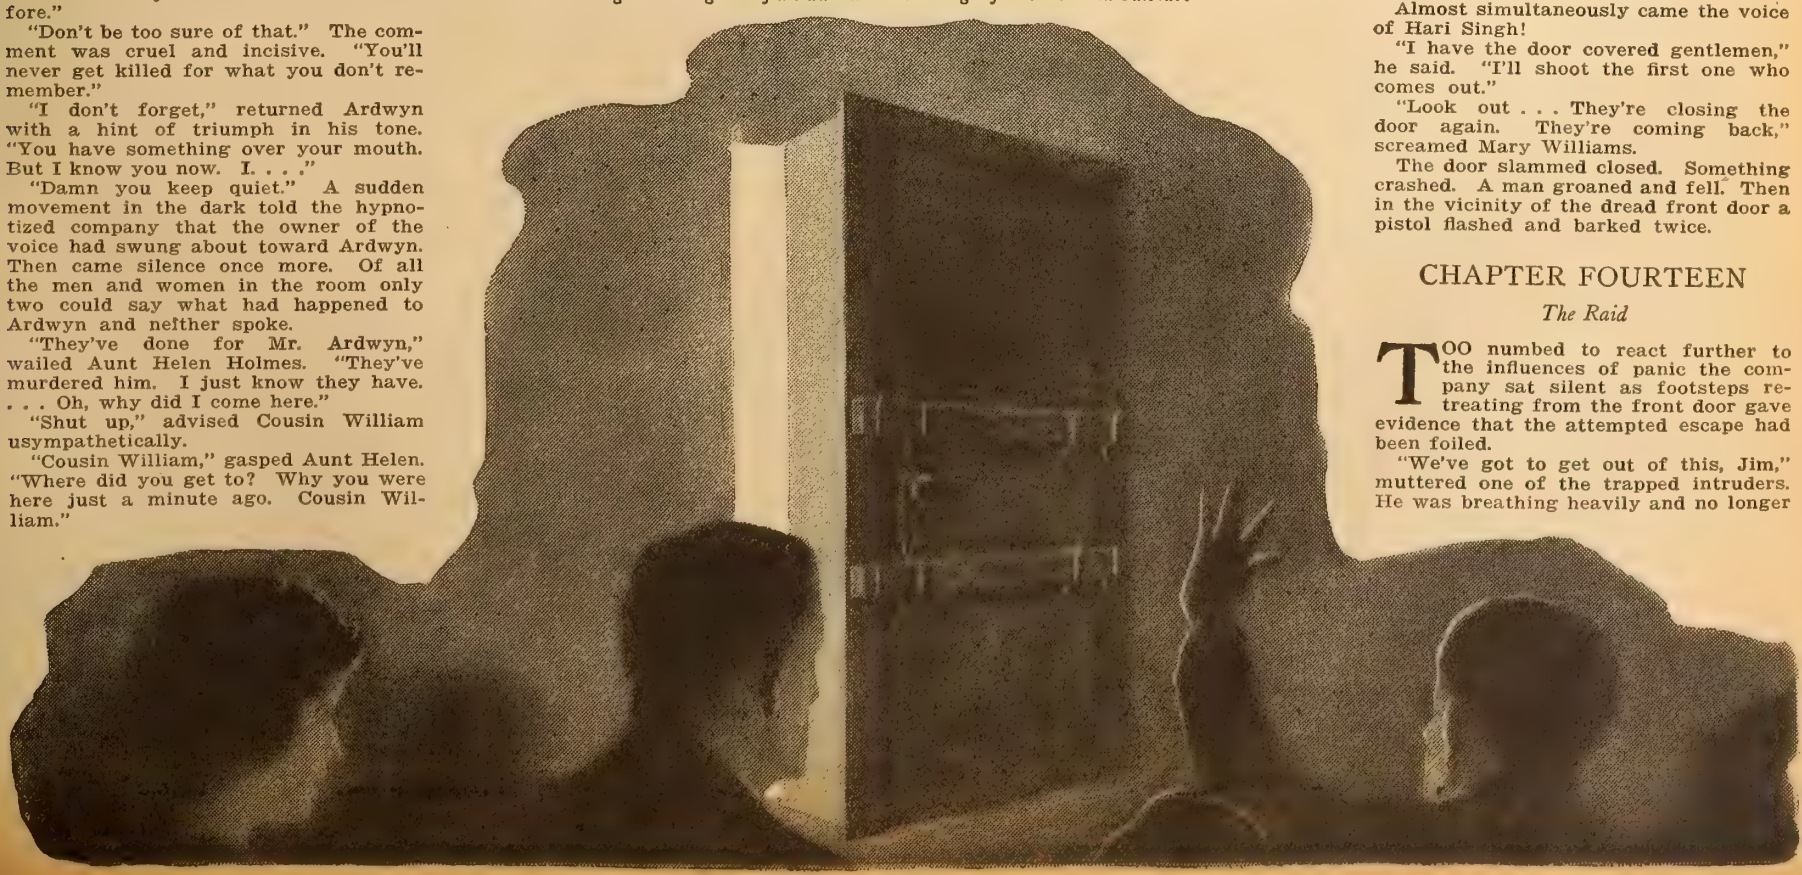
Almost simultaneously came the voice of Hari Singh!

"I have the door covered gentlemen," he said. "I'll shoot the first one who comes out."

"Look out . . . They're closing the door again. They're coming back," screamed Mary Williams.

The door slammed closed. Something crashed. A man groaned and fell. Then in the vicinity of the dread front door a pistol flashed and barked twice.

A dozen strained cries from all parts of the room answered him as the barred front door miraculously separated itself from the wall and stood poised momentarily in a diminishing silhouette against the glare of an automobile headlight from the road outside.



CHAPTER FOURTEEN

The Raid

TOO numbed to react further to the influences of panic the company sat silent as footsteps retreating from the front door gave evidence that the attempted escape had been foiled.

"We've got to get out of this, Jim," muttered one of the trapped intruders. He was breathing heavily and no longer

as confident as he had been when a few minutes before he had threatened Frederick Ardwyn.

"I'll follow you, Doggy," agreed the strained voice of the other. "I'll do what you say but we gotta do something quick."

"Gus," roared "Jim" in a louder tone. "Gus, where are you?"

Aunt Helen's hysterical laughter was his only answer.

"Gone!" breathed "Doggy" in horror. "He's gone. That cat did for him. Jim, we gotta crash the front door."

"I overheard you, gentlemen," Mary Williams interrupted calmly. "You won't get out through the front door."

"Where is that woman?" queried "Jim" in exasperation. "Get rid of her and we can bust out."

"I'll tell the world I don't know where she is," answered "Doggy."

"You were right at the door when she spoke."

"Yes, an' I was right after her. But she ain't where her voice is."

A taunting laugh echoed about them.

"There she is again. . . . Grab her."

"Grab her yourself. Look on the floor. . . . Damn! What's this?"

"It's a stiff," Neither spoke for some seconds which the clock ticked off with sonorous unconcern.

"The woman?" queried "Jim" at length.

"Nope," replied "Doggy" presently. It's a man an' dead as a doornail." It was apparent as he spoke that "Doggy" was growing angry.

"Why do we have to be the goats for this thing?" he demanded indignantly. "Why do we have to be dished up with these maniacs? Where is Gus? Where is Joe? Gone! And we're here holding the sack while that she-devil is waiting to knock us off if we attempt to get out."

"And the Indian!" retorted "Jim." "What a fine mess he turned out to be. If I can get out of here only two minutes I'll kill him."

Once more came Mary Williams' laugh and once more the scurrying of feet as they attempted to find her. In the midst of their frantic search there came another sound, insistent as always and unidentifiable.

"What's that?" queried "Jim."

"That's the sound they been raving about all night," replied "Doggy." "It's a step on the stairs."

"But what is it?" pursued "Jim." "How could it be a step on the stairs? You know there ain't any stairs in that end of the house."

"I know that. But I know my own ears. That's somebody walking on stairs and he's walking where there aren't any stairs." His voice had sunk to a whisper.

"And I move we drop the stuff and take our chances on the door."

"She'll shoot!"

"Listen, something's going on outside the house. We've got to chance it, I tell you."

"She'll shoot!"

"Just once. When she shoots we can see where she is and I'll be glad to attend to her."

"All r i g h t, we'll rush it. . . . We'll . . ." He paused as if in sudden pain.

"NO CHANCE!" muttered "Doggy" bitterly. "Look. . . . The d o o r is opening now. There's a crack of light underneath it. An automobile light. . . ."

"The side door," gasped "Jim."

"The Indian has a shotgun and no morals," "Doggy" reminded him.

"Who's this?"

A dozen strained cries from all quarters of the room answered him as the barred front door miraculously separated itself from the wall and stood poised momentarily in a diminishing silhouette against the glare of an automobile headlight from the road outside.

"Put down the gun, Jim," came the cool voice of "Doggy." "No use making a case for them. . . . We'll surrender and say it with lawyers.

"Step right in, coppers, and make yourselves at home. Welcome to our little madhouse."

"All of you line up against that back wall in the light where we can see you," came a gruff voice from beyond the doorway. "You are all under arrest. Lively now. . . . All of you. . . . Line up against the back wall and put up your hands."

Scurrying figures, flashes of white in the blinding glare of the lamps, hastened to comply with the command. A large man who hugged the edge of the doorway with precautionary zeal edged his way into the room and lost himself in the shadows adjoining the cone of light.

"Please make it snappy, captain; we've been up all night," urged "Doggy" cheerily as he marched with hands over head to the center of the spotlight.

"Who is that noisy one, lieutenant?" the big man inquired. "Is he one of your mob?"

"Sure, that's 'Doggy' French," laughed a guard at the door. "I thought everybody connected with the racket knew 'Doggy' French."

And then out of nowhere echoed the startled voice of Mary Williams:

"'Doggy' French! Why that's not his name! That's Henry Graves."

What were the strangers digging for and why are they at the seance? Who was shot as they started to bolt for the door? Why did the leader of the raid call Henry Graves "Doggy" French? The twisted strands of Mr. Casey's thrilling mystery story will be untangled much by next issue's installment.

$500 in Gold

FOR THE SOLUTION OF

"a Step On the Stairs"

REPRINTS NOW AVAILABLE

SO MANY people are attempting to win part of the $500 in Gold prizes which are being offered for solutions to "A Step On the Stairs," a reprint of the first four installments has been printed and may be had for the nominal charge of twenty-five cents, in coin or stamps, to cover the cost of handling. Address your order to the Mystery Story Editor, care of Radio Digest.

The chosen stations, which are broadcasting "A Step On the Stairs," in Radio play form, are given on page eleven. The days and the hours are listed.

THE PRIZES

The prizes are seventeen in number. First prize is $250; second prize is $100; third to seventeenth prizes inclusive, are $10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story will be published consecutively each week. The first appeared in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unraveling the mystery accurately, will win. The method of preparing the solution—its neatness, legibility, etc.—shall be considered.

RULES OF CONTEST

1. Solutions must be received not later than midnight of Saturday, May 1. The ninth installment of the story will appear in the April 24 issue. The author's intended and final chapter will appear in the May 15 issue, together with the announcement of the winners' names.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon one side of paper.

4. The decision of the judges, to be named later, will be final.

Radio Club Notes

The Broadcast Listeners association of Indianapolis, one of the largest and livest organizations of its kind in the country, recently secured as a speaker, Prof. A. M. Wilson, dean of the engineering department at the University of Cincinnati. This meeting was open to the public and invitations were extended by mail and through the press of the state to Radio manufacturers, jobbers and dealers since Prof. Wilson is nationally recognized as an authority on scientific research in the prevention of Radio interferences. He had a prominent part in the now famous report on this subject compiled and published by the National Electric Light association and his subject before the Broadcast Listeners club was "Radio Interference and How To Locate It and Prevent It Through Cooperation Between Listeners and Public Utilities."

* *

Copies of the report referred to should be obtained by every Radio club and can be had by sending 60 cents with a request to the National Electric Light association, 29 West 39th street, New York city, for the "Radio Interference" report.

* *

Eastern clubs are beginning to be heard from; such is the "power of the press." At Zanesville, Ohio, a Radio club has been formed that is most active and its president is H. E. Buker; its vice-president is C. W. Fowler, and its secretary is Owen A. Davis. The city council of Zanesville recently passed an ordinance prohibiting the use of vibratory type battery chargers between 6 p. m. and 5 a. m.

* *

The Manitoba Telephone system station at Winnipeg has commenced a systematic study of receiving conditions throughout the province of Manitoba. Observers in the employ of the company have been appointed at strategic points in the province and they report daily on receiving conditions from all points of the compass, noting interference, if any. The reports are telephoned in each morning to CKY, where a summary is made and broadcast at noon. CKY is the first station in Canada to undertake work of this kind on such a large scale. More power to them.

* *

If you like this column and gain anything from it thank Mr. E. J. Campbell, president of the Topeka (Kansas) Radio club as it was his letter urging it that brought a slowly crystallizing idea to a head. The Topeka club meets every Tuesday evening at the Chamber of Commerce and C. A. Rowe is vice-president, while R. L. McFerren is secretary.

"MAYBE I WANT IT," SAYS SEN. WATSON

SENATE RADIO POWER NOT SURE ABOUT I. C. C.

Although Contention Is Sound, Has Not Investigated Whether Change Will Be Made or Not

WASHINGTON, D. C.—"There is very generally a feeling that the interstate commerce commission should have control of Radio," says Senator Watson, of Indiana, chairman of the committee on interstate and foreign commerce, before which Radio legislation is pending, in a communication to the National Broadcast Listeners league.

The express purpose of the communication, it is understood, was to deny that he himself was the one sponsoring such a change. In part in his communication Senator Watson says:

"I have never given out a public statement that I thought that Radio should be under the control of the interestate commerce commission instead of the secretary of commerce.

Was Freely Discussed

"That thing was freely discussed in our committee simply because a number of witnesses that appeared made the suggestion. In fact, Judge Davis, solicitor of the department of commerce, stated that aside from a formally appointed commission, no one man should have this tremendous power in his hands. All of the members agreed to that and the only question with them is as to the proper jurisdiction of the business.

"There is a very general feeling that the interstate commerce commission should have control of Radio. Logically the contention is sound, but as to whether or not congress will see fit to make the change is more than I know, because I have not investigated it at all."

Station Is Teaching Oil Painting Through Radio

Instructor Paints Picture and Tells Listeners of Method

MUSCATINE, Ia.—One never knows what is coming next, and if by chance when tuning in you come across KTNT, here, from 6:45 to 7:45 Central time, you will find that station is teaching oil painting of portraits and all kinds of art pictures by Radio, and have many hundreds of students among their listeners.

The system of oil painting is one that requires no previous experience and no brushes are used, although the pictures are painted in genuine oil paints. The instructor doing a lesson paints the picture the same as the student has before them, and keeps up a chatter as he goes along, making the instructions not only interesting, but fascinating and amusing. KTNT has been featuring their art work for some months past and the first station to teach art by Radio.

KHJ ADOPTS POLICY OF NO ADVERTISING

LATEST ANNOUNCEMENT COMES AS SURPRISE

Los Angeles Times Will Make Annual Appropriation for Maintenance and Program Fund

LOS ANGELES.—KHJ has again done the unexpected. According to announcement made by "Uncle" John Daggett, manager of the Los Angeles Times station, effective April 1, programs put on the air over KHJ's microphone are now free from any kind of advertising, paid or unpaid, thus making the station an open forum for the people of the Southwest on a non-political, non-sectarian basis.

The plan provides for an annual appropriation for the Radio station to be used for the maintenance of the station and staff salaries as well as an additional amount to be used to hire the finest talent obtainable.

Elimination of all remote controls and absolute divorce from any and all advertising and objectionable matter is planned.

Policy Change Is Surprise

The announcement of this change in policy came as a surprise to everyone, particularly so at this time just when critics of the station were beginning to openly predict that KHJ would be forced off the air due to its unrelenting attitude towards the local musicians' union and the alleged unfair methods of the American Society of Composers, Authors and Publishers.

In addition to the much higher type of programs this new policy will bring to the listeners, it is felt by well-informed observers that it will do an even greater work by serving as a balance to other stations and act to keep the amount of advertising on their programs at a minimum.

It was also intimated that KHJ would soon be equipped with a new type high-power transmitter of latest design, capable of faithfuly transmitting the kind of programs that will be given in the future.

Station WSAI Shows Playing Card Display

Greatest Collection in Existence Placed in Reception Room

CINCINNATI.—The greatest collection of playing cards in existence will greet the eyes of visitors to the new studios of Station WSAI, of the United States Playing Card company here, when they enter the reception room.

The collection, which has been displayed at two world's expositions, was acquired some years ago, but never has been on public display before at the Playing Card company. With the great space made available in the new reception room at WSAI, officials decided to use the wall space for the display.

In it will be playing cards smaller than milady's finger tips, and cards used by royal families are included in the collection, which dates back to the year 1440. Card presses, used in the days when playing cards were not made with the care they are as in modern days, will also be shown.

Humorous designs, presidental cards, historical cards, in fact every playing card made since the diversion originated are included in this marvelous collection, and will be displayed with data, so that visitors may easily understand their origin and design.

Station WBAL Copyrights Monthly Musical Scenarios

BALTIMORE.—The musical scenarios being given once a month over WBAL, Baltimore's superpower station, are being copyrighted by this station. These scenarios are different from the majority of Radio features, being musical narratives illustrated by song and instrumental selections.

Broughton Tall, Baltimore author and dramatist, is writing these scenarios especially for WBAL.

DO YOU KNOW WHERE THESE PEOPLE LIVE?

TWO contributors to Radio Digest have checks awaiting them if they may be located. Letters bearing their addresses have been returned. The two men are Allan Murphy, of Paducah, Ky., and Marvin Shreffler, of Kankakee, Ill. Friends knowing their proper addresses will please correspond with the Technical Editor, Radio Digest, 510 N. Dearborn St., Chicago.

KPSN, Pasadena, Calif. (315.6m-950kc), 8-9 p. m., Star-News concert; 9-10, Maryland hotel dance orchestra.

High Lights of the Air

SATURDAY evening may be pleasantly spent by tuning in for WBZ, Springfield, and enjoying the children's verse of Riley as given by Dr. D. M. Staley. Or the listener preferring something more mysterious will at last discover the new method of fortune telling called Numerology. WGBS will prove that there is more to numbers than the ill luck of thirteen or the luck of three and seven.

Moussorgsky's famous song about the devil in a wine cellar, and the "monstrous flea" owned by a legendary king, will be featured on the KGO Little Symphony orchestra program Sunday afternoon, April 11, at 3:30 p. m. Central time. Albert Gillette, dramatic baritone, will be the soloist.

"Northwest Indian Music," is the title of the illustrated talk by Prof. Paul C. Phillips at KUOM, Missoula, Montana, Monday evening. Original melodies of the Indians of this section will be played. Radio is responsible for a revival of interest in the music of these early Americans. "The Life of Everyman," given with a special musical background is the literary event at KUOA, University of Arkansas this same evening.

Chicagoans remembering the aviation tests with Radio last year over WLS will not be as thrilled as will fans in other parts of the United States Tuesday when Lieut. John Macready, transcontinental aviator, broadcasts from an altitude of 5,000 feet. His talk will be sent out over the microphone of WLW. A Kansas City event of importance during the evening, although given on terra firma, is the program by the Southern Melody Makers of WHB.

Ann Pennington, famous as a dancer, will be interviewed at WOR Wednesday by Alice Beal Parsons, noted feminist. Miss Pennington is in New York at the present time making a series of pictures to be known as "Sally Runs Wild." Russian dance music has been poular since the successful tour of Russian players in Chauve Souris. A program of this fascinating music will be the Wednesday feature of KDKA.

One of Samuel Coleridge-Taylor's best known compositions, "The Death of Minnehaha," will be given by the Travelers Choral club at WTIC, Hartford, Thursday evening. The words of this composition were taken from Longfellow's familiar "Hiawatha." The melodies are typical of Coleridge-Taylor, whose power of characterization in music has given him a unique place among modern composers as a tone-poet.

An opera a month is being put on at WBAL, Baltimore. Friday, April 16, the opera to be broadcast is "Il Pagliacci." Among the important singers to take part are Elsa Baklor, John Wilbourn, George M. Castelle, Connor Turner and Paul Nachlas.

WBZ TO FEATURE RILEY'S POETRY

Sunday, April 11

"a Step On the Stairs"

Broadcast as a Play

EPISODE SEVEN—THE SETTING

EPISODE SIX continues in the high-beamed hunt-room, the room that has been the scene of strange and mysterious crimes, of the Turner manse. The guests who had gathered there to hear a message from Peleg Turner, have waited patiently until Tolliver returns from the Radio station to report that murderous deeds have been afoot there, too. Just as he displays a letter he has stolen at the station, Mary Williams seemingly faints, throwing out her hand and upsetting the candle. In the resultant darkness the letter has disappeared. Mary Williams and Ardwyn stay alone in the room to await the return of a stranger. He returns, in the dark, and the guests come in the room just in time to find Ardwyn unconscious with a flesh wound on his head and Miss Williams fainted—holding part of Peleg Turner's funeral clothes. The two are revived, and all but Mary leave the room. Then John Carton reappears to Mary and asks her to believe in him. He narrowly escapes the return of the other people and is assisted in escaping by Hari Singh, who then shortly returns from the outside with the unconscious form of Milford Jones. The seance is resumed with the unbelievable result that Peleg Turner's voice comes over the Radio. He curses the murderer of his brother. He says the murderer is now in the house, but shall pay in full ere dawn. Pandemonium reigns. The beam of a flashlight hits Tolliver. Attempts to locate the owner of the light are in vain. A human chain is formed to count heads. Instead of eleven as there should be, thirteen people are found in the darkened room. Tolliver seeks matches but is engaged in a struggle. An unknown voice threatens to shoot to kill at the first flicker of a match. The seventh episode follows.

THE CAST

Frederick Ardwyn.....Peleg Turner's lawyer
Aunt Helen Holmes.....A relative
Mary Williams.....A youthful guest
Cousin William Caryl.....A relative
"Doggy" French and Jim.....Two uninvited guests
Hari Singh.....Hindu servant of Peleg Turner
Captain Phelps and Lieutenant Cass.....State troopers
